Hongkong, ...Oct. 3
Shanghai, ...Sept. 27
} Received 11th Nov.

BIRTH.

On the 2nd instant, the wife of L. A. TAVARES, of a daughter.

MARRIAGES.

On the 31st December 1874, at St. Joseph's Church, Shanghai, by the Rev. Father Desjacques, MIERS CORYELL to MARIE LEONTINE BENETT.—No cards.

At St. John's Cathedral, Hongkong, on 28th December, by the Rev. R. H. Kidd, Colonial Chaplain, THOMAS WILLIAM DUFF, Esq., of Chinkiang, to HELEN HARRIET SMITHERS, daughter of John Inglis, Esq.

PASSENGERS.

DEPARTED.—Per str. *Costa Rica*, for Nagasaki—Mr. Fukushima and servant, Mr. A. Visscher. For Yokohama—Messrs. O. B. O'Malley and E. J. Frazer. For San Francisco—Mr. Jno. Lawson and Mrs. F. F. Hardy. For New York—Mrs. J. J. Henderson. Per M. M. str. *Anadyr*, for Hongkong—Miss Clark, Messrs. Jno. M. Forbes, Laiprack, and Baldwin. For Marseilles—M. Blarez, L. de V.; Mr. and Mrs. Mackenzie, Master C. H. Maclean, Mr. and Mrs. Maitland, child and servant, Messrs. D. R. Clark, A. F. Wheeler, G. Feliz-Freille, surgeon F.N., John Mesney, and Berthet, A. Nicholas, J. Nahre, P. Le Pain, seamen of the French barque *St. Francois*.

ARRIVED.—Per P. M. str. *Costa Rica*, from Japan—Messrs. R. Schlick and servant, Jno. Thorne, Jno. Middleton and servant, and Bigsby and servant. Steerage—1 European and 15 Chinese. Treasure—$62,250. Per str. *Yangtsze*, from Hongkong—Honble. P. Ryrie, and 47 Chinese. Per str. *Dragon*, from Foochow—Mr. Fraser, and 32 Chinese. Per str. *Yungching*, from Hongkong—60 Chinese. Opium—40 chests. Per str. *Glengyle*, from Hongkong—Mr. Jameson and servant. From Amoy—Mr. Henderson, U. S. Consul, Mrs. Henderson child and servant, R. Fukushima, Japanese Consul, and 16 Chinese. Per str. *Amoy*, om Hongkong—Messrs. Markwald, Leesman, Bruchen, and 23 Chinese.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, JAN. 7, 1875.

THE evidence and finding of the Court of Enquiry, held at Hongkong, to investigate the circumstances attending the loss by fire of the Pacific mail steamer *Japan*, which we publish to-day, clears up much of the obscurity hitherto surrounding that lamentable occurrence. The examinations, which extended over three days, appear to have been pursued with very great care and minuteness; and if the result shows that the catastrophe was one that might have been averted by the exercise of forethought in a particular department, it also places in a favourable light the organisation and discipline on board. Impartial witnesses testify that everything possible was done to save the ship; but there can be little doubt that to the prolonged efforts made in this direction, absorbing as they must have done the whole strength of the crew, was due the somewhat hasty abandonment of the vessel, without full advantage being obtained of the life-saving apparatus, and that serious loss

Dec. 11, 1912.

CARD CATALOGUED

of life, besides mails and treasure was the consequence. The enormous loss of life is, with one or two exceptions, confined to Chinese passengers, and it is conceivable that under the conditions detailed in the evidence, this was to a very great extent, if not altogether, beyond the control of the ship's officers. The fire had cut off communication amidships, and the Chinese forward, helpless and probably demented, too hastily, it would appear from the evidence, jumped overboard, weighted with the money which, in returning to their native country, they usually carry in a waist-belt, instead of buoyed by the life-preservers placed on board for their use. Some few, however, were picked up by the boats, and it is noteworthy that those saved had on life-belts. The fact that the fire broke out forward of amidships was also against the unfortunate Chinese passengers, not only because it cut off communication with the after part of the ship at an early stage of the occurrence, but because, having rushed on deck at the first alarm, they would be afraid to go below to obtain the life-belts which they had neglected at first to secure. The life-rafts would appear to have been got overboard somehow—Captain Warsaw says that at any rate they were not on the ship when he took a final survey of it; but if, as we are informed, it takes about an hour to launch them in an effective condition, it is to be feared they were practically useless in the emergency. The boats aft were in a proper state of readiness, and were launched successfully, and it is satisfactory to note that the Chinese abaft the fire, as well as the Europeans, were all rescued by them. The Purser's evidence explains how it happens that, seeing there was an interval of an hour-and-a-half to an hour-and-three-quarters between the outbreak of the fire and the abandonment of the ship, the mails could not be got out. The mail room was filled with smoke, and the unaided efforts of the purser resulted only in his getting at a few bags, which he was unable to carry to a place of safety. It seems a mistake not to have given more attention to such an important consideration as the saving of mails, but we have to remember that all hands were engrossed by their fire duties until it became too late to save anything but life. Still, had the mail-room been more readily accessible from the deck than it appears to have been, and had the purser received the assistance of one or two men, which he applied for, it would seem that the loss of mails might have been at least partially avoided. Two theories were advanced by those on board as to the origin of the fire. The first, supported by the captain and officers, and borne out by the evidence generally with a clearness which places it beyond all reasonable doubt, is that it broke out in a bunker forward. This bunker contained some 150 tons of coal, mostly shipped at Yokohama in a wet condition, but mixed with some former surplus, and had not been inspected at the time the other bunkers were. The Chief Engineer and his assistants incline to the belief that the fire occurred on the freight deck over the bunker, but though they may feel entitled to hold and express this opinion, the weight of evidence is decidedly against them, and the Court had no option but to find that the fire was spontaneously generated in the bunker referred to. The finding further points out, in the clearest and most impartial manner, whatever defects in organisation the evidence discloses; its suggestions are extremely sensible; and it awards praise and blame with commendable discrimination.

Summary of News.

We have had no mail arrival since last issue. The London mail of 20th Nov. is expected to-morrow, by the M.M. str. *Provence*; that of 27th Nov. left Hongkong to-day in the P. & O. Str. *Gwalior*. The American mail from San Francisco 30th Nov. is also expected to-morrow..

The following Reuter's telegrams have been received during the week.

The survivors of the *Queen of the South* (the burning of which was mentioned in our telegraphic news last week) subsisted on the bodies of their companions.

By an Alphonsist pronunciamento at Madrid, Alphonso, the son of Isabella, is proclaimed King, and recognised by the armies.

A Conference of party leaders has been convened by MacMahon. They are unanimous to discuss the Constitutional laws integrally, but there is divergence concerning the transmission of powers.

Alphonso is everywhere peaceably recognised.

The movement has been effected without bloodshed.

The supposed Nana has been declared to be an impostor.

It is reported that there are hostile relations between Afghanistan and Persia.

Obituary—Ledru Rollin; The Duke of Montrose.

The index to Vol. XXX. of the *N.-C. Herald* and *S. C. & C. Gazette* (June-December, 1874) is circulated with to-day's issue.

It is satisfactory to know that the P. M. S. S. *China*, concerning the safety of which some rather disconcerting rumours were prevalent during last week, has arrived safely at Yokohama on the 30th ult. It will thus be seen that the *China* was a week overdue between San Francisco and Yokohama, a period sufficiently long in these times of successive disasters at sea to excite some degree of apprehension, although a considerable detention in crossing the Pacific at this season is by no means unusual.

We have to acknowledge the volume of Reports on Trade at the Treaty Ports for 1873, published by the I. M. Customs Statistical Department. We have also received the *Chinese Recorder* for November-December.

Contemporary with the issue of the Reports on Trade, we have also to notice the publication by the Customs of the Returns of Trade at the Treaty Ports, for the year 1873, giving statistics of the trade at each port. We hope soon to be able to review both volumes.

A Notice to Mariners by the Engineer-in-chief to the Customs intimates that the new first-order light on the N. E. Shantung Promontory is now in operation. It is elevated 200 feet above the level of the sea, and in clear weather the white light should be visible at a distance of 21 nautical miles.

Professor Young, of the American Transit of Venus party to Peking, delivered a lecture on the Spectroscope and its contributions to Astronomical Science, in the Masonic Hall on Tuesday night, which was fairly attended. It would have been better, however, had the front room, which was used on the occasion of the previous lecture of the Course, been employed again, the acoustic properties of the large hall being unfavourable to public speaking. Professor Young gave an exhaustive and able exposition of his subject in simple but clear and forcible style, and illustrated it happily both in a verbal manner and by diagrams drawn on the blackboard. At the close, a hearty vote of thanks was awarded the lecturer, on the motion of Dr. Macgowan, seconded by Mr. Forbes.

The Shanghai Temperance Society have received two valuable presents during the past week. The first is a handsome billiard table, from Captain Harmon, of the steamer *Hupeh*; the second, a cheque for Tls. 100, from W. Mesney, Esq., of the Chinese Military service, stationed at Chên-too-foo, but at present residing at Hankow.

We hear that the suggestions contained in the circular addressed by London Shareholders to the Hongkong and Shanghai Bank Directors, which we published last week, have either been anticipated or are already put into practical shape. Mr. David Maclean is to return to China as Inspector, while Mr. T. Jackson, formerly Manager at Yokohama, will take charge in London. Mr. Rowett, lately a member of the Board at Hongkong, will it is reported advise with Mr. Jackson on the home side.

The Chinese Imperial Loan which we announced as forthcoming a few weeks since, has been advertised by the Hongkong & Shanghai Bank. It is for £627,615 altogether, but the first issue is to be for £539,748; security, certain portions of the Imperial Foreign Maritime Customs Revenue, which have been assigned to the Bank in trust for the bondholders.

Interest, 8 per cent per annum ; 3/20ths of principal repayable, in Foochow, on 19th June, 1876 ; and 1/20th every 6 months till 1884. The issue price is 95 % at exchange 4s. 1¼d. per dollar, or 5s. 7d. per tael—$462.94 or Tls. 340.30 per £100 bond.

The annual meeting of the Shanghai Chamber of Commerce was held on Tuesday, R. I. Fearon Esq., Chairman, when the Report and Accounts were passed. The former was published by us last week. The new Committee appointed are Messrs. W. Keswick, E. Cunningham, C. J. King, A. Hennequin, F. Nissen, M. Gubbay, F. H. Bell, J. A. Taylor, E. H. Lavers, and J. G. Purdon. The questions discussed were the compilation of Stocks of Imports ; a proposal for the establishment of a Pilotage Board ; Reuter's Telegrams, and Transit Dues. A full report will be found elsewhere.

Expression has been given in the Shanghai Press to a strong feeling of indignation, and we may add disgust, which has been excited in the community by the appearance of an offensive paragraph in the *London and China Express* of 13th November respecting the death of a popular and much-regretted member of H. B. M. Consular Service in China.

We have pleasure in placing before our readers the text of the despatch by G. F. Seward, Esq., U.S. Consul-General, which was referred to in our notice last week of the Annual Report on the Commercial Relations between the United States and Foreign Nations, for 1873. It is a thoughtful and suggestive review of the position of our relations with China, present and to some extent prospective, and as such it will be read with much interest.

Dividends have been notified for the half-year ending 31st ult. by the following Companies :— Yangtsze Insurance Association, 7½ per cent.; Shanghai Steam Navigation Co., 3 per cent. ; Shanghai Gas Company, 5 per cent.

The hearing of the case of the French brig *St. Francois* against the steamer *Cawdor Castle*, was brought to a close yesterday afternoon, before R. A. Mowat, Esq., sitting as Registrar, and Messrs. A. J. Little and M. Coryell, as Merchant Assessors. The owners of the brig were represented by Mr. Robinson, and those of the steamer by Mr. Wainewright. The forenoon was taken up by the hearing of evidence as to the ship's capacity, measurement of cargo, and other minor details ; and the afternoon with speeches of counsel, who severally referred to and commented upon the evidence given and points raised in favour of and against the numerous items of which the plaintiff's claim for damages was made up. The Court and Assessors took time to consider their award.

At the Supreme Court on Tuesday, before Sir Edmund Hornby, Chief Judge, James Malone, late Captain of the schooner *Alexandra*, sued Mr. Joseph Walton, the owner, for $264, balance of wages due, and $550 as per account stated, for disbursements, &c., and the cost of a passage from this port to Australia. Mr. Hannen appeared for the plaintiff, and Mr. Wainewright conducted the defendant's case. Mr. Hannen, in placing the case before his Lordship, said the main facts to go upon were that the plaintiff was engaged by the defendant at Adelaide in May last year, and was subsequently made Captain of the vessel at a salary of £15 per month. The ship was to go to Freemantle and Singapore, and back to the Colonies. The plaintiff was engaged for six months, and according to the terms of the articles to be discharged in the Australian Colonies. If he were discharged in a foreign port, then a passage was to be provided for him back to Australia. This was endorsed upon the articles. The other claim was for expenses incurred on shore, and for money paid by plaintiff on defendant's behalf. Plaintiff had been discharged at Shanghai after having fulfilled the terms of his agreement, but the defendant had refused to pay or provide him with a passage or refund the amounts he had disbursed. The case for the defence was that plaintiff was engaged by the defendant in the first instance as superintendent of riggers, while the vessel was on the slip at Adelaide, on the 23rd May, 1874, at the rate of £14 per month (captain's pay.) On the 15th of June plaintiff's name was placed upon the register as captain at £15 per month. The ship went from Freemantle to Singapore, and on to Shanghai. Defendant always transacted all shore business, except entering and clearing the ship, shipping men, &c. Defendant, in giving evidence, also swore that his agents in Adelaide, Elder Smith & Co., had told him that an agreement had been signed by them in conjunction with Capt. Malone, but that the latter had since told him he had torn it up ; and again, that he (the defendant) had never seen the articles or the clause in writing providing for plaintiff's passage home. He discharged the captain for personal reasons and because he did not suit him, but not until after he had served his term of agreement, viz., six months. He had agreed that if the plaintiff was discharged *within* the six months from the date of signing articles, he would give him one month's pay and £10 towards his passage money. After some conversation respecting the items of the account rendered by the plaintiff, both Counsel addressed the Court on behalf of their respective clients, at the conclusion of which his Lordship reserved judgment.

The sum of $175 has been collected by the exertions of Captains Peters and Thomson, of the British ships *Inverness* and *Omba*, from some of the vessels in harbour, on behalf of the crew of the *Horatio*, who lost their property in the fire which destroyed that ship. Yesterday, at the U. S. Consulate, Mr. O. B. Bradford distributed the money in suitable proportions.

A seaman of the U.S. corvette *Kearsage* was drowned early on Tuesday morning under peculiar circumstances. The man was seen by a policeman on duty on the Bund coming from the direction of the French Settlement in a jinricksha. He got out when opposite Messrs. Russell & Co.'s, and walked along the jetty to the pontoon, followed by the jinricksha man. From words he overheard, the constable walked along the jetty towards them, and suddenly hearing a plunge in the water, he hastened forward and saw the seaman clinging to a cargoboat, the force of the current quickly dragging him under. The constable sprang on to the cargoboat, and tried to reach the poor-fellow, but could not, for he soon disappeared, and was of course drowned. The constable got into a sampan and made a thorough search at the spot, but found only the unfortunate man's cap, which bore the badge of the *Kearsage*. Yesterday, at the U. S. Consulate, before O. B. Bradford, Esq., a deposition was made by the police constable, who in addition to the factsmentioned above, said he saw no indication of drunkenness on the part of the deceased, and that the jinriksha coolie was not near him when he fell into the river.

A case of successful highway robbery has been reported at both the English and French police stations. It appears that a French gentleman while proceeding homewards along the French Bund from a party, at about 1.30 on Sunday morning last, was violently assaulted by a Chinaman, who struck him a severe blow across the face with a bamboo, knocking him down. While he was on the ground, the thief robbed him of his watch, chain, and trinkets, valued at $42. The number of the watch is 30,907, and this may possibly lead to identification and recovery. The unfortunate gentleman also had his hand much hurt in endeavouring to defend himself.

It appears from our PEKING correspondent's Notes, that although the illness of the Emperor from small-pox caused considerable uneasiness, the Imperial patient was already convalescent when the latest advices were despatched. Another correspondent, noticing a rumour that the illness was of the most serious character, says the attack was very slight, only twenty-six vesicles appearing. There was a report that his Majesty would by and bye proceed to one of the temples to offer sacrifice, when he would be visible to all. Whether this had reference to some special thanksgiving service on his recovery, or to the Winter Solstice ceremonial, which Prince Tun has been deputed to perform, we are unable to say. It seems not unlikely, however, that after the three months during which his Majesty is to remain in seclusion, he should make a public appearance, for the former purpose and the satisfaction of his subjects. Later news from the capital, received yesterday, informs us that the Emperor continues to progress toward recovery. A great festival was to be held on the 23rd ult., in honour of the Goddess of Smallpox, when a quantity of paper offerings were to be burnt in front of the Palace.

It is reported that Li Tsung-shi, Viceroy of the Liang Kiang, has applied for leave to retire, owing to bad health. In the event of his request being granted, it is thought not improbable that he will be succeeded by Tseng Kin-tsuen a younger brother of the late Tseng Kuo-fan. There seems to be a fatality connected with the post of Viceroy at NANKING ; no one appears able to hold it long without being either murdered, dying, or falling sick.

OUTPORT, COAST and JAPAN news will be found elsewhere.

Editorial Selections.

THE CHAMBER OF COMMERCE REPORT.

It is significant of the continual backwardness of the Chinese Government, that year after year the annual report of the Shanghai Chamber of Commerce should be of so similar a nature. A little variation takes place this year, from the Chamber of Commerce at Hankow having pointed out as flagrant a breach of the treaties with regard to transit passes as has been noticed for some time. It is almost wearisome to have to go over old ground again and again, and to reiterate year after year the same old arguments, yet this is exactly the position in which the Chamber finds itself at the termination of the year 1874. It is now some four years since it was supposed that all difficulty with regard to import certificates had been removed, by mutual consent. At all events, practically, no obstacles were placed in the way of transit certificates being taken out by anyone on imported foreign goods, the only questions asked being such as were necessary to prove the identity of the goods. The claim was founded on the express stipulation in the Treaty of Nanking, confirmed by that of Tientsin, that goods of British import having paid import duties, and a further sum in commutation of transit exactions, would, whether in native or foreign hands, be held exempt from further impost. At the time, we commented on the curious point that, although the plain meaning of the treaty had at last been accepted, and that notifications had been issued, taking away all disabilities attaching to natives applying for transit passes, no notice had been given of the fact by the Foreign Ministers at Peking.* Whether it was beneath ministerial dignity to take notice of a matter which affected most intimately the entire of our import trade, or whether Ministers knew nothing of what was going on around them, we had no means of discovering. The negligence, or ignorance, of those charged with foreign mercantile interests has, however, as might have been anticipated, borne fruit. The once exploded attempt to recognise distinctions of ownership is again brought up; and a British Consul at Hankow, apparently unconsirous of all that has been previously accomplished with regard to the very same question, does not find himself in a position to prevent a serious breach of treaty rights being perpetrated in his own jurisdiction. Were we in a country in which official ignorance was less common than in China, we should have a difficulty in comprehending this curious position of affairs; but when we discover that our ex-minister has never even read an Order in Council which ruled in China for some years after he had occupied an official position there, we cannot be surprised at similar errors on the part of subordinate officers. With regard to the Woosung Bar, it is instructive to compare the course of action on the part of the Chinese Government with the proceedings of that at Yeddo. Foreign merchants at Yokohama have never had to urge the same complaints with regard to harbour accommodation, as we in Shanghai have had to do from year to year, and as yet without a sign of having made any impression. It was only a few weeks ago that we had to notice the remarkable fact that, notwithstanding that the improvement of Yokohama harbour has never had to be made an international question, the Japanese Government is of its own motion coming forward with a scheme to perfect the harbour arrangements at an estimated cost of nearly two million dollars. That Government is fully alive to the fact that in improving and extending mercantile facilities, it is in reality strengthening its own position. Such an example should not be lost sight of in the present juncture. Why, if it cannot see its way to strengthening its own position, should Japan desire to carry out such works? And why should the Chinese Government, with all its desire to thwart every scheme having for its object the advantage of trade, be continually losing ground, not only in the estimation of foreigners, but in its relations with its own subjects? A similar instance of objectless obstruction, where no possible advantage can be supposed to accrue, is exhibited in the refusal to amend the tariff for certain goods differing slightly in size from those ordinarily imported into the Shanghai market. Why, if it were not for the love of obstruction for its own sake, should any opposition be made to a request to alter the import rate on pieces bearing but a fractional proportion to those on which the tariff rate has been already fixed? If Figured Lustres 29 yards long and 31 inches wide are required in the market, why could not even a Chinese official be made to see that reason itself called for a proportionate rate of duty as compared with precisely similar goods 40 yards long and 36 inches wide? These matters, trivial in themselves, are but indications of the perverse policy which at present rules everything in China, from the highest to the least important. That the Chamber does not embody a longer string of complaints in its reports than it has done, arises not from any feeling that these are the only matters needing amelioration, but from the knowledge that till some desire to get rid of aimless obstructiveness is exhibited at head-quarters, the more numerous its complaints the less likely are they to meet with attention.

* See *N.-C. Herald* June 16th and 23rd, and again Oct. 18th and Nov. 1st, 1871.

SUPERNATURAL FAVOUR TOWARDS CHINA.

China is a very wonderful country, if we are to believe the Peking Gazettes. In fact it enjoys, on the same authority, quite a monopoly of celestial powers. The only wonder is that, enjoying this wonderful monopoly, it yet continues to get so persistently stuck in the mud. Not only are the supernatural powers continually lending their aid to get the empire out of its messes, but the question of the manner in which they shall be rewarded is a matter of State policy. The Emperor is, we are aware, all powerful on earth, and not only able to command such feeble States as England, France, or the United States, but he has lately shown his prowess in utterly demolishing the Mikado of Japan. His prowess does not, however, end there. The Peking Gazette assures us, and the Peking Gazette never errs, that the all-powerful spirits of the unseen world equally wait on his behests. Does he desire the grain junks to come safely to Tientsin, he has only to bribe the *Tienhow* by the offer of an extra title or two, and the mighty Queen of Heaven at once sets herself to the task of preserving the junks, and with them one of China's worst curses—the grain tribute. Does the Peiho overflow its banks, the Emperor can stop it by canonising two wretched little snakes; or, as we learn from the Gazette of the 7th December, does the Yellow River threaten to inundate the country, the Mandarins have only to carry out the image of the defunct Li Yü-mei, and to promise to ask His Majesty to confer a reward on his spirit, when suddenly the thing is done, and the water goes down. The proofs of this power of the Emperor are so numerous and so specific, that we can only wonder that the spiritualists of Shanghai have not applied to the Throne to get rid of a certain very officious and very vulgar-minded ghost said to haunt their *séances*. Indeed, we may go further, and express our astonishment, seeing that the spirits who influence these matters are so very easily cajoled into giving their assistance, that the Emperor should not arrange such a liberal system of rewards that the Empire might be governed, the taxes raised, and content and good order established, by some such ready system. People in Kiangsu are notoriously displeased that their trade should be impeded by the present exorbitant rate of taxation. Suppose the Emperor was to confer additional honours on T'ai-peh, call him an Imperial Highness, or something of the sort, and give the poor old spirit the smoke of some yellow rags to clothe himself withal, would it not be signally certain that the promised reward would be as effective as in the case of the Governor of Shantung and the spirit of Li Yü-mei? Surely we are entitled to reason these things out to their legitimate conclusions. Why should not T'ai-peh (we only adduce his name for an example, as having borne a respectable character, and as having founded the state of Woo,—say Kiangnan) be as easily caught

with soft sawder as Li Yü-mei? If it be an honour to the spirit of the latter to get a place beside the Four Golden Dragons in order to ease the irritation of his spirit nature, why should not the same influences affect the spiritual essence of the other? If spirits can bring their shoulders to the task and strengthen an embankment, while Mandarins stand by and admire in place of hurrying on the work, why should they not equally well save the latter the trouble of ruling their people or administering justice? There are spirits of vastly superior character to any Mandarins going nowadays, who are doubtless only waiting for a nod of the imperial head to set the empire on its legs.

AN EXPLANATION.

At the Chamber of Commerce meeting on Tuesday, the Chairman, R. I. Fearon, Esq., in expressing the satisfaction of members with the action of H. B. M. Minister in the settlement of the Formosan difficulty, took occasion to notice an article in one of the local papers which he thought was calculated to give a wrong impression of the general state of feeling among the mercantile community regarding that affair. We are probably right in assuming that we were the journal he referred to, and it is fitting that we should offer some explanation of the circumstances under which we were led to put forward what we are not sorry to find was the view of a minority. When the terms of the convention were made known, we hastened to give public expression to the approval with which we believed the settlement would be universally received, and more especially to congratulate Mr. Wade on having accomplished a difficult task in a manner apparently so satisfactory to both countries. "Mr. Wade," we wrote, "as representing Great Britain, could have had no interest in setting the two countries by the ears, and every reason, in the interests of legitimate trade, to reconcile them if possible." But the subject was one regarding which there was much divergence of opinion at the time, and we felt constrained to give a place to the consideration of it from a different point of view. "A great many," we said, "seemed to think that more benefit was likely to redound to foreigners and foreign commerce generally, out of a prolongation of the misunderstanding, than out of its summary removal; an impression which is to be attributed, not at all to any sanguinary desire to see two nations engaged in mortal combat, but, we verily believe, to a painful sense which pervades the minds of all classes of foreigners in China that we foreigners stand politically in a false position, and that any change, no matter at what cost, would be an enviable one." And our article generally was the expression of what we understood to be a prevalent sentiment, that some new and positive advantage to foreign interests should follow from the essential service which Mr. Wade had been able to render to China. At the same time we were careful to remark: "Nothing has as yet transpired to prove that Mr. Wade has not fully availed himself of the favourable opportunity afforded him, to secure some positive advantage to his country and its trade." And we concluded: "But should it not have occurred to him to have used the occasion to good purpose, it is much to be feared that the existing discontent with the state of our relations will be seriously intensified, and that China will only too soon forget the lasting service which has been rendered her in her time of need." On a subsequent occasion, without losing sight of the considerations of ultimate advantage to foreigners advanced in the article we have quoted from, we re-affirmed distinctly our first view, that Mr. Wade had done well to procure a settlement of the dispute. We hope, therefore, we may claim to have endeavoured solely to present in an impartial manner the various aspects under which the settlement appeared to us to be regarded by our fellow-residents; and if the divergent opinions which certainly did exist have become consolidated into one of "unqualified satisfaction," we can only say that it now gives us much pleasure to record the fact on the excellent authority of the popular and courteous Chairman of the Chamber of Commerce.

Outports.

PEKING.

Considerable uneasiness has been felt throughout Peking during the past week, owing to the news that his Majesty the Emperor has been attacked with small pox. The disease declared itself on the 9th inst., the day of the transit of Venus, and shortly afterwards was reported as having assumed a severe type. The *Peking Gazette* of the 14th inst., contained the first public intimation of his Majesty's illness, in the shape of a decree appointing the Seventh Prince, youngest of his Majesty's three uncles, to offer the winter solstice sacrifices at the Temple of Heaven.

The observations of the Transit on the 9th inst were very successfully made at the French, Russian, and American observatories. Although the morning proved cloudy, and the sun was at intervals obscured, the four important periods of contact were all successfully recorded. The French astronomers succeeded in taking nearly 150 perfect photographs. At the American observatory about 90 were secured. The Minister Chung How was present at the French Legation throughout the observations, in which he appeared to take great interest; and he invited the astronomers a day or two afterwards to visit the old Jesuit observatory, where he acted as cicerone to the interesting scientific relics which form one of the best known "sights" of Peking. A similar compliment was paid to the American astronomers.

Peking, Dec. 16.

CHEFOO.

Father Christmas has come upon us in very genial guise, for the 25th was more like a fine spring day than such as is generally considered appropriate to his advent. As may be supposed, festivity has been the order of the season, and last night was no exception to the rule, when at the house of one of our leading merchants—a gentleman no less famed for his universal hospitality than for the splendour of his entertainments—we passed a most enjoyable evening. The guests were numerous, and the fun was kept up until an *early* hour, every one seeming loth to leave such pleasant quarters.

On the 25th, service was held for the first time in the new chapel, and was conducted by the Rev. Messrs. Greenwood and Scott, clergymen of the Church of England, in presence of the largest congregation we have ever seen in Chefoo. We believe this is the first Christmas service at this port which has been performed by ministers of that Church; and everything that care and choral effect could do to make it complete, was most thoroughly carried out. And here let us remark on the obligations under which the community are placed to the different members of the choir, and more especially to the ladies, who, sparing neither time nor trouble, rendered possible the production of the fine vocal and instrumental music with which we were favoured.

The chapel has been a long time in attaining completion, and that it has done so even now is mainly due to the great generosity of two gentlemen of this community, one of whom made a most munificent donation at the outset, while the other, besides subscribing liberally at first, eventually advanced the funds still wanting for the completion of the building. The edifice, without being possessed of marked architectural grandeur, yet presents an amount of chaste and symmetrical simplicity which justifies us in describing it as a pretty and tasteful structure, doing credit alike to the architect and the community. We are sure we are only echoing the general wish, when we express the hope that ere long there will be sufficient money forthcoming to pay off the debt, and put up the remaining necessary fittings, for the perfect carrying out of the church service.

H.I.G.M.S. *Arcona* is looked for daily from Nagasaki. She has gone there, as you are doubtless aware, for the purpose of comparing and obtaining observations, with a view of fixing the position of Chefoo. It is said that she will make another trip to Japan and back before taking her final departure from our port. The astronomers are still very busy, and we hear they purpose remaining until the middle of February.

There is a great dearth of news at present, and we hear of nothing startling in the business world. There are a number of vessels in the harbour, a rather unusual circumstance at this time of the year. The *Bridgetown*, an English vessel, six months out from England, is daily looked for.

Dec. 26th.

NEWCHWANG.

From Newchwang we have dates via Peking to the 1st Dec., being the first of the overland fortnightly mails for the winter. The China Merchants Co.'s str. *Fusing* had arrived, but the Company take things so leisurely, writes our correspondent, that she did not discharge all her inward cargo, and only took in some 3,000 pieces of beancake. Business was quiet, and winter had well set in. The lowest range of the thermometer (Fahr.) was on 24th Nov., when it marked 8 degrees, but it was expected that it would yet go 18 or 20 degrees lower, giving about 42 degrees of frost. Skating had begun, but the ice was bad and it was hoped would be improved by the fall of snow which had begun before the mail left. Messrs. Bush Brothers report as to business:—

Small parcels of goods continue to be sold, viz.: *Grey Shirtings* 8.4-lb. (Lion Chop) Tls. 1.68. *T-Cloths* 7-lb. Tls. 1.52; 8lb. (Tiger Chop) Tls. 1.60. *English Drills*, (Dragon) Tls. 2.40.

Rates for produce are as follows :—

Cash now, Delivery in the Spring.

Beancake,	Tls.	2.60	per 10ps.
Pea,	,,	1.90	,, 300c.
Oil,	,,	2.90	,, picul

NAGASAKI.

The *Rising Sun* states that after a temperance meeting held by the Rev. Wilton Hack, at Hiroshima recently, a native was so impressed with what he had heard that he went straight home, emptied the contents of his *saki* bottles on the floor, and then proceeded to smash the bottles. This incident caused Mr. Hack to think that a temperance society might be successfully worked among the natives. The idea was soon practically carried out, and a society formed, conducted by Japanese, for the purpose of opposing the drinking customs of the day. There are at present eleven members.—Mr. Hack has preached through a native interpreter successfully, 13 Japanese having professed the Christian religion and been baptized publicly. Negociations are pending for the erection of a church at Hiroshima, capable of holding 1,000 persons.

HIOGO.

The *News* announces that telegraphic communication was established with the town of Ichinoseki in Oshiu (Mutsu) on the 20th ult.—The failure of another great native banking house is reported, that of Shimada, the doors of whose establishments at Yedo and Osaka were closed on the 18th ult.—The sale of another river steamer, the twin-screw *Victoria*, to Japanese, is reported, the sum named being $18,500.—A camp of exercise was established in the vicinity of Miki, a town about 15 miles to the Westward of Hiogo. The troops had some field guns with them, and the manœuvres, which commenced on the 19th ult., occupied a week.—The Kobe Hunt had another good run on the 19th ult., the country selected being just beyond Hiogo.

YOKOHAMA.

The *Mail* states that Yedo was lit with gas for the first time on the night of the 18th ult.—The papers are much exercised in discussing the proposal of the Government to construct large and expensive harbour works at this port. The *Mail* is dubious as to their probable usefulness, and says such works "would facilitate trade somewhat, but will not make it. What we want to see is the expenditure of money on works which will make trade. The Minister of Public Works who will give a good system of macadamized roads to the empire, will deserve the first place in the memory of posterity, and write his name imperishably on the face of the country."—Another shock of earthquake was felt at Tokei, at 2.40 P.M. on the 19th ult —The Formosa fleet arrived at Shinagawa on the night of the 18th ult.—The *Herald* says that the losses of the Japanese during their temporary occupation of Formosa, from fever and dysentery, are stated to be not less than six hundred, and a still larger number are debilitated by disease, and probably will never recover their pristine health. One way or another, not a few fighting men who have hitherto taken a heroic and romantic view of war, may be regarded as entirely cured of their military ardour, and are not likely to prove in that way troublesome to the Government again.—The interesting spectacle of the presentation of colours by his Majesty the Emperor to the regiments of his body-guard was witnesed on the 19th ult.—The residence of Mr. John Henderson, known as the Firs, was destroyed by fire on the 17th ult., and so rapid was the spread of the flames that not a single article of value was saved, the inmates barely escaping with their lives.—On the morning of the 20th ult., the publishing office of the *Herald* had a narrow escape from destruction by fire. An office on the premises, in the occupation of Mr. E. Abbott, bill and bullion broker, took fire, and the flames were not extinguished until the contents had been almost entirely destroyed. The origin of the fire is a mystery, but it is supposed to have been the result of carelessness by somebody smoking, and it had evidently smouldered during the entire night.—Small-pox is so prevalent at Tokei, that the authorities have been bestirring themselves to adopt measures for the prevention of its dissemination, by instituting a rigid system of examination, followed, where necessary, by vaccination. Several cases among Europeans at Yedo have been reported, and it is said that one of them has terminated fatally.—M. Verny, of the Imperial Arsenal at Yokoska, has undertaken the plan and superintendence of the execution of the monument to the memory of those who lost their lives by the wreck of the M.M. Company's steamer *Nil*.—The *Gazette* announces that the Oriental Bank Corporation is prepared to receive at par, from customers, the American trade dollar; and, adds the above paper, "there can be no doubt that the coin is fully equal in value to the Mexican dollar, and has only been kept out of legitimate circulation by a prejudice as unjust as unreasonable."—On the 20th ult., James H. Austin and Murray were drinking with some others in a public house. One of the party noticed an old gun in a corner. Murray took it up, and pointed it close to Austin's head, not knowing it was loaded, when it went off, tearing away almost all the flesh from Austin's left cheek, but without injuring the bone.—The Prefecture of Police of Tokio has addressed the following curious circular to all the *cho* of Japan :—"Any person, in European costume, meeting His Imperial Majesty, will be obliged to salute the Emperor by holding his hat under his left arm, and lowering his right hand to his knees. Those who do not wear a hat will be obliged to lower both hands to the knees whilst bowing before the Emperor."—The *Herald* states that on the morning of the 18th ult., Chevalier von Schaeffer, Austro-Hungarian Minister Resident to Japan, had an audience of H. M. the Mikado, to present his letters of credence. The Minister's suite was composed of Mr. von Roretz, Chevalier von Siebold, and Baron Oesterreicher, Captain of the Austrian corvette *Freidrich*, who, together with Count de Batthiany, were also introduced to the Emperor.—Some time ago a Chinaman employed in a tea-firing godown in Yokohama, in a fit of passion kicked a Japanese employed under him, wounding a vital part, and causing an injury from which the victim died. The aggressor has had the severe sentence passed upon him by the Japanese Court of imprisonment for life.—The first snow of the present winter fell on the night of the 21st ult., but quickly melted as the sun rose.

HONGKONG.

The *Mail* supplies the following details of the floating of the *Alaska*:—The *Alaska* floated last evening (22nd ult.) at 5.10, and shortly after was hauled off to her moorings. She then drew 10 feet forward and 11 feet 8 inches aft. The pontoons were then filled and sunk, and next morning were removed. Since their removal the steamer draws 14 feet forward, and 14 feet 10 inches aft. She will first take in her new shaft, and then go into the dock at Aberdeen. More especially, in view of recent calamities, are we rejoiced to hear, for the sake of the Company, of the success attending the attempt to carry the *Alaska* off the beach, and we are glad to congratulate Captain Roberts upon the ingenuity of his conception of, and the skill with which he has made practicable, the means of taking the huge vessel off a rocky beach into deep water. When the ship was lifted, she was moved some 50 feet astern, and held there until a further rise of the tide, when she was floated broadside out, bodily, and is now lying in about 7 fathoms water.—The *Press* of the 24th ult. says the operations for raising the steamers *Albay* and *Leonor* are being carried on with every prospect of success. One of the steamers is already sufficiently raised to enable the divers to get under her, and it is expected that they will both be up in a few days.

We give elsewhere to-day the evidence together with the finding in the Enquiry into the burning of the steamer *Japan*, which was held on the 24th, 26th and 28th ult. The finding of the Court which sat to enquire into the loss of the steamer *Mongol* has also been published. The master and chief officer being drowned, the Court refrain from expressing any opinion on the subject, but beg leave to offer the evidence for submission to the Board of Trade. As the *China Mail* remarks, however, "it is possible to carry even the maxim of *de mortuis nil nisi bonum* too far. The memory of the deceased should be cleared if no blame attached to them, and censure if merited would not have hurt their bones. The public had a right to look for the expressed opinion of the Court." The public certainly had a right to expect that the Court would express an opinion on evidence before it, with such reservation as to it might seem just, in view of the unhappy circumstance that the captain and chief officer could not appear to give evidence or defend themselves. The inference to be drawn from silence naturally is that the opinion if expressed would have been unfavourable.—Fire broke out in the house of Mr. Algar, Hollywood-road, on the evening of 24th Dec., but was extinguished before serious damage was done.—The sunken steamer *Leonor* has been successfully removed to opposite the City Hall.—An inquest has been held at the Military Hospital, on the body of a private soldier named Thomas Yates, who, with two others, got a quantity of bad liquor in Sailor Town on Christmas Eve, and was found dead in his bed on Christmas morning. The other two had the liquor succesfully pumped out of them.—The *Daily Press* has the following :—A very large tiger has been entrapped in a pit over on the Kowloon side, about twenty miles inland. The Chinese who caught the animal, came over here to invite some Europeans to go and shoot it, to enable them to make medicine out of it. Two Europeans accordingly set out on Monday morning, but one of them broke down five miles off the place, and the other went on. On his arrival at the spot, seeing the tiger was such a fine specimen, he at once struck a bargain and bought it. It will shortly be brought over to Hongkong to be exhibited.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

December 7th.—The acting Governor of Shantung memorializes soliciting an acknowledgment of the divine protection afforded by the presiding spirit of the Yellow River. It was requested last year, by the Governor Ting Pao-chêng, in consequence of the aid supernaturally manifested on divers occasions on behalf of the embankment works at Kün Ch'êng by the Great Prince Li 栗大王 (the canonized spirit of a former Governor-General of the Yellow River, named Li Yü-mei

栗毓美), that an honorific title be Imperially conferred upon this divinity, and that he be included for purposes of worship within the temple of the Four Great Golden Dragon Princes. The latter portion of this request was acceded to, on confirmation by the Board of Ceremonies, but the bestowal of a title of honour was ordered to be held in suspense pending further manifestations of divine response in time of need. The Governor now reports that in the sixth moon of the present year, when officials were employed under his orders in attending to the safety of the embankments, the waters of the river became swollen, and a time of danger presented itself at the confluence of the Tsi Ho. The banks appeared as though shaken, and a day and a night were spent in labours of repair without ensuring safety. It was not until the following day, when [the effigy of] the Four Great Golden Dragons and of the Great Prince Li were brought to the scene of the works, that the current abated its force, and the abutments were securely strengthened. At another moment of danger, on the 3rd of September, when the banks were in imminent peril, the civil and military officials, with the people and militia, threw themselves for a long while on their knees and offered up supplications; the effigy of the god having arrived at the spot, no further sapping away of the embankment took place. Earlier in the year, when the grain-junks from the South were waiting at Pa-li Miao to enter the northern section of the Canal, on prayers being reverently offered up by the acting Governor, the waters suddenly rose to the needful height,—and the Governor proceeded to Chang-ts'iu to prostrate himself in the temple and return thanks. (See *Gazette* of Aug. 4th). Similarly, when the grain-junks were on their way back, after discharging their cargoes, and were stopped at Tung-ch'ang for want of water, the Yellow River rose sufficiently to increase the volume of the Canal, and the squadron sailed on its way southward. These repeated instances of divine interposition are considered sufficient to warrant the bestowal of a title of honour.—Rescript: Let the Board of Ceremonies consider and report.

Dec. 8th.—The Superintendents of the Granaries report the delivery of the total amount of the year's supply of grain, remitted from the provinces, in the storehouses at Peking and T'ung Chow, and apply for appropriate rewards on behalf of the officials concerned in the service. They have already reported the delivery in full of the contingents due this year on account of the regulation supplies from Kiang-su and Chekiang, forwarded by sea, and from Kiang Peh and Shantung, forwarded by canal, as well as the quantities purchased and sent forward from Kiangsu and Chekiang, together with the complementary amounts of grain from Newchwang on account of the years 1872 and 1873. The officers in charge at T'ung Chow have now presented their report to the effect that by the 22nd November there had been carried into the granaries at Peking ration rice and grain to the amount of 1,275,030 *piculs* 5 *tow*, 6.8.8.3. It is further reported that there had been lodged in the T'ung Chow granaries 87,326 *piculs*, 1 *tow*, 6.7.8.6. of white, "king," and "*nomi*" rice; making a total of deliveries, including rice, millet, wheat, and peas, of piculs 1,362,356.7.3.6.6.9. There have further been swept up, under the orders of the superintendents, *piculs* 5.9.4. of rice from the different locks and portages between T'ung Chow and Peking, which have been duly carried into store.—The remainder of the *Gazette* is chiefly occupied with recommendations for promotions and brevets.

Dec. 9th.—(1) The Governor-General of Chihli reports that the Taotai of Tientsin, Ting Show-ch'ang, has been placed in mourning retirement by the death of his father, and dwells upon the necessity for an officer possessed of special capacity to succeed in the ensuing vacancy. The Taotai has two prefectures, embracing eighteen departments and districts, under his rule, and has to attend to duties connected with the grain transport service and the conservancy of the Grand Canal, beside supervision over military affairs and the defence and police of the coast. He is likewise constantly required to act in concert with the Customs' Taotai in matters affecting foreign relations, and it follows, therefore, that the incumbent of the post must be at once skilled in the duties of civil administration, and versed in foreign affairs and military matters. An officer who unites these requirements with general capacity and an upright character, is the Taotai Wu Tsan-ch'êng, whose appointment to officiate in the vacant post is consequently recommended.

(2) The Governor-General of the Two Kiang reports his temporary assumption of the seals of office as Governor of Kiangsu, pending the arrival of Wu Yüan-ping from Hupeh.

Dec. 10th.—(1) A Decree commanding that a district Magistrate, who has been impeached by the Governor of Kiangsi as a defaulter to the extent of Taels 5,000, be stripped of his office, made a prisoner, and proceeded against.

The remainder of this day's *Gazette* is occupied with administrative details.

Dec. 11th.—The Court Circular announces that the Grand Secretary Wên-siang, and the President Shên Kwei-fên (members of the Grand Council, who are on congé from duty), offered enquiries respecting his Majesty's health. (This in consequence of the attack of small-pox with which the Emperor has been visited since the 9th inst.)

The Governor of Yünnan memorializes reporting the result of the trial of certain yamen underlings and police implicated in the case in which a military officer had been fatally injured after a dispute with the Prefect of Tung-ch'wan Fu, who was subsequently assassinated in revenge for this by Yang Ju-tsi, the son of his victim. (See *Gazette* of March 29th). The case occurred as follows. In June, 1870, a denizen of the district of Hwei-tsêh brought a complaint against a native of the district for the abduction of his wife, justice for which was delayed by means of bribery on the part of the accused. The complainant had a connection, Major Yang Yü-lin, who was at Tung-ch'wan Fu awaiting the delivery of certain military supplies, and he moved some of the retainers of this officer to seek redress on his behalf. The retainers attacked the district magistrate's police and gave them a beating; but on complaint being made, they were handed over by Yang Yü-lin and placed in custody. After some further disputes about the affair, the Prefect requested Major Yang to call at his yamên, and asked him to explain his conduct in allowing his retainers to meddle in public concerns. Major Yang stated his case, upon which the Prefect, growing irate, snatched off his official hat and button, throwing them upon the ground, and shouted out: "Tie him up!" A number of his servants hereupon rushed up, with weapons and sticks in their hands, and belaboured Major Yang, whom they felled to the ground. The Prefect at the same time ordered him to be beaten as a criminal and sent to the magistrate's jail, whither his son, on coming forward to remonstrate, was shortly afterwards likewise sent. His house was next broken into by the police, and plundered of its contents by them and by the populace. A number of the police who were guilty of this outrage have been made prisoners, and it is ruled, in the sentence now proposed for the sanction of the Board of Punishments, that they should rank as accessories to the crime of which the principal guilt rested with their master, the Prefect. Of the prisoners in question, the greater number have died in confinement. Three remain, who are sentenced to the penalty of 100 blows and transportation for three years.

December 12th.—(1)—The Governor-General of the Yellow River, K'iao Sung-nien, memorializes urging the abolition of the office he holds. Beginning with the observation that the establishment of offices is decided in general by the requirements of circumstances, and may be modified either by addition or reduction according as special attention may be needed or duties may be taken in conjunction with others, he goes on to point out the changes which have taken place of late years in connection with his own post. The functions it formerly involved were of a highly onerous nature when the Yellow River pursued its ancient course through Honan and Shantung, and when, in addition to the 14 guard stations connected with the Yellow River embankments, there were six other stations appertaining to the Grand Canal, and the continuous stream of junks proceeding northward with grain tribute in its full amount of some millions of piculs, requiring administration and control. A change supervened when the Yellow River burst its banks at T'ung Wa Siang early in the reign of Hien Fêng, whereupon five of the stations in Honan were abolished, and the whole of the river-work service in Shantung was done away with. What remains for the Governor-General of the Yellow River to do lies wholly within the province of Honan, and he is of opinion that greater efficiency would be secured if the functions of his post were concentrated in the hands of the provincial Governor. A change in this sense was recommended so far back as 1862 by a Censor, and in 1863 by Sêng-ko-lin-sin. There is now the greater reason for urging it, inasmuch as in the whole of Shantung there no longer exist any embankment works supported by Government, the river being wholly embanked by the people of the adjacent country. Although there might be reason to look forward to some future resumption of Government works in Shantung, such a period is still distant, and the office may well be done away with in the meantime. The seal, however, need not be destroyed, but may be preserved in the Provincial Treasury until such time as it may be again required, should circumstances change in the course of some tens of years from now.—For rescript referring this memorial for consideration, see *Gazette* of Nov. 30th.

(2)—The Financial Commissioner of Kiangsu (on behalf of the Governor-General) memorializes reporting that he has received the following statement from Tsêng Ki-tsêh, (eldest son of the late Tsêng Kwoh-fan): "Having left my home on the 4th September for the purpose of proceeding to Peking to prostrate myself in gratitude for the Imperial favour (see *Gazette* of Oct. 17th), I had reached the district of Ts'in-ho in Kiangsu on the 9th October, when I received letters from my family informing me that my mother had died on the 3rd of the same month. I am consequently bound to return to my home, it being the mother who bore me, to conduct the funeral arrangements and observe the prescribed period of mourning. I beg that a memorial to this effect be presented on my behalf." The fact is accordingly brought to his Majesty's notice.

(3).—The same official, as acting Superintendent of the Grain Transport, refers to decrees heretofore issued with respect to increased supplies of revenue in kind from the Southern provinces, and to the consequent necessity of attention to the maintenance works on the River and Canal. Since the Yellow River broke its way across the Canal, the passage of the junks both ways is dependent upon the rise of the river water, and if the breaches in the

banks at Shih Chwang Hu 石庄戶 and elsewhere be not repaired, it is to be apprehended that the course of the Yellow River will gradually move southwards. This work is consequently urged on the Imperial attention.

(4) In a further postscript, the same official speaks of the rise of the waters in the autumn freshet season, as reported in a previous memorial (not yet published.) The floods in P'ei-Chow and Suh Chow shew no sign of abating, although the commencement of winter is at hand, and the Hung-tsêh Lake has risen to a height of eight *ch'ih* and upwards. Fortunately, the continuance of fine weather has been favourable to the works of maintenance. The population of Sü-chow Fu and Hai-chow Fu who have been driven from their homes by inundations are moving southwards in search of means of subsistence, and it is proposed to establish relief agencies, as has heretofore been done at T'sing-kiang P'u.

Official Papers.

MR. SEWARD ON THE SITUATION IN CHINA.

Despatch addressed to the Secretary of State, and published in the U. S. Reports on Commercial Relations, for 1873.

Shanghai, Oct. 24, 1873.

I have the honor to transmit to you herewith a copy of the annual report of the Shanghai General Chamber of Commerce, together with two sets of tables, the first of which shows the trade at the open or treaty ports of China, the second the trade at Shanghai. I have arranged these tables in a natural order, indicating upon each one the series to which it belongs, and its subject. They are taken from the reports of the custom-house, as published by the Inspector-General of Maritime Customs, and are very complete and accurate. The report of the Chamber of Commerce is entitled to the credence which should be given to the utterances of the largest and most respectable body of merchants of Eastern Asia.

It has been my purpose to comment, at some length, on the statistical and other information contained in the matter mentioned above, but my time has been so far engaged since my return from America, that I have been unable to carry out this intention.

There is a general point, however, upon which I am disposed to speak, even if I do so in a brief and inadequate manner.

It may be said that the position of foreign traders in China is unsatisfactory. They have but limited privileges as compared with natives, and are therefore at a disadvantage. They seize upon trade, develope it, and in doing so educate the Chinese to its requirements, and these latter then displace them. I have long believed that the Chinese would drive out foreigners from competition in all departments, excepting the importation and exportation of the great staples, and the carrying business. There seems to be no reason why the Chinese merchant, from dependent ports or the interior, should not purchase at Shanghai or Hongkong cotton goods or other merchandise, and sell his teas and silk at these and other marts of exportation. The foreign merchant can only compete with the native in the domestic part of trade at a great disadvantage, for the reason that he is a stranger, knowing less of interior markets than the native; that he is excluded from settling in the interior, and that even at the ports he is necessarily, as a stranger, and a man of superior refinement, at greater expense in doing business and in living. But I believe that the foreign merchant has, by reason of his origin and education, and his readier access to foreign markets, the advantage of the native in all foreign transactions, and that this advantage will more than counterbalance the superior economy of the native, although foreigners in the East are notoriously extravagant in their habits of life and conduct of business. And I believe, further, that the superior intelligence, honesty, and capacity for organization of foreigners will enable them to hold the carrying-trade to and from China, and between the ports of China, for a long time to come. Just now a Chinese steam-navigation company has been put in operation under circumstances calculated to give them, in some directions, a decided advantage over corporations under foreign management. For instance, they are the carriers of government-owned rice from the Yangtsze and Southern regions toward Peking, at prices far beyond what would be paid in an open market. They are said to be given certain other advantages resulting from the withdrawal of vexatious charges long and still imposed upon goods carried by foreign vessels. But to counterbalance these advantages is the prospect that Chinese-owned steamers will fail in punctuality, certainty of movement and safety, and that peculations will take place in their management.

I do not believe that foreigners come here for mere sentiment, yet I know there exists among foreign merchants sentimental or rather generous conceptions of the situation. I am not disposed to say that Foreign Governments should guide their policy from selfish considerations, but I am prepared to urge the proposition that a generous sentiment toward the Chinese is perfectly consistent with a policy which would tend to the immense advantage of trade. I do not mean simply, what all men will admit, that trade is a great civilizer, and that it should be protected for this reason; I mean that it should be actively promoted by the use of that moral power which Foreign Governments may, in my opinion, legitimately exercise in China.

The Government of China is undoubtedly decrepit and weak. The dynasty has apparently gone into the decline which dynasties elsewhere have exhibited. It deals vigorously in no direction. It is a great shadow of authority, respected as authority generally continues to be respected long after it has lost all the conditions which should entitle it to respect. It has had able men about it, at the capital and in the provinces. Some of them have been earnest, patriotic, far-seeing, and active, but it has crushed them, or is in the way to crush them. Wan Tsiang, a man of extraordinary ability, as judged by western standards, has almost retired from the unequal contest with the supineness of the ruling classes. Li Hung-chang, who has combined clear judgment with a rapidity of action almost unknown among latter-day Chinese, is now, to my knowledge, breaking down under the thousand and one vexations of the Peking Boards.

I do not mean to say that the Government is entitled to no respect. But I do believe that it is only imperfectly fulfilling the high purposes of Government; that it lacks energy and vigor, and that if it were not for the services which some of its officers outside of the capital—for instance, Tseng Kwo-fan and Li Hung-chang—have rendered, and the moral and active support which Foreign Governments have given to it, it would perhaps have already fallen.

If my authority for so broad a statement be asked, I may refer to the statements of all travellers, and to the reports of Chambers of Commerce and of newspaper correspondents.

If something that is more pointed and definite be asked, I may point to the audience question. Was there any reason which an intelligent human being would be likely to urge why China should not readily yield to Foreign Representatives this earnest of good-will and of gratitude for the favors which Foreign Governments had extended to it? If it be answered that the traditions of the empire forbade such action, then it may be responded that this answer begs the whole question, and Chinese blindness is to be the excuse for itself. I assert this blindness, and no more. If a further instance be asked, I may state the fact that the Government declares that telegraph-wires shall not be landed at the open ports. If it should say we prefer to have no wires in the interior, we might be ready to yield assent to their judgment, while failing to perceive any reason for it; but when they say that foreign merchants may not have the privilege of ready access to the wires brought in from distant countries by sea, while they fail to urge anything more logical than that the "distinctions between land and water must be kept in view," we can only lose patience with the extent of their unreason.

Now, if the premises be granted that the Government is a great shadow of authority; that it only indifferently fulfils its purposes of government; that its life has depended on the exertions of men who have been, or are being, crushed by its want of appreciation and its unnecessary and unreasonable interferences, and upon the forbearance and active support of Foreign Governments, then may not these Governments very well take up a position of urgency, if there be occasion therefor?

The occasion I have already somewhat indicated: foreign interests in China are languishing. They will languish until the restrictions upon trade are withdrawn. They will never attain a normal development until railroads are built, mines opened, and a free access to the interior permitted. Such measures would tend to the great development of the empire, and the welfare of its people. The advantages to be derived would no doubt be very beneficial to foreigners, but they would be beneficial to foreigners only because they would be so to natives. We may urge such measures for our own advantage, but we are not disloyal to China in doing so. We are doing for her the greatest service which can be rendered.

If such a policy would seem to combat with the policy advocated by Sir Frederick Bruce and Mr. Burlingame, my response is that they were in China when China was in great straits, and that then a policy of generosity, of forbearance, and of cordial support was altogether appropriate. To-day a policy of generosity, of forbearance, and of cordial support is not less appropriate, but the situation is different, and calls for something more. The Government has been long out of its difficulties, but it has failed to appreciate its responsibility. We could not expect that progressive measures would be systematically entered upon when the State was in the throes of rebellion. The duty then was to tide over the period of difficulty. The duty now is to fulfil the natural and right duties of government. These consist, among other things, in the promotion of commerce, mining, and manufactures, the establishment of highways, canals, and railroads, the diffusion of education, &c.

In all these directions what is it that the Government is accomplishing? Compared with the vast extent and numbers of the empire, one may well say that it is so little as to be almost hopelessly insignificant. I know of no highway in the empire which is in tolerable order. I know of few canals which are not utterly abandoned for any purposes of conservation or improvement. I know of no mines, of all those immensely rich ones possessed by the empire, that are worked to any appreciable extent. I know of no manufacturing establishments in which more than the members of a family are engaged. I see no disposition to introduce railroads and telegraphs. I find no adequate grappling with popular superstitions, such as those that precipitated the Tientsin

massacre, and from time to time threaten the safety of foreigners at that and other points. I find petty officials here and there allowed to impose all kinds of extortions upon trade. I find the people debarred from opportunities for legitimate enterprise, and actively betaking themselves to opium as a means of dissipating the tedium of existence.

I find the directions in which only progress has been made, for instance, the establishment of arsenals and navy-yards, the employment of foreigners in the customs, and the education of a few youths in western ways, subject to the criticism that a lack of confidence in themselves and a fear of foreign arms have been the considerations which have led to these steps.

Am I going too far, then, in saying that the time has at last come when Foreign States should take up a more positive attitude in this empire?

The basis for such an attitude has been laid. Mr. Burlingame, Sir F. Bruce, Monsieur Berthémy, General Vlangally, and others have not failed to impress China with a favorable idea of our benevolence. The co-operative policy has familiarized Foreign Representatives with the proposition that the interests of Western States in China are sufficiently near being identical to admit of perfect harmony among Foreign Representatives. Time enough has elapsed since the approach of foreign merchants to the ports and the ministers to Peking to allow the Chinese to survey the situation and conquer a natural aversion to us. The Regency has come to an end. The empire may be said to be as nearly at peace as it ever has been or is ever likely to be.

If it be asked what good can simple urgency do, I respond that, in my opinion, it can accomplish a great deal. I am not disposed to make a considerable argument upon this point, for I am already writing at too great length. I venture, however, this assertion, that there is no request within reason, according to our standard, that Foreign States may make in an urgent way from the Government of China that will not be granted. That Government feels its own weakness, its own igorance as compared with Western Governments, and its dependence upon them, in so great a degree that, while it will hold always to a great show of independence and opposition, (wave its ragged battle-flags, as it were, to frighten us,) it will succumb to any great evidence of vigor. The Tartar is, in fact, a stranger in the empire, and he trembles always lest the native Chinaman shall expel him. In face of this predominating fear, which, I confess, he conceals well as a rule, he turns to us for countenance and support.

Are we, then, throwing away our opportunities in China? I most certainly believe that we are. Our representatives, failing sometimes to perceive how firmness may be mingled with moderation, and judgment with urgency, have drawn back from due responsibility until the policy of England, for instance, has been emasculated to a pitiable degree. The self-respect of Western States, the well-being of the millions of this empire, will not permit this condition of affairs to continue. There was once undue and inconsiderate pressure exercised in China. It was the pressure of consuls and gunboats. We want now the pressure of the intelligent opinion of Western States discreetly exercised at all points of contact.

GEORGE F. SEWARD.

Public Meetings.

SHANGHAI CHAMBER OF COMMERCE.

The annual meeting of the Shanghai Chamber of Commerce was held on Tuesday afternoon, at the offices in Szechuen-road. The following members were present:—Robt. I. Fearon, Esq., chairman; Messrs. J. G. Purdon, W. Keswick, W. Lang. G. Harrisson, E. W. Batt, M. S. Gubbay, F. Nissen, D. Brand, W. Howie, F. B. Forbes, C. J. King, A. Hennequin, H. P. Hanssen, A. J. Little, H. S. Morris, P. Maclean, T. Olyphant, J. Hart, C. Emil Bade, and Geo. R. Corner, officiating Secretary.

The CHAIRMAN, in commencing the proceedings, said the business to be brought before the Chamber was somewhat of a routine character, presenting scarcely any features of more than ordinary interest. The report of the Committee had been for some time past in the hands of the members, and it was to be regretted that it had not been possible to chronicle some more useful and tangible results. He thought matters were now, however, evincing an improvement from which a hopeful augury as to the future might be drawn; though the day seemed still remote when treaty rights should be so far recognised and observed, as to enable foreign goods to reach distant places in the interior of the country, without those obstructions and exactions which now rendered the transit regulations almost a farce. At the same time he might allude to another very grave fact,—the deteriorating quality of much of the goods sent out to China from Manchester, as being specially a further source of loss to the importer, and one which might yet react in a very unfavourable way upon the industry of Lancashire. Attention had, on the other hand, been directed to the great success which had attended the institution of large spinning and weaving establishments in India; and that success suggested the possibility of adopting similar institutions in Shanghai. The development of such establishments in this part of the world would be of the very highest importance in the progress of commerce, and was certainly one of the possibilities of the future. Another subject that demanded continued attention, was the condition of the Woosung Bar; as regarded that subject, it was matter for regret that no actual result could as yet be reported as having been obtained. Nevertheless, he had reason to believe that the matter was not nearly so hopeless as it had hitherto seemed, and that the representations of the Ministers at Peking had had some effect with the officials at the Tsungli Yamên; so much so, in fact, that a member of the Chamber who was at Peking about two months ago, had been told by Mr. Hart that the Chinese authorities intended to proceed with the dredging of the Bar, and that it was merely a question of ways and means. He (the Chairman) was sure that the action taken by the Ministers at Peking on that primary subject, coupled with the result he had just stated as having been so far obtained, would be regarded as a source of congratulation by the Chamber. That body had sometimes shown that it could animadvert on occasion upon the supineness of Ministers at Peking, but it was nevertheless equally ready to offer congratulations. While expressing satisfaction in recording the efforts of Mr. Wade in the case of the Woosung Bar, there was another matter alluded to in the report of the Committee, to which he (the Chairman) might draw the attention of the Chamber, and in regard to which the name of Mr. Wade had been brought prominently forward. The matter alluded to was the Formosan difficulty. It would be remembered that one of the local journals, which was generally considered a faithful exponent of public opinion in Shanghai, published a leading article shortly after the settlement of the Formosa dispute, which he (the Chairman) thought did not give a fair critique on Mr. Wade's action in that matter, for he believed that in Shanghai there would be found but one opinion respecting the course then taken by Mr. Wade. (Applause). They believed that he had successfully mediated between the two nations, not only in the cause of humanity, but that he had also, by the course he had taken, promoted the true interests of legitimate commerce. (Applause.) In conclusion, the Chairman moved the first resolution—

That the Report as presented be passed.

Mr. HART seconded the motion, and it was carried unanimously.

PASSING ACCOUNTS.

Mr. A. J. LITTLE moved the second resolution, as follows:—

That the Accounts as rendered be passed.

M. HENNEQUIN seconded the resolution, which was also carried without comment.

ELECTION OF COMMITTEE.

MR. HOWIE proposed the third resolution—

That the following gentlemen be requested to act on the Committee for the ensuing year: Messrs. W. Keswick, E. Cunningham, C. J. King, A. Hennequin F. Nissen, M. Gubbay, F. H. Bell, J. A. Taylor, E. H. Lavers, and J. G. Purdon.

Mr. FEARON seconded the motion, which was passed.

STOCK OF IMPORTS.

Mr. PURDON moved the fourth resolution—

That in the opinion of this meeting, it is very desirable for the Chamber to resume the collection and publication, semi-annually, of statistics of the stock of foreign imports in Shanghai; and the Committee are requested to give the matter their special attention.

He said the motion was almost the same as one he had moved five years ago, to which all then present had after a time acceded, there being in fact only one dissentient, who would not then give way, but who afterwards saw the error of his way, and contributed the information wanted. There had been an impression abroad recently, however, that some of the statistics so given had become known in detail to some members of the Committee before they were published, and it was desirable to let the fact be fully sent forth that such a thing was impossible. The statistics were handed to the Secretary, and as soon as he had extracted from them what he wanted for publication, they were destroyed by him. No one else saw them. The names of the firms even were not known until they were published in the circular. He (Mr. Purdon) was authorised by Mr. P. Maclean to mention, in reference to the report he himself published, that when he issued his application a few days ago for the returns, he did so under the impression that the Chamber had given up the collection of statistics; but he considered the Chamber was the proper source from which the information should come, and wished they would resume the publication, as it would not be interfering with his report. If it was a good thing for a private person to do, it would be much better for the Chamber of Commerce to do it. A private person might at any time stop or withdraw his publication, but with a Chamber of Commerce it would be a permanent institution. He therefore now moved the resolution.

Mr. HART asked how it was that it had fallen through with regard to the Chamber?

Mr PURDON replied that it was through a firm refusing to give their returns, because they believed some of the members of the Committee saw them, as he had before said, but that was not the case. That was the objection he had heard given.

The OFFICIATING SECRETARY remarked that no reason whatever was given.

Mr. HART said if the motion were carried, he thought, if firms declined to give their statistics, their names should be published.

Mr. D. BRAND differed from that view, because it would tend to interfere with liberty of action in business matters.

Mr. Hart still thought it would be the proper thing to do, and one to which there could be no objection. To publish the names of firms declining to supply the necessary returns could do no harm, and would not be a libel.

Mr. Purdon thought, if the resolution were carried, some plan could be devised to ascertain the feeling of the various firms on the subject, and if there should be any objection to Mr. Hart's suggestion, the Committee could then consider the whole matter.

Mr. Hart said that would be replacing them merely where they started from.

Mr. Keswick said if it were known that the returns were not seen by any member of the Committee, but that they were confided to the hands of the Secretary only, who took the necessary figures from them and then destroyed them, it would have a very different effect. He did not think it was now known who were the firms who supplied the information. The matter was kept so far secret as that.

The Chairman said the information given in detail was known only to the Secretary, whose object was to obtain total results. The Secretary alone had access to the information, and he had never even named the firms who had supplied it to him, as Mr. Keswick had said. He (the Chairman) therefore saw no valid reason why the returns should be refused, and hoped that when the firms read the statements that had been made on the subject, they would reconsider it, and consent to give their quota of information. For, after all, it was a very good thing to enable the Committee to publish those semi-annual statistics, and he hoped the result of the resolution would be to give the Committee the power to apply more pressure to carry out the subject successfully. (Hear, hear.)

Mr. Hanssen expressed the opinion that it ought to be known to the Committee what firms had refused to supply the statistics necessary to enable the returns to be published complete.

Mr. King coincided with the previous speaker, that this was desirable if only for the sake of correctness; for there had not only been some who had refused to give the required figures, but some very false returns had been made. The Chamber must take that observation for what it was worth, but it was so.

Mr. Maclean asked if it would solve the difficulty if the names of those firms who did send in their returns were published, and all the rest left out. (Laughter.)

Mr. Hart said the question had been discussed at Hongkong over and over again, where the refusal of one or two firms to make the returns had destroyed the value of the statistics; and here in Shanghai it was proposed to start again at the same point as before. What was the good of doing that if some of the firms had refused to give their returns?

Mr. Purdon repeated the objections previously mentioned, as showing the reason why the returns were refused. The impression was that the information had been allowed to be too widely known, and that to have the quantity of stock held by each firm publicly known would be a disadvantage. But if it was thoroughly understood by the firms at large that such a knowledge could not be obtained, he was confident it would do away with the objections.

Mr. King said he clearly understood that the lists were destroyed by the Secretary, and that he only gave the results.

Mr. Maclean said there was some mistake made in the returns for last year, and there being an impression that the Committee knew the figures, a second return was asked for.

Mr. Forbes said the second return was asked for by the Secretary on account of the mistake that had been made.

A general conversation here ensued, which lasted some minutes, when

The Chairman said that once in the totals of stocks published it was seen that a palpable error occurred, and it was decided that it would be well for the Committee to republish them. The Committee had even then, however, no means whatever of seeing or publishing the details.

Mr. Purdon thought the Committee ought not to know what the total stock amounted to before the public knew it, and that if the Secretary saw there was an error, he should not lay it before the Committee until it was before the public.

The Chairman said when it became known that the strictest good faith was kept in the matter, he was not without hope that the knowledge would lead to good results.

Several members expressed concurrence in the suggestion just previously thrown out by Mr. Purdon.

Mr. Batt asked, if no one but the Secretary was to see the list, how was he to guard against error himself. He might possibly make an error in some thousands of pieces, and not notice it himself.

The Chairman said if there was an error, it would be corrected afterwards.

Mr. Batt therefore thought that some one else must see them.

The Chairman replied, not necessarily till afterwards.

The resolution was then put from the chair, and carried unanimously.

Mr. Hart asked how it was to be now understood the statistics would be published?

The Chairman said it was understood that the Committee would publish statistics as furnished by such and such firms. That seemed to be the sense of the Chamber, and would be considered by the Committee.

Mr. Maclean said he had reason to believe from his own success in collecting those statistics, that, with the understanding arrived at, there would not be a single firm in the Settlement that would not give the returns. (Hear, hear.)

Alteration of Rule.

Mr. Forbes, after a few introductory remarks in advocacy of the resolution he was about to propose, moved,

That in Rule 13, of the regulations of this Chamber, the word "January" shall be henceforth substituted for the word "July," after the words, "be held in the month of."

Mr. Nissen seconded the motion.

The Chairman, in submitting it, said it was merely a formal resolution which no one, he thought, could object to.

The resolution was carried *nem. con.*, and the Chairman then announced that those were all the resolutions before the Chamber, and if any member had any further business to lay before them, he would be happy to receive it.

Proposed Establishment of a Pilotage Board.

Mr. H. S. Morris, of the North China Insurance Company, in introducing this subject, said he believed some of the pilots of this port had addressed a letter to the Chamber, stating certain grievances under which they represented themselves to be labouring. He had no wish to remark upon the contents of the letter generally, but he thought a portion of it warranted observation from him, especially regarding it from an insurance point of view. It appeared to him that there should be a Pilot Board established in this port, under the supervision and executive management of the Harbour Master. At present there were no direct means of obtaining information as to accidents to ships, and it sometimes happened that ships arrived and left the port without any pilot on board. This was not as it should be; and the Pilots had applied to him, as representing a Company which had at stake a large amount of insurance on ships, expressing their wish that some sort of board should be formed, to the consideration of which all such things as those he had alluded to might be referred. He was not prepared to go fully into the matter now, but he saw the letter lying on the table, and thought it merited consideration by the Chamber. Some administration of the pilot service now appeared to be very much needed, for there was no Court of Enquiry into such matters. The Consul had the appointment of the pilots, but there was no compulsion upon them to work at all, and such a want of system might lead to there being no pilots on the coast in time of need. In the event of such a want arising, the Harbour Master might take up the matter, but if anything could be done to assist the men now, it would be very desirable.

The letter alluded to by Mr. Morris, is as follows:

To the Consuls of Powers having Treaties with China, resident in Shanghai:

The Harbour Master, for the Port of Shanghai; and, the Chairman of the Shanghai General Chamber of Commmerce.

Gentlemen,—We, the undersigned, Licensed Pilots at the Port of Shanghai, do most earnestly call your attention to the present existing state of the Pilot service.

Since the last General Pilotage Regulation, which runs as follows:—Rule 1st, "The number of Pilots for the Port of Shanghai shall be reduced to forty-five," the shipping of the Port has fallen off a half, owing to the large carrying capacity of the Ocean steamers, which enter this Port in direct competition with sailing vessels, carrying as much as three of the latter, at the same time giving employment for only one instead of three Pilots. Coasting steamers also go in and out of the Port without our assistance, also the majority of coasting sailing vessels.

The Pilots at the present time do not earn sufficient to keep their boats in running order, much less in case of accident. In the face of these facts, it is at present in contemplation to strike all the old Pilots off the list, who to better themselves, and temporarily to assist the others by their absence, have taken charge of ships, &c., to make other men in their places, who have had situations, but now find them gone, have applied to their Consuls to become Pilots.

We most respectfully submit that if such a state of affairs is allowed to go on, our boats will soon be worn out, and all respectable men will be obliged to seek other employment. We would suggest the number be reduced to twenty-five, or at the outside thirty, including those absent on leave not to exceed five.

These important facts we trust you may be pleased to take into your early consideration, and that the result may be, as licences are surrendered or fall in, no vacancies may be filled up until the total number of licenced Pilots has been reduced to twenty-five, and that hereafter twenty-five may be the limit, with discretionary power to the Harbour Master to appoint more, should in his opinion the number of Foreign vessels visiting the Port increase so much as to warrant it. We leave the matter in your hands, and subscribe ourselves,

Your most obedient servants,

D. Martin.	J. R. Mooney.
John F. Taylor.	W. Adams.
J. W. Hume.	W. v. Corbach.
H. Wilson.	R. Andersen.
D. C. Campbell.	F. A. A. Kofod.

Shanghai, December 1st, 1874.

The Chairman said the letter seemed to mention that there were too many pilots at Shanghai, and to suggest that the number might be reduced to twenty-five.

Mr. Morris went on to say that there was no system with reference to pilotage at Shanghai. A man merely got his license, and went to work; but if he got wrong no notice was taken. He might be drunk, or neglect his duty, but there was no appointed authority to take the matter up. A case came under his notice a few weeks ago, which ought to have been investigated, and he thought that some board of enquiry should be instituted, with the Harbour Master as executive chief, so that such matters might not pass unnoticed. It was a very important matter to the insurance companies, who had great interests at stake, for as was well known, a pilot was a very important and responsible person on board ship. He merely threw out the suggestion now, in the hope that the subject would be ultimately taken into consideration.

The Chairman said that as the case was put by Mr. Morris, it assumed a very important aspect. The Committee would take the matter into consideration at their next meeting, and would doubtless be glad of any information that could be given them.

REUTER'S TELEGRAMS.

Mr. BATT asked with reference to the agreement between the Chamber and Reuter's Telegraph Company, whether the Chamber were bound to continue receiving the telegrams?

The CHAIRMAN said the agreement with Reuter provided that it could be terminated by the Chamber giving six months' notice either from the 1st January or the 1st July. The 1st of January having now passed, the Chamber was committed to Reuter for the current year.

Mr. BATT had hoped they were in a position to settle it earlier, because from the way in which the telegrams were exhibited in so many offices for the information of Chinamen, he thought they would be better without them. He had intended to move that the telegrams be discontinued, but if the contract ran for another twelve months, it would be of no use doing so now.

The CHAIRMAN said if the telegrams were stopped by the Chamber, some firms would still get out private telegrams, which Chinamen could read just as well as now. It was true that complaints had reached the Chamber as to inaccuracies in Reuter's telegrams, and they had done what they could to remedy the evil. But they could not throw all the blame upon Reuter's people. They got their information from persons in England, and therefore the Chamber was really dependant upon people at home, and it was hardly fair to put the onus of blame upon Reuter's Co. alone.

Mr. BATT said he merely referred to them as being the agents of the Chamber. He considered it was not to the advantage of the Chamber to continue the telegrams, because they were losing from Tls. 1,100 to Tls. 1,200 per year by them.

The CHAIRMAN said the telegrams were intended for the benefit of the members of the Chamber, because it was not likely that members could obtain private telegrams at the same rate. Therefore the Chamber set apart a portion of its funds for that purpose, and the members subscribed the difference.

Mr. KESWICK said he thought Mr. Batt should have addressed his remarks to the incoming committee.

Mr. BATT considered it unfortunate to have public telegrams at all, as they appeared to be as much for the benefit of Chinamen as for themselves.

A desultory conversation of some duration here ensued, several members intimating that Mr. Batt had better bring his motion forward, wording it so as to take effect six months hence.

Mr. BATT must say that the majority of the Chamber had agreed with him in private on the point during the past year, but he was not aware how they would now express their opinion in public. He was not directing his remarks against Reuter, but against the introduction of more public telegrams.

Mr. KING said if the public telegrams were stopped, private telegrams would be obtained, which perhaps might not be so correct as the others.

Mr. PURDON pointed to the fact that the Chairman had adverted to the same thing, when he said if the Chamber ceased their contract with Reuter, private members would obtain telegrams and show them to the Chinamen. That was a thing that could not be stopped. A motion to cease the agreement with Reuter, simply meant that the Chamber would not pay anything for information for them.

Mr. WESTALL said by way of illustration, that he had himself been told by Chinamen what was contained in a telegram received before he had himself seen it. That showed they had the means of obtaining the information they wanted very quickly.

Mr. NISSEN was of opinion that if such a resolution was to be brought forward, it would be better to send round to all the members of the Chamber, and ascertain their opinion, especially as there was a large number absent. Many of them might desire to continue the telegrams.

This suggestion was endorsed by several members, and a circular was mentioned as the best means of ascertaining the general opinion.

Mr. PURDON objected to this course. If a small meeting adopted such a plan, it would be opening the door to a bad precedent, and it would always probably have to be done. If carried out, it would result in small numbers always being present, because absentees would say, "if we are not there, a circular will be sent to us." It would be much better to let each meeting take its own course in deciding matters brought before it.

The CHAIRMAN said this was a question that did not appear on the agenda, or there might have been a larger meeting.

Mr. MACLEAN asked why should those who did not wish to have those telegrams be compelled to pay for them? He said, let those who wanted them bear the expense of them.

The CHAIRMAN did not see the possibility of one member declining to pay his subscription to Reuter, because, if that were allowed, the Chamber would be open to pay the Tls. 88 for his share.

Mr. MACLEAN knew that several objected to be continued on the list.

The CHAIRMAN said he had been looking through the rules, and could not find anything in the form of a notice of motion being necessary in such a case, only in case of alteration of rules. The proposed motion would therefore be in order.

Mr. BATT said under the circumstances mentioned previously by the Chairman, he hardly knew how to put the motion.

The CHAIRMAN said it might be put in the way of a recommendation to the Committee to terminate the agreement with Reuter as soon as possible.

Mr. BATT asked if he could include in it a stipulation that the Committee should not enter into an agreement with any other Company?

The CHAIRMAN said there was nothing to prevent it, as it would have to come before a meeting.

Mr. BATT ultimately moved—

That the required notice of discontinuance of the commercial telegrams be given to Reuter's Telegraph Company.

The motion having been duly seconded,

The CHAIRMAN said that in accordance with the agreement with Reuter, the motion could only take effect in July, and end in December, of the present year. In putting this motion, he would express his own opinion that it would be much better to endeavour to obtain an improvement in the quality of the telegrams than to discard them altogether. He was sure they would also be less in pocket by the discontinuance of the telegrams, which were obtained for much less cost than would have to be paid for private information. He did not see either how their discontinuance would remove the difficulty of which Mr. Batt complained. The Chamber could not prevent Chinamen getting the information when it arrived in some way. But he would now put the resolution.

Mr. FORBES begged to submit the following amendment:—

That the incoming Committee be requested to give their special attention to the improvement of the public telegrams received by the Chamber, and that they be authorised, if necessary to this end, to give the required notice for cancelling the present contract with Reuter's Telegraph Company.

Mr. KESWICK seconded the amendment.

The CHAIRMAN submitted the amendment to a show of hands, when there appeared *for* it, 11; *against* it, 2. It was therefore declared carried, and the resolution was not put, the Chairman saying it should be entered on the minutes.

Mr. BATT—Thank you, Sir. (Laughter.)

TRANSIT DUES.

Mr. MACLEAN asked if the Chamber had received any information as to a reported arrangement between the Government and the Native Guilds, whereby the transit dues on foreign goods sent by Chinese hence to the interior had been commuted for Tls. 20,000 per annum?

The CHAIRMAN said no such notice had been received by the Chamber.

This terminated the business, and with a vote of thanks to the Chairman, moved by Mr. KESWICK, and seconded by several, the meeting broke up.

Law Reports.

MARINE COURTS OF ENQUIRY.

Re LOSS OF S. S. *Mongol.*

The following Report of the Marine Court of Inquiry into the loss of the British Steamer *Mongol*, is published in the Hongkong Government Gazette.

FINDING.

1.—We find that the British Steamer *Mongol*, Official Number 68,496, 1463 tons, of London, left Hongkong bound for Japan at 10.30 a.m. on the 12th instant, and that at noon of the same day she struck on a rock—marked on the Admiralty Charts—lying about nine-tenths of a mile East of the South Ninepin Island, and became a total wreck from five to eight minutes after the time of her striking.

2.—We find that out of a crew of fifty-two and one passenger (the Captain's Wife); the Master, Chief and Fourth Officers, Second and Fourth Engineers, and twelve others, including the Captain's Wife, were drowned.

3.—The Master and Chief Officer being drowned, the Court refrain from expressing any opinion on the subject of the loss of the *Mongol*, but beg leave to offer the evidence for submission to the Board of Trade.

The Court attribute no blame to the Survivors, but are of opinion, that, considering the circumstances under which they were placed, they all did their duty.

Given under our hands at Hongkong, this 18th day of December, 1874.

C. MAY,
First Police Magistrate.
H. G. THOMSETT,
Navigating Lieutenant, R.N., *and Harbor Master.*
H. H. NELSON,
Un-Official Justice of the Peace.
ROBT. MCMURDO,
Government Marine Surveyor.
W. H. POCKLEY,
Commanding British Str. "Orissa."

Hongkong, 24th Dec.

Re LOSS OF P. M. S. S. *Japan.*

An official enquiry into the loss of the above vessel was begun at the American Consulate on the 24th December. The Court was composed of H. S. Loring, Esq., Vice-Consul, president; Commander Lewis, U.S.N., *Yantic*; Lieut. Kilpatrick, U.S.N., *Yantic*; and Captain Clough (mercantile marine), American ship *Malay*.

EDWARD R. WARSAW said: I am a master mariner, and have been so for eighteen years. I have been in command of steamers for seven years, six of these in the Pacific Mail service. My last command was the steamer *Japan*. I was in command of that vessel when she was destroyed by fire. The fire broke out at 11.25 p.m. on the night of the 17th instant, The first I knew of it was a confusion among the passengers on the main deck, and about a minute afterwards there was a cry of "fire." Upon hearing this confusion, I sprang towards the pilot house door, which connects the pilot house with my room. The second mate, who was the officer of the deck, then called out "fire." I then rang the gong to stop the engine, and at the same time sounded the fire alarm. I ordered all ventilators to be turned from the wind, ported my helm, and ordered the topsail halliard to be let ago, in order to bring the vessel to the wind, so as to keep the smoke from the deck. The smoke was issuing from amidships, which was the first indication I saw of fire. It was coming

from the fire-room ventilator. I then ran immediately to the stairs at the fore hatch to get down on the main deck. I then went to the ash-shoot, which is situated forward of the smoke stack, and over the fire. I saw large volumes of smoke issuing from the fire-room. Immediately after the alarm of fire was given, three streams of water were brought to bear upon it, and also three streams on the engine room, from which dense volumes of smoke were also issuing. All available hose and connections were brought into use. We had altogether twenty-one streams bearing on the fire within ten minutes from the time of the alarm. At the same time, we cut holes through the steerage deck on the port side, abreast of the engine and fire room, and applied three streams and covered the holes with blankets. I then gave instructions to the officers with me to cut holes in the after steerage hatch, communicating with the freight deck. I saw large volumes of smoke but no fire. I applied two streams at those holes, and covered the holes with blankets. About that time the chief officer took off the fore hatch to see if he could make out the fire. He could not. The chief officer and myself then went on the after freight deck to see if we could discover any fire. We did not, but saw considerable smoke. I returned forward to the place where the fire was supposed to be in the fire room. The first blaze that I saw was issuing from the ventilators over the forward fire room. During this time all available hose and connections were laid to bring all the hydrants to bear fore and aft, making in all the 21 streams I have already mentioned. I now gave orders to my messenger to tell the Chief Officer to detail men to swing out and clear all boats ready for lowering. That messenger was Sutton, the quartermaster, and I never saw him afterwards. I then went below again to the steerage, cut a hole abreast of the foremast through the deck, and saw fire. At the same time I cut two holes in the fore hatch and applied streams to them. I applied a hose to the former, and then went aft on the port side, pulled the butt out of a hole which we had cut before, and saw fire. Apparently all the deck below, between the engine-room, fire-room and wing bunkers on the port side was on fire. I inserted the hose again into the hole, covered it up, went up on the hurricane deck, and saw the third officer and a gang of men swinging the forward boats, the second officer and another gang of men swinging the after boats. During the whole of this time every effort was being made to extinguish the fire. I advised Dr. Tyndal then to make ready to leave the ship, and placed the women in his charge, telling him that I thought we would be compelled to leave, and if so he would take them with him. I then went back to the scene of the fire, where my officers and men were doing their utmost to extinguish it. At this time a man ran past me, named Dennon, an oiler, crying out, "Every man for himself." I called him and asked him who gave him that order, and he said the Chief Engineer. I said if he repeated it again I would blow his brains out, and I ordered him to work with the rest. We fought the fire for about fifteen minutes after this. We found that all our efforts proved unavailing, and that it was rapidly gaining on us, and that the water was failing in supply in the fire engines, caused by the fire and smoke issuing from the fire room and engine room. It would have been impossible for any man to enter that part of the ship. I then started with a view of saving life. I went aft as far as the engine room door on the port side, where the flames cut me off. I then ran forward, passing through the smoke abreast of the ash-shoot, passing round on the starboard side which was the weather side, and aft through the store room and pantry, and thence to the hurricane deck by the saloon stairs. It would have been impossible to go forward then. I took a general survey of the weather side, saw all starboard boats were lowered and from the ship, and those people forward had apparently life preservers on them. I passed over on the port side, and saw two boats still hanging by the davits. At that time several Chinamen made an appearance, together with Mr. Crocker, a saloon passenger, and the ship's storekeeper, and I advised them to get into a boat. Not seeing any one there to assist me to lower a boat, I put Mr. Crocker forward to assist in lowering it. When the boat was down, I sent him down the fall into it. The boat went off, and I did not see him again till I picked him up next day. A few minutes afterwards I saw the second officer standing aft by the forward tackle of the only remaining boat on the ship, abaft the wheel. I then assisted him to lower the boat. In it went all the Europeans and Chinese abaft the fire, which was extending across the ship at the engine room. I then gave orders to the second officer to wait for me, and I returned to the weather side of the quarter deck, took a general survey of the ship, saw that the metallic life raft forward was overboard, saw that the captain's gig was gone, and the nonpareil raft, and that all the settees on the quarter deck had also disappeared. I opened the door of the engineer's room, called for him, but got no response. I then went aft, lifted the skylight, called out to see if anyone was there, and not getting any reply, concluded to leave the ship. I went over the ship's side at a quarter to one o'clock a.m. on the 18th instant. We shoved the boat clear of the ship, came round under the stern, and used every endeavour to save life. We picked up a number of Chinese, all of whom had life preservers round them. Some of them were floating on chairs, and one was on a coffin. We remained to windward of the wreck until daylight, and then went in search of the other boats. We fell in with and engaged a fishing smack, in which I cruised about, and succeeded in picking up five boats, and saving 117 souls. At about 2 p.m. on the 18th, seeing no more life, I stood in for the land. At 6.30 p.m., about a mile from the land, I communicated with the steamer *Yottung*. The captain kindly took us on board to Swatow. I then took passage in the steamer *Yesso* for this port, and arrived here at 2 p.m. on the 20th. The fire originated I think in the forward bunker.

Captain Lewis—After making the trips from San Francisco to Hongkong, what is done with any surplus coal remaining in the bunkers?

A.—It was generally left there.

Q.—Is fresh coal heaped down upon it?

A.—Yes.

Q.—Is the surplus coal used up first?

A.—No, the fresh and surplus coal is usually used together.

Q.—Was any damp or wet coal taken on board before leaving San Francisco, or at Yokohama, or were the bunkers leaking?

A.—No damp coal was taken at San Francisco; 140 tons, said to be Sydney, was taken on board at Yokohama, and about 480 tons Takao—a new coal. This latter coal was wet, as it rained heavily during the night we were taking it in. The bunkers were not leaking.

Q.—Was this new coal stowed in the bunker where you supposed the fire originated?

A.—Yes, the coal said to be Sydney was stowed there.

Q.—Were the boats on the steamer always kept provisioned and watered, and filled with oars and sails, compass, and so forth, complete?

A.—They were perfectly fitted and equipped, and examined every day. They were ready to be lowered at a moment's notice.

Q.—Was any provision made by stationing the officers and crew, in case of the emergency of having to leave the ship, to take charge of and lower the boats, and see to the disposal of the passengers?

A.—There was; the second officer and quartermaster Harris had charge of the eight after boats, with men to swing and lower them. The third officer and boatswain had charge of the four forward boats, with men to handle them.

Q.—Were the officers instructed to superintend in telling off passengers and filling the boats after they had been lowered?

A.—They were not.

Q.—Were officers appointed to superintend getting the rafts in the water?

A.—The second officer had charge of the rafts aft, and the third officer the raft forward.

Q.—What was the full capacity of the boats and rafts, for the saving of human life.

A.—The full capacity of rafts and boats was 650, under ordinary circumstances.

Q.—How many life preservers were on board?

A.—1,500.

Q.—Do you take the temperature of the bunkers?

A.—No; the chief engineer does that.

Q.—Were you in the habit of examining the chief engineer's log daily, to see that all regulations had been complied with, and that he had taken the temperature of the bunkers?

A.—No. I looked the log over to see the quantity of coal consumed.

Q.—What was the nature of the cargo stowed in the locality where the fire was supposed to have originated?

A.—Flour and fish.

Mr. Loring—Where is the position of the Chief Officer in the case of fire?

A.—He immediately proceeds to the scene of the fire with his men.

Q.—Were all the officers at their posts on this occasion?

A.—Yes, with the exception of those who were compelled to leave the fire and engine room by the smoke.

Q.—How about the crew?

A.—They were all at their posts, and worked remarkably well.

Q.—Was there any hesitation on the part of anybody?

A.—None whatever. All did what they could.

Q.—Was fire practice and drill gone through at regular intervals?

A.—It was. Every night at eight o'clock I stretched the hose along all the decks.

Q.—When was the last fire drill before the disaster?

A.—On the passage from San Francisco to Yokohama.

Q.—When did you inspect the ship last yourself that night?

A.—About half-past eight o'clock.

Q.—How many boats had you on board?

A.—Twelve metallic life boats, one wooden boat, and two rafts.

Q.—Were they all available for use?

A.—They were, every one of them.

Q.—Were they all made use of that night?

A.—They were, except one boat. It was impossible to get this one away in consequence of the fire and smoke.

Q.—Were the life preservers easily accessible to the Chinese passengers?

A.—They were.

Q.—Did the Chinamen take every precaution to save their lives?

A.—They did, and behaved remarkably well. There was no panic amongst them whatever. All who were picked up had life preservers round them.

Q.—Will you state how many streams were available in case of fire?

A.—24 streams from the engine, and a little hand pump in each end of the ship.

Q.—You have stated that there were 24 streams available, why were they not all brought to bear on the fire?

A.—From the fact that there was not sufficient hose to concentrate all these upon that part of the ship. The hose from the hydrant in the lower saloon, and the hydrant in the after main saloon, and the hydrant in the after steerage were connected with hose in other parts, in order to bring as much water to bear on the fire as possible.

Frank Wm. Hart said: I was first officer on board the late steamship *Japan*. I first heard the alarm of fire on the night of the 17th inst., sometime after eleven o'clock. I was then in my room. At the alarm of fire I saw all the officers and crew at their respective stations. I opened the valves of the fire hose, directed the hose down to the engine and fire rooms, with about eight streams. I went down the after steerage and took off the hatches and could see nothing but smoke coming from forward. I ordered the carpenter to open the steam valves which lead to the holds of the freight deck, and took off the fore hatches in the steerage. I found very little smoke there, and I put on the hatches again. I opened the steam valves which connected with hold and freight deck so as to smother the fire. At this time it was my opinion that the fire was in the coal or port bunkers, or in that vicinity, as it smelt of coal. I then disconnected hose in the saloons aft, lower and upper, and after steerage, in order to lengthen the hose and bring all the streams to the fire. There were fifty feet of hose attached to each hydrant with the exception of one. I cut holes in the deck in afterpart of the forward steerage, and put two streams of water there. I cut a hole through the little hatch, and found some flour sacks on fire. Took off the fore hatch again and saw fire. Replaced the hatch, and cut a hole in the steerage on the port side, and placed two jets there. I ordered the third officer to swing out the fore and aft boats, and take two quartermasters with him. One was told to keep the

Chinamen from crowding the boat. Went down below and found all the pumps working well. Went down the steerage on the port side, and saw the casing round the steam chest on fire. I found the fire was cutting us off from the after part of the ship, and I ordered men to leave the steerage. When I went on deck again there seemed to be no pressure of water in the hose, the pumps evidently having stopped working by becoming heated by the fire. I then escaped through the fire on the port side, and the only people I saw were one of the quartermasters and the second steward. I afterwards went on to the hurricane deck, and saw all the boats on the aft deck were lowered with the exception of one, which the Captain and second mate were in the act of lowering. The communication between fore and aft was at this time entirely shut off. I looked about and could not see any one on board, so I then got into the Captain's boat.

Captain Lewis—What is your opinion as to the origin of the fire?

A.—I think it was spontaneous combustion of the coal.

Q.—Was there any fresh coal taken in at Yokohama?

A.—Yes, I think there were 600 tons.

Q.—Was it wet or dry when taken on board?

A.—The coal must have been wet, as it rained very hard during the ten hours of coaling.

Q.—Was any of the coal taken on board at Yokohama stowed in the bunker where you supposed the fire originated?

A.—Yes.

Mr. Loring: Did the Captain's messenger (Sutton) come to you with an order to swing out the boats?

A.—No, I received no order through Sutton. I never saw him but once.

Q.—How often do you inspect the ship at sea as chief officer?

A.—Every night at eight o'clock I have a general inspection, and make my report in writing to the Captain. I am about the ship all day.

Q.—Did you inspect the ship that night at eight o'clock?

A.—I did.

Q.—What condition was the fire apparatus in then?

A.—Ready for immediate use, and everything in perfect working order.

Q.—How many streams were brought to bear on the fire.

A.—I believe twenty.

Q.—How long after the fire broke out was it when you left the ship?

A.—From an hour and three quarters to two hours.

Q.—Did you consider you took every precaution against fire on this night?

A.—I did.

Q.—Do you think there was a good watch kept throughout the ship that night?

A.—I do.

Captain Lewis.—Were the boats properly equipped?

A.—They were all complete, and had been inspected by the Captain.

Q.—Where is your station in lowering the boats?

A.—I have no particular station, but superintend the lowering generally.

Mr. Loring—Were all the officers and men at their duty?

A.—They were.

Q.—Did they all obey orders?

A.—They did, without exception.

Q.—With regard to the regulations for fire, do you think they were all carried out?

A.—As far as the fire would permit, they were carried out to the letter.

Q.—Was there a good supply of life preservers on board?

A.—There was. They were convenient and were brought into use.

Q.—How was it, in your opinion, that more of the Chinese passengers were not saved?

A.—The sea was very rough, and many of them overburdened themselves with money, and others trusted themselves to pieces of wreck instead of taking life preservers.

At this stage, the Court was adjourned till nine o'clock on Saturday morning.

Saturday 26th December.

JOHN HENRY COSGROVE stated—I was chief engineer of the *Japan*. I have been chief engineer of different ships between seven and eight years. I have been in the service of the P.M.S.S. Company since 1856. The fire originated about half-past seven o'clock on the night of the 17th inst. The first intimation I had of it was the sounding of the engine room gong to stop the engine. At the moment of the first alarm I was in my room. I was not on duty. I went directly to the engine room to see what was the matter. I next went to the steam pumps. I had a difficulty in getting to the pumps. I could not get to the midship pumps on account of the fire and smoke. After starting the forward pumps, and getting two or three streams of water to bear on the fire, I succeeded in reaching the amidship pumps. I was calm and collected at this time. All the outward discharges were attended to. The third assistant and the first assistant engineers were in charge when the alarm was given. I asked if the pumps were started, and being told "no," I went to them myself. Not two minutes had elapsed from the time of the first alarm till the starting of the pumps. The room was full of smoke when I got there, and all the lights were out but one. Fire was coming through the forward bulkhead, dividing the engine room from the freight deck. I do not know what freight was stowed there. I saw that all pumps and gear were in proper working order. I made an inspection in San Francisco, and found everything in proper working order, and reported to the Captain. I made an inspection of everything on the night of the fire at eight o'clock, and all was in proper order. I first saw fire at the bulkhead mentioned, and then saw flames coming through a door near the engine room. I next saw the engine room all on fire, and flames were coming up both fire room skylights. Every man was at his post, and all orders were obeyed, so far as I know. The conduct of the officers and men in my department was very good, all working well and doing their best. I never gave the order "every man for himself;" I mean I never gave it in that way. I told my messenger that I wanted to see the first assistant engineer on the upper deck, and that he (the messenger) was to look out for himself.

Captain Lewis—Was any fresh coal taken on board at Yokohama?

A.—Yes.

Q.—What kind of coal?

A.—140 tons of Sydney coal, and 480 tons of Tako coal.

Q.—What was its condition, wet or dry, when put in the bunkers?

A.—The Tako coal was dry. I did not see the other when it came on board.

Q.—In which bunkers was the coal stowed?

A.—The Sydney coal was stowed in the forward and after bunker, and the Japanese coal in the side bunker.

Q.—When surplus coal happened to be in the bunkers after a voyage, was it your custom to heap the fresh coal down upon it?

A.—In some cases I did do it.

Q.—Was any care taken that the surplus coal should always be used first?

A.—No.

Q.—Was there any surplus coal in the bunkers in which the coal was put at Yokohama?

A.—There was none in the forward bunker, but 5 or 6 tons in the after.

Q.—How often were you in the habit of taking the temperature of the coal bunkers when steaming?

A.—We never took it at all.

Q.—Where, in your opinion, did the fire originate, and from what cause?

A.—I think it must have originated on the freight deck, the cause I cannot say.

Q.—When you were first aware that the ship was on fire, what kind of a smell pervaded the vicinity—that of coal, or gas, or wood?

A.—It was a smell as of burning wood.

Q.—How is the freight deck, where you supposed the fire originated, situated as regards the coal bunkers?

A.—It is situated immediately over the forward athwart ship bunker.

Q.—At what stage of the fire did you leave the engine room?

A.—When I saw there were no hopes of saving the ship.

Q.—Could you have remained any longer at your post?

A.—I could not.

Q.—What was the pressure of steam at the time of the fire?

A.—I cannot say, but I believe 20 lbs.

Q.—How long after trimming the fires would there be sufficient steam to work the pumps?

A.—About half-a-day.

Q.—How often are the fires trimmed?

A.—About once an hour.

Q.—How long after the mending of the fires was the alarm given?

A.—I do not know.

Q.—How long did the pumps work after the fire broke out?

A.—As near as I can say about two hours.

Q.—In your opinion what caused the pumps to stop working?

A.—I think it was the action of the fire.

Q.—At what stage of the fire, and when did you desert the vessel?

A.—When I left I had already seen five boats in the water pulling away from the ship; I do not know the hour.

Q.—Who gave the order to lower the boat that you reached Hongkong in?

A.—I gave no order; six Chinamen lowered it on their own account.

Q.—What was the capacity of that boat, and how may had you in it?

A.—The capacity was about 15, and we had nine people in it.

Q.—Did you assume charge when you got in her, and order her to be shoved off?

A.—No, I simply got into the boat, and pushed clear of the ship.

Q.—Did you, immediately after pushing off, desert the wreck and steer for Hongkong?

A.—No.

Q.—Did she render any assistance in endeavouring to save the lives of any the passengers or crew?

A.—No.

Q.—From what reason?

A.—There were only three oars in the boat, and she was unmanageable.

Q.—Did any one assume command of her?

A.—A Chinaman did. I was too sick to do any duty.

Q.—How many streams from the steam pumps were brought into requisition in the endeavour to subdue the fire?

A.—Eight streams around the engine room were all I saw.

Q.—How many streams were there available by the steam pumps altogether?

A.—Twenty-four.

Lieut. Gillpatrick—What time did your boat leave the vicinity of the wreck for Hongkong?

A.—About half-past five in the morning, as near as I can judge.

Q.—Did you assume charge of the boat at any time before reaching Hongkong?

A.—No, I did not.

Mr. Loring—Had you any difficulty in reaching the deck from the engine room?

A.—I had not.

Q.—What was your condition then?

A.—I was suffering severely from inhaling the smoke.

Q.—How long were you on deck then before you left the ship?

A.—About ten or fifteen minutes.

Q.—When you left the ship, what was her condition as regards the fire?

A.—Her condition was hopeless. The whole of the amidship section abreast the engine room was on fire.

Q.—What was the cause of your sickness in the boat?

A.—I was suffering from the effects of inhaling the smoke, and from sea-sickness caused by the motion of the boat.

Q.—Do you still feel any ill-effects from inhaling the smoke?

A.—I do, and have been under medical treatment since reaching Hongkong.

Q.—Was any surplus coal in the bunkers when coal was taken on board at San Francisco for this last voyage?

A.—All the bunkers were clear to the best of my knowledge, except the after one.

Lieut. Gillpatrick—What kind of lights were allowed in the bunkers?

A.—Common open petticoat lamps.

Q.—Are these lamps always uncovered when in the bunkers?

A.—They are.

JAMES HENRY stated.—I am an engineer, and have been so for nineteen years. I have been in the employ of the P.M.S.S. Co. off and on since 1850. I was third assistant engineer on board the *Japan*. I believe the fire broke out at 28 minutes past eleven p.m. on the 17th inst. The first intimation I had of the fire was that I saw smoke coming from the freight deck on the port side through the

coal bunker. I was in the engine-room on duty, and had full charge there. When I saw smoke I called out "fire," and the gong to stop the engine was sounded in less than half a minute afterwards.

Mr. Loring—What was your next action?

A.—I stopped the engine and eased two safety valves.

Q.—What did you do next?

A—I shipped the starting bar.

Q.—How long after the alarm did you see the Chief Engineer, or receive any communication from him?

A.—I did not receive any communication from him. I saw him seven minutes afterwards on the top platform. He could not have got down on the working platform then.

Q.—What further action did you take in regard to the fire?

A.—I attempted to return to the engine room after I had been driven out by the smoke, but could not reach the working platform.

Q.—How long after the first alarm did you see any streams of water bearing on the fire?

A.—About two or three minutes.

Q.—What was the nature of the smoke in the engine room?

A.—It was thick and black, with a strong smell of pine wood.

Q.—Had you time to do all you ought to have done as engineer in charge?

A.—I did all I had orders to do.

Q.—How long after the first alarm did the steam pumps continue to work?

A.—They were working up to the time I left the ship, so far as I know.

Q.—In your opinion where did this fire originate?

A.—Somewhere forward on the freight deck.

Captain Lewis—Were you on duty when the coal was taken on board at Yokohama?

A.—I was on duty, but not looking after the coal.

Q.—Do you know if it was wet or dry?

A.—I do not know.

Q.—Were the bunkers at any time previous to the breaking out of the fire visited by any one, and any unusual heat noticed in them?

A.—Men were working in the side bunkers behind the boilers, and they reported no unusual heat?

Q.—Was there any surplus coal in the bunkers in which the coal taken on board at Yokohama was placed?

A.—I do not know.

Q.—Was the Sydney coal taken in at Yokohama in the forward athwart ship bunker exhausted when the fire occurred?

A.—At that time there was Sydney coal in it, but I do not know when it was taken in.

Q.—What was the pressure of steam at the time of the alarm?

A.—Twenty pounds.

Q.—How long before the alarm of fire had the fires been trimmed?

A.—A few minutes, I think.

Q.—What sort of lamps did you use in the bunkers?

A.—Common uncovered lamps sometimes, and sometimes covered ones.

Q.—Were any of the bunkers in a leaking condition?

A.—Not that I am aware of. She was a remarkably tight ship all over.

Q.—How many streams are available in case of fire?

A.—Twenty or twenty-one.

Q.—At what stage of the fire did you leave the vessel?

A.—When I received orders.

Q.—Who gave you the order?

A.—The second engineer told me that the Captain had passed along the order "every man for himself."

Q.—Did you consider the safety of the ship hopeless at this time?

A.—I did.

Q.—Who ordered the boat to be lowered that you escaped in?

A.—I don't know. The third officer was present.

Q.—When that boat left the ship, was she full?

A.—She was, she had about 65 people in her.

Q.—Who assumed charge of her?

A.—The third officer. She had provisions, and was fully equipped.

Mr. Loring.—Did you see the Captain when you left the ship?

A.—I did not. I had not seen him for some six or seven minutes previously.

Lieut. Gillpatrick—You say you received no orders from the Chief Engineer; did he question you whether the pumps had been started?

A.—He did not.

Mr. Loring—Did you see him on deck during the fire?

A.—I did, and he was working very hard.

Captain Clough—Did you suffer from the inhalation of smoke?

A.—I did, I was made sick.

Mr. Loring—So far as you observed, was every one doing his duty?

A.—All I saw were doing their best to save the ship.

Q.—In what part of the ship did you see flame first, and where were you at the time?

A.—I was standing on the main deck near the engine room door, and the flame was issuing from the spot where I first saw the smoke.

Michael Jordan stated—I was employed on the steamer *Japan*, and had made ten voyages in her. I was a water tender. The first alarm of fire was given about twenty-five minutes past eleven. I was in the fire room, and perceived the smell of wood burning. I called out that there was wood burning somewhere, and the gong was sounded and the engine stopped almost immediately. I was on watch at the time. I then pulled down the dampers, and opened the smoke and fire doors.

Mr. Loring—At this time did you see any fire at all?

A.—No. But as soon as the ship was stopped I saw the smoke coming from forward.

Q.—Did you see the smoke coming from any particular door?

A.—It came from the door of the freight deck, and along the bulkhead.

Q.—How near this was the coal?

A.—There was coal in the bunkers directly underneath.

Q.—How long was it from the time of the alarm till water was brought to bear on the fire?

A.—Almost immediately.

Q.—Do you know how many streams?

A.—I think seven or eight.

Q.—How long did you stop in the fire room till you were driven out?

A.—I left the fire room, not on account of the smoke, but to look after the donkey engine.

Q.—Did you try to return to the engine room again?

A.—I did, and held a lamp to the steam gauge and read it at 24lbs. I could not go farther, and made no efforts, as my lamp was extinguished by the smoke.

Q.—During all this time what orders did you receive?

A.—I received no orders, but proceeded to my regular station in case of fire at sea.

Captain Lewis—Was the Yokohama coal wet or dry when you took it in?

A.—I don't know. I was not on duty.

Mr. Loring—Did you see the Chief Engineer at all during the fire?

A.—Many a time.

Captain Lewis—Had you visited the coal bunkers that night previous to the fire?

A.—I had.

Q.—What bunkers did you visit?

A.—The side bunkers abaft the boilers.

Q.—Did you notice any undue high temperature in them?

A.—No.

Mr. Loring—Did the Chief Engineer give you any orders that night?

A.—Yes, and I assisted him to take some hose aft.

Q.—Did you hear him give any orders?

A.—I did, plenty. I know he was at the pumps himself.

Q.—Did you hear any one give an order something like this, "every man for himself?"

A.—I did not.

Q.—Did you see the Captain about?

A.—I did, several times. I heard him give several orders about the fire.

Q.—How long after the first alarm was it when you left the ship?

A.—I cannot say.

Q.—How did you get away?

A.—I got away in the second port aft boat.

Q.—Was that boat lowered when you went there?

A.—No, she was only swung. I lowered one end, and I think the saloon watchman lowered the other. No one had charge of her.

Q.—What was the condition of the fire when you left?

A.—The amidship section was all on fire. I could have got forward by rushing through the flames.

Q.—Who took command of your boat?

A.—No one. I steered and was relieved once or twice. There were no sailors with us. We had thirteen persons in her, it was a small boat.

Q.—Who was the last man you saw on board?

Q.—The Chief Engineer, at the door of his own room.

Q.—How many boats were lowered before you got into this boat?

A.—I cannot say.

Q.—Did you attempt to save life after you left the ship?

A.—We saw no one in the water.

Q.—How was your boat equipped?

A.—She was perfectly equipped, and had bread and water in her.

Lieut. Gillpatrick—Were the pumps working when you left the ship?

A.—They were.

Captain Clough—Did you receive orders to leave the ship?

A.—No; I left when I saw all the others leaving.

Lieut. Gillpatrick—Was the Captain on board when you left?

A.—I don't know.

The following evidence we give only in a condensed form:—

Henry Harrison Andrew, second officer, said he was officer of the deck, and rang the fire bell. He was relieved by Quartermaster Harris, and went aft and called the chief officer and the third officer. Cleared away all the boats aft. Left the ship in the last boat with the Captain and chief officer, and this boat saved some ten or fifteen passengers and crew and lay by the ship all night. In answer to questions, he said he left the ship about an hour and a half after the alarm of fire. He thought the fire originated in the fire room or forward bunkers. Was of opinion that everything was done to save the ship. The capacity of the despatch boat in which the chief engineer left was 60 persons, and the total capacity of the boats and rafts was 700 persons, there being besides the life-preservers. The fire, however, prevented many of the Chinese from getting aft, and they did not avail themselves of the means of saving life because they were paralysed with fear. Some jumped overboard, weighted with money, and were drowned, and there was a cross sea running. This officer, it will be observed, coincides with the captain and chief officer as to the locality in which the fire originated, and inferentially the cause of it, the wet coal taken in at Yokohama, and said there was only flour on the freight deck. The next witness

David Fulton, second assistant engineer, agreed with his chief in the opinion that the fire broke out on the freight deck. He inspected the coal bunkers, all except the forward one, at 7.30, and did not observe any rise in their temperature. While at his post, witness heard a voice, which he thought to be the Captain's, say, "every one for himself," and he at once dropped the hose and passed the word to the third assistant engineer. Thought there was hope of saving the ship till he heard that order, then concluded it was hopeless, and left the ship about an hour and three-quarters after the outbreak, in a boat containing fourteen people. The boat could carry 25, but the men in her could not work her properly, being sick and unable to pull.

Harry Lester, steerage watchman, described his proceedings, and said he thought the fire originated right amidships on the port side, in or around the fire-room or in the bunkers. Being forward on duty, he had to run through the flames to get off, and left the ship in the Captain's boat, the Captain being the last man to leave the ship.

Monday, 28th December.

John Rooney, purser, described his efforts to save the mails, in which he was unsuccessful on account of the smoke. Confirmed the former evidence as to the Captain being the last man on board.

Captain Warsaw was then recalled and questioned as follows:—

Capt. Lewis—State the complement of crew and deck hands allowed the *Japan* by the Company.

A.—24 deck hands, including the boatswain and messboy.

Q.—Had you a full complement on board at the time of the fire?

A.—I had.

Q.—State their nationalities and the number of each?

A.—All Chinese.

Q.—How many seamen, including officers, had you on board at the time of the destruction of the *Japan*, that you considered capable of taking charge and managing a boat properly in a sea-way?

A.—26 Europeans and 22 Chinese, in all 48.

Mr. LORING—Whereabouts in the ship did you meet the man Drennan, alluded to in your former evidence, calling out "every man for himself."

A.—On the port side of the main deck, abreast of the ash-shoot.

Q.—When you stopped the man, did you say something like this "who gave you that order 'every man for himself?'"

A.—I did not repeat the words, but asked him who gave the order, and said if he repeated it again I would blow his brains out.

Lieut. GILLPATRICK—Who has charge of the freight deck, and whose duty is it to inspect it at sea?

A.—The Chief Officer,

JAMES DRENNAN said he got the order referred to from the Chief Engineer, who said to him, "Jamie, go and see Bennett, and tell him it will be every body for himself." Witness then went below on the main deck and met the skipper and several men, and supposing Bennett to be amongst them, called out "'bos,' it will be every one for himself." The skipper stopped him, and told him he would blow his brains out unless he went to his duty. The Captain also asked who gave the order, and witness said the Chief Engineer.

The Chief Officer (Hart) recalled, said there were no standing lights on the freight deck; and globe lanterns were used in inspecting it. No one had been on the freight deck for about thirteen hours previous to the fire, and all ways of access to it were locked, with the exception of the doors leading from the engine room to the side bunker, which was a continuation of the freight deck. Saw nothing to lead him to believe that any one had been on the freight deck from the engine room.

A Chinese fireman thought the fire originated in the bunker. Believed the fact that so many Chinese passengers were lost was due to the rough sea. Some of the Chinamen he saw in the water had life preservers and some not. The life preservers were easily accessible to all the Chinese on board. Some of the boats went off from the ship as soon as lowered, but others lay near the ship a long time. He only saw the third mate's boat remain. Witness jumped into the sea and swam to this boat.

ROBERT MORRIS TYNDAL, passenger, spoke highly of the cool and collected manner in which the officers and especially Captain Warsaw conducted themselves in the emergency. He considered every exertion possible was made to save the ship.

P. V. GATES, surgeon, said his boat had orders to leave some time before it did. There were twelve persons in her, and she was as full as safety would allow, as the sea was very rough. There were no sick or helpless men on board the *Japan* at the time of the fire. Everything was done to save the ship. The boat he was in was properly provisioned and equipped.

The steerage cook (a Chinaman) said he left in a boat which a Chinese sailor took charge of. The Chief Engineer assisted to lower this boat, but gave no orders. Witness himself took charge of the boat next morning, relieving the sailor. All the ship was on fire when they left. They remained by the ship about twenty minutes after the boat was lowered. The Chief Engineer gave no orders. He was sick and vomiting.

This concluded the evidence taken.

At the close, the Court delivered the following—

DECISION.

We, the undersigned, composing the Court of Enquiry assembled at the U. S. Consulate, on the 24th day of December, 1874, to enquire into the cause of, and circumstances attending, the loss of the P. M. S. S. *Japan*, Capt. E. R. Warsaw commander, after hearing and carefully considering all of the testimony adduced in the case, do find as follows:—

1st.—That the P.M.S.S. *Japan*, of 4,351. 21/100 tons register, registered at the port of New York, sailed from the port of Yokohama on the 11th day of December, 1874, at four o'clock p.m., fully manned and equipped in every particular, bound for the port of Hongkong.

2nd.—That on the night of the 17th of December, when off Breaker Point, at the hour of 11.25, or thereabouts, an alarm of fire was sounded, the approximate position of the ship being Lat. 22.45 N., Long. 116.36 E.

3rd.—That the fire in our opinion originated in the forward bunker, immediately under the freight deck.

4th.—That the fire was caused by the spontaneous combustion of the coal placed there when coaling in the harbour of Yokohama, the coal having been taken on board during a violent rain storm, and consequently stowed in a wet and damp condition.

5th.—That at the last inspection previous to the fire, the engineer on duty failed to inspect this bunker, although he did inspect all others containing coal, the reason assigned being that no coal had been used from this bunker since 5 p.m. that day.

6th.—That at the last inspection of the vessel at 8 p.m. the inspecting officers failed to detect any evidence of the presence of fire.

7th.—That such was the condition of affairs at 11.25 p.m., when the first alarm was given, and smoke seen to issue from the vicinity of the coal bunker referred to.

8th.—That at this moment no flames were seen, only a dense volume of smoke.

9th.—That immediately the engine was stopped, a general alarm sounded, ventilators turned from the wind, and in fact, the rules and regulations of the Company, made and provided for such an emergency, strictly complied with, and that the officers and crew at once put forward every effort in their power to subdue the flames.

10th.—That under the direction of Captain Warsaw, all available streams, some seven or eight in number, were brought to bear in the immediate vicinity of the fire, located in the engine and fireroom at that time.

11th.—That all the available fire apparatus was brought to bear on the fire within about 10 minutes, some 21 streams in number.

12th.—That the fire apparatus was in excellent condition, and was used to its utmost capacity, until the increasing heat prevented the pumps from working.

13th—That everything was done on the part of Captain Warsaw and the officers and crew generally, under his command, to save the vessel.

14th.—That after all human efforts had proved futile, as shown by the evidence, to subdue the fire and save the ship, she was abandoned by all on board at 12.45 on the morning of the 18th, the commander being the last man to leave the ship, but we find that in abandoning the vessel there was an evident lack of organisation in lowering and manning the boats properly, although they were properly equipped and provisioned.

15th.—That we are of opinion that there should have been established a Boat Station Bill upon this steamer, providing for the emergency of abandoning the ship, with a view to the greater security of the lives of the passengers as well as the ship's company, and to prevent confusion and disorder, as well as the lowering of the boats unauthorised by the commanding officer.

16th.—That a more rigid inspection of coal bunkers, a greater care in regard to burning surplus coal first, and a more careful supervision of the condition of the coal when coaling should be exercised, and that the temperature of the coal bunkers should be taken at least once every four hours for the purpose of preventing and the detecting any incipient signs of combustion going on in them.

17th.—That from all the evidence, we gather the Captain was cool, calm and collected, that he did his duty nobly and well, and exerted himself to the fullest extent to save the vessel under his command, and after her abandonment, in remaining by the wreck until all hopes of saving further life was gone.

18th.—That we consider the conduct of the chief engineer reprehensible, both in passing an unauthorised order calculated to dis-spirit the persons engaged in subduing the flames, and in allowing the largest boat, in which he was the only male European, to leave the ship only partly filled, without endeavouring to save the lives of those remaining on board and in the water, although from the evidence, he appears after reaching the boat to have been suffering from inhalation of smoke, and not to have been actually in command of the boat.

19th.—That we consider the great loss of life among the Chinese passengers arose from the communication between the fore and aft ends of the ship (at which latter end most of the boats were placed) being cut off, their paralysation by fear preventing any efforts to save their lives, the roughness of the sea and darkness of the night, and the weight of the money in many cases slung upon their persons, although life preservers were abundant, and were extensively made use of.

H. S. LORING,
Vice-Consul in charge and President of the Court.

R. T. R. LEWIS,
Commander U.S.N., and Senior Officer present.

W. W. GILLPATRICK,
Lieut U.S.N., Member.

BENJ. P. CLOUGH,
Master, American Ship "Malay."

Clippings.

The list of Silk shipped per P. & O. steamer *Thibet*, on the 1st instant, gives: for London 473 bales; for New York 119 bales; for Marseilles 50 bales; for Lyons 173 bales; for Milan 72 bales; for Venice 39 bales; for Suez 3 bales; for Bombay 68 bales; for Hongkong 12 bales. Total 1,009 bales; and 32 bales waste for London, from Japan and Shanghai.

The bright cold weather of New Year's Day made the holiday a most enjoyable one, more particularly for those who spent it out of doors. A large field assembled at Oliver's Bungalow, to follow the paper, which, after an easy "throw off," led away in the direction of Jessfield, and then turning towards Sicawei, returned along the line of the Sicawei road, finishing at the second bridge from the Bubbling Well. The frost of the previous evening having yielded to the genial influence of the sun, the ground was very heavy, and told severely on the ponies. The jumps were well selected and were easily cleared by the better ponies, but the finish, like the start, did not present any noteworthy features. Mr. Hinckley, on a griffin, came in winner of the light weight prize, and Mr. J. Keswick, riding *Ghillie Callum*, who took his jumps in fine style, gained the honour for the heavies. Another meet was held on Monday. The weather was perfection for hunting, and at three o'clock a field of over thirty ponies had assembled near the Hermitage. The route from Sicaway lay almost straight for Jessfield, and then followed the Creek until a line was made direct for the finish. The foxes had taken pains to avoid the old paper, but apparently were not sufficiently careful to mark their own course, and the consequence was an unusual number of checks and a late finish, scarcely a full mile of straight running being afforded throughout. A few rather severe jumps were given soon after leaving Sicaway, and one or two more and some fencing about Jessfield, but as a rule mudlarking was left out, and the course gave every satisfaction to the hunt, although the laying of the paper did not. The finish was to be in the neighborhood of "Mount Shastra," and was within about three-quarters of a mile of that architectural eminence. Two flights of hurdles and a small ditch were here provided, and the first of the light weights to get over them was Mr. Walker on *Apollyon*, and of the heavies Mr. Brandt on *Seabird*. The checks enabled the field generally to be well up.

EXPORT OF TEAS FROM SHANGHAI AND RIVER PORTS,

TO GREAT BRITAIN.

Season 1874-5.

Shipping Reports.

The str. *Yungching*, Capt. Gibbon, left Hongkong Dec. 24th, 1874, at 5 p.m. Arrived at Amoy on the 26th, having had rainy and thick weather and heavy sea. Left Amoy on the 29th at 4 a.m., and arrived at Shanghai Jan. 1st, at 5 p.m., having experienced a succession of heavy N.E. gales with thick and rainy weather throughout the passage.

The str. *Yangtsze*, Capt. Corner, left Hongkong Dec. 24th at noon, with moderate N.E. breeze and cloudy weather, which increased with thick drizzling rain to a strong gale with a heavy sea, lasting until 4 p.m. of the 27th. On the 29th it again set in thick, with a strong N.E. gale, which veered to N.N.W., and obliged ship to anchor until daylight of the 30th. From thence to port had fine clear weather with strong N.E. breeze.

The steamer *Dragon* left Foochow on the 1st inst., and arrived at Shanghai on the 3rd inst. at 4.30 p.m. Had strong N.E. gale with clear weather throughout the passage.

FOOCHOW SHIPPING.

Arrivals during the week ending December 23rd :—Haining, from Shanghai ; Achilles, from Shanghai ; Kestrel, from Tamsui ; Douglas, from Hongkong.

Departures :—Kwang Tung, for Hongkong, general ; Haining, for Shanghai, general ; Adele, for Shanghai, general ; Achilles, for London, tea.

In Port :—Kestrel ; Douglas, for Hongkong.

COMMERCIAL INTELLIGENCE.

SHANGHAI, JANUARY 6TH, 1875.

ARRIVALS.—The steamships *Ocean* from Glasgow, and the *Glenroy* from London.

TELEGRAMS.—London, 2nd January, 1875.—*Cotton Mid. Orl.*, 7¾d.; 8¼-lbs. *Grey Shirtings*, 9s. 6d.; *Iron*, £10 10s.; *Lead*, W.B., £24 10s.; *Discount*, 5 per cent.

PIECE GOODS.—Considering the broken character of the past week, a very fair business in PIECE GOODS has been transacted. Demand has been active, and although a goodly portion of the settlements are for distant clearance, and so presumably speculative, the LOCAL, NINGPO, and YANGTSZE Traders have bought extensively for immediate or early delivery. The CHEFOO men have also been in the market, and trifling purchases of *Shirtings*, *Plain Black Lustres*, and *Figured Orleans* have been concluded by the JAPANESE dealers. The following is a *précis* of the business reported since last mail day :—

9¾-lbs. Grey Shirtings	5,500	pieces at Tls.	2.55 *a* 2.62½	per piece.
8¼-lbs. Do.	14,500	,, ,,	1.60 *a* 1.91	,,
7-lbs. Do.	9,000	,, ,,	1.37 *a* 1.46	,,

Long Ells, Scarlet	120	,, ,,	7.25 *a* 7.30	,,
Spanish Stripes	2,040	,, ,,	0.56 *a* 0.62½	per yard,
Crape Lastings	1,500	,, ,,	4.00 *a* —	per piece.
Lastings, Scarlet	100	,, ,,	11.60 *a* —	,,

It will be observed from the foregoing that GREY SHIRTINGS do not show up quite so prominently as usual, and the logical inference is that they have not received the customary attention. There has been some enquiry for the article, however, and there would have been more extensive operations, were it not that the buyers are afraid of the market dropping upon them before the Northern season opens. As it is, good chops still hold their own, but some of the commoner descriptions have declined in value 2 *a* 3 candareens per piece, while all are weak and in little request at the close. *Dewhurst's Eagles*, 8¼ lbs., have been sold at Tls. 1.88 *a* 1.91 per piece. *Collie's Lion-on-Bale*, at Tls. 1.74, and other chops from Tls. 1.60 up to Tls. 1.70 per piece. 6 *a* 7 lbs. goods require no special notice, there having been scarcely enough done in them to affect quotations, but *Heavy Shirtings* have been frequently asked for, and are wanted at the close, on the basis of last week's current rates, viz.: Tls. 2.62½ per piece for *Dewhurst's Taeping* chop.

White Shirtings.—No change to report in the nature of the trade, saving that the market is a trifle quieter than it was. Buyers have found that although there is a scarcity of 64 *a* 66 Reed Cloth in Shanghai, there are quantities afloat, and abundance still in Manchester. Their purchases during the last three weeks are said to amount to between 600 *a* 800 cases.

T-Cloths.—Speculation has been the preponderating element in these. Indeed, almost every piece of the ordinary description of 7 lbs. *Mexicans* has been settled on the three weeks to a month clearance principle, and in some instances delivery has been extended till after China New Year. Buyers—and chief among them are the TIENTSIN and HANKOW dealers—have, however, a good opinion of the article, and have advanced a little upon their offers of last week. Thus, *Collie's Eagle*—for which only Tls. 1.37 could be got on 30th ultimo—has been placed at Tls. 1.40 per piece, and other goods, for which there was no market at Tls. 1.30 *a* 1.32, have been disposed of at Tls. 1.30 *a* 1.33 per piece, and the demand is not yet quite satisfied. The finer qualities have also been wanted, but these, together with the settlements of the lower counts, have been more for immediate requirements, and their value shews no perceptible alteration. A few common 6-lbs. have been taken at about last week's rates, and a better business both in enquiry and price in 8-lbs. has to be recorded. Good medium of the latter weight is wanted at from Tls. 1.60 *a* 1.65 per piece.

Drills.—One lot of *Dutch* at Tls. 2.25 per piece is the sum of the business reported since this day week, but 14-lbs. *English* have been enquired for. The rates named, however, are below those last quoted, and in the present position of Stocks, it is not likely that holders will submit to any decline.

Jeans.—Trade in these seems to have terminated on 31st ultimo; at all events there has been little demand since, and scarcely any transactions reported.

Sheetings.—No change to note; the *Americans* "to arrive" still engross the dealers' attention.

Fancy Cottons.—Enquiry has existed for *Dyed Spotted Shirtings*, of which the stock seems exhausted, *White Spotted Shirtings*, *White Brocades*, *Dyed Damasks*, *Irish Linens*, *Velvets*, *Velveteens*, 18 inches, and *Blue Mottles* or *Denims*, and, it is satisfactory to find that prices have not been materially affected by the long prevailing inactivity in the market for these.

Woollens.—The chief business has been in *Spanish Stripes*, of which about 2,000 pieces—exclusive of the auction sales—have been sold. *Scarlet C.P.H. Camlets* have been much wanted, but evidently there are none here, or holders refuse to break their assortments, at Tls. 14 per piece, which is the rate offered. *Long Ells.*—The price for C.P.H. Scarlet was Tls. 7.30 less ½ per cent. when last mail left, and up to yesterday; it is now Tls. 7.25 per piece, with little enquiry. *Plain Black Lustres* have been sold to the Japanese dealers at an advance of 5 candareens per piece on their offers of a week ago, or Tls. 3.75 per piece for a good medium Lustre, and some *Figured Orleans* have been taken by the same buyers at Tls. 3.20 *a* 3.25 per piece. *Lastings.*—A sale of 100 pieces Scarlet at Tls. 11.60 per piece, and one of 1,500 pieces No. 2 *Crape Lastings* are the only transactions to chronicle in these articles.

METALS.—*Nailrod Iron.*—The position of the market has not improved, and no further transactions are reported. There are rumours of transhipments to Japan, but the extent to which the stock here is likely to be relieved, in that way, is probably trifling. *Lead.*—Importers do not seem quite so confident in regard to the future as do the late speculative operators, for while the latter hold for Tls. 6.30 per picul and upwards for L.B., the former have sold to natives at Tls. 6.10 and Tls. 6.05 per picul, free of commission. To-day's quotations are therefore reduced to Tls. 6.05 *a* 6.10 per picul. In other metals, there is no alteration to notice.

COTTON.—Quotations are maintained at last week's currencies, but the business is diminishing, and will probably grow smaller as the native holidays approach. Thus, prospects warrant the expectation of lower rates before long. The supply is rather, but not much, over current necessities.

EXCHANGE.—Rates are weak, the best rate for Bank paper being 5s. 8⅞d., while Credits have been sold as low as 5s. 9⅛d. There is very little Private Paper appearing. On India, the closing quotation is Rs. 302½ wire for Feb. On Hongkong, 26¾ is still the quotation for Bank paper.

EXPORTS.

TEA.—The following settlements have been reported during the week :—

Black—355 chests at Tls. 13. Stock—630 chests.
Green—Fychow and Moyune... 8,705 ½-chests, at Tls. 18 *a* 36½ } Stock of all kinds—89,500 ½-chests.
Pingsueys..... 2,229 ,, ,, 23 *a* 25 }

Total...10,934 ½-chests.

There is no change to note in the value of Green Tea. Some parcels of common quality are slightly easier, but fine chops keep very firm.

Our Export to Great Britain (exclusive of lost Cargoes) is—

	1874-1875.		1873-1874.
Black.....	64,845,598 lbs.	against	58,502,484 lbs.
Green.....	9,516,338 ,,	,,	8,136,952 ,,
Total.....	74,361,936 ,,	,,	66,639,436 ,,
To America and Canada—			
Black.....	1,612,500 lbs.	against	588,424 lbs.
Green	12,530,066 ,,	,,	17,899,511 ,,
	14,142,566 ,,	,,	18,487,935

SILK.—Telegrams from London, report the silk market firm, and quote 15s. as the sellers' price for Red Peacock;—and 12s. 6d. for common No. 5 Tsatlee. The English mail steamer *Thibet*, which left on the 1st instant, took 1,009 bales of silk (473 bales for London, 337 bales for the Continent, 80 bales for India and Coast, and 119 bales for America). Since then the market has remained quiet until the past two days, when fully 700 bales have found buyers, increasing total settlements from 1st June, 1874, to date to 59,400 bales. The following prices are reported to have been paid:—

	Per picul.	*Per lb.*	*Per kilo.*
Blue Elephant	Tls. 327½	=16s. 2d.	Frs. 45.65
Yellow do.	,, 302½	=15s. 0d.	,, 42.20
"Chay-shen"	,, 275	=13s. 8d.	,, 38.20
Market No. 4½ & common Tsatlees	,, 260 @ 305	=13s. 0d. @ 15s. 2d.	,, 37.55@42.30
Medium Hangchow Tsatlees	,, 250 ,, 260	=12s. 6d. ,, 13s. 0d.	,, 34.80,, 36.20
Common to No. 3 Kahing Taysaams	,, 240 ,, 280	=12s. 0d. ,, 13s. 11d	,, 33.50,, 38.90
Re-reeled Hainings	,, 330 ,, 350	=16s. 4d. ,, 17s. 4d.	,, 45.65,, 48.35
China Trams	,, 305 ,, 350	=15s. 2d. ,, 17s. 4d.	,, 42.30,, 48.35

Red Peacock is offered by some holders at Tls. 320, and for "Koo-fong-sing's" chop 3 Tls. 417½ per picul have been offered and refused. Arrivals continue very small, and the unsold stock is reduced to barely 9,000 bales.

Statement of Imports and Deliveries of Cottons and Woollen Piece Goods for the Week ending 4th Jan., 1875, compiled from the "Customs Daily Returns," Nos. 302 @ 304 and 1.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, JAN. 14, 1875.

IT is suggestive that the topics just now agitating the minds of Indian financiers are of a very similar nature to those we are called upon to discuss in China. The legacy left by past misrule in both countries, and the contravention in both cases of many of the simplest rules of political economy, have in both had results, differing in degree indeed, but not in nature. Yet when we come to enquire into the question of degree, we see how immensely superior is the position of affairs in India; and yet, small as are the actual defects, we can plainly see their results in a state of the finances, not indeed hopeless, but such as to need much care, and give much anxiety in their readjustment. Some of the difficulties arose from errors in the settlement of the land, but the greater ones seem to have had their origin from the want of means of intercommunication, and from too heavy fiscal duties. In India, the natural means of communication are of a very inferior description. Few of the rivers are really navigable, and even those that can be made use of, vary at the different seasons of the year from foaming torrents to shallow and sand-obstructed streams. The British Government has established the outline of a system of railways, to afford the means of communication denied by nature; but as yet, although constructed at enormous cost, the lines made can only be considered as the skeleton of what is necessary. Works of irrigation and canals have only of recent years been taken in hand with any real amount of energy, and their construction has been made too dependent on the varying requirements of the finances of the moment. Did income at any time fail to reach its estimated amount, the most ready way of equalising it with the expenditure seemed to consist in at once stopping the public works. Great injury was thereby done, as not only was a severe loss thus entailed in again having to take up works stopped when half executed, but the landholders of the districts likely to be affected were kept in a state of uncertainty. Hence, it in a great measure happened that, when at length such works were ready for the accommodation of the public, it was found that the public had made on its part no preparation. Canals were not made use of for transport, and actually a prejudice had arisen against utilising the water conveyed by the irrigation works. In addition to these, it was felt that a part at least of the debt for which the Indian Government was responsible, was incurred rather in Imperial than in Indian interests; and seeing the great benefit directly gained to Great Britain by her connection with her great dependency, it has been held that for such portions of the debt it was unfair to tax the latter. Without lending any ear to the prophecies of those who predict the bankruptcy of the Indian Government within a term of years, there is in all these statements much ground for

anxiety. It is, however, a hopeful sign that they have been put forward, and still more hopeful that they have been generally acknowledged to have at least the foundation of truth. Compared with China, the Indian Customs duties are of small amount, while the country is happily free from those internal imposts which in the more Eastern State are rapidly sapping the existence of trade. Small as the amounts are, wise financiers point out that they interfere with free circulation, and in many cases propose a reduction. There can naturally in these matters be no hard and fast line drawn. A tariff of two per cent., or of five per cent., on all articles indiscriminately, may seem to be both equitable and reasonable, yet experience seems to show that such hard and fast tariffs are not desirable. Products there are in every country, the imposition on which of even so light a rate of taxation will practically cause their expulsion from the markets of the world; while others will, without difficulty, bear a much larger percentage. Thus, a three per cent. duty on tanned hides in India is detrimental to trade, and therefore to the revenue, and it is proposed to substitute a duty of one per cent. on all hides tanned or untanned. Three per cent. is likewise found to be an unprofitable rate on re-exports of manufactured cottons. Whether from this or other causes, the export is diminishing, and the fair inference therefore is that the cottons of India cannot be laid down at saleable rates. It will readily be seen how small these rates are as compared with the imposts levied even by the Maritime Customs in China. But the duties directly paid to the Customs here are, as a rule, high when compared with the irregular levies exacted before commodities arrive at a port of shipment. On one article, perhaps, of the whole number, duties seem to have had but a slight effect, and that is the article of tea, in the production of which China occupies a unique position. Yet there are signs that tea cannot hold that position long; Japan and Assam are treading closely on her heels; and as in both those countries foreign supervision is much more directly exercised over the preparation of the article, the proportion of tea exported from the three countries is rapidly changing, to the detriment of Chinese trade. Silk duties have been known by the experience of the past few years to press heavily on the export of another of China's staples. Here she has a keener contest than in the case of tea, to enter into, and it would be wise to equalise her chances as much as possible. Tea and Silk are at present almost the only articles which China can export; and this not from any want of industry in her people or fertility in her soil, but because, by a false system of finance, prices are raised to an artificial pitch which renders it unremunerative to export. India is blamed for being too slow in her works for improving communication; but China, as a matter of policy, sets herself to obstruct those she has got. The Indian Government attempted again to introduce a system of land tenure, but unlike that of China. Every man was to be lowered to the same dead level, and the old aristocracy was in a fair state of being destroyed. The result was the Mutiny of 1857, in which not only the landed proprietors, but the persons supposed to be benefited, joined. The mistake has fortunately been in a great measure corrected, with manifest improvement in the condition of both classes alike. In all these things, much may be learned from a comparison of the two countries. China, vastly more rich in its soil and natural productions, is going rapidly down the hill; while India, with many mistakes to rectify, is certainly on the whole in a better position than she has ever occupied before. The evils under which the two countries were undeniably labouring can be traced to the same causes. The difference in result is owing to the fact that in the one case every attempt is being made to correct past errors, while in the other those errors are religiously preserved, and made daily to press heavier on the people.

Summary of News.

The mail of 20th November arrived by the M.M. steamer *Provence* late on the 9th instant, and that of 27th idem by the P. & O. steamer *Gwalior* early on the 11th. The American mail from San Francisco November 30th arrived on the 8th instant; that of December 12th arrived to-day.

A homeward mail leaves to-morrow, by the P. & O. str. *Golconda*. The American mail left this morning by the P. M. str. *Golden Age*, which connects with the *Alaska*.

The following Reuter's telegrams have been received during the week.

At the Encyclical Council, the Pope proclaims a Jubilee in 1875.

The *Verulam* has been wrecked at the Cape. The crew were saved.

The message of MacMahon asked the Chamber to vote for the first and second Chamber Bill. The Assembly rejected the proposal by 420 against 250. The Ministry resign.

MacMahon's endeavours to obtain a new Ministry have failed. The present Cabinet have agreed to remain in office provisionally.

Alphonso has landed at Barcelona amid great enthusiasm, and an imposing religious procession. Russia, Germany, and Austria have agreed to recognize Alphonso.

Intervention Sheridan Orleans (?) caused great indignation in America, and the Senate have requested Grant to furnish an explanation.

Fire broke out in the sailroom, forward, of H. M. S. *Curlew*, on Monday, but was extinguished before serious damage was done. Particulars of the occurrence are given elsewhere.

The remainder of the hull of the late ship *Horatio*, after having all the charred portions of the timbers removed, and replaced by new, is now being decked over, so as to make it available either for a pontoon or a hulk.

The steamer *Leven*, lately purchased by the China Merchants Co., is being fitted out for her intended occupation at th Taku bar. A hurricane deck is being built fore and aft, thereby greatly increasing her cargo space.

We have pleasure in announcing that H. M. the King of Denmark has conferred on G. F. Seward, Esq., U. S. Consul-General, the high decoration, "Commander of Dannebroge," in recognition of the services Mr. Seward has rendered to Danish interests in China.

We are informed that H. M. the King of Denmark has also conferred on Edmund Pye, Esq., (of Messrs. Elles & Co., Amoy) the decoration of "Knight of Dannebroge."

We give to-day the texts of two judgments delivered by Sir Edmund Hornby at the Supreme Court on Saturday. The first is in the case Chay-a-Sahichi *v.* Mourilyan Heimann & Co., appealed from the Consular Court at Hiogo, as to which his Lordship reverses the decision of the Court below. Being of opinion that a breach of charter-party had been committed on which some damage may have been sustained, his Lordship remits the case back, to be reheard on that point, the plaintiff to be at liberty to adduce evidence of damage. Each party (for reasons stated) to pay their own costs of the appeal, but costs in the original cause to depend on the result of the new trial.—In the case Malone *v.* Walton, of which we gave a summary on Thursday, his Lordship allows plaintiff, late master of the *Alexandra*, 12s. 6d. beyond the amount paid into Court by defendant, the owner of the vessel,—each party to pay his own costs.

We also give *in extenso* the report and award by the Registrar and Merchant Assessors on the reference in the *St. Francois v.* the *Cawdor Castle*. The report contains also the reasons upon which the Court sustained Mr. Robinson's contention that the owners of the *St. Francois* were justified in treating the sinking of their vessel as a total loss, in refusing to receive her back if raised and repaired, and in claiming that the defendants should pay them the full value of the brig, her freight, stores, crew's wages and expenses. The plaintiffs claimed Tls. 17,235.53, and are allowed Tls. 11,929 41, the principal deductions being on the estimated value of the vessel and on the freight claimed for the sandalwood which remained in her at the time she was sunk.

At the Mixed Court, on Saturday, was resumed, before Geo. F. Seward, Esq., Consul-General, U.S., and H. E. the Taotai of Shanghai, with Dr. Yates acting as interpreter, the remarkable case, "C. E. Hill *v.* Yang Taikee." It is a claim for no less a sum than Tls. 54,000, with interest for eleven years, arising out of the chartering of a steamer, the *Keorjeor*, or *High Bridge*, during the Taeping rebellion. The evidence adduced was in a way a narrative of the measures taken, by means of the "Ever-Victorious Army," to suppress the Taiping rebellion in this province. On Tuesday the Consul-General made a *vivâ voce* statement with regard to the two arbitrations held by

arrangement with Woo, the then Taotai of Shanghai, with a view to the settlement of the claims of Americans and Europeans who had served with the army. The historical nature of the case gives it more than a passing interest; and a lengthy report of the proceedings will be found in our Law columns.

The delegates of the respective Companies of the Shanghai Fire Department, attended at the Municipal Council room on Friday, for the purpose of electing a chief and district engineers for the year. The voting resulted in the reelection of the old officers, Mr. Robert Mackenzie, as chief engineer; Mr. C. J. Ashley, first district engineer; Mr. B. A. Clarke, second ditto; and Mr. A. Charrier, third ditto.

The annual meeting of the Mih-Ho-Loong Hook and Ladder Co. was held on Monday. The officers of the past year—Mr. Rice, foreman; Mr. Groom, 1st assist.; Mr. Tobin, 2nd assist.—were re-elected by acclamation. Dr. Henderson was re-elected Surgeon, and Messrs. Low, Pryer, Welch and Hawtrey were chosen as a Committee. The accounts were then discussed and passed; after which the Rules as amended were read; but although these were approved, it was found there was not a sufficient number of members present to render their adoption valid, as by the old bylaws the votes of two-thirds of the Company would be necessary to enable any alteration to be made. It was therefore proposed and carried, that a copy of the new rules should be circulated, to be signed by the members; and that if a sufficient number of signatures were obtained, the rules as amended should be adopted. At the meeting of the Mih-ho-loong Rifle Company, Messrs. Rice, Mackenzie, Groom, Dunman, Hawtrey, and Cheverton were elected committee. The accounts for 1874 were then read and passed. Some discussion took place as to the advisability of holding the annual ball, and the votes of the meeting being unanimously in favor of it, a committee was chosen, and it was resolved to give the ball as usual, at an early date.

The first battalion drill of the S. V. C. under the command of Major Hart, took place on Tuesday, in the Consular Compound. About 90 rank and file mustered at the appointed time, and were put through some rather severe but serviceable field movements, the drill lasting more than an hour. At the conclusion of the evolutions, Major Hart expressed gratification at the way they had been performed, and hoped to see a better turnout on future occasions.

On Tuesday, at the Masonic Hall, Professor Watson, of Michigan College, chief of the United States expedition for the observation of the transit of Venus, delivered a lecture on that subject and its relation to the problems of Astronomy. The lecture was given under the auspices of the Shanghai Temperance Society, being one of the winter series. Mr. C. P. Blethen occupied the chair; and notwithstanding unfavourable weather, an audience of nearly 200, including a large proportion of ladies, was present. The subject was treated in a popular manner, and was illustrated by diagrams on the blackboard, drawn by the Professor as he proceeded, as well as by copies (by Mr. Saunders, of Shanghai,) of three of the 99 photographs of the transit taken in Peking, showing the first and second contacts and the appearance when the planet was fairly on the sun's disc. It is impossible to give even an outline of the lecture within the limits at our disposal, and it can only be said that those present received a rare intellectual treat. At the close of the lecture, a vote of thanks to Professor Watson was proposed by Mr. Taintor, and seconded by Mr. Wylie.

The minutes of the French Municipal Council meeting of 22nd December, which we give elsewhere, are largely of a routine character, although at the same time they form a report of useful municipal activity. Various proposals of the Committee of Works were approved, relative to the carrying out of the system of drainage, the planting of trees, the metalling of the Yangkingpang bund, &c. An application by jinricksha owners, that wheelbarrows should be placed under the same restrictions and regulations with their vehicles; and a letter from the other Municipal Council, relative to the reconstruction of Yang-king-pang bridge No. 4, and the rectification of the line of the Creek bund, were referred to the delegates of both Councils, for arrangement. The Council decided to appoint an arbitrator to act with one nominated by Mr. Hanssen, in settling terms for a piece of land required for widening the Rue du Consulat. It was resolved to submit to the Chief Engineer of the Fire Department, certain proposals by Mr. Viguier, Harbourmaster, regarding signals in case of fire in the anchorage. The Chairman was requested to address the Belgian Minister, with a view to obtaining the return of documents deposited at the Belgian Consulate as proofs in the Godaert case.

A very serious accident occurred on the river on Monday evening, in the sinking of a Chinese passageboat by collision with the steamer *Europe*, involving an estimated loss of fifteen lives. The *Europe* was coming to an anchor below the harbour limits about 7 p.m., and her engines had been stopped some few minutes, preparatory to letting go the anchor. Miscalculating their position probably in the darkness, and misjudging the force of the tide, the boat people rashly attempted to cross her bows, and their boat came into collision with the starboard bow of the steamer, or with the descending anchor, and was at once sunk. A boat was immediately lowered from the steamer, in charge of the second officer, and picked up two of the unfortunates before they were carried astern of the ship. Ten others were recovered, but although the boat pulled some distance down the river and a careful search was made, no more could be found. One of the rescued was in an insensible state, and though every effort was made to restore animation when the vessel was reached, it proved in vain. Dr. Burge was sent for, but before he could arrive the man was quite dead. The people saved were all passengers, and they state that, seeing the danger, they advised the lowdah of the boat to put about, but he replied "No fear; I can cross her bow."

We regret to hear of another outrage on a foreign resident, by a rowdy Chinese. As a European lady and gentleman were setting out for an afternoon walk, on Wednesday, and were about turning into the Foochow from the Szechuen road, towards the Bund, a Chinaman jostled them and suddenly struck the lady across the eye, inflicting a severe cut. He then ran away, and succeeded in escaping from his pursuer, the lady's husband, who was divided between the necessity of attending to the sufferer, and the desire to secure the fellow. Unfortunately there were no police in the vicinity.

There was a very good but rather severe hunt on the Hongkew side on Saturday. The start was from a point off the Woosung road, about a quarter of a mile from the rifle butts, and the tract of country beyond was traversed and re-traversed till a course was laid for home, just opposite the S. S. N. lower wharf. A large number of people had as usual made the direction of their afternoon drive or walk depend on the movements of the hunt, and from 2.30 till 3.30, there was a steady exodus from all parts of the Settlement to a common centre on the Yangtszepoo road. A widish and well-filled creek was selected as the rubicon, and was boldly charged by the first arrivals, Mr. Vincent on *Caradoc* winning the light weights. The names of horse and rider were of good omen, Mr. Vincent *conquering* in the local contest on the namesake of the animal which, the mail tells us, has won world-wide fame by carrying a certain Lieutenant Zubowitz from Vienna to Paris, a distance of 800 miles, in 15 days. Mr. Turnbull won the heavy weight prize again on *Steam Whistle*.

A memorial in the Peking Gazette of 15th December shows that the Chinese still maintain a semblance of suzerainty in their relations with Loochew, although the Japanese have formally taken the islands under their protection. True, the junk with tribute arrived at Foochow in the end of last year, before the Formosan difficulty arose; but a year before that, it had been officially intimated to foreign powers that the sovereign of the islands had been reduced to the position of an ex-daimio and assigned a residence at Yedo. The departure of the junk on her return voyage is now noticed; and according to precedent, the duties on Chinese merchandise shipped by her have been remitted. In acknowledgment of the graciousness of the "Sacred Ruler" to the men from afar, however, the Envoy, followed by his attendant officials and the crew of the junk, has had to perform the ceremony of the *kotow*, at the Custom-house!

The numerous friends of Mr. A. C. Dulcken, who was for many years connected with the Press in Shanghai, and who during the past five years has edited the Hongkong *Daily Press*, will be pleased to hear that he was invited to a farewell banquet, on the 30th ultimo, by his Hongkong friends, on the eve of his departure for England.

Editorial Selections.

THE CHINA LOAN.

If getting in debt be a sign of progress, the Chinese Government has made a small step in that direction. The new Chinese loan of two millions and a quarter taels, secured as it is on the Foreign Customs' Revenue, will doubtless meet with ready acceptance at the proposed rate of nearly 8½ per cent. Economically speaking, the proposed loan has much to recommend it; but it is characteristic of the false position which China holds among nations, and the bad name its Government has earned for itself, that it has had to go into the market at a rate so much less favourable than has the Government of Japan. The securities offered are, as we have stated, ample, provided care is taken that the revenues assigned are duly placed aside for the intended purpose. There is no reason to believe that the Chinese Government is other than desirous to do its duty in this respect; in fact, we believe that those who control the executive are quite sensible that in a matter of this sort thorough honesty is their best and only policy; and their good intentions are guaranteed by the statement that a certain portion of the Customs' revenue is assigned to the introducers of the loan, the Hongkong and Shanghai Bank, in trust for the bondholders. So far, we believe the loan to be satisfactory, but there is a question to be asked the reply to which is not of so clear a nature. We are not told the object of the loan, nor what are the circumstances which have impelled China to go into the market, and become a debtor to Europe. Were the money raised to be devoted to some useful project, as in Japan, we have little doubt that China bonds would rapidly become a favourite in the market. It has been our unpleasant duty lately to comment on the extremely unsatisfactory state of Chinese finance, and the issue of this loan lends considerable proof to the arguments that we have advanced, that China in this respect has fallen into a position whence she sees little hope of extricating herself. Yet this condition of affairs has occurred in a time of profound peace, when the empire is settled—so far as China can for years hope to be settled within the eighteen provinces—and when the only external foe to be guarded against is the Ameer of Kashgar. It is true that the threatened rupture with Japan cost a good deal of money; but it augurs ill for the finances of a power like China, that the few weeks of preparation really undertaken should have so utterly exhausted its resources as to need an application to foreigners for capital. Had the finances of China been in a moderately sound condition, they should without difficulty have borne this strain, but so involved had they become, that it rendered necessary the present appeal to right them again. These circumstances are not hopeful for the future of the empire, as the government is at present administered; and now that China is about to take the first leap and become a debtor to the world at large, it will behove her to see that her revenues are administered in a less extravagant manner than at present. That the empire is capable of occupying a high financial position, no one who has studied the economy of the country, its resources, both mineral and agricultural, and the character of the people, can doubt. But all those things are rendered nugatory by a Government feeble and yet grasping, and which by unluckily always adopting the very worst means to an end, has succeeded in involving itself in its present complication. The breakdown of Chinese finance when exposed to the light strain put upon it by the threatened rupture with Japan, cannot, however, but have left its impress on the minds of those who direct the Government. If the mere rumour of a war with a small power like Japan so seriously interfered with the car of State, the consequences of any serious difficulty with one of the Great Powers would be overwhelming. When China was ignorant of the ways of the rest of the world, as at the outbreak of the first war, it seemed but a slight thing to offend a Power like England. Men there were in abundance, and the rude munitions of war within the experience of Chinese mandarins were readily obtainable without any very great expenditure of money or discomfort to the country. Experience has twice shown China that things have changed, and that even such measures as might have been effective in 1840, in 1875 would be of no avail. Even within that brief space the expense of war has probably quadrupled, and what China was unable to do then, with a comparatively uncrippled exchequer, is now altogether beyond her utmost endeavours. As we have pointed out, the very measures recently adopted to increase the revenue of the empire are in reality sapping its existence; but we fear that, although known to many Chinese officials, these unpleasant facts have not yet presented themselves in their nakedness to the *de facto* Government of China. The present loan may afford a breathing space to enable some relief to be introduced, but we fear that this will hardly be its result. To amend its ways, unless under the extremest pressure, would be contrary to all the traditions of China's policy. The slight relief afforded will, we anticipate, not be turned to the most useful, or to any useful, purpose. The terms of the loan are as we have stated fair, but one point attracts comment. Issued at £95 per £100 bond, the repayment of the principal by lot will effectually prevent the scrip ever rising above par. The future quotations of the loan will thus never be a fair criterion as to public opinion with regard to Chinese financial resources. Perhaps, on the whole, this will be an advantage; though it might, on the other hand, be useful if the Chinese Government had some external means of ascertaining the effect on its own credit of amelioration in its exchequer.

THE CHINESE RECORDER.

The concluding number for the past year of the *Chinese Recorder and Missionary Journal* has been published in good time, and contains some extremely interesting matter. Readers of the periodical will be glad to hear that, under its present management, it has been found possible to increase its size, and that for the future each number will contain about seventy pages of reading matter, for the small subscription of $3 per annum. Although nominally a class organ, the *Recorder* has always opened its columns to papers of merit on miscellaneous topics connected with the East, and within its pages are preserved many valuable notes, and the records of many observations which in all probability would otherwise have been lost. The index, however, in the present number, is very defective, containing nothing more than a bald list of the headings of papers, and this, in a work of this nature, which will eventually become extensively useful as a work of reference, must be looked upon as a shortcoming. The November-December number opens with a continuation of Dr. Bretschneider's notes on Chinese Mediæval Travellers, and is devoted to a consideration of the *Si-shi-ki*, a small work describing the travels of the Chinese envoy Ch'ang-te, sent by the Mongol Emperor Mangou Khan in the year 1259, to his brother Houlagou, who had just succeeded in overthrowing the Caliph of Bagdad. This pamphlet had already been translated by Rémusat and Pauthier, but with the usual want of accuracy which unfortunately marks the Chinese labours of those two men. Their texts were, besides, incorrect, but for this latter they would not be held responsible, not having the opportunities at Dr. Bretschneider's disposal for comparing the various surviving texts. Dr. Bretschneider's notes are peculiarly valuable, he having made the history of mediæval China his special study; and he is thereby able to elucidate a rather poor description with valuable notes. It is only with the greatest care that the information concealed in the few records of travels of those times handed down to us can be put in an available shape, and yet few historical topics are at present of greater interest than the revolutions which have taken place in Central Asia. Never in fact was the civilisation of the West in so great danger of extinction as at the time when Ghengis Khan and his successors were masters of Asia from the Yellow Sea to the Caspian, and when already their victorious arms for a time eclipsed the infant power of Muscovy. Mr. Phillips' paper entitled *Zaitun Researches*, will, as touching more generally

these topics, doubtless appear to most of greater interest. No part of Marco Polo's book of travels has been so much called in question as that portion relating to Fuhkien. Mr. Phillips' present paper will, we think, set the greater portion of those difficulties at rest. In the old text of Ramusio, from which most of the earlier editions of Marco Polo were taken, the traveller is described as entering Fuhkien from the city of Gieza Kieu-chow-fu; Fuhkien is styled Koncha (of which more anon) and we are told that Fugiu is its capital. Afterwards, he is taken to Unguen, a great sugar district, thence fifteen miles we are informed took him to Cangiu, from whence across plains and hills he reached Zaitun. In the text made use of by Colonel Yule, several additions occur. The journeys agree in the main as far as Kelinfu (Kien-ning-fu) whence the traveller proceeds as before to Unkèn (Unguen of the former text.) Here, however, a discrepancy arises. Col. Yule's text proceeds (Bk. II., Chap. LXXX.), "There is no more to say of this place, so now we shall speak of the splendour of Fuju. When you have gone 15 miles from the city of Unken you come to this noble city, which is the capital of the kingdom. So we will now tell you what we know about it." The next chapter (Bk. II., Chap. LXXXI), proceeds: "Now this city of Fuju is the key of the kingdom, which is called CHONKA, and which is one of the nine great divisions of Mangi." The city is a place of great trade and manufactures, is inhabited by people very ready to rise in rebellion, is built on a river a mile wide, makes sugar, and trades direct with the Indies. Mr. Phillips finds here many difficulties. Foochow is not a great place of trade or manufacture, does not make sugar in any quantity, and is not within 15 miles of any sugar district like Unken. Ramusio's text, as Mr. Phillips shows, is plain—Kwelinfu is Kien-ning-fu; Unguen, as Mr. Kingsmill was the first to point out, is Yungchun-chow, a noted sugar producing district, and moreover near Cangiu, the port for which Col. Yule's authority substitutes Fuju. Chinchew, as Mr. Phillips shows, answers all the circumstances of the case. Whence then did Fuju come in the text? Mr. Phillips cannot answer, and is sorely taken to task about it. We will make a suggestion. On entering Chouka we were told by Ramusio's text that Fuju is its capital, a sentence left out by Col. Yule's authority, which speaks of our entering the kingdom of FUJU. Chapter XXXI. speaks of the place in dispute being the "key" of the kingdom. The Fuju then of the earlier chapter, the "capital," is confounded with Cangiu, the "key," and to try and make the latter fit, the first quotation from Col. Yule's text was inserted. Leave out the interpolation at the end of Chapter LXXX., and for Fuju in the beginning of the next, read with Ramusio Cangiu, and everything drops into its place. Mr. Phillips then proceeds to identify Zaitun with a place called Geh-kong 月港 formerly a sea port near Changchow, but as he promises to give in a succeeding paper other and weightier reasons for his opinion, we may await its publication. A visit to the Yün-shui-tung by the Rev. Mr. Meech is at least useful as a guide to an interesting locality; while the Rev. Mr. Ross' Journey to the Corean Gate gives us much useful information on a topic of great interest. Corea, as Mr. Ross suggests, is certainly playing the game of Russia in her present jealous and foolish policy, and is laying herself out in the plainest manner for absorption by that omnivorous power. The other papers are of a purely missionary nature. Though sufficiently interesting to those devoted to such subjects, they are not of a nature to need discussion in an ordinary newspaper. We wish the new issue of the *Recorder* every success, and hope that it will this year carry out the promise with which last year closed.

Outports.

NINGPO.

A correspondent has favoured us with an item of news, the occurrence mentioned in which has caused intense excitement among the Chinese population of this city and neighbourhood. It appears that on the night of the 5th inst., three natives were engaged in some occupation at a distance of about three miles from the west gate, when they were fiercely attacked by a tiger, the animal's onslaught being so sudden that escape was impossible. One of the unfortunate men was killed on the spot, and the other two seriously wounded; but while the animal was occupied with the dead body of their late companion, these managed to make good their escape, and hastened into the city. The circumstance was reported to the Che-hien on the following morning, and he at once ordered out a detachment of 200 braves, to endeavour to capture the animal or destroy it. The detachment scoured the adjacent country, and fortunately found the tiger about two miles from the north gate, when it was shot dead by one of their number. They returned with their prize to the city in the evening, and its appearance excited the utmost curiosity. In size it is said to be as "large as a full-grown donkey," and it is beautifully striped. Speculation is rife as to how such an animal could have found its way through so populous a region as that surrounding Ningpo, in which the existence of wild beasts has been unknown probably for very many years.

TIENTSIN.

Early on the 26th instant snow began to fall, with the wind blowing strongly from the Northeast. This weather continued till about noon, when the wind veered to the Northwest, and the snow ceased. A couple of hours later it was blowing a strong gale from the Northwest, with the thermometer rapidly falling, till at daylight on the 27th it stood at seven degrees Fahrenheit. The river off the settlement was covered with ice about an inch in thickness. Since daylight on the 26th, it has continued to freeze, and this morning, I saw people walking across the river on the ice, and I heard later that sledges had begun to run on it. We have to-day, in fact, our proper Tientsin winter weather, such as we used to have before the summer inundations of the last four years in this region.

Since Christmas Eve, the usual social banquets of this festive season have been the order of the day—having, I should mention, been properly introduced by an avalanche of good things.

In my last letter I mentioned that the Prince Tun, one of the uncles of the Emperor, had been, by Imperial decree on the 14th December, appointed to represent His Majesty at the Temple of Heaven, on the observance of the sacrificial ceremonies at the winter solstice. In a decree in the Gazette of the 22nd December, it is stated that for the purpose of thoroughly re-establishing his health, His Majesty will abstain from the transaction of public business till the 11th of the 2nd moon of next Chinese year (our middle of March 1875); and in the Gazette of 24th December, it is announced that the Empresses-Dowager will meantime represent His Majesty.

In the Gazette of the 24th December, an edict announces the appointment of Chung-how, one of the chiefs of the Tsung-le Yamun, to fill the post of Right Vice-President of the Board of Finances, in addition to that of Vice-President of the Board of War. A decree in the Gazette of the 18th December, as I have already written to you, appointed Paou Keun, one of the chiefs of the Tsung-le Yamun, a Minister of State. In the Gazette of the following day another decree appoints him a chief of the Board of Magistracy; and at an audience on that day he presents his thanks for the former appointment.

The Governor-General, his Excellency Li Hungchang, left Tientsin on the 23rd for Paouting-foo, the capital of the province, where he will stay till next spring. Of course, during the 100 days for which the Emperor abstains from public business, His Majesty will not grant audiences to foreign Envoys; and as the Empresses-Dowager do not receive those Envoys, the Danish Minister will not be able to have an audience till next April at earliest.

28th Dec., 1874.

NEWCHWANG.

From Newchwang we hear on 15th December that Father Ph. Simon, a French Roman Catholic Missionary, died two days previously, after ten days illness. Father Simon was well known and much liked by the residents generally, for his kind heart, social qualities, and gentlemanly, unobtrusive manner. As a missionary, he was zealous, like most of his brethren; and he had built a little church which for architectural taste and design put every other building in the shade. His death is felt as a great loss, not only to the mission of which he was an ornament, and to the community, but to the many poor people whom it was his delight to teach and feed.

The river was not yet frozen over, and the weather remained comparatively mild, thermometer 15.

Messrs. Bush Brothers report, as on 1st December, that there was still no news from the south, although the Chefoo mail was daily looked for.

The following parcels of Manufactures have been placed, viz:—

Grey Shirtings, 8.4 lbs.,		Pagoda Chop	Tls.	1.67,	20 bales.
T-Cloths.....	7 ,,	,,	,,	1.57,	10 ,,
Drills English	15 ,,	Chimney Chop	,,	2.40,	30 ,,
Do.		Horse ,,	,,	2.46,	40 ,,

Malwa in quoted about Tls. 480, nominally.

FOOCHOW.

The *Herald* regrets to have to record the destruction of Dr. J. M. Beaumont's residence, by fire, on the morning of 26th December. The fire is supposed to have originated in the roof—close to one of the chimneys. There was no wooden beam in the chimney, but the inference is that some soot had been ignited, and, smouldering for an indefinite period in the upper part of the chimney, had heated and charred the adjacent rafters. The alarm was given about 4.30 a.m., and the fire spread with such rapidity along the roof that Dr. Beaumont had much difficulty in escaping with his life—only partially dressed. Nothing whatever was saved.—

A notice to mariners intimates that the Beacon which was erected on the southern end of Middle Dog Island, in 1861, as a range mark to guide vessels into the entrance of the South Channel leading to the River Min, was blown down during the month of November last, and will not be rebuilt; as owing to the shifting of the banks it had ceased to answer the purpose for which it was intended, and the natural marks are now deemed a sufficient guide into this channel.—Regarding Tea, Messrs. John Forster & Co.'s Market Report of 2nd inst., states:—Owing to the near approach of the native New Year, the Teamen have been more anxious to clear off their remaining stocks, and in consequence more activity has been apparent in this market. The principal feature has been the resumption of business in Oolongs for America, the Teamen having been at length obliged to accept the much reduced offers of buyers. Arrivals from the country have ceased, and business for the season would be closed by the settlement of the small stock of Congous and Oolongs now left.—No departures of tea vessels are recorded, and there are none on the berth, while the only one expected is the str. *Ajax*, for London.

HIOGO.

The *News* says that small-pox, thanks to the want of a compulsory system of vaccination, is again prevalent in the native town, and that a foreigner resident upon the Concession is suffering from this terrible scourge.—A Japanese has been arrested in the Concession, charged with a murder committed in Main-street three or four years ago. The man has been working honestly ever since. —The *Tokio-maru*, having on board General Saigo and about 40 officers connected with his staff, Admiral Akamatz and Lt. Cassel, arrived in Kobe at about 1 p.m. on the 24th ult. As she passed Hiogo Bay she was saluted by the Japanese man-of-war lying there. The unfavorable weather somewhat interfered with the intended demonstrations of the people, who had made great preparations.—One of the bettos charged with murderously assaulting one of their fraternity for refusing to pay the "King of the Bettos" the usual poll tax, turns out to be "wanted" for a robbery of the Imperial Mails which took place several months ago on one of the roads in the vicinity of Yedo.

NAGASAKI.

The *Rising Sun* in alluding to the new postal arrangements between America and Japan, says:—At each of the open ports, a foreign director has been appointed to look after the interests of the several foreign countries; and though they are all Americans so far as we know, still we have confidence there will be no favouring of one nationality more than another. At Nagasaki, the foreign department is to be under the management of Mr. J. W. Clarke, a gentleman who has been connected with the United States' postal service for nearly 13 years. The new Post-office is described as a very creditable building.—Christmas-day was well observed at Nagasaki, both ashore and afloat. The vessels in the harbour, says the *Sun*, were neatly decorated with foliage from the neighboring hills. Of course it was a free day for the sailors, and numbers being ashore, found their way to the grog-shops, in the absence of a Temperance Hall. Sundry free fights between seamen of different nationalities were the natural result; and some of the men of the *Mosquito*, who have behaved themselves in a very creditable way during their stay in Nagasaki, with a few exceptions, lost all control over themselves, and went so far as to threaten to pull down the Garibaldi Hotel about the ears of the landlord. —In a row between some Chinese and Malays, one Chinaman was badly wounded with a knife.—On the 27th, the steamer *Nanzing* left Nagasaki for Hongkong, loaded with coal and a general assortment of goods. She had on board also the distinguished Japanese personages who came in her from Yokohama for the purpose of transferring the Takasima Colliery to the new purchaser. On the day before the *Nanzing* sailed, the German man-of-war *Arcona*, while leaving the harbour, collided with her, carrying away the taffrail, stern davits, and a portion of the upper deck. The *Arcona* sent a boat to enquire into the amount of damage.—The state in which the books belonging to the Ono Bank have been found, does not appear to be very satisfactory, for a notification has been issued by the Governor stating that on examining the books no record was found of any transaction with foreigners.—The P. & O. S. N. Company's steamer *Orissa* put into Nagasaki on the 31st ult., short of coals.

YOKOHAMA.

The dearth of news in the Japan papers received by the *Costa Rica*, shows that the several Settlements, like Shanghai, have suffered from the effects of holiday-keeping, and that business of all kinds has been at a standstill.—Among the more important items just now, is one of much interest to the foreign community not only of Japan, but also of those ports at which ships arrive from that country, viz., that the most strenuous efforts are being made to avert the spread of small-pox, and that the Japanese are now submitting themselves to vaccination and to re-vaccination in large numbers. On the 25th ult., no fewer than four hundred operations, says the *Mail*, were successfully performed at the Japanese hospital, under the direction of Dr. Simmons and Japanese students. The prevalence of the disease among the pupils of the Kaiseigakko has alarmed the foreign teachers, who are stated to have "struck" work in consequence. Dr. Ritter, Professor of Chymistry and Natural Philosophy in the Imperial College at Yedo, has died from small-pox.—A proclamation has just been issued by the Comptroller of the Imperial Household, intimating that there would be at the end of last month, "a great concourse of poetry," wishing a happy new year to the Imperial family. Officers, daimios, samurai, priests, peasants, and in general "all who feel themselves capable of writing poetry," are invited to send their contributions, by post, for examination, to the Minister of the Imperial Household,—the sending by post being adopted for the first time.—The *Nichi Shimbun* states that Shimada the native banker stopped payment on the 19th instant. His business ramifications were very extensive. The liabilities are supposed to reach 900,000 *yen*, consisting chiefly of deposits from the various *ken*.—The *Mail* says the public entry into Yedo of the Formosan Army has been again postponed.—The German Club have given an amateur theatrical performance which fully sustained the reputation which the *corps* earned last year. The pieces were well selected, and the acting was for the most part full of spirit and consequent effect. The new Post Office, which is situated on the Main Street, adjoining the Custom House and facing the Kanagawa Kencho, is described by the *Mail* as an unpretentious edifice, erected with that indifference to durability of material which so largely characterises local architecture.—An order has been given to reconstruct the Imperial palace and the offices of the Ministry of the Imperial Household, on the same place which was occupied by the castle destroyed last year by fire. The *Herald* hears from private sources that it is intended to reconstruct the palace in the European style, and that it is also proposed to rebuild the whole of the public offices after foreign models.—The first paper hunt of the present season came off on the 29th ult., and was fairly attended by riders. There was a good course selected, including some stiffish jumps. Mr. Abbott on *Ivanhoe*, was the winner, followed by Mr. Tyler, on *Mormon*; Mr. St. John, on *Kingcraft*, third.—The *Gazette* states that H. E. Yanagiwara, Ambassador to the Court of China, and suite, reached Yokohama per P. M. S. S. *Golden Age*, on Christmas morning, from Shanghai. A salute of 21 guns was fired by the Kanagawa Forts, on his Excellency landing.

CANTON.

The transport of the remains of the late Viceroy will take place next Monday, the 11th inst. The land route is taken in preference to the sea transit. The cortège is said to consist of over 3,000 men, the coffin alone requiring 64 men to carry it. No doubt the ceremony will be a very interesting one, as no expense is spared to make it as imposing as possible. Requisitions will be made on the officials along the route the procession passes through.—Various robberies, and an attempted piracy of a passage boat, are reported. In one case a party of robbers intercepted a wedding procession, and began to possess themselves of the valuable dowry. Not satisfied with this, they broke open the bridal chair with the object of removing the costly ornaments from the person of the bride. The outcry raised by the men of the procession attracted the attention of the bridegroom's party, who fearing something wrong, turned out and arrived just in time to relieve the bride from the ignominy of being dragged out of her chair.—*China Mail.*

HONGKONG.

The *Daily Press* understands that Colonel Loring, the U. S. Vice-Consul at Hongkong, has received a letter from the Consul at Swatow, stating that he had sent a messenger to the wreck of the *Japan*, and that its exact locality had been ascertained. He also mentions that the bodies of two Chinamen, with upwards of $2,000 in gold upon them, had been picked up.—Three men charged with being concerned in the *Spark* piracy and robbery, were committed for trial at the Magistracy on 30th ult.—A curious case is being investigated there, in which a man named Richards, a seaman on the ship *Weymouth*, is charged with the unlawful possession of a quantily of jewellery, suspected to be the proceeds of an extensive robbery in Newcastle, N.S.W.—An inquest has been held on the body of a soldier who is supposed to have met his death by a fall in the Gymnasium A comrade said deceased was on a parallel bar and was performing a feat known as the "muscle grinder" exercise. He was swinging the contrary way to that which the bar was put in; the bar sprang out and he fell heavily. The spine was dislocated and a vessel on the brain ruptured.—The *China Mail* states that the crew of the French brig *H. & L.* have been sent to Saigon by the M. M. S. S. *Sindh* for trial on a charge of murdering their late Captain, Planchet. —At a meeting of members of the Victorian Recreation Club, it was resolved that $3090 having been promised by subscription and donation, the rebuilding of the premises of the Club, destroyed by the typhoon, should now be proceeded with.—The *Mail* states that Captain Warsaw has left for Swatow, where he will join the str. *Yottung*, chartered to proceed from Swatow to search for the wreck of the S. S. *Japan*, and if successful in the

search, to buoy the wreck, with a view to obtain the treasure lost in her, if practicable. The surviving Chinese passengers from the *Japan* are holding a religious ceremony in the Sing Wong Josshouse, in commemoration of their safe deliverance from the calamity. They are evidently still in possession of large sums of money, from the expensive way in which they celebrate the thanksgiving.—Mr. Henry Kingsmill has published a letter he addressed to Mr. Greig, chief manager of the Hongkong and Shanghai Bank, enquiring as to the truth, in whole or in part, of the rumoured movements and changes in the staff of the Bank which we mentioned in our last issue. Mr. Greig replied on the 4th inst., that he is instructed by his Directors to inform Mr. Kingsmill that "Mr. McLean, who has recently acted as Manager in London, has, by order of the Directors, started from London on a tour of inspection of the Bank's Eastern Branches and Agencies. Mr. Thomas Jackson, lately Manager of the Yokohama Branch, has been appointed to act as Manager in London during his absence, and Mr. Rowett has been appointed to act as Sub-manager at the latter Branch for the same period. Beyond these appointments no other have been made as regards the London Office or the inspectorship of the Bank."—The *Fort William* has been towed to Canton, to be broken up.—H.M. ships *Elk* and *Avon* have finally left for home, *viâ* Singapore. The *Iron Duke* was to leave Hongkong on the 9th inst., for Singapore, which she will leave about three days after the arrival of H.M.S. *Audacious* for home.—A Cricket Match between the "Garrison" and the "Hongkong Club" was played on the Cricket Ground, on the 1st and 2nd inst., ending in a victory for the former.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

Dec. 13th.—(1)—A Decree according memorial boards to the temple of the God of the Sea at Hai-ning Chow and Jên-ho in Chekiang, on the application of the Governor, who has represented the divine assistance rendered in maintaining the solidity of the coast embankments.

(2) The Governor of Shantung, Ting Pao-chêng, memorializes reporting his departure from his home in his native province of Kweichow, after completing the repairs of his ancestral tombs, on the 29th August, in order to return to his duty within the year graciously accorded him for leave of absence. He arrived at Wu-ch'ang Fu on the 19th October, and reports the harvests abundant and the condition of the people happy and contented along the line of his journey through Sze-ch'wan and Hupeh. As five years have elapsed since he was granted an audience, he is possessed with a continual anxiety to gaze upon the countenance of Heaven, as a dog or a horse longs for a sight of its master, and he entreats permission to visit Peking for this purpose before resuming his office. He intends to travel overland from Ts'ing-Kiang P'u northwards, and hopes to meet on the way the answer to his request.—Rescript in the vermilion pencil: There is no need for him to come and have audience.

The remainder of the *Gazette* is occupied with administrative details from Ngan-hwei.

Dec. 14th—(1)—A Decree. For the great sacrifice to be offered on the 22nd of this month at the altar of Heaven, We ordain that the Prince of Ch'un, Yih-hwan, do reverently perform the ceremony in Our stead.

(2)—The Governor-General of the Two Hu and the Governor of Hupeh memorialize reporting the outbreak of a popular disturbance at Lao Ho K'ow, in the Kwang-hwa district, bordering on the province of Honan. A military officer having been sent to that place to superintend the proper working of the system of salt supply from the Sze-ch'wan government agency, and to guard against the introduction of smuggled salt from the northeast (Liang Hwai) division, he discovered that a great abundance of counterfeit *cash* were in circulation, and both issued notices in concert with the local authorities stringently prohibiting this practice, and likewise took measures to arrest the offenders. Upon this a number of lawless vagabonds leagued themselves with the police of the district Magistrate, and taking advantage of an opportunity when the Magistrate had gone out of town, they convoked a public gathering on the 26th April last, compelled the shopkeepers to close their shops, and attacked and pillaged the Salt-office. One of the rioters was killed in the fray by a soldier of the local force. Some arrests have been made, but the confessions obtained are unsatisfactory, and a rescript is requested stripping the Magistrate of his button and holding him answerable for the apprehension of the actual ringleaders.

Dec. 15th—The Tartar General and Superintendent of Customs for the Province of Fuhkien memorializes as follows. It has already been reported that the junk with tribute from Liu-ch'iu arrived at Foochow toward the close of last year, when duties were remitted upon the merchandize imported by her, as the regulations provide. Her business being now at an end, the junk has sailed on her return voyage. The Customs' deputy at Nan-t'ai has reported to the effect that the envoy who was on board the junk, named Tung She-hien, has handed in a list of the Chinese merchandize purchased and shipped on board, from which it appears that the amount of duty for which exemption is to be accorded is Taels 283.1.9.8. The Superintendent of Customs has given orders hereupon to waive the payment of this sum, in accordance with precedent, and in furtherance of the profound benevolence displayed by the Sacred Ruler in tenderly cherishing the men from afar. He has notified the same in a mandate addressed to the foreign envoy. The Custom's deputy has further reported that the envoy, followed by his attendant officials and the crew of the junk, has performed the ceremony of the Kotow at the Custom-house, all with faces turned in the direction of the Imperial abode, in thanksgiving for the celestial favours, which have filled them with joy and gratitude. After this they had set sail on their return voyage.

December 16th. (1)—The President of the Court of Censorate reports that an accusation has been lodged by Wu-ying, a writer of the Court, against Têh-ts'ûan, a head-clerk of the same department, for extortion and intimidation. The complainant states that, on being posted to his appointment as writer, he lent Têh-ts'ûan Taels 30, and that, on sending in an application for leave to go to meet his parents, he made the same person a further loan of a like amount. On applying subsequently for repayment, he was told that these sums were amounts due on his appointment and obtaining leave; in addition to which various payments by way of gratification have been repeatedly demanded of him, and for two years past the whole of his office allowance has been withheld. Beside this, a claim of twenty odd taels by way of interest has been pressed against him, and he has not ventured in consequence to present himself at the office for the discharge of his duty. The accused person denies these charges; and it is requested that both parties may be handed over to the Board of Punishments for judicial investigation.—For rescript see *Gazette* of Dec. 4th.

(2) The Governor of Hunan exposes an individual holding the appointment of expectant Taotai, named T'ang Shêng-wee, who, originally a personal attendant of a sub-Magistrate in that province, has availed himself of the laxity which has been an inevitable concomitant of the purchase system, to obtain an official position. He has made himself notorious by divers acts of a disgraceful nature; and on enquiry being instituted, his base origin has been brought to light. It is requested that he be stripped of his official rank, and condemned to the penalty of 100 blows, beside being placed under rigorous surveillance.—Acceded to by rescript.

Dec. 17th.—The Court Circular announces that Tsiang Yih-li 蔣益澧, heretofore holding office as Judicial Commissioner of Shansi, has paid his respects on his arrival at Peking. (N. B. This is the once-famous Governor of Kwangtung, whose activity and zeal for financial reform led to his removal and degradation to a Judicial Commissionership in 1867. He has since then remained in retirement.)

(1) The Ministers of the Presence have received his Majesty's verbal decree as follows. Henceforward, in all cases when memorials are handed in from any of the departments of the Government in the Manchu language, let them be written in parallel columns with the Chinese text. (This is for the convenience of the Empresses Dowager, during his Majesty's illness; as the Imperial ladies do not read Manchu.)

(2) The Governor-General of Fuhkien memorializes reporting that the chief perpetrators of a daring robbery on a pawnshop within the city of Ts'üan-chow Fu (Chinchew) which took place a year and a half ago, have at length been apprehended. From the confession of the prisoners, ten in number, it appears that the gang consisted of 17 individuals. The prisoners are condemned to death.

Dec. 18th.—Imperial Decree. Whereas, on the happy occurrence of a visitation of smallpox which has this month befallen Us, We have been besought in unison by the Prince of Tun and his colleagues to undergo restorative attention in undisturbed tranquillity of mind, it has nevertheless seemed impossible, as We reflected on the solemn importance of the affairs of State, that We should dare to take thought for Our own comfort and repose. Yet, as our bodily frame at the present juncture is unequal to the effort of sustaining fatigue, it behoves Us consequently to give ear to the request. In deep apprehension, however, lest any neglect be entailed in the absence of attention to affairs, We have addressed reiterated supplications to their Majesties the Empresses Dowager, entreating that, in consideration of the fact that Our person is for the time being under restorative treatment, they will deign to suffer the submission of all representations from departments of the government in the capital or the provinces to their perusal and decision. To Our deep joy and gratitude their Majesties, in the affection with which they overflow toward Us, have consented to act in this manner. Let this be promulgated for the information of all, throughout the Empire.

(2).—A Decree. Lei Pao-yün 寶鋆 be appointed to the vacant post of Grand Secretary.

(3).—The Governor of Kiangsi denounces the late Magistrate of the Lin-ch'wan District for defalcation and acts of violent misconduct. When handing over charge to his successor he was found to be a defaulter in the amount of Tls. 5,430, under different heads of revenue collection. In the month of May last his daughter-in-law, having fallen out with him on her demanding payment of her expenses for the journey back to her native place, lodged

complaints at the Magistracy and Prefecture, and with the Financial Commissioner, accusing her husband's younger brother, Li Wên-shên, of having in his possession amounts appropriated from the public revenue. Upon this Li Wên-shên was arrested and imprisoned. His father subsequently burst into the Yamên of the Prefect of Fu-chow Fu, and insisted on having his son set at liberty; and some time afterwards he forced his way into the Yamên of the Financial Commissioner of the province, despite all opposition, and intruded within the private apartments, where he stormed like a madman on reaching the Commissioner's presence. It is requested that he may be stripped of his official rank and made a prisoner for trial. —Granted by rescript.

(4).—The Governor of Kiangsi further reports an attempt at insurrection in the province. From the reports addressed to him at sundry times by the prefect of Jao-chow Fu and the magistrate of the Po-yang District, it appears that a number of desperadoes have been captured, upon information received, together with arms of different descriptions, such as daggers, spears, etc., and on being brought to trial the following facts were elicited. Wang Shêng-yang and four other prisoners were agricultural labourers from districts bordering on the Poyang Lake, and another prisoner named Chow Yü-hien, a native of Hupeh, was an itinerant professor of the arts of self-defence and medicine, with whom they were acquainted. Wang Shêng-yang had fallen in by the roadside with another Hupeh man named Lin, who had entered into conversation with him on the advantage to be derived from combining with others to form a brotherhood, by which means aid could be mutually looked for in times of trouble, and resistance be offered to oppression from any quarter. Wang having agreed in this, Lin said he could set out at once to repair to the Ma-chêng district in Hupeh. In the month of January last, Wang had secured two confederates, named Li T'ien-ki and Chow Jih-hwei, who, in turn, had obtained the participation of sundry others whose names are given, and had further compelled or inveigled an additional number of persons into joining the brotherhood. In May last Chow Yü-hien came to Wang's house, where he took lodgings, and set up a pugilistic school, and he agreed to become a member of the confederacy. He devised for it the name of *T'ai-p'ing T'ien-shun* 太平天順, and it was arranged that confederates should be enlisted with a view to raising a rebellion. Wang Shêng-yang was unanimously elected as chief, with five assistants, two of whom respectively agreed to collect a body of 1,000 adherents, and it was further arranged that all were to meet on the 2nd September at a given rendezvous, using the password *T'ien Shun*, and kindling conflagrations as their signal. They were to be armed with daggers, but had no banners or firearms. If they should succeed in obtaining a memerous band of adherents, it was intended to capture the city of Jao-chow, and proceed to form a government; but if the numbers should be few, their object would be to gather plunder and go their several ways. It was while they were in the act of recruiting confederates that the civil and military authorities got wind of what was going on, and one of the party, named Chow Jih-hwei, having come forward to betray the rest, the prisoners were apprehended as above mentioned. The Governor reports that Wang Shêng-yang and two others have been summarily executed, some of the remaining prisoners being respited in order that they may be brought forward to give evidence when further arrests are made. Eleven of the persons who are proved to have been intimidated into joining the confederacy, without any complicity in the design to engage in rebellion, are sentenced to the penalty of the cangue and beatings, after which they are to be released under security.

Public Meetings.

MUNICIPAL COUNCIL FOR SETTLEMENTS NORTH OF THE YANG-KING-PANG.

Council Meeting of 21st December, 1874.

Present :—Messrs. John G. Purdon (chairman), Geo. J. W. Cowie, F. E. Hoyden, F. W. Lemarchand, R. Mackenzie, E. Seligmann, S. D. Webb, and the Secretary.

Volunteer Corps.—Resolved that the election of Mr. James Hart, as Major of the Corps, and of Mr. T. Brewer, as Captain of No. 1 Company, vice Mr. J. Hart, elected as above, be confirmed.

Iron Bridge—Spanning Hongkew Creek, Broadway.—Plan for lowering submitted, considered, and approved.

Width of Yang-king-pang Creek.—The following letter was received from Mr. J. P. Bisset, Agent for Mr. A. Cushny and ordered to be published :—

French Encroachment on the Yang-king-pang Creek.

E. B. Souper, Esq.,
Secretary Municipal Council, Shanghai.

Dear Sir,—Observing from the published minutes of late Council Meetings, that the above question has again been brought up, I wish, on behalf of Mr. Cushny, owner of most of the land on the North bank of the Creek between the Shantung and Fokien Roads, to urge upon the Council the desirability of having the question brought to an issue, and the Creek restored to, and maintained at, its original width of 50 feet.

I am prepared to produce a survey of Mr. Cushny's property, made by Messrs. Gribble and Whitfield in 1862, by which it will be seen that the measurement of his land is taken from the centre of the creek, and that opposite to the most of his land, the said centre was 55 feet from the stones placed to mark the north edge of Sungkiang Road, allowing 25 feet for half the creek and 30 for the road. Mr. Cushny has informed me that he recollects being present when the creek measurements were made, and that a coolie waded into the creek at low water, placing a pole in the centre of the small stream then flowing, from which the measurements were taken. If I am not mistaken, this was done with the approval of a native official, who was present.

Allowing 25 feet for half of the creek on the French side, their bunding should be 80 feet from the boundary stones above mentioned, but it is now about 66 to 67 feet, being an encroachment of 13 to 14 feet. If the bunding on this side be carried out in the same proportion, (which, if justifiable in the one case, would be justifiable in the other), the width of the creek would be reduced to some 25 feet, and the traffic seriously interfered with.

Mr. Cushny having surrendered the 55 feet composing the Sungkiang Road and half of the creek to public use, is precluded from taking any active steps to protect his own and the public rights, but it is plainly the duty of the Council to do so. I beg, therefore, to ask the Council to use every endeavour to have these rights duly protected.

I am, Yours faithfully,
J. P. Bisset,
As Agent for A. Cushny.

Shanghai, 7th Dec,, 1874.

The Secretary was instructed to inform Mr. Bisset that the French Municipal Council had already been addressed in the matter, and that the Council were waiting their reply.

Jinrickshas.—Considered petition from proprietors of jinrickshas, praying that the Municipal Regulations enforced against their vehicles with regard to loitering and carrying of lights, should be applied to wheelbarrows, as otherwise the jinrickshas were placed at a disadvantage in plying for hire. Referred to Watch Committee.

Arrest by Shanghai Municipal Police at Ningpo.—Read following letter from H.B.M.'s Consul, forwarding enclosures from H.B.M.'s Consul at Ningpo, and H. E. the Taotai of that place, lodging complaint relative to the arrest of a Chinese subject named Wu, in the neighbourhood of Ningpo, by two of the Shanghai Municipal Police.

British Consulate,
Shanghai, 19th Dec., 1874.

Sir,—I have the honour to enclose copy of a letter, with its enclosure, from Her Majesty's Consul at Ningpo, complaining of an arrest without warrants, and within Chinese territory, by detectives acting under your authority; and I shall have much pleasure in being the means of conveying an explanation that will satisfy the Taotai of Ningpo that there has been no intention to set his authority at defiance, or to ignore Treaty stipulations.

I have the honour to be,
Sir, Your obedient Servant,
W. H. Medhurst, *Consul.*

J. G. Purdon, Esq.,
Chairman, Municipal Council.

British Consulate,
Ningpo, 17th Dec., 1874.

Sir,—I have the honour to inform you that last Friday, about 1 o'clock in the afternoon, a party of Shanghai Municipal Police dragged a native named Wu from his mule, as he was riding near the West Gate, and took him in custody. The arrest was witnessed by one of Colonel Cooke's sentries, who wisely insisted on the man being taken to the Foreign Police Station, where an investigation could be held. On arrival at the Station, Mr. Golding, the Superintendent of Police, asked the Shanghai detectives by whose authority they had made the arrest, upon which one of them produced a paper as his warrant which ran thus :—"My dear Golding,—A man whom the bearer will be able to point out to you is charged with kidnapping a girl from No. 44, Woohoo Road, Shanghai. Two of his accomplices are in custody on remand, as the Magistrate wishes this man to be brought before the Court. If you can render them any assistance, and get the fellow sent back to Shanghai, you will greatly oblige yours faithfully, A. Stripling."

Mr. Golding refused to admit the validity of this paper, and detained all parties concerned until he could consult with Colonel Cooke. Meanwhile, the seizure of Wu,—who as a kind of foster-brother to the Intendant's grandson had been living at the Yamên,—came to the knowledge of the Taotai; and that official, believing that Colonel Cooke had ordered the arrest, sent an officer to him demanding the instant release of the prisoner, and explanation as to why he was arrested and by what authority.

The man was of course handed over to the Taotai, but the explanation that he had been arrested by some Shanghai policemen without the knowledge of Colonel Cooke or any one else in authority here, excited the Taotai's indignation to such a degree that he talked of at once abolishing the entire establishment under foreign control, including the fire department and foreign police. He wrote me an indignant despatch, and I assured him in reply that a mistake had been made which was not likely to occur again; and having promised to place the matter officially before you, the detention of the detectives who made the seizure was not insisted on. I enclose translation of the Taotai's despatch, for your information.

The affair is very unfortunate just now, because I am well aware that opportunities are being eagerly sought to get rid of the entire foreign establishment here, which has worked so well hitherto under the control of Colonel Cooke. The small officials, who have a keen dislike to everything foreign, will not fail to make capital out of Mr. Stripling's indiscretion, by pointing out this occurrence as the inevitable result of the employment of foreigners. The immediate result will be, I fancy, the escape of Wu, and the certain arrest and punishment of any detectives whom Mr. Stripling may see fit hereafter to send down here, without the consent of the local officials, to arrest a culprit. I hope you may see fit to bring the subject of this despatch to the notice

of Mr. Stripling, whose undoubted zeal may in consequence be tempered in future with more discretion.

I have the honour to be,
Sir, Your obedient servant,
(Signed) R. J. FORREST,
H.M.'s Acting Consul.

W. H. MEDHURST, Esq.,
H.B.M. Consul, Shanghai.

(Translation.)

KU, *Taotai*, to Mr. FORREST.

I have received a petition from Wu Tsai-chia, a graduate of the district of Ying, which states as follows :—

My son Ying-ting is a merchant by profession, and has been guilty of no punishable offence. About noon on the 11th instant, he was unexpectedly accosted and arrested at the West-gate by a party consisting of one of Colonel Cooke's men and some runners, and thrust into the foreign police station. I humbly submit that if my son had been guilty of any crime, he should have been arrested by the local Authorities ; Colonel Cooke has presumed to arrest my son on his own authority ; I therefore beg that you will be pleased to have him brought before you, and issue orders for his release.

When a Chinese subject commits an offence where foreign as well as Chinese interests are concerned, the case should be investigated and dealt with by the local Authorities in conjunction with [the foreign officials.] In the present case, I was quite at a loss to understand how Colonel Cooke could have taken it on himself to arrest the man without authority ; I lost no time in communicating with him on the subject ; at the same time I had the accused brought before me, and released him on my own responsibility. I am now in receipt of Colonel Cooke's reply to my communication. He states that Wu Ying-ting was arrested at the West-gate by certain members of the Shanghai Municipal Police Force, and one of his men, who was sentry at the gate, seeing a disturbance take place, asked them what they were about, to which they replied they were taking a man to the foreign police station ; the sentry accompanied them to the station, but had nothing to do with the arrest. On their arrival at the Station [the Shanghai constables], produced a letter from the Central Police Station stating that Wu Ying-ting had swindled some one in Shanghai, and then run off to Ningpo ; and that orders had been issued to the Municipal Police by the Mixed Court to proceed to Ningpo and arrest him, but take no further action till the Court should have communicated [with the proper Authorities at Ningpo], when they could obtain the assistance of [the Ningpo-police] to conduct the accused back to Shanghai. Colonel Cooke goes on to state that he knew nothing whatever about the matter ; had issued no warrant of arrest, nor had his men taken any part in the arrest ; that he cannot therefore understand why Wu Ying-ting should have presented a petition so full of fabrications, and begs I may order him to be brought up for examination and severely punished. Whether Wu has committed the offence in Shanghai attributed to him or not, and run off in consequence, no steps can be taken in the matter till a proper official communication has been received from the local Authorities on the subject ; so that thus the matter stands at present. I cannot have the accused brought up for examination, and I have sent further instructions to Colonel Cooke how to act. By Treaty, when a Chinese subject commits any offence, it is the duty of the Consul to communicate with the local Authorities and request them to deal with the case. In the present case, whether Wu has swindled any one in Shanghai or not, though there is a letter from the Central Police Station, there is no official communication from the local Authorities, nor have I received any communication from yourself. What right have the Shanghai Police to come to Ningpo and take it on themselves to make an arrest in another province ?

I have therefore to request you will be good enough to write to the Consul in Shanghai, and beg him to take the case in hand.

11th Moon, 6th day.
14th December, 1874.

And the following reply agreed upon, embodying explanation of the circumstances and an expression of the Council's regret at the occurrence. At the same time stating that instructions had been given to the Police which will prevent similar proceedings in future.

Municipal Council Office.
Shanghai, 23rd December, 1874.

SIR,—I have the honour to acknowledge receipt of your dispatch of 19th instant, with enclosures from Mr. Forrest, H.B.M.'s Consul at Ningpo, and from H. E. the Taotai at that place, relative to the irregular arrest of a Chinese subject named Wu, in the neighbourhood of Ningpo, by two of the Shanghai Municipal Police Force.

The Council regret exceedingly the occurrence of this affair, and I therefore hasten to inform you, and, availing of your kind offices, the Chinese Authorities at Ningpo, that the proceedings on the part of the detectives referred to were unauthorized, and are condemned alike by the Council and Mr. Stripling, the Acting Superintendent of Police, whose conduct in the affair will best be gathered from the following statement of the case :—

The Chinaman Wu is known to have been implicated in the abduction of a Chinese woman in the Settlement during the month of October last, and a warrant had been issued for his arrest by the Mixed Court Magistrate. Wu, however, managed to escape to Ningpo, and it then became necessary to obtain a fresh warrant, from H. E. the Taotai here, to arrest the man in Ningpo. This caused some delay, and in the meanwhile two detectives were sent to Ningpo to watch Wu, until this new warrant had been procured. They were furnished with a semi-official letter from Mr. Stripling to Mr. Golding, requesting the latter to afford them any assistance he could in this direction.

This letter was not delivered until after the arrest had been made ; and it is due therefore to the foreign officials at Ningpo, to state here that they knew nothing whatever of the steps that were being taken to keep sight of Wu. Before the warrant reached Ningpo, the police discovered that Wu was about to depart into the interior, and over-zealous in their endeavours to capture the fugitive, committed the act complained of. They had no instructions to make the arrest ; and in consequence of their behaviour on the occasion, both will be reprimanded and one dismissed the Force—further instructions being given to the Police which will prevent similar proceedings in future.

The Council beg you to note that H. E. the Taotai's warrant had been applied for and reached Ningpo before the seizure had been reported in Shanghai.

Trusting this explanation will be satisfactory, and remove any unfavorable impression that may have been formed of the conduct of the Council or the Acting Superintendent of Police.

I have the honor to be, Sir,
Your obedient sevant,
J. G. PURDON,
Chairman.

W. H. MEDHURST, Esq.,
H.B.M.'s Consul, Shanghai.

ADMINISTRATION MUNICIPALE DE LA CONCESSION FRANCAISE.

Résumé des délibérations du Conseil.

Séance du 22 Décembre, 1874, sous la présidence de M. A. Voisin. Conseillers présents : M.M. E. Ewald, F. D. Hitch, H. Maignan, E. Millot. H. Sayn, Secrétaire.

M.M. Hennequin et Lang empêchés n'ont pu assister à la séance.

Approbation de la proposition émise par le Comité des Finances tendant à stimuler le zèle de l'entrepreneur des vidanges en lui garantissant à l'expiration de son contrat une prime de Taëls 100, s'il en a rempli les conditions sans donner lieu à des plaintes fondées.

Approbation des propositions émises par le Comité des Travaux et de la Police, relativement :—

A la continuation progressive du système de drainage par l'exécution de travaux dans la partie Sud de la rue Touranne, dans la rue de l'Administration, et dans la rue du Consulat, sur une longueur de 257 changs ;

A la plantation d'arbres sur les voies publiques ;

A l'empierrement du quai du Yang-king-pang entre les ponts No. 1 et 2, et l'établissement de bordures et rigoles de trottoirs dans la même partie de ce quai ;

A l'application d'une couche d'huile sur les ponts de la route de Sikaway, du cimetière et sur le canal de la pagode ;

A la rectification d'alignement des murs d'entourage de l'Hotel Municipal, et à l'établissement d'une grille en fer sur la façade, ainsi que le remplacement des trois portes en bois par des portes en fer ;

Et enfin, au paiement des gratifications de fin d'année au personnel de la Garde Municipale.

Comme garantie des intérêts de l'Administration, le Président est chargé de prier M. le Consul-Général, de faire réclamer de tout postulant à un emploi dans la Garde Municipale, un certificat de validité signé par le médecin et approuvé par l'Administration.

Examen d'une pétition des détenteurs de licences pour jin-rick-shaws demandant d'assujétir les brouettes au même réglement de police que les jin-rick-shaws.

Aucune détermination ne pouvant être prise sans l'existence d'une entente entre les deux Administrations Municipales, cette question est renvoyée à l'examen des membres délégues par les deux Conseils.

Communication d'une lettre du Municipal Council présentant quelques observations relatives à la part de dépenses qu'il a à supporter pour la reconstruction du pont No. 4, et au désir d'une rectification d'alignement du quai du Yang-king-pang. Le reglement de cette affaire est remis entre les mains des délégués.

Accordé à M. Berthet, inspecteur du service de salubrité, son rapatriement dans les conditions suivantes :

Billet de passage Taëls 111.60.

Secours et gratification d'un mois de solde Taëls 167.50.

Appel est fait au personnel de la Garde pour le choix d'un inspecteur du service de salubrité.

Le titulaire continuera à figurer sur les rôles de la Garde, en portera l'uniforme avec marque distinctive de son service spécial, mais ne sera pas astreint au service ordinaire d'agent de la Garde. Appointements Taëls 45 par mois.

Des pourparlers ayant été entamées entre l'Administration et M. Hanssen, pour une cession de terrain à l'effet d'élargir la rue du Consulat, le Consul décide de faire appel à un arbitre pour s'entendre avec celui de M. Hanssen.

Réclamation de M. Yates au sujet de taxes. M.M. Hennequin et Maignan sont priés d'examiner les faits présentés dans la dite réclamation.

Accusé de réception d'une lettre de M. Viguier, capitaine de port. Sa proposition de signaux d'alarme en cas d'incendie dans la rade, sera soumise au *Chief Engineer* du *Fire Department*.

Afin d'obtenir la rentrée des documents déposés au Consulat de Belgique comme piéces de conviction dans l'affaire Godaert, le Président est prié de s'adresser directement à M. le Ministre de Belgique.

Refus d'une demande d'enregistrement d'une jin-rick-shaw sous un numéro déjà assigné.

Examen des rapports des Chefs de service.

Correspondence.

TIGERS AT NINGPO.

To Editor of the
NORTH-CHINA HERALD.

SIR,—It may interest your sporting readers to know that I have just returned from the inspection, at the Taotai's Yamen here, of a magnificent tiger, shot, last Tuesday, at Ma Ming Chiao, five miles from the West Gate of Ningpo, in an empty house belonging to a Mr. Dzong, whither he had fled from his pursuers.

The beast, a male, was shot by a body of soldiers sent by the magistrate for his

destruction. He managed, however, to kill two of his assailants, and tear the side of the neck from another, before he fell pierced by some forty bullets of all sorts and sizes.

I measured the tiger, and found him to be 8 feet 2 inches in length from nose to end of tail ; 4 feet 4 inches in girth, just below the shoulders ; and 2 feet 2 inches from the eyebrows round the throat. The teeth were magnificently white, and the canines fully 3 inches long. He was in such splendid condition that neither vertebra nor ribs could easily be felt. I tried in vain to obtain the animal for the Shanghai Museum ; the skin had been already promised to the Taotai.

Yours very sincerely,
R. J. Forrest.

H. M. Consulate,
Ningpo, 8th Jan.

THE REVOLUTION IN COREA.

To the Editor of the
North-China Herald.

Dear Sir,—As you were good enough to accept and publish my first letter, I am induced to give you some further information on Corea, feeling assured that it will interest most of your readers. I would first, however, with your permission, rectify some errors which appeared in a letter published by you last April. Your correspondent, unintentionally no doubt, misled you in some particulars, which, as they are matters of history, it is necessary to put right.

1st.—The Queen (dowager), whose party has just triumphed, is not only not a Christian, but is inimical to Christians, she being the mother of the King who, in 1839, instigated the persecution in consequence of which a French Bishop and two Catholic priests, with a great number of native Christians, were murdered. This Queen's family have always been systematically opposed to the propagation of the Christian religion.

2nd.—This same Queen, named Tcho-taipi, adopted the King then actually reigning. Your correspondent says in error, that the widow of the last King (who died comparatively young) did so. This is really what I notice in a book lately published in Paris by the Catholic Missionaries from Corea:—(*)

"Notre jeune roi, Tchiel-tjong, est mort "le 15 Janvier, 1864, après un régne de "quatorze ans, et à sa mort une révolution "de palais a fait passer le pouvoir dans les "mains d'une famille qui avait toujours été "très-hostile aux Chrétiens. Quand Tchiel-"tjong avait été appelé au trône en 1849 "à l'age de 19 ans, les grands mandarins "qui allèrent le saluer roi dans son exil "à Kanghoa, le trouvèrent avec des vête-"ments couverts d'ordures, les mains sales, "le visage tout barbouillé du jus d'un "melon qu'il mangeait à belles dents. On "le lava et on l'amena à la capitale. In-"stallé dans son palais et reconnu pour roi, "il n'a pas fait de mal au peuple, car il n'a "rien fait. Sa famille (? femme) Kim a tou-"jours eu l'autorité en main, elle a disposé "de tout comme elle a voulu, le roi a "signé les décrets qu'on lui a présentés, "souvent même sans le savoir, car il était "constamment ivre. Chaque jour il ava-"lait une grande cruche de vin ; des "centaines de femmes étaient là pour "l'occuper le reste du temps."

The King always names, or is supposed to name, one of his children (if there be any) his successor, the eldest being ordinarily chosen. When he has no children, he chooses amongst his nearest relatives. The throne passes by the delivery of the Royal Seal, which is immediately received by the King elect, if of age. If not, the Seal, and therefore the Regency, is confided to the Queen, chosen by the dying monarch, who generally selects the first of his wives. Now, the King Tchiel-tjong, died on 15th January, 1864, without issue, and did not name a successor. There were then three widow queens in the Royal palace of Corea, namely :—1st, Queen Tcho, wife of Tktjong, mother of Hen-tjong ; 2nd, Queen Hong, wife of Hen-tjong ; and 3rd, Queen Kim, wife of Tchiel-tjong. Queen Tcho took violent possession of the seal, and thereby became Regent of the kingdom. Although she had a nephew, aged 20, by name Tcho-seung-hă who, as we shall see, was concerned in the revolution of 1873, the Regent would not put him on the throne, because according to the law of the country, a king must belong to the Ni family ; and she thereupon chose Ni-miong-pokei, a child of 12 years, second son of Prince Ni-keung-soung Koun (Regent), as related, with the result, in my previous communication.

3rd.—The changes in the Government of 1873 were not caused in any way by the troubles with Japan. There is no Japanese party in Corea, and when the Revolution occurred, there was not the slightest fear of war with that nation.

4th.—With regard to the cheerful hopes engendered by the news from Corea, they are the birth of your April correspondent's vivid imagination ; for you will learn by the following particulars, that the kingdom of Corea has positively not gained anything by the Revolution, but that the poor people have fallen from Charybdis into Scylla, and Corea remains closed as before, to Catholic missionaries as well as to European merchants. For this long, but necessary preamble, I must ask you kindly to bear with me. Let us pass on to the news on the state of the country.

§ 1*st—Revolution of November*, 1873.

The unsuccessful American expedition, as before said, only increased the power and dread of the Regent—whose will was become the only law in the kingdom—where every head bowed before him. Yet the spirit of opposition against the tyranny and oppression of the Ruler and his creatures, grew with the sufferings of the people and the humiliations of the nobility. One noble in particular, Tcho-sengha, real nephew of Queen Tcho, loudly protested against the iniquitous acts of the usurper, and the Regent determined to get rid of him, as he had done with many others. In November, 1873, everything was ready for this purpose, but Tcho-sengha being warned of the danger which he ran, sheltered himself with his Aunt in the Royal Palace. This lady (Queen Tcho,) had long been grieving over the miserable state of the kingdom, and did not of course forgive the Regent for usurping the throne as he had. Believing the time had arrived for turning the tables upon him, she prepared three cups of rice, with a good dose of poison in each, and then, having invited the Regent and her nephew, she addressed them somewhat to this effect :—"Everything is going to the bad, and the country suffers. I know that you and my nephew do not get on well together ; that you, Regent, have all prepared for his death. It is better for all three of us to die ; and I have, therefore, procured three poisoned rice cups, which we had better swallow in turn. If, however, I ate first, the Regent might object to follow my example. He must, therefore, begin, or make peace with my nephew, &c., &c." Rather than take the medicine, the Regent made all the promises demanded of him, and the old Queen then dismissed them. Tcho-seng-ha was thus saved, but the Regent was all powerful, and could any day place him under arrest, or have him assassinated. His rival felt anything but secure, and therefore did his best to overturn his adversary. He arranged with two high nobles to present a petition to the King. One was a great Mandarin named Tchen Tkyen-i, the other with the title of Doctor, named Hong-si-yeng-i. These were promised his protection, and his aunt's also, in case of non-success. So the two nobles wrote out the petition, describing the miseries of the people owing to the Regent's maladministration, and proposing urgent changes. The reforms principally required were eight in number, as follow, viz. :—

1st.—The suppression of arbitrary taxes. When the Regent was hard up he made a demand on the first noble or citizen for 1,000, 5,000, or 10,000 *teaous* (about ten *teaous* to a *tael*), as the case might be, which demand must be complied with at once, by selling lands, houses, and being reduced to beggary.

2nd.—Reduction of land taxes, which had been considerably increased by the Regent.

3rd.—Suppression of all the taxes imposed by the Regent, on goods and animals entering the Capital.

4th.—Prohibition of Chinese *cash*, in which a large business was done since the Regency. The Chinese *cash* was allowed to become current, although its intrinsic value was at least one-third less than the Corean *cash*, and as the importation was on a large scale, nearly everything useful became dearer.

5th.—Re-establishment of the worship and honors due to departed great men.

6th.—Equal rights, for gentry and peasants, in the acquisition of dignities.

7th.—Restoration of the old laws for the regulation of soldiers. Instead of receiving Government pay under the Regent's administration, the soldier had to pay yearly a certain sum as service money, and was allowed to extort by the greatest violence, all that he could from the poor people. As for many reasons the number of satellites had got smaller, the service money or impost was levied on the inhabitants of each district, including even the nobility, &c.

8th.—Power of life and death to be limited with the King. We have shewn already how much value the Regent attached to the life of anyone who became objectionable to him, whether aristocrat or plebeian. Unfortunately the example set by their august master was followed by all the Mandarins, great and small, who all arrogated to themselves the power of life and death.

Now when the two nobles named before, supported as they felt themselves to be by the nephew of the old Queen, risked their lives by presenting the petition, the King, after accepting it, dismissed them without a word. To assure himself as to the truth of the accusations against his father, he disguised himself, and surveyed his capital followed by a few guards. On every side he heard about the two nobles and their petition ; the conduct of the Regent was blamed, and the people complained bitterly of the administration. In one of his walks, the King entering an inn, asked for a cup of rice, the price for which so frightened him that he requested to know the cause. "Why (was the reply,) where does the noble gentleman spring from, that he does not know, since the introduction of Chinese *cash*, everything is trebled in price."

From nine o'clock at night, when the bells toll as a signal to keep in, till two in the morning, no man is allowed to be abroad, except it be absolutely necessary, on pain of being heavily fined. The object of this police regulation is to enable the women to walk out freely. A little while after his run out, the young King felt inclined to make a night survey of his capital, and was arrested by the police. "What," said he, "do you mean by stopping a nobleman?" "It is the law," he is answered, "to arrest every man, noble or

(*) Histoire de l'Eglise de Corée, 2 vol. in 8, chez Victor Palmé, rue Grenelle-St, Germain, 25 ; Paris, 1874.

not," and although he offered ten, even one hundred *teaous*, not to be interfered with, the police would not let him go. As the matter began to look serious, the King called his followers, and made himself known, whereupon the patrol, fearing consequences, fell on their knees and *kow-towed*. Next day they were recompensed by a dinner and a present of one hundred *teaous*—(about ten taels.)

Such incidents began to be noised abroad, and even the Regent was being moved by them, when the old Queen Tcho gave the final blow. Ever since the petition to the King, presented with her consent and under cover of her protection, Queen Tcho had retired to her palace, refusing to eat, and threatened to starve herself, so as to draw the King to her. One night two of her maidens were deploring the Queen's state, just as the King was passing by; and on his asking what they said, they pretended surprise, and throwing themselves before him, told him that Queen Tcho was dying for want of food. He at once went to the Queen, and said, "Why do you suffer?" "Never mind the cause, I must die." "Yet tell me why?" "Am I not the mother of my people, and does not a mother love her own? How can I live in the midst of the plaints and sufferings caused by the Regent?" On being invited to speak out clearly, the Queen only too gladly explained her grievances against the Regent, and when she had done, the King replied: "In future my father shall "not govern, as I shall do so myself. "Therefore rise and eat." All this was the doing of a few days only, during which the King had clearly seen the true state of things; and determining how to act, he called his father to him, and told him not to trouble himself any more with the government, as he meant to direct matters himself, forbidding his father also to leave the Palace. Having called the royal council together, as also the two petitioners, he addressed them as nearly as possible in the following words: "I have become King at an early age. "The Regent has been managing matters "beyond the Palace, whilst this has been "the care of the Dowager Queens. Till "now I have done nothing, and am un-"acquainted with matters—but I have "become a man, and as my father, who "governed for me, is old and fatigued, I "must direct everything myself in future. "You and all functionaries will help me "with your strength and intelligence, to "govern wisely and justly." After the meeting of this great council, *the King was induced, under the influence of the Queens Tcho, Tcho seng-hâ and some high officials*, to change the principal men, exiling one great Minister, degrading another, and replacing nearly all the high and low Mandarins. The chief points of the petition were acceded to, and it was promised that in future no opposition would be made to the introduction of European goods, such as cottons, needles, &c. As to the soldiers, the tax or service money was no longer demanded, but they would only be paid as heretofore on the days of exercise, five *cash* each; troops who are continually under arms, since the French expedition, to be paid monthly, and special instructors from the Capital appointed to teach them daily their drill.

You have now the most faithful explanation of this revolution, by which the Regent, odious as he had made himself to all Coreans, was displaced by others, who, not less than he, lived at the public expense. In my next letter I shall endeavor to communicate what I have been able to ascertain in October last (1874) as to the actual condition of Corea, and the results of the Revolution of November, 1873.

PHILO-COREANUS.

Newchwang, 1st Dec., 1874.

Law Reports.

H. B. M.'s SUPREME COURT.

Shanghai, Jan. 9th, 1875.

Before Sir EDMUND HORNBY, *Chief Judge.*

His Lordship delivered judgment to-day in the following cases:—

CHAYA YAHICHI *(plaintiff) appellant*; WALTER MOURILYAN *and* CHARLES ADOLPH HEIMANN, *trading as "Mourilyan, Heimann and Co.," (defendants) respondents.*

On appeal from H. M.'s Court, Hiogo.

Judgment:—

It is not without considerable doubt that I have come to the conclusion that the judgment of the Court below must be set aside. The ground upon which the Court proceeded was that there was no breach of the charter-party, inasmuch as the accident to the steamer fell within the clause in the charter-party, "the perils or dangers of the seas and navigation excepted," and was not the result of any neglect on the part of the master or any one on board the steamer. It is clear from the cases with reference to these excepted clauses, that, in their absence, the master would be liable for non-performance of his contract of hire if, by reason of *any* accident, he failed to perform it, whether such accident was caused by circumstances over which he had or had not control. This being so, it is clear that his original liability exists except so far as he has protected himself by the wording of what is usually called "the excepting clause." In the present case, the delay which amounted to a breach of the charter was caused by an accident to the machinery while the ship was on her return voyage. Now, accidents to the machinery are not one of the exceptions mentioned in the charter-party unless caused by the dangers of the sea or navigation, and the evidence shews that the accident took place while the sea was calm and the vessel on her regular course. It is impossible, therefore, to say that it falls within the exceptions mentioned, by which the captain has limited his liability. I have, therefore, to consider next, whether the delay which occurred between the 5th day of November and the 10th day of December—(the dates respectively of the happening of the accident and the bringing of the action)—is to be considered as amounting to a breach. The trial did not take place, it appears, until the 14th January, at which date the vessel had not arrived at Kobe, nor, indeed, did she arrive there until the 17th of February. Now, it is impossible to read the charter-party without feeling that time was of the essence of it. The ship was to make three consecutive voyages—two days only were to be allowed for loading or discharging, after the captain had given notice that he was ready to load or discharge, and a heavy demurrage is imposed on the charterer if he exceeds this allowance; the captain is also bound not to detain the vessel beyond this time, unless compelled by necessity. The evidence shows that a voyage to Yokohama and back usually takes less than 10 days, allowing the time stipulated in the contract for loading and discharging, so that the vessel could have made three consecutive voyages within a month, and this, no doubt, was about the calculation of the parties. An interval, however, elapses between the departure of the steamer on her return voyage from Yokohama and the commencement of the suit, of 35 days, and, in fact, she does not arrive in Kobe ready to start on her second voyage for three months and half from the termination of the first. This conclusively shews the extent of the accident; and I think, therefore, that the plaintiffs were justified, under the circumstances, in considering that a breach of the charter-party had been committed when they commenced their action. There is nothing in the language of the charter-party which would lead one to assume that any delay was contemplated—on the contrary, it is clear from it that no delay was to be permitted; and as this was the evident intention of the parties, no construction must be given to it at variance with that intention. It is unnecessary to refer to the numerous authorities to be found in the Text-books and Reports, which shew that where, in a contract, no time for its performance is expressly mentioned, it is governed by what is reasonable—and what is reasonable is to be gathered from the nature of the contract itself, which should therefore be taken as a guide as to the time in which it should be performed; and in this case a delay of thirty-five days—taking it at the least—is certainly not a reasonable delay between one voyage and another, when all the three voyages might, under ordinary circumstances, have been performed within the month. I now come to the most difficult portion of the case—namely, whether the plaintiff is entitled to recover the total amount of the charter money by way of penalty or liquidated damages for the breach. I think the observations of the judges in the case of Betts *v.* Birch (28 L. of Ex. 267) are peculiarly applicable to this case. Both Baron Martin and Baron Bramwell lament that the cases which have drawn a distinction between penalties and liquidated damages have in their result practically overruled the principle applicable to the interpretation of the written contracts—namely, that the proper mode of ascertaining what a contract means is, first to ascertain what the express meaning is, and then to carry out that meaning; and that it would have been much better if Courts of Law had been left simply to ascertain what the parties had expressed, and then been permitted to compel the carrying out of such expressed bargains. To my mind it is perfectly clear that what the parties meant by the last clause in this charter-party is, that whoever committed a breach of it should pay to the other the total charter-money. I consider, however, that I am not at liberty to act upon that view with respect to this question, and however reluctant, I feel myself bound by the decided cases. The term used in the last clause is "penalty." The cases shew that where this word is used it is not to be held as meaning that the sum mentioned is to be paid at all events on the breach of the contract; but that the amount of damage proved to have been sustained is alone to be awarded; and the only exception seems to be, where the penalty is in the nature of a sum certain payable on the happening of *one event* only. Sparrow and Paris (31 L. of Ex. 137) appears to be the latest authority on this subject. The question then is, is the total charter-money to be recoverable on the happening of one event only, or is it intended as a sum to secure the performance of several matters? In the one case, although the word penalty is used it is so used as a convertible term for liquidated damages, and the party observant could recover it from the party delinquent; in the other case, the meaning I have before given must be taken as alone applicable to it. Now, although it may be said that the one event, upon the happening of which it becomes payable, is simply a breach, yet it is clear that it was intended to secure the performance of *several* matters: it was intended to secure the loading of the steamer by the charterer with a certain amount and description of cargo; it was intended to secure also the payment of a certain amount of demurrage by the charterer, on delay caused by him, as also a certain freight on each voyage; and it was intended to secure the performance of several conditions on the part of the captain. Thus, several events are secured, and not only one, and the case thus falls within the principle enunciated in the case of Sparrow *v.* Paris. Being, therefore, of opinion that a breach of the charter-party has been committed, upon which some damage may have been sustained, I shall remit the case back to be reheard on that point, the plaintiff to be at liberty to adduce evidence of damage sustained. As however, he had the opportunity before of doing this, and neglected to avail himself of it, I shall leave each party to pay his own costs of this appeal. The costs in the case below must depend on the result of the new trial. If the plaintiff succeeds in proving damage to have been sustained, as indeed it appears to me he must do, since the bargain money was paid by him in consideration of the full performance of the whole contract, and only one-third of it has been performed—he must recover, *plus* such damages and bargain money, costs of the original suit and the new trial.

JAMES MALONE *v.* JOSEPH WALTON.

Action brought to recover $264, balance of wages due, as captain of the schooner *Alexandra*, of Adelaide; and $550 as per account

stated, for sundry disbursements, and the cost of a passage from Shanghai to Australia. Defendant was owner of the schooner.

Judgment :—

In this case the late Captain of the *Alexandra* seeks to recover from the owner certain expenses incurred and paid by him as captain of the ship, on his owner's behalf; and he claims also damages which he says he has suffered and will suffer by reason of his having been discharged in Shanghai instead of in Australia. Those damages he fixes at $500. With the exception of 12/6, the cost of a telegram, I disallow all the items of expenses, first, on the ground that I have no proof they were properly incurred or necessary; and, secondly, because they are not vouched. I have always held and shall always hold, that a captain of a ship is bound to prove that every farthing he spends on his owner's account has been properly and necessarily expended, and that he should produce vouchers for all such items as it is possible to vouch. I do not consider that carriage hire is necessary to a man, in a place like this, who has the use of his limbs. I do not consider that hotel bills are necessary, when the captain can and ought to take his meals on board his ship; and in this case, I am not satisfied that he had any business to transact, except handing in his papers to the agents of the ship, and discharging one crew and shipping another. Moreover, with the single exception of the telegram, no receipts or vouchers are produced, and as to the bill for medicine, apart from all question as to the owner's liability, I would not allow it on principle. In the midst of a bill which consists of several items, is inserted an amount of £1.17.6. for medicines supplied to the captain; it may just as well be that £1.17.6 was lent to the captain. As regards the amount for wages, I accept the owner's account as the most probable, namely that, for the first month, the captain was merely superintending the repairs, at £14 per month; and that for the remaining six months, the time for which he acted as captain, he was to receive £15 a month. His agreement as captain was clearly for six months certain, and those six months I allow him at the increased rate. I pass on to the captain's claim for $500, as damages incurred by his discharge in Shanghai instead of in the Australian Colonies. The plaintiff says that he was first engaged on the 3rd of May, and that by his agreement, he was to be discharged at some port within the Australian Colonies; that subsequently, on the 5th of June, his wages were to be £15 a month, so that I am asked to conclude that although there was a distinct understanding about where he was to be discharged, on the 3rd of May, there was no understanding as to the rate of wages he was to receive until the 5th of June. If the captain had asserted that his engagement as captain only dated from the 5th of June, and that his six months run from then, I might have been inclined to attach some credence to it, but he distinctly states he was engaged as captain on the 3rd of May, and that it was then arranged he was to be discharged in an Australian Colony, although the ship was then on the slip and only fitting out. I do not believe this; it is to my mind most unlikely that the whereabouts of his discharge should then have been settled, and that the amount of his wages should have been left unsettled. I think that it is to the agreement of the 5th of June that we must refer, not only on the point of where he was to be discharged, but also as to the pay he was to receive. The captain said there was no written agreement; the owner affirmed that there was, and that the captain had told him that he had destroyed it. What its contents were—if it ever existed—there were no legal means of ascertaining. I am bound, therefore, to decide the case on the evidence offered at the hearing on either side. The plaintiff swears that it was arranged he was to be discharged in the Australian Colonies, and he urges that this is borne out by the fact that according to the articles, the crew were to be there discharged also; and if the two agreements had been contemporaneous, there might be something in the argument; but according to the captain's account of his agreement, and the time it was entered into, this arrangement, if made at all with him, was so made a month previous to the signing of the articles by the men. To this evidence, therefore, as corroborating the captain's statement, I am not inclined to attach much weight. The owner denies that he ever undertook to discharge the captain in the Australian Colonies; on the contrary, he swears that when asked he refused to promise to discharge him there, and that he never authorized the captain to insert or allow the insertion of such a clause, or of a fixed period of six months in the articles. Now the articles are foreign-going and not coasting articles, and it certainly does appear strange that the owner, if he contemplated going into the China Seas, seeking, as he says, should have allowed the insertion of so short a period. But the captain says that his owner did not contemplate, at the time the articles were made out, going further than Singapore. If he told the captain this, it is odd that the captain did not insert Singapore as one of the contemplated destinations of the ship; but the description of the voyage is left open—the ship is to go wherever employment offers. I must take it, therefore, that the ship was intended to go wherever employment offered, but that the captain agreed with the crew that it was not to exceed six months, and that they were to be discharged in the Australian Colonies. At the same time, as he does so contract with the crew, he inserts, or gets inserted, by the shipping officer, a clause relative to himself, and although this clause, if it was inserted without the knowledge of the owner, is not binding on him, or is evidence against him, it is evidence as against the captain of the terms on which he considered himself engaged. Now, what are the terms? They are to the following effect:—"This "agreement shall last for six months so far "as the master is concerned—or, in case the "master leaves before six months, he is to "have six months' wages and passage money "to Adelaide." The grammatical construction of this sentence only allows of one interpretation, viz., that if the captain leaves before six months he is to have his wages for six months and passage money to Australia. This is the distinction which the captain himself draws between the agreement made with the crew and with himself—if the crew are discharged before six months, they only get the wages for the time for which they may have actually served; but if the captain is discharged before the expiration of that time, he is to receive his full six months' wages, and a passage home. The owner agrees with this interpretation, and admits that it embodies the understanding that he had with the captain; but he declines to admit either that it bears the interpretation that in any event the captain is to have a passage home, or that he contracted to give him passage money to take him home. Here, then, the owner agrees with the memorandum which the captain himself has endorsed on the articles, and the only way by which the captain can escape from the inevitable conclusion that his owner and himself understood the contract in the same sense, is by saying that a different interpretation must be given to his own memorandum. The fact is, that the captain in seeking behind the owner's back to create evidence in his own favour, over-reached his aim, and has thereby put himself out of Court. I pass no opinion as to who is probably right or probably wrong, or what ought or ought not to be done in a spirit of fairness or liberality. The case is one of oath against oath—both witnesses are entitled to the same amount of credence; but it is the captain's business as plaintiff to make out his own case clearly, and he has not done so to my satisfaction; as it is only by straining the interpretation of his own memorandum, and thus making it mean what it does not say, while it does agree with what the defendant says, that I can give any effect or weight to his *viva voce* evidence. The verdict will stand for 12/6 over and above the sum paid into Court; but as I am of opinion that there must be some other cause for this litigation than appears on the face of the proceedings, I shall exercise the discretion I possess as to costs, and direct each party to pay his own costs.

The "St. Francois" and "Cawdor Castle."

Report of Registrar and Merchants, pursuant to the decree of the Court dated 7th December, 1874.

The schedule appended to the report contains the sums claimed by way of damage, and the amounts allowed. Such only of the items that seem to call for special notice, in connection with the principle on which we allowed or reduced them, are here remarke on.

Item 1.—"*Estimated value of the brig St. François, of* 253 *tons, after* 2 *years and* 9 *months service, Frs.* 95,000, *or Tls.* 13,380,28."

This is a convenient place to state the reasons that induced us to sustain the contention of the Counsel for the owner of the *St. F.*, that he was entitled to refuse to receive his ship back after she had been raised by the agents of the *Cawdor Castle*, and to demand from the owners of that vessel the value of his ship. We felt that we were bound by the authority of the *Columbus*, a case decided by Dr. Lushington in 1849, and that unless we saw, or had suggested to us, some broad tangible ground of distinction between the facts of that case and the present one, we had no alternative but to follow the rule there laid down.

Now three, and only three, points of difference were all that the Counsel for the *Cawdor Castle* could discover between the two cases. The first was that the *Tryall* (the fishing smack sunk by the *Columbus*) was sunk *at sea*, while the *St. Francois* was sunk *alongside a wharf* to which she was secured. But this was, we think, completely disposed of by Mr. Robinson, who pointed out that the *Tryall* was not left at the bottom of the sea, but was raised and brought into port before she was offered to her owner; and that consequently his refusal to accept her (in which the Court held he was perfectly justified) occurred when she was no more lost, and not a whit less safe, than the *St. Francois* alongside the wharf. Unless, then, the mere circumstance that one ship *had* been sunk off Dungeness before she was raised and tendered to her owner, while another *had* been sunk in the Whangpoo before she was raised and tendered to her owner—in other words, unless there is some radical difference between the effects of pure salt water and muddy fresh water on a ship submerged in them (which was not suggested), the first ground of distinction must fail.

The second was, that while the *St. Francois* was only 5½ days under water, it does not appear how long the *Tryall* was left there—that is, we were asked to presume that she lay there for a much longer period than 5½ days. But we had no right, in the absence of all information on the point, to presume anything. If we were to presume at all, we should certainly presume that a small fishing smack (her value was only £310) sunk off Dungeness—her masts probably partly above water—would not be left there for so much as 5½ days before she was raised and brought into port.

The third suggested point of difference was that there was no immediate abandonment of the *St. Francois*, while the owner of the *Tryall* from the first refused to receive her back. After consideration, we could not see in this sufficient on which to base a sound distinction between the cases. We thought that the effect of Dr. Lushington's decision was, broadly, and in all cases, to give the owner of a sunken ship, even after she is raised by the owner of the vessel in fault, the right, if he cares to claim it, to look to such owner for the value of his ship before the accident—abandoning of course to the latter the ship in the condition in which she happens to be. That being so, when once the right accrued, we did not see how anything that the other party did, could divest that right. If the *St. Francois* had never been raised, it could not have been contended that her owner could not abandon her: when she is raised by the *Cawdor Castle*, why should his right be altered or diminished? Then, ought his taking time to consider what is most to his interest, (*i.e.*, whether to have his ship repaired at the expense of the wrong-doer, or to leave her on his hands)—surely a most reasonable thing to do—to have the effect of a penalty, and cause him to forfeit a right which, had he in indecent haste asserted, he never could have been deprived of?

None, then, of the suggested grounds of distinction being sufficient, we had, as already stated, no other course open but to apply the rule of the *Columbus* to the case in issue. We conceived that it was not enough to justify us in not following that authority, that there *might* be fine points of distinction, or that, in principle, it was difficult to see why a rule of the kind should ever have been made to hinge upon the immediate consequence of the damage (the sinking) rather than upon the extent and nature of the damage itself—but that, on the

one hand, if there was a similarity in all the leading features of the two cases, and on the other the authority of the case had never been in any way impugned since it was decided in 1849, it was obviously our plain duty to recognise and apply it. It occurred to us as possible that in that case the *Tryall* was so injured that she was practically beyond repair, and that consequently it mattered very little on whose hands the wreck was left: but we were not at liberty to speculate upon the point; it was enough that that is not the reason assigned in the judgment.

To return now to the amount claimed as "estimated value of the *St. Francois*." Her master proved that she was built in December 1871, at a cost of Fr. 95,000; and his counsel, Mr. Robinson, contended that that sum was the value that must be put upon her for the purposes of this case. He did not even admit any deduction for wear and tear, claiming that he was entitled to set any that we might otherwise be disposed to make on that head against the present increased price of building materials and cost of labour, as compared with the price and cost in 1871. We cannot assent to this mode of estimating the value. It is sufficient to say that the decided cases have established another criterion as the proper one. In the *Ironmaster* (Swabey 441) it is said: "The best evidence as to value is the opinion of competent persons who knew the ship." In the *Clyde* (Swabey 23) the same rule is expressed more at length: "The value is the market price at the time of the destruction of the property.... It is the market price which the Court looks to, and nothing else, as the value of the property." So in Dobree *v.* Schroeder (2 My. and Cr., cited in Pritchard, page 697), it was "held that the value of the ship is the price at which she could be sold, which price must be ascertained, not by making deductions from her cost price proportioned to her age, but by a valuation and appraisement." Again, in the African Steamship Company *v.* Swanzy (25 L. J., Ch., 870), "The natural meaning of the words 'value of the ship' seems to be that which the ship will sell for." It is quite true that exceptional circumstances may make the price for which a ship would sell anything but a fair criterion of her value, but, in the words of the judgment from which this qualification is taken: "That is not the present case. There is here no suggestion that the ship would have been useless to anyone else."

Such being the principle on which we had to proceed, it was comparatively easy to assess the *St. Francois'* value. The only valuations supplied us were by the defendants, the plaintiff either not being in a position to supply us with higher ones or thinking them unnecessary. Two of the valuations, Captain Tucker's of Tls. 6,500, and Captain Barton's of Tls. 7,100) were manifestly too low; the third, (Mr. Riach's, of between Tls. 8,800 and Tls. 8,900) being that of a practical shipbuilder and of a perfectly unbiassed mind,—coinciding nearly as it did with the independent estimate of the one of our number who is best able to form an opinion on such a point,—we felt would be much nearer her true value, which we accordingly fixed at Tls. 9,000. We consider that sum her value to a man who was in want of a ship of the kind, and who was disposed to pay a full price for her.—Of interest (since the date of the collision to the date of payment) nothing was said in the argument on either side. We allow 8 %.

Item 2—"*Estimated value of stores on board at time St. Francois sank, Tls.* 711.96."—The stores stated to have been on board are charged for at Shanghai prices, and no evidence is offered of the price actually paid in any one instance. We think the captain must have known the price of some of the stores—wine, for example, put on board, probably by himself, in France for his own use and that of the crew—and that we ought to have been told what this price was. He has, then, only himself to blame if, in our conjectures as to what prices were paid generally, we have made too large a deduction. We allow Tls. 600.

Item 3—"*Freight on fifty tons of Sandalwood Tls.* 644.44."—We allow freight on twenty tons, or Tls. 257.77. This is thus arrived at:—Sixty piculs dry sandalwood *ex* the *St. Francois* measured 279 cubic feet—*i.e.*, 4.65 cubic feet to the picul. Mr. Lambert's measurement (which we consider the most exact) of the ship's capacity is 18,513 cubic feet, or at the above rate, 3,981 piculs; or at 16.80 piculs to the ton, 237 tons. Seven tons were taken off this quantity, as a fair allowance for the space that must, with the best possible stowage, have been unoccupied with cargo.

Item 5—"*Survey Fees, Tls.* 160."—We think survey fees are fairly chargeable to the *Cawdor Castle.* Surveys were necessary in order to enable the master of the *St. Francois* to ascertain the condition of his ship, and what it was best to do in the interests of his owners. At the same time, we think some of the surveys were unnecessary, and we disallow accordingly the fees of two of the three surveyors on the 4th, (when the ship was still sunk,) and the two on the 19th. Captain Bolton's must stand; if we were to accede to the contention of the Counsel for the *Cawdor Castle,* and treat it as a matter of costs only, it might never be recoverable at all, because the costs of the reference fall differently according to the amount of the claim that is allowed. Reduced to Tls. 96.

Items 6 *to* 12, *amounting in all to Tls.* 975.25, *are for* (1) *the wages and* (2) *the expenses ashore of the master and crew* from the 3rd of November last (the St. *Francois* was sunk on the night of the 2nd) till, with certain exceptions, the date of this report, and the departure of the first French mail thereafter, respectively. We think that part, at least, of these is chargeable to the *Cawdor Castle.* The transaction by which the owners of the *St. Francois* part with her, is in no sense a sale, as was attempted to be made out. It is true that the price for which she would have sold before the collision has to be taken as the nearest approach to her value, but there the analogy ceases. Had we had to arrive at a price for which her owners would have been willing to sell her, we should have had to name a much higher sum, for one reason if for no other—that out of her proceeds they would have had to provide the funds to meet the very expenses that it is attempted to make them meet out of her bare value. At the same time, we see no necessity for the detention of the *crew* beyond the departure of the first French mail after the defendants had filed their answer admitting their liability, *i.e.*, after the 10th of December, and we accordingly reduce the amount in respect of the crew's wages to Tls. 86.07 (which with the captain's up to date makes a total of Tls. 124.33 for wages), and their expenses to Tls. 290.27. The captain's expenses to the 21st January are allowed at $3 a day, together with the additional sum of $2 a day claimed for carriage hire, but this last for the first fortnight only, that is, Tls. 196.44.

Item 13.—"*Passage-money for Master and Crew from Shanghai to Nantes, Tls.* 922.53."—This must stand, for the reason indicated under the previous item, though perhaps strictly it is reducible, in respect of the captain's and chief officer's portions, in the respective proportions in which they were owners of the *St. Francois,* viz., 18/100ths and 7/100ths.

Item 15.—"*Commission to Agents of Ship, Tls.* 250.—This was admitted to be reasonable in amount, and the only question was whether it could be charged to the *Cawdor Castle.* We are of opinion that it can, on the simple ground that the necessity for the services of the Agents arose directly out of the collision.

It will be seen from the schedule that while the plaintiffs claim Tls. 17,236.53, they are allowed only Tls. 11,929.41—that is, more than one fourth, but less than one-third, has been struck off. The usual rule in such cases must be followed, and each party will pay his own costs of the reference.

Schedule.	*Claimed.*	*Allowed.*
1 Estimated value of vessel..	Tls. 13,380.28	Tls. 9,000.00
2 Estimated value of stores..	711.96	600.00
3 Freight on Sandalwood ..	644.44	257.77
4 Fee to I. M. Customs.....	20.00	20.00
5 Survey Fees	160.00	96.00
6 Expenses of Capt. Simon from 3rd Nov., 1874, to 22nd Jan., 1875	266.08	196.44
7 Do. Chief Officer do.	178.12	83.56
8 Do. Boatswain do.	73.67	41.78
9-10 Do. Crew do.	264.61	164.93
11-12 Wages of captain and crew from 3rd Nov., 1874, to date	192.77	124.33
13 Passage-money of crew from Shanghai to Nantes	922.53	922.53
14 Fees to French Consulate..	14.48	14.48
15 Commission to agents of ship	250.00	250.00
16-23 Private effects of captain and crew	157.59	157.59
Total,	Tls. 17,236.53	Tls. 11,929.41

R. A. MOWAT, *Registrar.*
MIERS CORYELL.
11th January. ARCHD. J. LITTLE.

CIVIL SUMMARY COURT.

January 7th.

Before R. A. MOWAT, Esq.

W. H. STANLEY *v.* MAWHOOD.

Claim for Wages, $98.00.

This was a claim for wages at the rate of $35 per month from the 6th of May to the 31st July last. Plaintiff stated that he was engaged by Mr. Edbrook as clerk and general overseer, but that he did not draw his salary, not being in immediate want of it. On Mr. Mawhood's return to Shanghai, he gave over charge on the 1st of August. He spoke to him about his salary, and received the reply that it would be paid as soon as possible. Subsequently the firm was sold out, and then he again made application for payment, but defendant refused to sign the bill for payment.

Mr. EDBROOK, sworn, stated that he was a partner in the firm of Edbrook & Co., and managed the business during the defendant's absence in England. Defendant acted as clerk, &c., and when he left engaged Mr. Menzies to do his work at a salary of $35 per month, which amount was paid by him and debited to Mr. Mawhood's account. Menzies left and Capt. Edwards was engaged upon the same terms. He remained six months, but subsequently obtained better employment; then plaintiff was engaged at the same rate of pay. He had a verbal authority from defendant to engage a clerk if Menzies did not suit, and in pursuance of that authority he engaged the present plaintiff, as he could not carry on the business without a clerk.

Defendant swore that he never at any time gave any authority either written or verbal to Mr. Edbrook to engage any one for him, and contended that he was not liable. The business had been a losing concern during his absence, and he did not think that the expenses should have been increased.

His WORSHIP said that there was a conflict of evidence, and that therefore he was obliged to take the most probable version of the matter. He considered that there had been an authority for Mr. Edbrook to engage a clerk, as it was clear that the business could not be carried on without a clerk. Therefore, he should give judgment for the amount claimed and cost of the first summons issued. The Plaintiff would have to pay the cost of the second summons, as he did not appear at the adjourning hearing.

11th Jan.

I. ZING *v.* J. SMITH.

Claim $6.25, for goods sold and delivered. The summons having been personally served, and defendant not appearing, judgment was given against him by default.

POLICE COURT.

Shanghai, January 5th.

Before R. A. MOWAT, Esq.

Drunk and Incapable.

JOHN CREIGHTON, a fireman residing at the Sailors' Home, was charged by P. C. 23 with being drunk and incapable in Hongkew, yesterday.

Defendant said that he was not drunk, he had only one glass, and it seemed to take great effect on him. He promised not to drink any more if his Worship would let him go this time.

His WORSHIP observed that this was the third time defendant had appeared before him for drunkenness. He thought it was a great pity that a man should ruin his constitution in that way; the most charitable thing to do with him was to send him to prison for seven days.

Refusal of Duty.

FRED. WENTLANDT, a seaman of the *Agnes Muir,* was charged by Capt. Lloyd with refusing duty on Monday, the 4th inst.

Defendant, in answer to his Worship, said that he had not done any work since Thursday last.

His WORSHIP—Why?

Defendant—Because I was not sober.

His WORSHIP—But why did you not go to work yesterday, when you were ordered?

Defendant—Because my head ached.

His WORSHIP—Very likely—that's a natural consequence.

Capt. Lloyd explained that he had given all hands Friday and Saturday as a holiday, and next day being Sunday no work was done; but on Monday morning it was necessary to straighten them up a bit, as the ship was to leave on Thursday next for Manila and Home.

Defendant said that he wanted to leave the ship, and join the American Navy.

His Worship—But perhaps the Captain will not give you your discharge.

Capt. Lloyd said that he did not wish to discharge the defendant, as he was a very good man, and hitherto had given no trouble. This refusal of duty arose out of a drunken fight on board on Friday night, by which one of the crew was seriously injured and was at present laid up.

His Worship said that he had heard nothing of the disturbance mentioned, and thought it strange, especially as one man appeared to have been seriously hurt. (To defendant)—What do you say, will you go on board to your work?

Defendant—No, Sir.

His Worship—Well, I shall have to send you to prison until the ship is ready to sail, and then you will be put on board; and you will have to pay the cost of the summons.

Defendant—Are you going to send me to prison? I'll go back to the ship.

His Worship—I am glad you have thought better of it; you will only have to pay the cost of the summons now.

Jan. 7th.

Wm. Britwell was charged with deserting from the British barque *Deogaum*.

Capt. Burlar, of the *Deogaum*, stated that the defendant stowed away on board his ship at Nagasaki, and came to this port, where he was shipped. He had since learned that he had run away from the U. S. S. *Hartford*.

Defendant admitted having deserted from the *Hartford*, because he did not like her. He had joined her for the commission.

His Worship ordered defendant to go back to the *Deogaum*.

Jan. 11th.

Drunk and Disorderly.

William Stevens, A.B. of the British str. *Ocean*, was fined $1.00, for being drunk and breaking a pane of glass at No. 664, Hongkew Road. 30 cents of the fine to be paid to the proprietor of the shop as amends.

Robert Henry, a coloured seaman, residing at the Sailors' Home, was charged by Cale, constable of the Home, with being drunk and disorderly, assaulting him, and tearing P. C. H. Stean's uniform coat.

Constable Cale stated that defendant was in the Wharf Hotel, and making a great noise. He tried to persuade him to go across to the Home and go to bed, but he resisted, and was very violent after getting inside the Home compound.

Defendant.—Weren't you drinking and shaking dice with me in the Hotel.

His Worship.—Is that so? How can you expect to have any respect shewn you if you do such things?

George Graham, a lad also residing at the Home, stepped forward, and said that the Constable Cale struck the defendant first, knocking him down, and that then they had a fight, lying down in the road outside the Hotel. Both defendant and the constable were half drunk; previous to this they had been throwing dice for drinks.

Defendant admitted having torn the P. C.'s coat, but was willing to pay the damage.

His Worship ordered him to pay $8.00, and cautioned Constable Cale as to his future behaviour, reminding him that he had sent one constable to prison for similar behaviour.

[Mr. Bowen, superintendent of the Sailors' Home, informed our reporter that the Constable has been dismissed.]

W. H. Donovan, A.B., and John Higgins, fireman, of the str. *Glenroy*, for being drunk, were dismissed with a caution.

MIXED COURT.

Shanghai, 9th Jan., 1874.

Before Geo. F. Seward, Esq., U. S. Consul-General, and H. E. the Taotai; Dr. Yates, Interpreter.

Charles E. Hill *v.* Estate of Yang Taikee.

Mr. I. B. Eames appeared for the plaintiff.

Mr. Drummond and Mr. Cowie for the defendant.

This case, being a claim made against the representative of the late Taikee, for Tls. 54,000, and eleven years' interest to be added thereto, in respect of the alleged charter of a steamer named the *Keorjeor* in the year 1863, by the local authorities, to assist in the suppression of the rebellion, again came on for hearing, by adjournment from the 26th ult.

The Petition.

The representation and petition of Charles E. Hill, an American citizen, humbly sheweth as follows:—

1*st.*—That in the year (1862) Eighteen hundred and sixty two, General Frederick T. Ward (also an American citizen) was in command of a Force of disciplined Chinese troops, officered by Europeans (known as the "Ever-victorious Army"), acting for and in concert with Chinese officials against the Taeping Rebels, who at that time held the cities of Nanking and Soochow, and the great plain of the Yangtzse Kiang, between those cities and Shanghai.

2*nd.*—This force was stationed at Sung Kong, but General Ward drew all supplies for it from Shanghai, and the wages of the troops as well as all contingent expenses of the Force, were paid by Takee, then Government Treasurer, and residing at Shanghai.

3*rd.*—This necessitated constant communication between Sung Kong and Shanghai, which was mostly carried on by means of sailing boats, and these, owing to head winds and tides, were often delayed, causing great inconvenience, besides running great risk of being captured.

4*th.*—Ward therefore demanded of Takee an additional steamer for this work, to ensure both safety and dispatch.

5*th.*—In reply to this demand, Takee ordered Ward to charter a suitable steamer to be used as a dispatch boat, and Ward did, in the month of June, 1862, charter from me, the said Hill, a new steamer which the Chinese Officials named the Kiäo Chiäo *(Keorjeor)*, after a town near the mouth of the Whangpoo river, where by the aid of Ward they gained their first important victory over the Rebels.

6*th.*—The Charter-party was written in English and Chinese, and was signed by both Ward and Takee, and also bore the official chop or stamp of Takee. It was for four (4) months certain, at the rate of Taels (3,000) Three Thousand Shanghai Sycee per month, with the stipulation that the same sum should be paid for each and every additional month the steamer should be used by the Force, and contained an indemnity clause agreeing to pay in case of her loss a further sum of Taels (12,000) Twelve Thousand. It was further stipulated that the Charterers should furnish coals and stores and pay all wages and other expenses while so employed, reserving to themselves the right to appoint their own officers and men to command her, and to remove them without reference to me. The charterers were also allowed at their own expense to build a gun-deck and magazine, and make such other alterations as might be necessary to fit the steamer for active service as a gunboat if so required.

7*th.*—The steamer was taken possession of by Ward early in June 1862; was used by him for the force until his death in the following September; then by Burgevine, his successor, until some time in January 1863, when in consequence of a quarrel with Takee, the before mentioned Government Treasurer, he was dismissed; then by the officials in command of the Sung Kong Force until her capture on the first day of August following.

8*th.*—The steamer was therefore in the constant employ of the Sung Kong force, from the time of her being taken possession of by Ward until her capture (about fourteen months.)

9*th.*—After the quarrel between Burgevine and Takee, and his dismissal from the command of the Force by the Taotai in consequence, all claims against the Force were immediately sent to Takee for payment, but owing to the treatment Takee had received from Burgevine, Woo, Taotai, refused to sanction the payment of any outstanding claims against the Force. Application was therefore made to your Honor, for assistance in their collection. The result of this application was an arrangement between your Honor and Woo, Taotai, by which John Kearny Rogers and Frederick H. B. Jenkins were appointed Arbitrators to examine and pronounce upon all claims by American citizens against the Force.

10*th.*—After the appointment of these arbitrators Takee (and A. L. Freemen Esq.,) acting for Takee, came to me and earnestly requested me to put in a claim before these arbitrators for the use and charter of the steamer while Burgevine was in command of the Force, about four months, stating as his reason, that if he paid any of the expensese of the Force while under the command of Burgevine more than had been paid, without the sanction of Woo, it would not be allowed in his accounts, but he agreed to pay all due on the charter both before and after this time, to continue the steamer in use, and if I failed to collect from the arbitrators he would eventually pay me for the four months charter also.

11*th.*—In accordance with this request I appeared before the arbitrators, gave into their possession the charter-party, claimed under it Taels 12,000, for her use, four months, and was allowed the full amount claimed.

12*th.*—This award was not paid, neither did Takee pay as agreed, and the first time thereafter that I saw the steamer in Shanghai, I took possession of her with the intention of not allowing her to return to Sungkong until the full amount due for her charter and use was paid.

13*th.*—This action brought Takee again to me, who stated that the steamer came down with a Mandarin who had important business, and must return with the steamer at once, or he (Takee) would have great trouble; that I need not fear, for he would soon pay me every dollar; that he was hard pressed for funds to keep the Force together; that he had paid out large sums to fit out an expedition against the city of Nankin, which had failed to start, causing him much trouble to raise money at all; that there were still large sums due the English Government for guns, stores, and ammunitions, which must be paid at once, or they would not assist in taking Soochow and Nankin, in which case he would lose his place, his official rank, and perhaps his head; and he begged of me to wait until Soochow was taken, when he could easily raise money and would pay all.

14*th.*—Knowing some of these statements to be true, I released the steamer, and allowed her to return, and shortly after an arrangement was made with Takee whereby he agreed to pay me the full amount due on the charter, and in consideration of the amount of the charter money being so large, I agreed to sell him the steamer outright for an additional sum of Taels (8,500) Eight Thousand Five Hundred. A bill of sale was made to some Chinese official whom he named, and together with a memorandum in both English and Chinese, showing the exact amount to be paid me, were deposited in the safe of Mr. B. R. Lewis, then a clerk in the U. S. Consulate-General, to be shown to Takee whenever he should present my order for the same.

15*th.*—None of this money has ever been paid to me as agreed, and neither the charter-party, bill of sale, or memorandum, have been in my possession since delivered up, as within mentioned, nor can either of them now be found.

16*th.*—Shortly after this arrangement was made, the steamer was captured, while towing the Taotai's or Viceroy's chop to Sungkong, or immediately after their arrival at the Sungkong Creek.

As soon as this news reached me, I went at once to Takee, and demanded the money due me, when he again begged me to wait until Soochow was captured, which would be in a few days at most, when he would have plenty of money, and would pay me all with interest.

17*th.*—I waited on until Nankin was taken, after which I went to his house and again demanded the money due me. He was then sick, but promised to pay in ten days. After the ten days expired, I went often to his house, but he was always too ill to see foreigners, and I never saw him again alive, and never received any part or portion of the money due me for the use or loss of the steamer.

18*th.*—After Takee's death, Mr. Yates went to see the wife and heirs of Takee. She did not deny the debt, but said she would pay in full on production of the charter-party, but

although diligent search has been made for it, it cannot be found.

19*th.*—In support of my own statement that such a charter-party did exist, I hand in the sworn statements of John Kearney Rodgers and Frederick H. B. Jenkins, the before mentioned arbitrators, and also of E. S. Benson, who for a time was Quartermaster-General to the Force, all of whom have seen it, and had it in possession.

20*th.*—I hand in also the statement of J. Howard Nichols, who purchased the steamer for me in sections as she was shipped from England, who is cognizant of her erection here by me, of her subsequent charter through Ward for the use of the Force, and constant employment by the Force until her loss.

21*st.*—As collateral proof of the existence of such a charter-party there are the undisputed facts, that the steamer was in the constant employ of the Force for more than one year, that she was furnished with coals by the Chinese officials during this time. That they did alter the steamer to a gunboat by building a gun-deck and magazine, and arming her as such, and that they did place their own men in command of her, and discharged them at pleasure. As positive proof of this last fact, one C. F. Jones, whom they had appointed to command her, was accused by the Mandarin in charge of the steamer of having struck him, when he was immediately discharged by the Taotai, and his place filled with a Chinese captain.

22*nd.*—Charles J. Ashley, Quartermaster-General and Paymaster of the Force under Ward; J. F. McLaughlin, Engineer of the steamer *Confucius*, also employed by the Force; Mr. Lambert who made repairs to the steamer while employed by the Force, and others, both foreign and Chinese, are still residing in Shanghai, and can be produced to testify that the steamer was in the employ of the Force as above stated.

23*rd.*—In view of these facts, I most respectfully beg to submit my claim as follows:—

For charter and use of steamer *Kiaochiao* from June 1st, 1862 to August 1st, 1863—14 months at Tls. 3,000 per month...Tls.	42,000
Indemnity for her loss as per charter .... ,,	12,000
Taels.....	54,000

With interest on this sum at such rate as to the Court may seem just and proper.

24*th.*—I therefore humbly pray that your Honor will take such steps as to you seem fit and proper to secure payment by the representative of Takee, or by the Chinese Government, of the amount of my claim as above stated, and your petitioner will ever pray, &c.

(Signed) CHARLES E. HILL.

The Answer.

In answer to the said petition the said defendant says as follows:—

1.—That owing to the great length of time the plaintiff has allowed his claim to lie dormant, and to the fact that so many of the persons principally concerned (namely Woo Taoutai, Taikee, General Ward, and Burgevine) are now dead, the defendant finds it impossible to reply in detail to the various allegations set forth in the plaintiff's petition.

2.—That the defendant is informed and believes that the late Taikee did at the time mentioned by the plaintiff, and as admitted by the plaintiff, act as Banker and Agent for the late Taoutai Woo, and in such capacity and for and on behalf of the said Taoutai did from time to time pay monies to the forces engaged by the said Taoutai in the suppression of the Taiping rebellion, and for and on behalf of the said Taoutai was concerned in the recommendation of steamers to be used by the said Taoutai to aid the said force. And the defendant has been informed and believes that the said Taoutai did so engage several foreign steamers and affix his seal on the charters thereof, but no record has come to the defendants knowledge of any charter of the steamer *Keorjeor*, and he does not believe any charter of said steamer was ever made by the said Taoutai or the said Taikee.

3.—That it is incredible that the said Taikee chartered for the said Taoutai the said steamer on the terms stated by the said plaintiff, namely, for four months at Taels Three thousand per month, when the price of the said steamer was fixed by the said plaintiff at Taels Twelve thousand only.

4.—That the defendant has been informed and believes that soon after the suppression of the rebellion a claim similar to the present one was put forward by the plaintiff in respect of the said steamer *Keorjeor*, and that the same was referred to Messrs. Cunningham, T. Hanbury, and A. A. Hayes, as arbitrators, and that by their Award the said claim was disallowed.

5.—That the said Taikee had no official seal, and it was not his practice either to sign or impress his private seal on the charter of any steamer so hired as aforesaid.

6.—That the reference to Arbitration referred to in the 9th paragraph of the plaintiff's petition was, as appears by the said petition, made at the instance of the said Taoutai Woo and his Honour the American Consul-General for the consideration of the plaintiff's claim as against the Taoutai Woo, for service rendered the Government Forces and not as against the late Taikee personally.

7.—That throughout the transactions referred to by the plaintiff, he the plaintiff fully recognized the position of the late Taikee as Agent merely of the said Taoutai Woo.

8.—That by the 28th Article of the Treaty between China and the United States of America, it is clearly laid down, "that if con-,, troversies arise between Citizens of the "United States and subjects of China which "cannot be amicably settled otherwise, the "same shall be examined and decided con-"formably to *Justice and Equity* by the public "officers of the two nations, acting in con-"junction," and in accordance with such principles the lapse of time alone is sufficient to bar the recovery of any such claim as that of the plaintiff, even had it ever been admitted to be valid.

9.—Under the circumstances hereinbefore appearing, the defendant submits that there is nothing due to the plaintiff from him as the representative of the late Taikee, or from the Estate of the late Taikee and humbly submits that this honorable Court should dismiss the petition of the plaintiff with costs.

The CONSUL-GENERAL said he had sent a copy of the defendant's answer to the Taotai; and, as he had read it himself, he supposed there would be no necessity to read it in Court.

The TAOTAI, through Dr. Yates, acknowledged the receipt of the translation of the answer.

The Court proceeded to hear evidence on the petition; and,

Mr. EAMES first called the plaintiff,

CHARLES E. HILL, who, sworn, deposed to the facts contained in his petition.

The TAOTAI asked what had become of the steamer?

A reply was given that all such facts as that would be shown in the hearing of the case, and would be explained to him as it proceeded.

Plaintiff's examination resumed—I came to Shanghai in 1860, and left for a time in January, 1866. I was familiar with the proceedings of the force known as "The Ever-Victorious Army," and General Ward's command. I furnished supplies to the Force, my dealings being entirely with Yang Taikee. The final arrangements under which Ward was to take command of the Force, were made through me. I introduced Ward to Taikee. I never had anything to do with Woo Taotai (the then Taotai of Shanghai), nor did I know that he had anything to do with the Force until he disagreed with Taikee. Mr. Hayes had nothing to do with that arbitration. I filed a claim with the first arbitrators, Messrs. Jenkins and Rogers, for only four months' charter of the steamer, because Taikee asked me to do so, the steamer being then in use. I never filed any other claim, until this petition. I know by common report and newspaper report, that the steamer was captured somewhere about the 1st August, 1863, near Soonkong. This information I got from Dr. Macartney, who was there. The steamer has never been returned to me, nor has any offer been made to return her to me. I see the defendant's answer speaks of my long delay in making this petition, but I repeatedly sent in a claim to Taikee up to the time of his death; after that circumstance, to his wife; and until I went home in 1866, when I left the case in the hands of Dr. Yates. I returned from America at the end of 1867, or at the beginning of 1868—within a month either way. Taikee often promised to pay me; but when I applied to his widow and son, I was told I must wait until her period of mourning was over. While I was so waiting, it happened that my own family affairs made it necessary for me to go home. Taikee, and others connected with him, never denied that the steamer had been used. I have never received one *cash* for the use of the steamer, or for indemnity on account of her loss. When I returned to Shanghai in 1867 or beginning of 1868, I was in the employ of Jardine, Matheson and Co., and they sent me to Newchwang, where I remained three years. After I left Newchwang I again went home, and when I returned after that occasion, almost immediately went to America. These circumstances will account for a great deal of the delay that has occurred. As soon as Mr. Seward returned to Shanghai, I lost no more time, but immediately entered my plaint.

Cross-examined by Mr. DRUMMOND—On my first departure from Shanghai, I was absent about two years. It was in March, 1868, that I left Shanghai for Newchwang. I remained at Newchwang until the fall of 1870—not quite three years. I then returned to Shanghai. At that time I had business that took me South, to Canton and other places; and also to Japan. I left Yokohama, in February, 1871, for America, and remained home one year, returning to Shanghai about May, 1872. I have remained with the exception of short absences to Pekin and elsewhere, ever since my last arrival. I have talked over my private affairs with Dr. Yates frequently, and have probably had casual conversations on the same subject with other of my friends. I can give you the names of some with whom I have conversed—there are Mr. Seward, Dr. Yates, Mr. Eames, Mr. Bradford, Mr. Vail, Mr. Keswick; —with the latter, because he was agent and trustee for the other party. At Newchwang, too, during the two or three years I was there, I dare say I talked to some persons also—it was very likely in a small community like that. I have not, to my recollection, made this claim the subject of special conversation. I spoke to Mr. Albert Knight, at Newchwang, but do not remember any one else, except Dr. Yates, who was with me at Newchwang for a time. I cannot specify any others. I claim Tls. 54,000 and interest. I have never forgotten the fact of my having this claim. I have never made my property on expectations in regard to his claim, the subjects of special conversation. I am not in the habit of mentioning my private affairs or special prospects to any one promiscuously. Dr. Yates is, I believe, the only person who knows how much I am probably worth, but I do not believe there is one man in the world who knows what I owe, or who owes me, or what I am worth. I may have mentioned the particulars of my property to one or more of my private friends.

The TAOTAI, to whom the substance of this had been interpreted, wanted to know what it was all about, as he could not understand it?

Mr. DRUMMOND said the questions were necessary to the interests of the defence.

Cross-examination resumed.—Only one charter-party was signed by me, but my name appears in the charter-party twice. It was also signed by Taikee and Ward. The latter signed only by way of approval, and for no other reason. The charter-party proper was supposed to be in Chinese, but I wanted a translation of it in English. The charter party was never renewed by Burgevine. I am not aware that be ever refused the charter-party. He never did so with me.

The TOUTAI asked if, when the steamer was seized, Ward was still living?

A negative reply was given.

The TOUTAI further asked what had become of the charter-party?

A reply was given, that the plaintiff did not know. It had never been in his possession since it was given up at the first arbitration.

Cross-examination again resumed—When Ward died I took no steps with regard to the steamer or as to the renewal of the charter-party. I saw Taikee sign the charter party. I cannot read Chinese, but I know he took a Chinese pencil and wrote something. I do not know what characters he wrote. He signed what he said was his name. I have no doubt about its being his name. He also affixed a Chinese stamp to it—what we designate by the name of "chop." I saw him affix that also. I cannot describe what the chop was

like. It was not much larger than the hong chop that is used by compradors, rather larger than wide. It might have been about an inch long. The charter party was signed at Taikee's private house, at the corner of Honan and Kiangse-road, where I did all the business with Taikee and Ward. Taikee told me it was his own chop. I never saw him affix the same seal to any other document, nor ever had any business with him requiring a chop seal. I do not know whether Taikee had any other seal of the same kind, or whether he had an official seal. I saw the charter-party after it was signed and sealed. I held the charter-party in my possession until some time after a man named Benson was appointed Quarter-master-General under Burgevine. I kept it in my possession until I was called upon by the Arbitrators to produce it in evidence, as to chartering the steamer for the four months. I then gave it up, and have not seen it since.

The Taotai asked if Benson was here, and was informed that he was in Yokohama.

Cross-examination further resumed—When I had the charter-party in my possession, I have no recollection that it bore any other stamp or chop than the one I have mentioned. I know that when the Naukin expedition was fitting out, the Taotai's chop was required. That was under Burgevine. I know that by seeing the other charter-parties afterwards, but I did not know it at the time. General Ward, Taikee, and myself were present when Taikee signed and sealed the charter party in question. Rogers is an American citizen. I have put in an affidavit by him; I do not think he can read Chinese. Taikee went with me to Mr. Rogers, and acknowledged the charter-party, and I believe we also went to Mr. Jenkins; but I have not thought of that matter at all—you can ask him if you like. Jenkins was chosen as an arbitrator entirely by Taikee. He speaks and reads Chinese well. The steamer was chartered for four months certain at Tls. 3,000 per month, and her value was set down at Tls. 12,000, though her cost to me was Tls. 25,000. In case of the steamer being lost within the four months, I should have received Tls. 12,000 only—the money that was due upon her at the time; that is, supposing she had been lost just after starting, I should should only have got about Tls. 12,000. I did not agree with Taikee to wait until the whole of this province of Kiangsu was retaken from the rebels to be paid my money. When the disturbance took place with Burgevine, they were in great straits for money, and at the same time had to reorganise the entire Force, purchase heavy guns, etc. I was not in particular want of money at the time, and agreed to wait from time to time for payment. While I was waiting patiently for this money, I was, as a merchant, getting paid for other goods, as were also other merchants on account of other transactions. Taikee paid me $10,000 on account, but it was for the firm to which I belonged, and not to myself individually. My own personal money I waited for—I did as I liked about that. Taikee and myself were personal friends, and I did more for him than I would for any other man in China at the time. When Ward lay wounded, I gave up my own room to him, and sat up and nursed him, because Taikee thought he was then going to die. My waiting for my money was in fact a matter of personal arrangement between Taikee and myself, because he said if I pressed him for payment it would inconvenience him. Taikee was alive when the matter was first submitted to arbitration, and admitted my claim at the interview with Rogers, one of the arbitrators. Mine was only one of a good many claims, and was included among them at his special request. He said if he paid any of the claims which arose under Burgevine's command, he would not get his money back again from Woo Taotai. I therefore allowed mine to go in with the other claims, and depended entirely upon Taikee for payment. The difficulty in the way of paying me was not because Woo Taotai would not sanction my claim, but because of want of funds. I am not aware that any application was ever made to Woo Taotai on the subject. The newspapers reported at the time the vessel was taken by the rebels that such was the fact. Of my own positive knowledge, I am not aware that Burgevine had anything to do with her capture, but it was the general report that he had. The Chinese name of the steamer was *Keorjeor*.

Some conversation here ensued as to the name of the vessel, and her identity with the one in question; and Dr. Yates said the proper name was 高橋, the English equivalent being "High Bridge," the name of a place between Shanghai and Woosoong, where an important victory was gained over the rebels.

Cross-examination continued—I do not know who gave her that name. Up to that time the Chinese had only got three steamers. I cannot tell you of any other steamer named after the name of a place, nor do I know what the Chinese names of steamers mean. There is the *Yungching*, for instance, I do not know what that means. I do not know either that the Chinese name their steamers after quite a different principle to the names of places, such as "Good Luck," "Good Fortune," or some such names. I do not know whether, after Burgevine's dismissal, the steamers were in the hands of a person named Holland. I do not think that Colonel Gordon had anything to do with the *Keorjeor*. I never made a claim upon either of those, or upon Dr. Macartney, for payment of this money. I do not know that she was at one time in the possession of Dr. Macartney at Shanghai. I have been told that she was, but I was not here at the time. It was after she had been recaptured. I was told she was here, having new boilers put into her. I do not know that Taikee was ever disgraced. He had some "difficulty," but I never knew the facts—he would not be likely to tell me. I do not recollect if it was a matter of public notoriety. I never applied to any Chinese authority for payment of my claim. I agreed at one time to sell the steamer to Taikee for an additional sum of Tls. 8,500, and a bill of sale was made out then. That was in June or July, 1863, and was arranged on the ground that the sum due to me was so large. At the expiration of the four months, Taikee had the right to continue the use of the steamer as long as he chose, on the same terms. It was so stated in the charter-party. The steamer was not taken by the rebels during the currency of the first four months, nor until ten months afterwards, and she was in use altogether fourteen months. They never gave me notice that they wished to renew the charter party at the same rate, nor that they wished to break the charter. No fresh agreement was made between us. I looked upon Taikee, at the time the steamer was chartered, as chief of Ward's Force. He originated the Force, and undertook all things necessary for it; and I do not believe anyone ever saw Woo Taotai in the matter. Taikee did all this, not as agent of the Chinese Government, but for the purpose of suppressing the rebellion, for clearing this province of the rebels. Taikee acted as a sort of banker for the Forces, and paid them. He was the head of the Haikwan Bank at the time. Taikee acted from patriotic motives, I believe, all through, and I also believe him to have been a good and conscientious man. I further believe he did all this on his own private account, that is, when he started the Force, and not as agent for China. He made a great deal of money out of the Force, and I think he was the father of the whole thing, without any communication from his Government. I cannot speak more positively, and only express my opinion on this point.

The Consul-General—Do you know anything about it?

Plaintiff—No, I do not; it is only what I believe.

The Consul-General—Then why did you not say so at once.

The cross-examination of the plaintiff was continued for some time longer, and in the course of his replies, he said I had no claim upon the Chinese Government, excepting through Taikee. The award of Jenkins and Rogers, the first arbitrators, was in my favour, granting me all I asked on the four months' charter-party. I know there was another arbitration, before Messrs. Cunningham and Hanbury, but cannot say at what time afterwards. I had no right to enforce the arbitration of Messrs. Jenkins and Rogers. I left that in the hands of the authorities.

The Consul-General said he knew more of that part of the matter than anyone else, and at a later moment, if it were thought desirable, he would take the stand and make a statement.

Cross-examination further resumed.—I do not know the result of the reference to Messrs. Cunningham and Hanbury, and never asked what the result was. I left all the papers having reference to my claim in this case, in the charge of Mr. Lewis, who was clerk in the Shipping-office at the time. They were placed in a pigeon-hole by him. Those papers stated what was due to me. I have not seen them since. I believe they were lost, bill of sale, charter-party, and all.

The Taotai asked when they were lost?

Plaintiff.—I have not seen them since my return to Shanghai in the beginning of 1868. When I first went to Taikee's widow about the matter, she did not ask to see the charter-party, but only said her period of mourning was not over, and that I ought not to ask her to do any business.

The Taotai—How long after that was it before it was discovered these papers were lost?

Plaintiff—Not till about five years afterwards.

The Taotai—And have no steps been taken to recover them?

Plaintiff—I took all the steps I could think of.

Mr. Eames pointed out that the plaintiff did not say they had been lost all that time, but that they were discovered at a certain period to be missing.

Cross-examination resumed—I did not file the petition until ten years after the occurrences for the reasons I have given before. It did not occur to me that it would be dangerous to wait so long without filing a petition. The subject has never been allowed to drop, and I have never lost sight of the claim, but always had some one looking after it every two or three months.

Re-examined by Mr. Eames—I understood by Ward's signature that he was merely a witness to the matter between Taikee and myself, not making him in any way responsible to me. After Woo Taotai came into office, they continued to use the steamer, but took no exception to the charter-party.

Mr. Eames said he put those questions because he saw his friend Mr. Drummond was trying to cut the Chinese Government out of the case, with a view to ulterior proceedings.

The Taotai was asked whether he had any questions to put to Mr. Hill, to which he replied in the negative, as there must be witnesses on both sides to be examined. The charter-party must be produced, however.

Mr. Eames would make a suggestion. As the case was likely to last all through the winter at the present rate, he suggested that he should simply put in the next witness's statement, as sworn to, and Mr. Drummond could proceed with his cross-examination at once.

Mr. Drummond thought it would be better if the examination proceeded in the regular way, as the Taotai might wish to put some questions to the witness as it proceeded.

The Consul-General said it appeared to him desirable to take the witness's evidence as it stood in his affidavit, a translation of which had been supplied to the Taotai. Abbreviation was very desirable, for it was possible they might all catch their deaths sitting in such a building.

[The Mixed Court is very like a ruinous barn. It has an unceiled roof, and a front composed of glass and wood. Some of the panes are broken, and the wood is full of chinks and openings, giving free admission to the wintry wind, and fully justifying the Consul-General's remark.]

Frederick H. B. Jenkins was the next witness. It was decided that Mr. Eames should read his sworn affidavit in his presence, and he was accordingly called into Court. The affidavit was to the following effect:—Witness was an American citizen. In 1863, sometime after the death of F. T. Ward, there were certain claims against Ward, which Woo Taotai refused to pay. The said claims were referred to arbitration, witness and Rogers being the arbitrators appointed to act on claims of citizens of the United States; one of these claims was that of C. E. Hill, the plaintiff, and was based on a charter party for the steamer *Keorjeor*. The steamer was engaged in active service during the rebellion. The arbitrators decided to give Hill the sum claimed. (The affidavit confirmed other portions of the plaintiff's evidence, and was in fact corroborative all through. It was sworn

before O. B. Bradford, Esq., on the 2nd of December, 1873.)

In reply to the CONSUL-GENERAL, the witness having been sworn, said the contents of the affidavit were true.

Mr. EAMES asked the witness a few additional questions upon the affidavit, his replies to which were further confirmatory of the plaintiff's evidence.

Cross-examined by Mr. COWIE—At the time named in the affidavit, I was trying to make a living. I forget in what way. I did all sorts of different things. I owned steamboats for one thing. At the time of the arbitration, I was engaged in general business.

Mr. EAMES objected to this line of examination.

Cross-examination resumed—I had transactions with Woo Taotai. I do not recollect that I have any claims against the Chinese Government. I might have. Mr. Hill's claim was brought before us to decide upon, as near as I can recollect, with some other claims of foreigners, against both Woo and Taikee. I was appointed by Woo.

The CONSUL-GENERAL explained that the arbitration was appointed to consider claims of foreigners against the Chinese Government, some of which were incurred by Woo and some by Taikee.

Mr. EAMES—But the witness has not said so.

Mr. COWIE—No; but Mr. Seward has.

Cross-examination resumed.—We went through all the bills presented to us, and examined them. Not one of the claims submitted to the arbitrators was paid. I saw the charter-party alluded to, and to the best of my belief it was signed by Taikee. I have stated so in my affidavit. It is a long time to remember things exactly as they occurred. I do not understand Chinese very well. I think I might understand what the characters were that Taikee put to the charter-party. I think it was also sealed. I cannot state anything more than appears in my affidavit. I do not remember whether the Taotai's seal was on the charter. I know the steamer was employed with the Soonkong Force. The officers of the Force used her. My deposition and affidavit were written by Mr. Hill, and are as near as I can recollect. I dictated a portion of them to him, but before I swore to them I read them through several times, and am sure they are correct. I have no further interest in this claim than in any of the others. I do not know whether the award was enforced,—our work was done in making it.

A few unimportant questions closed this witness's cross-examination, and the Court adjourned.

Jan. 4th.

Before the Chinese Magistrate, CHEN; and W. G. STRONACH, Esq., H. M. Vice-Consul.

Serious charge against Native Detective Policemen and others.

This was a remanded case, the particulars of which, having reference to the alleged abduction of a girl, at the instance of an officer of high rank in the Chinese army, from a house in the Hoopeh-road, in this Settlement, were reported in the *N.-C. Herald* of the 3rd ult. Several Chinamen of respectable position were stated to the concerned in the matter, two of whom, who had apparently acted as principals, were the defendants in the present case. Their names were 傅晋友 (Foo T'shing Yao), a *tepao*, formerly in the employ of the Municipal Council as a detective policeman; and 葛棟山 (Qua-tung Seng), also a member of the detective force. The charge against them was that they had received the large sum of Tls. 3,000 from an acquaintance of the officer in question 楊 (Yang), for the purpose of abducting the young woman, and that with portions of the money they had bribed some other members of the native detective police to assist them in the nefarious transaction. The name of the acquaintance who consented to act as go-between, is 吳雲亭 (Woo-wing Ding), an employè of a foreign hong in Shanghai, and a relative of a *toutai*; and the case has been under remand in consequence of his having left for Ningpo shortly after the affair. His whereabouts was discovered, however, but before he could be arrested, he had gone on to Hangchow. At that place he appears to have been met by a European gentleman who knew him, to whom he made known the circumstances under which he was placed, and by whose advice he consented to return to Shanghai and explain the part he took in the transaction. On the case being called on,

WOO-WING-DING made the following statement—I made the acquaintance of a Yunan Mandarin named Yang, and went with him every night for two or three weeks to Sza Juai Lee. One night Yang asked a young woman whom he had met on several occasions, if she would go with him to Yunan, promising to make her his second wife. She said she would go with him willingly, and upon his further question as to whether he might rely upon it, she answered in the affirmative. Yang then sent his boy to the hotel where he was staying, telling him to get from thence one pair of heavy gold bracelets and another pair of jade-stone, also promising the young woman money. Next evening, Yang was told that she had gone to her mother's house, and that the mother refused to permit her to go to Yunan, as it was so far away. Yang went into a great rage, and on the advice of one of his followers, he went to the Paou Tang Ting, and there saw Foo T'shing Yao and Qua-tung Seng, who offered to settle the matter for Tls. 3,000 ($4,000)—and also guaranteeing to Yang that he should have no further trouble in the affair. They told him to send a boat to Jessfield Farm, and that they would take the young woman to the boat. Yang then agreed to pay the amount named. The same night, the boat was sent up the Soochow Creek to the place appointed, and Yang, in company with the witness, went there in a carriage. After waiting some time the young woman was brought to the boat by Foo T'shing Yao and Qua-tung Seng, and Yang handed to them a bank order for the Tls. 3,000. He immediately afterwards started with the young woman in the boat, for Soochow. After about fourteen days, the young woman's mother came to witness and said that she had been offered money by Foo T'shing Yao and Qua-tung Seng to say nothing about it, but that she would have her daughter back again or go to her. After some time, Yang came to this arrangement with her—that she was to have $2,800 of the money, and be allowed to go to Yunan with her daughter. The mother then signed a paper to the effect that she had received the money and was perfectly satisfied, and with that paper Yang returned to Shanghai, went again to the Paou Tang Ting in company with witness, and on producing the above-mentioned paper, Foo T'shing Yao and Qua-tung Seng returned to him $2,800, thus keeping $1,200 for their trouble as agreed. Witness himself never received a *cash*, had nothing to do with the matter, and only accompanied Yang as a friend.

The MANDARIN said he was not at all satisfied with the statement that the $2,800 had been given back as described.

QUA-TUNG SENG was next brought into Court, and placed upon his knees. He in part confirmed the statement of the witness, confessing that he and the *tepao* divided $1,000 between them, and that the remaining $200 were swallowed up in expenses.

The MANDARIN said it was remarkable how money would melt in such cases as this.

Acting-Superintendent STRIPLING said he could not understand how $200 were expended, as he had ascertained that the carriage hire had only amounted to $7.

FOO T'SHING YAO was next examined separately, and told a very different story to each of those preceding. He denied that he kept any of the money for himself, but said he gave it all away to other persons concerned, though he did not say to whom. He added that the first witness's statement was not true.

Mr. STRONACH said this defendant's statement, in the native language, was very confused, and he made no mention as to the repayment to Yang of the $2,800.

The MANDARIN, who for some moments appeared to be in a dilemma, suddenly and with seemingly great warmth of manner, ordered Woo Wing Ding on to his knees as a defendant.

This unexpected proceeding so terrified Woo, that his countenance assumed a most rueful expression; and on being told that he had already confessed enough to ensure his punishment in some way, he further confessed that it was he who gave the bank order for the Tls. 3,000 to the other defendants.

The MANDARIN then advised him, if he had got any of the money now, to give it up as quickly as possible.

Woo, after pondering a moment, said that he was ashamed to tell the Mandarin before that he had "squeezed" some of the money. He had done so, and now asked the Mandarin to fine him and let him go!

The MANDARIN—How much will you pay?

Woo—Say $50.

The MANDARIN—No; that is not enough.

Woo said he had only received $50 of Yang's money.

The MANDARIN—How much will you give to get rid of this affair? There is no fear of my wanting it for myself—it will all be in the newspapers!

The other defendants now said it was Woo who had got them all into the scrape.

The MANDARIN (to them)—Would not $50 be a ridiculously small sum to make him pay?

QUA and the *tepao* both said it would be too small a sum.

The MANDARIN suggested $500 as being nearer the mark, but this met with no response.

Mr. STRIPLING now caused to be ushered into Court, several other native detectives who had been found to have received bribes of $50 or thereabouts, to prevent the transaction coming to the knowledge of the Police authorities. All these men were ordered by the Mandarin to give up the money to the Police.

One of them, Chang-foo-szee, was the man who was appointed about two months ago to a responsible public office, and a few days afterwards was sentenced to three months' imprisonment for making a violent disturbance, but who it appears was liberated from the yamên on the score of ill-health or for some other cause. It was said that in his case the $50 had been paid to his wife, and he now said, in very good English, "What proof it was given my wife? I won't pay it."

The MANDARIN said he would deal with him presently, and then proceeded to decide the case. Foo, the *tepao*, and Qua, the detective, were each ordered to give up $300.

Mr. STRIPLING—But will not the Mandarin make them give up all that they received, and obtain the return of the smaller sums they have paid to the others? Both those men received $500, and he hoped the Mandarin would not only make them return that amount, but also punish them severely as well. If he did not do so, there would be plenty more "squeezing," besides other misconduct, for any lighter sentence would have no effect.

Mr. STRONACH consulted with the Mandarin, and afterwards said he could not induce him to alter his decision.

Mr. STRIPLING—Then the *tepao* receives $500, has to pay back $300, and so pockets $200; while the detective, who has admitted that he has received $350, will retain $50—about four months' pay for him.

The MANDARIN next ordered Woo to pay a fine of $100 for his share in the transaction, and a European gentleman in Court at once gave a bank order for that amount on his behalf.

The MANDARIN ordered that all the other amounts should be paid before the end of the Chinese year, and in reply to a question said the punishments to be inflicted would be considered.

Mr. STRIPLING said the community would not be satisfied with such a decision.

The men said they would rather go to prison than pay back any of the money.

Mr. STRIPLING said imprisonment in the yamen would be no punishment, because they could do almost as they chose—smoke, and see their friends, and have food brought in to them.

The case thus terminated.

Miscellaneous.

FIRE ON BOARD H.M.S. "CURLEW."

On Monday morning, shortly after ten o'clock, an alarm of fire was given on board H.M. gunvessel *Curlew*, Commander Church, which arrived at Shanghai from Hongkong (at which port she had been recommissioned), only on Saturday last. The fire broke out in the sail-room, just over the port forward magazine, and was fortunately discovered before it had obtained much headway. The crew were immediately called to fire-quarters, and went to their stations with customary alacrity and

coolness. The proximity of the seat of the fire to the magazine, rendered it necessary that the first step should be to flood that source of extreme danger. The valves were therefore quickly opened, the hose rigged, and large quantities of water poured in among the powder cases. In the meantime the signal for aid was run aloft, and was speedily answered from the signal station on the Pootung shore and from the other ships. But a very few minutes elapsed ere boats and launches were seen pulling hard for the scene of the fire. They were from the French gunvessel *Volta*, the U.S. corvettes *Hartford* and *Kearsage*; H.M. corvette *Modeste* and gunvessel *Ringdove*. The launches each carried a deck fire-engine, and were quickly alongside the burning ship and at work. The floating fire-engine from Kin-lee-yuen was also soon at hand, and the hose being run on board aided in the work of extinguishing the fire. Notwithstanding the vast body of water poured into the sailroom of the *Curlew*, it was evident that help had not arrived too soon, for smoke began to ascend through the hatchways in large quantities, showing that the fire would soon have obtained a serious hold of the vessel. One lower deck beam, indeed was so fully ignited, that it was found necessary to cut it away, to prevent the flames spreading; and it was not until so much water had been pumped on board, and the forehold so far filled that it reached within a very few inches of the lower deck beams, bringing the ship greatly down by the head, that all further source of danger was prevented. About the time this was achieved, the *Tsatlee* steamed to the scene to render aid, and brought up just astern of the *Curlew*, but her services were not required. At about 1.15 p.m., it was announced that the fire was extinguished, and the engines ceased working. Previous to this the men had been engaged in getting on deck the sails caught by the fire, and it was matter of surprise that comparatively little damage had been done to them. The closeness with which they were stowed will in a measure account for this; but sufficient damage was done, however, to show that had the fire broken out in the night time, the destruction would have been much greater. Of course until the magazine, sailroom, and lower hold are cleared of the water and *dèbris*, it is impossible to ascertain what amount of damage the ship herself has sustained; but it is believed this will be found to be no more than can be repaired without going into dock. Too much praise cannot be given to the officers and men of the several ships named, and also those of the Kin-lee-yuen engines for the readiness and skill with which they rendered aid in the emergency. Had the fire reached the powder, the destruction of life and property can only be imagined —the *Volta* and *Kearsage* lying so close to the *Curlew* that they at least could not have avoided the effects of the concussion.

SHANGHAI TEMPERANCE SOCIETY.

The Temperance Hall was again comfortably filled on Saturday night last. Mr. C. P. Blethen, President of the Society, officiated as Chairman, and requested Mr. Shaw to commence the proceedings with prayer, after which the audience sang an opening chorus. Captain Barclay, of the *Northampton*, who was cordially welcomed, recited *Campbell's* stirring poem, "Lochiel's Warning," a reminiscence of the days of the Stuarts and Culloden. The piece was suitably rendered, and was loudly applauded.—Mr. Weatherdon, chief gunner's mate of H. M. S. *Modeste*, next sang in very good style and voice, "The auld Scotch Sangs for me," and complied with a redemand, by substituting the pretty ballad, "Bell Mahone." Mr. Weatherdon has a very musical voice, and sings with remarkable taste, but excellent as his rendering always is, we think it would give more pleasure to the audience if he received the assistance, in the way of accompaniment, that is vouchsafed to other singers. The next selection was a reading by Mr. Triggs, of the A.D.C., who gave one of Robert Browning's pleasantest of children's poems, "The Pied Piper of Hamelin." The reading was admirably given. The succeeding number on the programme announced a song and accompaniment, the former by Mr. C. L. Simpson and the latter by Mr. J. Hoffmeyer. The song was Tennyson's "Come into the Garden, Maud," one of Sims Reeves' best musical *morceaux*, and was sung in the most finished style of amateur vocalism. Mr. Hoffmeyer's accompaniment on the piano was a source of great delight to the audience, and with the song was received with a storm of applause, which did not cease until both gentlemen again presented themselves. Mr. Simpson next sang, "When other Lips and other Hearts," from the *Bohemian Girl*, and the performance was equally successful.

Being given in connection with a Temperance Society, these entertainments would not of course be complete without a temperance address, and the speaker on the occasion under notice was Dr. Macgowan, whose observations rambled over the physiological, medical, moral, and statistical aspects of the question, and were in favour of the safety of total abstinence as compared with even the moderate use of alcoholic drinks.

A song by Captain Barclay, given by way of filling a gap caused by the unexplained absence of the vocalist under promise; and a recitation by Mr. Rogerson—Tennyson's "Charge of the Light Brigade," capitally delivered—brought the programme to an end.

NOTE ON THE FORMOSA COAL-FIELDS BY A NATIVE EXPERT.

(Customs Reports on Trade.)

In closing his remarks on the coal trade of North Formosa, Mr. Hobson mentions that "rumours have been rife from time to time during the last twelve months of an intention on the part of the Fukien higher authorities to introduce Foreign machinery into the Kelung collieries, but that matters have not advanced in this direction further than the appointment of a Native expert to survey and report on the Coal measures. A rough translation of his memorandum is appended, and in connection with his remarks it should be stated that for the more practical of them he is in all probability indebted to M. Dupont, a French Engineer, and a professional, who whilst in the employ of the Foochow Arsenal authorities surveyed much the same ground during 1863. His Report has likely enough been lying in the archives of the Arsenal Director's office ever since, and if so, it may turn out that indirectly it was not penned entirely in vain. Apart from the really practical suggestions of the Chinese expert it is decidedly amusing to observe that he cannot steer clear of the bugbear "fêng-shui." No doubt he is right to refer to the subject though, as it must be consoling to the higher authorities to know that an innovation springing from an extended knowledge of Western appliances can be adopted without interference to the main pulse of the geomancy of the district."

The petitioner having been ordered to survey the Coal-fields of the island, begs to report as under:—Starting from Twaiwan-fu he travelled viâ Kia-i and Changhwa, crossing the Taoutow and Chuh-shui streams, remarking that the mountain ranges of the interior must contain rich Coal deposits. Of this fact however he judged by the colour of the waters he met with, and not by personal inspection of the base of the ranges. (N. B. These ranges would be adjacent to savage territory, and to which the surveyor would not care to proceed.—Translator).

In the New-tow-shan near Aoulan there are also large deposits, which is proved by the fact that mineral oil here exudes. In the line of country between Banka and Kelung much Coal exists, of both good and inferior qualities, whilst beyond Shui-fan-kioh and to the north of Ta-heaou, the presence of good Coal is betokened by the rock formation of Moo-teen-ling. The high road of the district crosses this range, and a river skirts its base, the Coal measures dipping to below water level.

Mining operations would here be materially interfered with by the river water, which even in winter would be on a level with the seams, whilst in summer and autumn it will be above them.

Such are the remarks he has to offer on the deposits noted on the line of march. After reaching Kelung the petitioner first called on the gentry of the locality to make enquiries of them, and afterwards started in company with the Coal office Weiyuen, to explore the adjacent hills.

Between Teenleaou-keang and Shengaou-kang, a distance of 10 *li*, ten mines were visited. From these following the range of hills on the seaboard, the Kelung mountain was reached and ascended.

It was noted that the main geomantic pulse thereof proceeds viâ Santseaou-ling in a southerly direction towards the *fu* city; another pulse issues to the right and trends west by the seaboard to Kin-paou-li. What others exist are simply side arteries, amongst which Coal exists, and which can be worked without detriment to the main geomantic properties of the district.

After passing the night in the Salt office at Kang-tsye-leaou, a round was taken to the eastward of the Kelung mountain, amongst hills at once high, rugged, and difficult to cross, but at this point further investigation was put a stop to by a continuance of rainy weather.

To sum up: Formosa abounds with Coal measures which it is possible to mine. So extensive is the Coal-field, that were the whole of the inhabitants of the isle called on to devote attention to mining, it is the petitioner's opinion that their united operations would not exhaust the supply in a thousand years. The Coal supply may therefore be looked upon as forming a mine of wealth to the country and its people. The quality of the Coal is nevertheless not superior, and as the present mining operations are conducted without method, the result is that working expenses are heavy; the cost of the article produced is therefore enhanced, its sale is interfered with, and profits are small; it is obvious then that the introduction of mining machinery is essential. On the other hand, in view of the poorness of quality, and the fact that the Coal seams are not thick—only some three feet, from which cause the miners have to work in a stooping position—the idea of introducing machinery may be deemed unworthy of attention. If argument be further required in support of the non-machinery view, it may be noted that the mines lie near the surface, are carried inward for no great distance, and are not to be compared with shafts sunk deep into the earth.

On this account, therefore, there is little to be contended against in the shape of inflows of water. For the present, by improving on the style of mining tools in use, and by introducing a few new ones of a minor description, some advantage may be reaped; but by far the most important matter is the necessity for an even and convenient roadway, along which coal-ladened carts drawn by horses or cattle might pass to and fro unceasingly.

Easy transport from the mines being provided for, expenses will be reduced, prices will become easier, sales will be large, and profits more handsome.

If the object be to get at the better quality Coal, it must be sought below the rock strata, and to reach it, durable chisels, &c., for cutting through the rock must be provided, and the Foreign system of boring attended to. Investigation of the lower strata proving satisfactory, the larger pieces of mining machinery can then be purchased, and the best of results may be looked for; but in this connection it is important that measures be advanced step by step, so that there be no hastening to expend funds in a lavish or futile manner.

For the present the petitioner appends a list of the implements which it is advisable to employ in the mines now open.

Another point demands attention; that is, that the Kelung neighbourhood is but a poor one, maintaining a struggling population; hence master-miners have difficulty in getting capital together. Were they advised then to invest in machinery, difficulties would intervene, not necessarily from a want of common sense on their part, but because their means are straightened. It remains for the Government to set an example by erecting machinery at a convenient spot affording water communication, when, after its utility has been thoroughly demonstrated, the miners can be advised to obtain similar appliances for themselves.

It behoves the petitioner to lay these his views before his superior, in order that, if they meet with approval, action may be taken on them.

SHANGHAI SHIPPING.

Table shewing number of arrivals of Foreign vessels within limit of Anchorage for the year ending December 31st 1874. Men-of-war, lorchas, and native built craft under foreign flags, not included :—

Flag.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

Note.—Several vessels under the Japanese flag arrived during the year, but came as transports; and the *Behar*, included in Table, is really a Government vessel, though at present worked by a Company, and will take on her return trip, the first of the cotton which is to be paid as part indemnity. The Jurtsu Maru (late Gipsy) is the only *bonâ fide* Japanese merchantman that arrived within same period.

Casualties within limit of anchorage :—

Barque *Lady Louisa* from Cardiff, arrived on 26th September with coals on fire. Ship and cargo but slightly damaged.

November 2nd.—Steamer *Cawdor Castle* came in collision with and sunk brig *St. Francois*. Steamer stove in on one bow, and cargo in fore compartment much damaged. Brig since raised.

November 22nd.—Cargo on board barque *George Washington* found to be on fire. Ship scuttled but since raised. Vessel and cargo much damaged.

December 4th.—A fire broke out on board barque *Conqueror*, laden with tea for New York. Fire soon extinguished. Cargo partially damaged.

December 16th.—Ship *Horatio* totally destroyed by fire. Chief Officer since dead from injuries received at the time.

THE NEW YORK TEA MARKET.

The following extracts from a trade circular compiled by Mr. J. D. McKenzie, Tea Broker, New York, explain some of the causes which conduce to the unsatisfactory condition of the American Tea-market, and which lead to the reception with such disheartening regularity of unfavourable advices by shippers in China :—

New York, 19th November, 1874.

Since my last report, dated 22d October ult., I cannot quote any improvement in the condition of the Tea Market. On the contrary, there is a still further material decline in prices, with a marked unwillingness on the part of our large dealers to purchase in excess of immediate wants, which are very small. Considerable parcels of all kinds have been forced off at auction *without reserve*, just as real estate is sold under foreclosure sales to the highest bidder. The way the business seems to be done now is literally thus: In China and Japan the buyers ask this question, What will you take? *and they give it*; and here the receivers or owners ask the opposite question, What will you give? *and they take it*—in each case without regard to actual value or consumptive demand and supply.

Everybody in the trade asks, Why is the trade so depressed, and why does it not improve? I will answer it as I have done before—*The supply is largely in excess of our wants*, and more close at hand. Besides this, the great bulk of our people are poor in cash. Whatever may be their expectations, they are practising the most rigid economy in all their expenditures; as they cannot earn money they purchase lower grade goods of every kind. In this city it is stated that more than 70,000 persons are out of employment, with winter close at hand. Now in the interior of the country there are no railroads building as before on borrowed capital, and the hundreds of thousands of men at work upon them have been thrown out of employment. Certainly if they don't earn wages how can they have money to buy Tea or other things which they can do without. The first great need with them is *Bread*, and this is cheaper than it has been for years. These are some of the reasons why Tea does not sell at anything like its enormous cost of importation, or at prices equal to those obtained when the people had money to spend, or were out of debt.

Green Teas.—During the month old Green Teas have sold at prices fully 3 to 5 cents per lb. less than last quotations, say 35c. to 38c. per lb. for good to fine Moyune and Teenkai chops costing 36 to 40 taels per picul. New Ping Suey Teas suffer most. It is difficult to give quotations of value. The Auction Room seems to be the only place where they will sell, and then only for what buyers choose to give. A poor imitation of good tea, *as it should, it has come to grief. Market value of Green Teas*, when a purchaser is found, may be fairly stated thus: Ascertain the actual cost per lb., in gold, landed in New York, with all charges, except commission, and then deduct from that cost, say on Ping Suey Teas 27 to 30 per cent., and other kinds 20 to 22 per cent. This is near enough for all practical purposes, especially to those having a direct interest in the article itself.

Clippings.

A well-known Chinese shoplifter went into a shop in the Honan road, on Christmas day, and as on former occasions when he visited the shop, small articles were missed from the counter, one of the shopmen went to a part of the shop where, with his back to the fellow, he could observe his actions in a large mirror. In a very short time he observed him secrete a rug beneath the long garment he was wearing, and then hasten out of the shop. The watcher started in pursuit and soon caught the thief, whom he observed at the same moment to cram something into his mouth and swallow it. He was taken to the Central Police Station, and after the charge was entered, placed as usual in a cell. Soon afterwards, Mr. Inspector Fowler heard an unusual noise in the cell, and on going to ascertain the cause, found the prisoner apparently in the agonies of death. As speedily as possible, Mr. Fowler caused him to be removed to the native hospital in the Shantung road, where an emetic was successfully administered, and it was discovered that the stuff the prosecutor saw him swallow was opium. On Saturday the man was sufficiently recovered to be taken to the Mixed Court, and as he was recognised as a thief who had only recently been liberated from prison in the native city, he was sent there to be again dealt with by the Chehsien.

PASSENGERS.

DEPARTED.—Per str. *Ajax*, for London—Capt. Harmon, Mr. A. Warick. For Hongkong—Messrs. F. A. Williams, S. R. Seirberge, H. E. Lodge, and A. Sedeusner. Per P. M. str. *Golden Age*, for Nagasaki—Mr. J. C. Smith and servant. For Hiogo—Dr. Ermerius. For Yokohama—Mrs. C. J. Hansche, Mrs. Craven, Capt. Satterthwaite, Messrs. J. F. Sutton and S. J. Morris. For San Francisco—Messrs. R. J. Blackburne, C. Robertson and Robt. Henderson. Per P. & O. str. *Golconda*.—For Calcutta—Mr. E. C. Davis. For Bombay—Mr. D. Pestonjee and servant. For Venice—Mr. and Mrs. Latham. For Southamptom—Mr. H. Æ. Sidford. For Hongkong—Mr. A. G. Wood and Mr. S. A. Solomon.

ARRIVED.—Per str. *Chinkiang*, from Hongkong—Mr. and Mrs. Duff, Mrs. E. R. Holmes and child, and 64 Chinese. Per P. M. str. *Golden Age*, from Japan—Mr. and Mrs. Davenport, Messrs. J. S. Van Bruen, Rev. P. B. Tazets, Messinger, R. Newman, M. Von Lessen, H. E. Lodge, M. S. R. Seibert, F. H. Williams, Lieut. Sedeusner; 12 in steerage. Per M. M. str. *Provence*, from Marseilles—Mr. Ermermis. From Hongkong—Messrs. Chabal and Sutton. Per str. *Taku*, from Chefoo—Mr. Cousin, and 12 Chinese. Per str. *Haining*, from Foochow—Mr. and Mrs. Latham, and 35 Chinese. Per str. *Ningpo*, from Hongkong—16 Chinese. Per P. & O. str. *Gwalior*.—From Bombay—Mr. Fitzgerald. From Southampton—Mr. H. F. Holt. From Hongkong—Messrs. M. Kalb, F. Bloomfield and 11 Chinese. Per str. *Fusiyama*, from Hankow—Mr. Solomon. From Chinkiang—Messrs. Gearing, Williamson and Assitter.

COMMERCIAL INTELLIGENCE.

SHANGHAI, JANUARY 13TH, 1875.

ARRIVALS.—The mail steamers *Provence* and *Gwalior*, the latter with dates from London to 27th November, and the P. M. steamer *Golden Age* from Japan, with the American mails of 1st ult.; also, the ship *Golden State* from New York.

TELEGRAMS.—London, 8th January, 1875.—*Cotton Mid Orl.*, 7⅞d.; 8¼-lbs. *Grey Shirtings*, 9s. 7½d.; the public telegram states the home export of *Plain Cottons* to Shanghai for December to be 28,000,000 yards, but private messages subsequently received give shipments as from 16 *a* 18,000,000 yards.

PIECE GOODS.—The activity prevailing when last mail left has been gradually subsiding throughout the past week, and business has daily fallen off. This may be ascribed in part to speculation having been nearly satisfied, partly to the Chinese New-year holidays, which already appear to be exercising their usual influence on trade, and partly to the continued discouraging nature of the advices from the interior. At HANKOW.—Sales "have been on a very small scale—being confined almost entirely to *Grey Shirtings*, rates showing little or no change." From NEWCHWANG, however, there is rather better news—to 15th ultimo—for some articles, and the late steamers to CHEFOO have been carrying fair supplies of manufactures, their principal cargoes being low classed 8¼-lbs. *Grey Shirtings*, and fine to finest *Mexican* 7 lbs. *T-Cloths*. At NEWCHWANG, Mexican 7-lbs. *T-Cloths* had been sold at Tls. 1.54 *a* 1.56 per piece. Further there was some enquiry for 64 *a* 66 Reed and finest *White Shirtings*, and favorable expectations regarding *Dutch Drills* were entertained, but the *Heavy Shirtings* hallucination seemed to be dying out, the COREANS affecting indifference to the textile. The letters from JAPAN by the *Golden Age* did not advise anything of interest, beyond a little demand at NAGASAKI and HIOGO for *Figured* and *Plain Lustres*, light weight *Turkey Red Shirtings*, and the ordinary counts of 8¼ lbs. *Grey Shirtings*.

On this market the business of the week was done chiefly on the 6th, 7th and 8th instant—the *Shirtings* then settled being for CHEFOO and the *T-Cloths* mostly on speculation. It comprehended somewhere about 40,000 pieces of 8¼-lbs. *Grey Shirtings* at from Tls. 1.60 *a* 1.64 per piece, and 25,000 pieces of 7-lbs. *Mexican T-Cloths* at Tls 1.33 *a* 1.45 per piece, the highest figure being for *Mendel's hand & branch* Cloth.—These aggregates do not by any means comprise the whole week's transactions in these Cloths, but they form the bulk of those reported, and, with two exceptions only, viz.: about 16,000 pieces 8¼-lbs. *Grey Shirtings* and 13,500 pieces 7-lbs. *Mexican T-Cloths*, the others are scarcely worth recording.—With 6 and 7-lbs. *Grey Shirtings* but little progress has been made, and prices for the former are lower, those for 7-lbs. remaining as last quoted.—The latter remark is applicable to *heavy Shirtings*, of which sales have been very trifling.—In 6-lbs ordinary and 8-lbs. *T-Cloths*, business has been done at Tls. 1.05 *a* 1.06 and Tls. 1.62½ *a* 1.65 per piece respectively, and 1,000 pieces of *Dewhurst's* M.T. 6-lbs. at Tls. 1.25 per piece have been settled.

White Shirtings.—Demand, which is much quieter than it was, still runs chiefly on 64 *a* 66 Reeds, but latterly finest makes, or 80 *a* 100 Reed, have also been wanted, and a small parcel of fine 60 Reeds has changed hands at Tls. 1.88 per piece. The ruling rates have been Tls. 1.92 *a* 2.12 per piece for 64 *a* 66½ and the dealers have been offering Tls. 2.73 *a* 3.00 for the finest qualities, of which there appear to be few in stock. 72 Reed has been disposed of at Tls. 2.60 per piece.

Drills, Jeans and Sheetings.—No change to note in any of these fabrics. There has been a little business in each of them, but scarcely enough to affect quotations. The dealers are offering rather higher prices for the *American Sheetings* ex *Golden State* just arrived, but their tenders are still far below the ideas of the importer. *English Sheetings* are being enquired after preparatory to the resumption of the *Northern Trade* after Chinese New-year.

Fancy Cottons.—*Turkey Reds.*—A sale of 1,700 pieces favorite 3-lbs. at Tls. 2.10 per piece is reported. Other and minor transactions in the lighter weights and inferior chops have taken place at Tls. 1.70 per piece for 2-lbs. up to Tls. 1.97 per piece for 3-lbs. The latter business is for the JAPAN market, for which also some *Black Velvets* and 26in. *Velveteens* have been bought. Besides these a few *Chintzes* have found purchasers amongst our local merchants, and *Blue Mottles* or *Denims* have been occasionally asked for. The demand for *Brocades* and *Spotted Shirtings* has subsided.

Woollens.—*Long Ells.*—The quotations have not altered since last mail day, sales of H.H. 500 pieces and of C.P.H. 2,000 pieces having been effected at Tls. 7.20 and 7.25 per piece respectively. *Camlets.*—In these scarcely anything has transpired since the Auction held last Thursday, at which prices were raised about 3 mace per piece. There are however 800 pieces advertised for to-morrow's sale, and lower rates are talked of. The scarcity of C.P.H. Scarlet is still felt. *Medium Cloths.*—A trifle more activity is noticeable, but as yet the business is only retail, and the same may be said of *Figured Orleans*, of which a few of good to fine assortment and quality of *Shanghai* or *Tientsin* patterns at Tls. 3.20 *a* 3.45 per piece have been taken by the FOOCHOW and JAPANESE buyers. In *Spanish Stripes* there has not been anything doing.

METALS.—*Nailrod Iron.*—The market continues to go against importers, who are pressing sales with very little success. Quotations are quite one mace per picul lower, 3,200 bundles, good quality, having changed hands at Tls. 2.85—less brokerage—while best Dawe's has been offered at auction without obtaining a bid within three mace of the owner's ideas. *Lead.*—Irregularity characterizes the *Lead* market. The trade demand continues insignificant, the dealers contenting themselves with 50 to 100 pigs at a time, and for these they are compelled to pay close up to the rates current about ten days ago, but generally they will not buy in quantity unless at a reduction on the quotations of last week. *Tin* is lower again, with no more symptoms of business than have lately been visible. *Quicksilver.*—Sales of English in small lots by natives—importers from the south—at Tls. 160 are reported. In *Copper* there is no change.

QUOTATIONS—Duty Paid.

ENGAGEMENTS.—*Progress*, Ger. bq., 233 tons, Monthly Charter, 3 *a* 5 months, — lay days, $975.00 per month; *Kronprindsessen*, Dan. bq., 344 tons, Shanghai to Foochow (with despatch) — lay days, $2,000.00 in full. *Northampton*, Br. sh, 1,161 tons, Shanghai to New York, — lay days, private terms; *Wm. Turner* Br. bq., 431 tons, Foochow to Melbourne, — lay days, private terms; *Vesta*, Am. bq., 300 tons, Nagasaki and back, 15 lay days, $2.50 per ton coal; *Menam*, Brit. bq., 468 tons, Nagasaki and back, 20 lay days, $3.00 per picul.

COTTON.—Common to medium staples remain as last quoted, with a fair business for the South going on. Best quality, however, has advanced 2 mace per picul, caused by more favorable news recently received from Hankow, where it is in small supply and saleable at H. Tls. 10.40 per picul.

EXCHANGE.—Rates are again rather lower, most of the Banks quoting only 5s. 8¾d. A small amount of Credits was settled at 5s. 9⅛d., but the bulk of the business done has been at 5s. 9¼d. and 5s. 9⅜d. for Credits and documents respectively. In Rupees, a few lakhs have been placed at 302 for wire in February. On Hongkong, the rate for Bank paper at the close is 26⅝.

* Exclusive of import cargoes ex *Horatio, Bangalore, Omba, Sindh, Achilles, Star of the West, Hankow, Menelaus, Ajax, Anadyr, Golconda, Ocean, Glenroy, Provence, Gwalior, Golden State* and several Coasters, and of sundry re-exports.

STOCKS.—The usual tabular statement is discontinued until the promulgation of the RETURNS now in course of collection by the Chamber of Commerce.

EXPORTS.

TEA.—The export to date, as compared with that of last season, is :—

To Great Britain—Black	Excess	6,359,685 lbs.
,, ,, —Green	Excess	1,582,854 ,,
To United States—Black	Excess	1,074,076 ,,
,, —Green	Deficiency	4,406,278 ,,

Shipments to date have gone forward as under :—

To Great Britain (per Steamer)	50,429,387 lbs.
,, ,, (per Sailing Vessel)	24,152,588 ,,
To America (per Steamer)	9,314,547 ,,
,, (per Sailing Vessel)	5,791,186 ,,

Black.—The only settlements during the fortnight have been three small parcels of Hohow kind at Tls. 13 *a* Tls. 20, and the stock now left is very trifling.

Settlements..... 533 chests. Stock (against 50 chests last year), 450 chests.

The following prices have been paid :—

	Exchange, 5/9½.	Freight, £3.	Against 1873.
Oopacks, &c.	Tls. 00.00 *a*	=0/00 *a* ...	—0/00 *a* 0/00 per lb.
Oonams and Oonfaas	Tls. 00.00 *a*	=0/00 *a* ...	—0/00 *a* 0/00 ,,
Hohows and Ningchows	Tls. 13.00 *a* 20.00	=/9½ *a* 1/ 1½	—0/10¼ *a* 1/ 1½ ,,

Green.—A moderate business has been done by a few buyers, chiefly for America, and very full prices have been paid for good and fine chops of Moyune and Teenkai. Commoner kinds and Fychows have attracted less attention, and no change is quoted in their value during the fortnight. In Pingsueys there has been more doing, and though these Teas are not in general request, settlements are larger than have been reported for some time. Prices are low compared with those ruling at this time last season, but the quality of the Teas now offering is inferior.

			Against 1873.
Settlements—Fychows, Teenkais and Moyunes ...	24,000 ½-chests.	Stock, 70,400 ½-chests.	12,000 ½chests.

Kahing Taysaam No. 3 to common	,, 240 *a* 280	,,	,,	12/0 *a* 13/11	,, 33.45 *a* 38.85
Coarse do.	,, 245 *a* 270	,,	,,	12/3 *a* 13/5	,, 34.15 *a* 37.50
Re-reeled Hainings	,, 330 *a* 400	,,	,,	16/4 *a* 19/9	,, 45.65 *a* 55.10

During the past week business has been restricted owing to the firmness shown by holders. There is a good demand for the lower classes of Tsatlees and Taysaams for Europe, but the high prices demanded for the former, and the paucity of stocks of the latter have prevented settlements being made to a large extent, and the transactions reported do not exceed 700 bales, including 200 bales of re-reels settled for the American mail which leaves to-day. Prices said to have been paid show no change on those mentioned above, and as the business transacted is of such a trivial nature, quotations are not altered.

For America, re-reels have been taken at Tls. 320 *a* 420 for Hainings, and Tls. 325 *a* 410 per picul for Tsatlees.—Chop 1 Kahing Taysaams at Tls. 315 and 325 per picul, and No. 3 Tsatlee at Tls. 390 (the latter is reported to have been rejected on inspection.)

The arrivals from the Interior and River Ports for the past fortnight do not exceed 600 bales, and the unsold stock is reduced to about 8,500 bales, a large proportion of which consists of coarse and rejected silk of very undesirable quality.

COMMERCIAL POSTSCRIPT.

January 14, 1875.

Arrivals.—(Not given above)—January 7th, Brit. ship *Corona*, from Newcastle, N.S.W. ; 8th, Brit. barque *Velocity*, from London.

Departures.—January 9th, British steamer *Ajax*, for London ; 12th, American barque *Sooloo*, for New York.

The English mail steamer *Golconda* takes about 650 bales of Silk.

Exchange.—On London, Bank Bills, 6 months' sight, 5s. 8¾d. *a* 5s. 8⅞d. First-class Credits to Bank, 5s. 9⅛d. First-class to Private buyers, 5s. 9d. Private and Documentary, 5s. 9⅜d. On Paris, Bank, Frs. 7.25. Private, Frs. 7.30 *a* 7.31¼. On India—Bombay Bank, Rs. 303. Calcutta Bank, Rs. 303. On Hongkong, Bank Bills, demand, 26⅝ per cent. discount. Private, 15 days' sight, 27⅛. Gold Bars, Tls. 173.00. Bar Silver, Sh. Tls. 111.25. Mexican dollars, Sh. Tls. 74.00 per 100. Carolus dollars, Sh. Tls. 81.00 per 100. Copper cash, 1,560 per tael.

Shares.—Messrs. J. P. Bisset & Co. report :—

S. S. N. Shares.—A fair business has been done at Tls. 78 *a* 78½ cash, and at Tls. 80 *a* 81½ for 31st March *ex div.*, the market closing firm at the higher rates, with few, if any, shares on offer.

Banks.—No business reported. There are sellers at quotations, but no buyers.

Insurance Shares.—In *Fire Shares*, *Victorias* are quoted $121, *Chinas* $129 (both *ex div.* of $6 to 31st Dec.), and *Hongkongs* $530, with buyers but no local sellers. In *Marine Shares*, *Yangtszes* are wanted at Tls. 572.50 *ex div.*, and *China & Japans* have been placed at Tls. 77, at which they are still obtainable.

Hongkew Wharf Shares.—A few shares have been sold at Tls. 89 cash ; the market closing with sellers at same rate and proportionate rates for time.

Shanghai Gas Shares are wanted at Tls. 140 *ex div.* of Tls. 5 payable on 18th instant..

The weather was very mild in the end of the week, but has again become colder, with a considerable downfall of rain on Tuesday and some snow the following morning. The range of the thermometer has been from freezing point as the minimum to 54 as the maximum.

SHANGHAI, THURSDAY, JAN. 21, 1875.

RETROSPECT OF 1874.

Silk. When reviewing the course of this Market in 1873, we attempted to give a summary of the various causes which had led to the great decline in the value of Silk during that year, viz., increasing supplies both here and in Europe, deteriorating quality, a natural reaction from the over-speculation of several previous years, and a spirit of economy throughout the World, and most notably in France and America, which greatly restricted the use of this article of luxury. Although the fall in values during that year amounted to no less than Tls. 100 per picul, or from 20 to 30 per cent., a depreciation which, in a trade characterised by such extreme competition as this, entailed enormous losses on all concerned in it, yet, as it has proved, we were not even then at the end of the decline. Before the disastrous Season of 1873-74 closed, prices had dropped another Tls. 60 per picul, or 15 to 20 per cent., and the value of China Silk was on the average less than two-thirds of what it had been only a year and a half before, while common Silk of nearly all classes was worth barely half its previous value.

So great was the disorganization of the trade in Europe, that Silks bought here even at this great decline showed heavy losses on arrival there. On the panic-stricken Markets of last July and August in London, Tsatlee Silk was forced off by Auction at 14s. for Red Peacock, and 10s. *a* 11s. for the lowest grades, which in January 1873 had been worth 21s. 6d. *a* 22s. 6d. This proved, however, to be the turning point of the market, and we have since seen a fair increase in consumption, a recovery of 5 *a* 10 per cent. in values, and a trade which, so far as the present Season has gone, has on the whole yielded a fair commission to Exporters.

It is much to be regretted that there is, as yet, no perceptible improvement in the reeling of our Silk. The Crop of 1874-75, like those of the two preceding Seasons, has been coarsely and irregularly wound and imperfectly cleaned, which is the more unfortunate as the demand of consuming markets has been entirely for fine-sized Silks. Coarseness of size has not been by any means confined to the lower grades, for many of the best known Chops have shown a great deterioration in this respect. Hence best Chop Silks have as a rule given poor results to Exporters, and would now appear to be unduly high in proportion to lower qualities. On 1st January 1873, best Chop No. 3 Tsatlee was worth Tls. 560, and it is now worth Tls. 410; the commonest Tsatlee was then worth Tls. 410, and it is now worth Tls. 260; the fall on each class has been Tls. 150 per picul, but whereas No. 3 then cost 37 per cent. more than common, it now costs 58 per cent. more, a difference in value great beyond all precedent.

One of the most notable features of the year has been a continuance of the great increase in the direct Export to the Continent of Europe; this compares with that to London and America

as follows (an allowance which it is impossible to accurately estimate, but which is supposed not to exceed 2,000 to 3,000 bales per annum must be made for Silk shipped to Marseilles with the option of afterwards being taken on to London if required) :

	1871.	1872.	1873.	1874.
London	35,579 bls.	38,259 bls.	33,616 bls.	33,846 bls.
Continent ..	10,317 ,,	12,223 ,,	16,217 ,,	28,054 ,,
America....	2,677 ,,	4,142 ,,	2,714 ,,	4,127 ,,
	48,573 bls.	54,624 bls.	52,547 bls.	66,027 bls.

It is encouraging, however, to note that, although London has thus been to a very great extent deprived of her former large re-export trade to the Continent, yet deliveries from the London warehouses show this year a fair increase, the figures being :

In 1871.....33,710 bales.
,, 1872.....29,389 ,,
,, 1873.....32,831 ,,
,, 1874.....37,118 ,,

which would seem to indicate a substantial increase in the Silk consumption of England.

If London continues to take off 37,000 bales per annum, while the Continent receives direct 28,000 bales, this, with the demand for America and India added, is sufficient to balance our present supply. But before the trade can be considered in a sound state, we require a still further growth of consumption, to reduce the excessive stocks of Raw Silk which are held all over the World, and also to provide for the increasing crops which we may naturally expect will be produced.

In dealing with the crop of North-China, we have a powerful aid in the native consumption, which is unanimously reported to have increased considerably under the stimulus of low prices. It is impossible to obtain definite figures, but it is believed that this season 35,000 to 40,000 bales of the Silk produced in this neighbourhood have been taken for Chinese use, the bulk of these being Taysaam sorts.

Present prices would appear to be sufficiently low to stimulate everywhere the increased use of Silk, and it is not so much any further reduction of cost that is required, but rather time to allow the Silk industries of Europe and America to develope themselves. We have had abundant evidence how quickly any rise in prices gives immediate check to the growth of consumption, and any considerable advance at the present time would perhaps be the greatest calamity that could happen to the trade. French consumers appear to have appreciated the altered position of Silk much more accurately than London merchants. The advices of the former have apparently been generally to buy freely as long as prices were about the basis of Tls. 295 *a* 310 for Red Peacocks and Tls. 355 *a* 370 for No. 1 Gold Lion, and these Silks as a rule must have given a fair return. Fair profits have also been made by Shanghai houses who picked up cheap parcels at quiet moments of the market. But the bulk of the orders sent out from London have been during excited bursts of speculation, when Chinese were able to dictate their own terms, when this market was forced up to Tls. 325 *a* 330 for Red Peacocks, and Tls. 385 *a* 395 for No. 1 Gold Lion, and Silk bought at this range has shown a loss on arrival.

Another remarkable feature of this season is the unprecedentedly large Stock which has been held in Shanghai, and which in August reached no less a figure than 19,000 bales. This is said to have been caused by the fact that Native Banks and Pawnshops in the country had lost so heavily from losses on unreclaimed Silk during the previous two years, that many of them refused any longer to advance on the produce.

The fluctuations in the value of different classes of Silk during 1874 have been approximately :—

	1st Jan. Ex. 5/9	1st June. Ex. 6/1	31st Dec. Ex. 5/9
Chop No. 3 Tsatlee.....	475	400	410

,, Laeyang.....	260	205	225

The business done in the several months of the year may be summarised as follows :—

January.—Settlements to date for the season 1873-74 were 47,100 bales, and Stock 6,000 bales. Chop No. 3 Tsatlee was worth Tls. 455 *a* 475, Red Peacocks Tls. 385, and the commonest Tsatlee Tls. 310. The market throughout the month was quiet, with prices tending downwards, closing at a decline of from Tls. 10 on best Silks to Tls. 30 on common sorts. Settlements amounted to only 2,300 bales, and stock at the close was 5,500 bales.

February.—The same quiet tone prevailed, and only 1,900 bales were bought at a further small decline, leaving 4,000 bales in stock. The closing rates were Tls. 440 *a* 460 for Chop No. 3, Tls. 350 *a* 355 for Red Peacocks, and Tls. 280 for common Tsatlee.

March.—In consequence of a slight recovery on the European Markets, a large business was done, and prices advanced Tls. 10 *a* 20, but in the end of the month there was a reaction, and they closed somewhat lower than before. Holders took advantage of this spurt to move off nearly all the remaining good and fair Silks in stock, and only 1,500 bales were left in Shanghai. The last quotation for Red Peacocks of this season was Tls. 345.

In *April*, 2,300 bales of common Silk were settled at continually drooping prices, and early in *May* about 400 more went forward, closing the season with an Export of 57,000 bales. The results of the earlier part of this crop were indicated in our last retrospect, and we need only add that the last 10,000 bales shipped since 1st January, although costing comparatively very low, must have lost on the average about 20 per cent.

June.—The market for new Silk opened very quietly on the basis of Tls. 300 for Red Peacock and Tls. 23 for common Tsatlee, being a fall of Tls. 100 *a* 115 from the opening rates of the previous Season, which in turn were Tls. 60 *a* 80 below those of June 1872. In consequence of continued unfavourable advices from Europe, very little was done for the first three weeks, and prices declined Tls. 5 *a* 15. A large demand then sprang up, and the month closed with a most excited market at a rise of Tls. 30 *a* 40 from the lowest point, Chop No. 3 being worth Tls. 395 *a* 415, Red Peacocks Tls. 325, and common Tsatlee Tls. 255. Settlements were 7,500 bales, and Stock 5,000 bales.

The shipments of this month arrived to very bad markets in Europe, and if sold on arrival must have left considerable losses. The only exceptions were the coarser sorts of Taysaam, which were bought here at low prices, and of which there was a very small stock, both in London and on the Continent.

July.—The excitement in our market very soon subsided, and although a large steady business was done, the course of prices was uniformly downwards, and we closed about opening rates. Arrivals from the country were so enormous as to stagger the confidence which had been felt in the lowness of prices, and although 13,000 bales were settled, stock at the end of the month had increased to 17,500 bales.

In *August*, the disastrous advices received from London, where large unreserved auction sales were being held, greatly restricted buying for that market, and of 9,500 bales settled, the greater part were for the Continent. Prices touched the lowest point we have yet seen, viz. : Tls. 365 *a* 385 for Chop No. 3, Tls. 295 for Red Peacock, and Tls. 225 for common Tsatlee. These Silks, arriving to the active speculative markets of October, paid on the average nearly 10 per cent. Stock showed a slight reduction, and after touching the highest figure of 19,000 bales, remained at the close 15,000 bales, supplies from the country having fallen off in consequence of the lowness of our prices.

September saw an advance of Tls. 20, and on some classes, especially common Tsatlee, as much as Tls. 40 per picul, but this was not maintained, and the market closed quieter at Tls. 390 *a* 400 for No. 3, Tls. 305 for Red Peacocks, and Tls. 245 for common. The business done amounted to 12,000 bales, and stock was 13,000 bales.

Early in *October*, a large speculative movement in London caused an active business, and prices rapidly advanced Tls. 20 *a* 30; and although the demand died away, holders continued firm at Tls. 420 *a* 430 for No. 3, Tls. 335 for Red Peacock, and Tls. 270 for common Tsatlee, being the highest point touched as yet this season. Settlements were 11,000 bales, making up the large

figure of 53,000 bales in five months. Stock remained nearly unchanged.

November.—Buyers refused to go on the high range of prices established, and as holders remained firm, the settlements for the month reached only 1,200 bales, stock being increased to 14,000 bales. Closing quotations were only Tls. 10 below the highest point of October.

December.—During the first half of the month, the same quiet tone prevailed, and prices declined Tls. 5 *a* 10. A better demand has since sprung up, and this fall has been recovered, the market closing steady. This month's business amounting to 4,600 bales, the total to date for the Season is 58,800 bales. Stock has been reduced by about 1,200 bales Taysaam being sent back into the country for Chinese use, as also 300 bales Haining to be re-reeled, and is now about 9,000 bales. Total supplies for the Season are variously estimated at from 70,000 to 72,500 bales, and it will chiefly depend on the course of prices during the remainder of the Season which of these figures is more nearly correct.

Summary of News.

We have had no mail arrival since our last issue.

A homeward mail for America left this morning by P.M.Ss. *Nevada* and *Vancouver*. That for Europe leaves to-morrow by M.M. steamer *Provence*.

The following Reuter's telegrams have been received during the week :—

The German gunboats have returned from Santander.

President Grant's policy in Louisiana threatens the disruption of the Cabinet.

The report that Germany has recognised Alphonso was premature ; the recognition is deferred until the decree suspending two Protestant journals, and closing a chapel at Cadiz, is rescinded.

A City of Paris loan for 220,000,000 will be issued immediately, in bonds of 500, interest 20 francs each. The issue price is unfixed.

Grant has sent a message to Congress vindicating his intervention in Louisiana, on the ground of the lawlessness prevalent, and asks the instructions of Congress.

Grant has sent a message to Congress, approving the Bill for the redemption of specie payments, and recommending the resumption of the Tea and Coffee duties.

Hongkong, 18th January.

The China loan is a great success : 20,131 Bonds applied for from all quarters, being 6⅔ times the number offered.

The Hongkong and Shanghai Bank announce that the applications for the £300,000 Chinese loan reached £2,017,100, or more than six times the amount required, and that the applicants will receive bonds *pro rata*. This result would show that the loan is regarded with very great favour, as there was every reason to expect it would be from its conditions ; but at the same time it might be unwise to assume that the money market out here is prepared to devote over two millions sterling to one investment on a few weeks' notice. Telegraphic instructions to send in applications might of course be received by agents here from investors at home, but it is probable that the amount has been swollen by not a few people placing their applications higher than their actual wants, in the hope that the allotments would more closely approximate to the latter.—There is some rumour of another and larger loan being contracted for by the Chinese, through the same agency. We have heard the amount put at ten million taels, but we can only give the rumour at present for what it may be worth.

We hear that a scheme for a Chinese Naval Reserve is being arranged in connection with the China Merchants S. N. Co. It is intended that each of the larger provinces shall furnish two steamers, and the smaller provinces one, to be added to the fleet of that Company and used by it while the country is at peace, but to be at the service of the Imperial Government on the outbreak of war. The scheme has been submitted to the Emperor by his Excellency Li Hung-chang, the Viceroy of Chihli (the prime mover apparently in all matters of this nature) ; and it is stated that the Emperor has given it his approval. The fleet to be thus furnished will number twenty-eight steamers ; and we are informed on good Chinese authority that a telegram was despatched from Shanghai to England last week, to have one built on behalf of the province of Hupeh, at a cost of Tls. 56,000. This prospective enlargement of the C. M. S. N. Co.'s fleet is a serious menace to foreign steam-shipping interests in China. We give our information with some reserve, as coming from a Chinese source, but we have been assured of, and have no reason to doubt, its truth.

In accordance with instructions received from Hongkong, negotiations have been going on for the charter of the China Merchant Co.'s steamer *Aden*, to proceed to the wreck of the *Japan*, with the view of recovering, if possible, the large amount of treasure on board. The *Aden* will probably leave almost immediately for the scene of the loss, with divers and appliances. We have been informed that the wreck lies in about fourteen fathoms of water.

The steamer *Lee Yuen*, when about 30 miles from Foochow, abreast of Fuhyan, on her passage from this port to Foochow, carried away the lignum vitæ bush in the stern tube. She was beached for one tide under the lee of Matsu Island, for temporary repairs, and then proceeded to Foochow, where she has gone into dock.

At the half-yearly meeting of the Pootung Dock Company, held on Tuesday, a dividend of 5 per cent. was declared, and Messrs. Coryell, Webb, and Dr. Little were appointed directors. Messrs. Farnham & Co.'s offer to renew their lease of the Dock for a further period of five years was accepted.

W. Keswick, Esq., has been appointed Chairman of the Shanghai General Hospital, in place of F. B. Forbes, Esq., who has resigned on his departure for home. Mr. Forbes has devoted a great deal of valuable time to the affairs of the Hospital, having been one of its Board of Trustees for a number of years ; and it gives us pleasure to acknowledge, on behalf of the community, the eminent services he has rendered to this and other public institutions, during his past residence in Shanghai. E. Iveson, Esq., has been appointed Vice-Chairman.

A meeting of the North-China Branch of the Royal Asiatic Society was held last night, at the Society's Rooms, the President, F. B. Forbes, Esq., in the chair. The minutes of the preceding meeting were read, confirmed and signed. Messrs. E. J. Caldbeck and H. W. Daniel were elected resident members ; and Mr. Harry Wickings, of Hongkong, a non-resident member.—The President tendered his resignation of that office, consequent upon his approaching departure for America and Europe. He also expressed his appreciation of the honour of being appointed delegate to the parent Society at Home, and hoped during his visit to be able to procure contributions to the library of the Shanghai Branch.—Mr. A. J. Little moved a vote of thanks to Mr. Forbes, to whom the Society owed more than to any man in China, during the six or seven years he had been connected with it, and for the last two of which he had filled the office of President.—The motion was seconded by Mr. Reding, and carried by acclamation.—Mr. Forbes returned thanks in an appropriate speech.—Mr. Wylie rose with a feeling of melancholy to offer a tribute to the memory of the late Mr. H. Lang, whose sudden departure from among them he was sure they would all deeply regret. Mr. Wylie then proceeded to read a lengthy but interesting paper by the Archimandrite Palladius, entitled "Elucidations of Marco Polo's Travels in North-China, &c., drawn from Chinese sources," of which we purpose giving an abstract. The meeting closed with the customary votes of thanks.

We hear that Mr. Russell Sage has been replaced as President of the P. M. S. Co. by Mr. Alexander ; and that Mr. W. H. Fogg, formerly of Shanghai, has become a director of the Company. It is reported that Mr. Fogg takes the managing directorship, which has been held by Mr. Rufus Hatch, but we have been unable as yet to get confirmation of this. The *Great Republic*, with the next mail, left San Francisco on the 2nd inst., and the connecting steamer is due here on 5th February. The next homeward mail from here, following that which closes to-day, will be on the 2nd proximo, to connect at Yokohama with the *China*, leaving Hongkong on the 1st.

It has been rumoured that the Japanese mean to include Shanghai in the ports of call of their principal line of steamers ; and though we cannot say whether it is intended to keep up a regular service, we hear that an occasional steamer may be expected, and that a special agency will probably be established. The new arrangement by which Japan undertakes the distribution of the American mails after their delivery in Yokohama, might give additional weight to the rumour ; but we understand that a contract has been entered into by the Government of that country with the P. M. S. Co., for the conveyance of mails between Yokohama, Hakodadi, Hiogo, Nagasaki and Shanghai. The contract dates from the beginning of the present year.

On Tuesday morning, a robbery was committed under peculiar circumstances at the premises of Messrs. Lane, Crawford and Co., Nanking Road. Shortly after daybreak, it was discovered that one of the large panes of plate glass had been smashed from the outside with a piece of stone, which must have been thrown with considerable force, and which was afterwards found inside the window. Further examination showed that a large piece of Russian Astracan wool-lining and a valuable sea-otter skin had been stolen. The Police having inspected the hole in the glass, and the position in the window from whence the articles were taken, some thirty or more inches distant, incline to the belief that they could not have been drawn through the fractured pane, or a much larger hole would have been made. It is right to add, however, that suspicion does not attach to anyone on the premises; and at present there is no clue to the thief.

The second A. D. C. performance of the season is to come off on Friday, 29th inst., the pieces being the petite drama by Benjamin Webster, "One Touch of Nature," and the new and classical burlesque of "Thespis," or the Gods grown old.

The Miholoong Ball, an event of some note in our social annals, has been fixed for the 2nd February.

A concert given by Mr. G. B. Fentum at the Masonic Hall, on Tuesday night, was attended by an audience numbering nearly 200, including many ladies. The programme was an excellent one, and among the selections were several not usually attempted by amateurs. Taken as a whole, the concert was a decided success, the audience being at times roused to enthusiasm, and *encores* being numerous. Mr. Edmund Wells made a very favourable impression on this the first Shanghai audience to which he has sung, and he will be welcomed on future occasions. A pleasing innovation, very successfully carried out, was the perfuming of the programmes, *à la* Rimmel, by Messrs. Watson & Cleave; it is, we believe, the first time this has been done in Shanghai.

The case of "C. E. Hill *v.* Estate of Yang Taikee," was resumed on Monday at the Mixed Court, before Geo. F. Seward, Esq., U. S. Consul-General, and H. E. the Taotai of Shanghai, Dr. Yates being interpreter. Mr. Eames conducted the plaintiff's case; the defendants being represented by Mr. Drummond and Mr. Cowie. The afternoon was occupied in the examination of witnesses on behalf of the plaintiff; and at the close, Mr. Eames, in reply to the Court, said he would refrain from calling any further testimony now, upon the understanding that should the other side attempt anything startling or novel in defence, he should be permitted to call further witnesses, of whom he had several in reserve.—Mr. Drummond said that was a question that could be submitted if occasion arose.—The Court shortly afterwards adjourned.

A decree in the Peking Gazette of 1st January appoints Shên Ping-chêng, the present Taotai of Shanghai, to the vacant post of Judicial Commissioner for the province of Honan. Shên is an able official, and has proved courteous and liberal in his relations with foreigners during his incumbency in Shanghai. He came here from Chinkiang, where he gained considerable credit by his efforts to encourage sericiculture and generally to revive the district after the devastation which had been wrought in it by the Taiping rebels. He is a member of the Hanlin; and must feel rather disappointed that his present promotion, from the governmental into the judicial service, debars him from further advancement in the former direction. We believe it is the case that, owing to some mysterious regulation of Chinese officialdom, such promotion as has now been conferred on Shên, cuts off the possibility of becoming a Governor, Viceroy, or Minister at the Capital.

The place of the departing Taotai, a decree in the Gazette of 4th January informs us, will be filled by Fêng Tsün-kwang, the mandarin who has so long been the native head of the Shanghai Arsenal. Fêng has the reputation of being a clever and energetic officer, and we may assume that his connection with the Arsenal and his intimate dealings with foreigners have imbued him with progressive tendencies. He is credited with being the author, or at any rate the warm advocate, of a scheme to establish a public company for the development of Formosa; and though little has been heard of this project lately, we believe the idea has not been altogether lost sight of. Fêng has a good literary status, having taken the Ku-jen or Master of Arts degree. Instead of proceeding to the capital to have audience, before taking up his appointment, we hear that for the present he will merely visit the Viceroy at Nanking, and consult with him. He leaves by steamer at once and will return without delay, so as to enable the Taotai to set out for his new place of residence, Kai-fung-foo, as soon as possible.

It is with deep regret that we record the sudden and unlooked-for death, on Tuesday, of Mr. Hugh Lang, the Editor and Proprietor of the *Shanghai Evening Courier*. Mr. Lang seemed in his usual health in the morning, when, between eight and nine o'clock, he visited the office to arrange the conduct of his business for the day. Shortly before the latter hour, he returned to his room to dress, and a few minutes later he was found there, lying on the floor, apparently dead. Drs. Johnston and Henderson were sent for, but on their arrival were only able to confirm the melancholy fact; and we understand it is their opinion that rupture of an aneurism of the aorta was the cause of death. Mr. Lang was an old resident, having arrived in Shanghai some thirteen years ago. Up till 1869 he was engaged in commercial pursuits, but in that year he began the connection with the Press which he has ever since very ably and worthily maintained. About four years ago he became sole editor of the *Courier*, and shortly afterwards its proprietor. Mr. Lang wielded a vigorous and graceful pen; his style was scholarly and attractive; and his treatment of public matters was characterised by a force and clearness which, allied to thorough integrity of purpose, exercised a beneficial influence. When writing of a lighter sort was appropriate, his racy humour overflowed; and his graphic notices of local events have frequently given the highest pleasure to a wide circle of readers. On several occasions also he has contributed to the gratification of local audiences as a public speaker; and a lecture which he delivered a few years since, and afterwards published under the title "Shanghai Socially Considered," was so favourably received that we believe the published edition is now almost out of print. Mr. Lang's familiar figure and genial manner will be much missed at local assemblies. In the earlier years of his residence he was prominent as a man tall among his fellows; and if we venture to touch on the physical infirmity which later bowed him down after a severe rheumatic attack, it is only because it placed in stronger contrast his remarkable activity, his indomitable energy, and his unvarying cheerfulness. Aside from his duties as a public journalist, Mr. Lang was always at the command of a large circle of personal friends, whose concern at his untimely death will be shared by those who knew him even less intimately. Much sympathy is felt for those on whom the weight of this sudden bereavement directly falls. The funeral took place at the New Cemetery yesterday and was largely attended.

The *Courrier des Etats-Unis* states that Comte Mejan, formerly Consul-General for France in Shanghai, died at Havana on the 23rd November last.

The Chinese occasionally betray a fiendish ingenuity in their mode of committing capital crimes. A few days ago, one of the native newspapers in Shanghai reported that the body of a woman had been found, crucified on a shutter or doorway, floating in the river outside Woosung. The head of a man was attached to the waist of the woman's body, and both were taken to the district city of Paoshan. The circumstances of this crime have not been discovered, but it is conjectured that the poor crucified wretch had been faithless, and that this revolting revenge had been taken by the injured husband and his friends. Our Peking Gazette translations to-day relate how a wife, tired of a dissipated husband, compassed his death by smothering him in a bag of lime, the father and son of the murdered man assisting her. The punishment, however, is equal to the crime in this case;—more, it is the most frightful inflicted, even in any of the darkest habitations of cruelty, at the present day. Yet the criminal records of the Peking Gazette show that its infliction is a matter of frequent occurrence in this highly civilized empire!

Our Gazette translations also contain various decrees consequent upon the illness of His Majesty the Emperor. In token of rejoicing at his convalescence from the disease by which he has been "happily attacked," his Majesty confers dignities and donations, and exercises his royal clemency, in the most liberal and gracious manner.

Editorial Selections.

THE FRENCH IN TONQUIN.

A CURIOUS confirmation of our strictures as to the conduct of the adventurer Dupuis, and the subsequent proceedings of the French in Annam, is afforded from no less an authority than the Peking Gazette of the 21st December. The Chinese Government is not given to acknowledge that it, or any one connected with it, has been guilty of an error; yet in this matter of the expedition up the Hanoi river, although no force can have been used to compel the acknowledgment, the Government frankly confesses that its officers have been wrong, and proceeds to inflict punishment on one of the number. The memorial is curious as throwing light on the relations between China and Annam. The former will not allow the King to make use of his official title in correspondence with it, but haughtily calls the sovereign by his name, Yuan Fuh-she. The latter, although submitting to this slur on his kinghood, takes care that his position as an independent sovereign shall not be trenched upon. He complains that the officer in charge of the frontier, Chen Teh-kwei, had had the temerity to write on his own account to the Government of Annam, demanding the passage of foreign vessels and arms. Chen Teh-kwei pleaded, and his plea has apparently been accepted, he being himself a useful man, that he had not proceeded to these extremities. He had, however, sent an agent, one Liao King-shen, to Hanoi to report on matters there, and this agent, he averred, met with Dupuis, who was accompanied by a discharged Chinese official named Li Yu-hi. These produced a dispatch from the General-in-chief in Yunnan, Ma Ju-lung, stating that the arms were for use in that province. They drew up a despatch, which was conveyed to Chen by Liao, stating the purport of their expedition, and Chen, persuaded by his agent, did actually write on the subject to the Annamese. These not agreeing with Chen's views in the matter, still refused passage, whereupon Dupuis of his own authority transhipped his stores, and forced his way on his own responsibility into Yunnan. That this course of conduct was indefensible, the Government does not for a moment deny. It does not assert any claim to such a suzerainty as should compel the Annamese to pass unquestioned its military stores. On the contrary, while finding that Chen was not really responsible for the eventual conduct of Dupuis, it considers that he has merited some degree of punishment. Liao, the agent, who is probably a man who can be better spared, is made responsible for those acts which apparently he committed simply as the representative of Chen, and is to suffer banishment to the Amoor. We are not going to reason on the justice of the punishment inflicted. So far as that is concerned, it is in this instance a matter between Chen, Liao, and the Chinese Government. The fact of the actors in the affair being considered worthy of punishment by their own Government, is an acknowledgment on the part of China that she does not claim the right, in consequence of her nominal suzerainty, of interfering in the internal arrangements of Annam. The only plea which could be urged by the French, and which we believe was urged, was that the suzerainty of China over Annam extended to the right of interference with the internal arrangements of the kingdom. The letter of the King and the action of the Chinese are both clear evidence that they did not represent the true state of the case. Even were such a plea to be accepted, the subsequent conduct of the French was equally unjustifiable. If the conduct of the Annamese towards Dupuis had been an act of rebellion towards the Emperor, we should probably have heard of the matter through the French Minister at Peking. The very fact of the French Government having subsequently made a treaty with Annam, without submitting it for confirmation at Peking, is sufficient proof that no real importance was attached to the plea of suzerainty. The story of the expedition then, stripped of its embellishments, amounts to this. Dupuis desired to get certain guns into Yunnan to sell to the Chinese officers there. He thought that the Hungkiang, flowing through Annam, offered an easy route. The French Government of the day, pleased with the brilliant idea, offered assistance, and everything was prepared. One of the parties concerned, the Government of Annam, was not even consulted in the matter. It naturally objected to its territory being made use of for the conveyance of military stores to China. This objection was looked upon as a crime by the French, who determined to punish the recalcitrant State. The result is well known. Much as we would wish to see all the corners of the Asiatic continent opened up, this is not the way in which such a matter should be approached. We can imagine that neither French nor Chinese feel quite content with their conduct in the affair, and certainly the sense of wrong must be the pre-eminent feeling amongst the inhabitants of Annam. The *China Mail*, in two elaborate articles, has called in question our statements of fact with regard to the French expedition. If our contemporary had looked with a little care at our previous notice, he would have discovered that our authority was a paper read at the North-China Branch of the Royal Asiatic Society. That paper was professedly friendly to the French; its author had collected the facts from original sources, and we have every reason to believe is quite as competent to give a true statement as F. Romanet du Caillaud, our contemporary's authority. The opinions expressed in the article were our own.

THE MIXED COURT.

WE have now had pretty good experience of the working, and we may add utter inefficiency, of the tribunal known as the Mixed Court. With every desire to throw over it the cloak of charity, and to keep in the background, so far as was consonant with the ends of justice, its sins of omission, matters are now getting to such a pass that in order to carry on the ordinary municipal government of the Settlements, some change in the present system is urgently required. We last week reported a very extraordinary case of abduction—extraordinary not so much in its actual perpetration, as in the position of those who were concerned, and the measures taken to secure their ends. The story of the abduction was simple enough. A certain individual takes a fancy to a girl at a house of entertainment, and desires to become possessed of her. The girl was one of that unfortunate class who in China are merely so much merchandise in the hands of their relatives, or owners for the time being. The individual could not make his proposals suit with the wishes of the girl's mother, so at his wits' end he applies to a friend. The friend conceives the, to a Chinaman, not unnatural design, of bribing the police, and so accordingly the train is laid. A native detective of the Municipal Police, and an ex-constable, now promoted to be a tipaou, are taken into the plot; the girl is conveyed to the suburbs and there given over to the amorous suitor, who removes her to Soochow. So far the story is peculiarly Chinese; probably no one of those concerned, from the girl's mother to the detectives, had a qualm of conscience as to the impropriety of their conduct in the transaction. If they had been merely ordinary people, the Mixed Court Magistrate would have ordered the suitor to restore the girl, which he would have, or would not have done, in accordance with a mysterious law apparently depending on the influence of the culprit with the myrmidons of the Mandarins. The individuals, however, mainly concerned, were not ordinary people. The suitor was a high military officer, the same we believe who, as we learn from the Peking Gazettes, lately got into disgrace at Peking for harbouring an ex-rebel in his suite, but who, by some mysterious dispensation, seems to be able withal to enjoy himself at Shanghai. The suitor's friend was a sort of relative (foster-brother to a grandson!) of the Taoutai at Ningpo, and in consequence of that mysterious relationship was partaking of the latter's hospitality. Here of course was a plain case of interference with the governing powers of the country. That an officer of the Municipal Council, or any one at all not within the charmed circle of the mandarinate, should presume

to meddle with two such lights as the General and Wu Yang-ting, the foster-brother of a Taoutai's grandson, was a thing not to be thought of. It was no wonder that the whole community of mandarins, tipaous, yamen runners, their guards, and relations up to the third degree, should be scandalized by such a suggestion. Unfortunately, the men sent down to Ningpo to watch Wu, while waiting till by a circuitous route some documents requesting his attendance at Shanghai should be obtained, exceeded the bounds of discretion, and fearing to lose Wu, attempted themselves to "abduct" him. So glorious an opportunity of turning the tables was not to be lost sight of, and the result was the threat of the instant dissolution of Colonel Cooke and all his force, military and civil, at Ningpo. Not that it could be alleged that any one connected with that Force had been in any manner responsible or even cognisant of what was going on, till Colonel Cooke's sentry, seeing the occurrence, insisted that if the man were to be arrested the arrest should be made in a legal way. Wu, however, very kindly "turned up" on the 4th instant at the Mixed Court, and condescended to give evidence. According to his story, his friend desiring to obtain the girl, but refused by her mother, offered through Wu no less a sum than four thousand dollars. Some of this money Wu acknowledged had stuck to him, but in the main he had handed it over to the detectives and the ex-detective, then, and we presume still, a tipaou or native head constable. The girl, however, being well away, her mother it was alleged came to treat with the General, and it was arranged that the latter should give her some $2,800. For some reason not stated, the detective and the tipaou agreed to hand this sum back to Yang, keeping, so said Mr. Wu, $1,200, less his squeeze, for their trouble in the matter. The affair at this period seemed to have become little more than a joke. That the General and Wu, mandarins or mandarins' friends, could do wrong, was of course beyond the power of the magistrate to conceive. He did indeed get Mr. Wu to go down on his knees and make the confession that he, the friend of the General and the foster-brother of a Taoutai's grandson, had actually squeezed some of the money, for doing which he requested the magistrate to fine him and let him go. The following conversation then took place :—

The Mandarin—How much will you pay? Woo—Say $50.

The Mandarin—No ; that is not enough.

Woo said he had only received $50 of Yang's money.

The Mandarin—How much will you give to get rid of this affair? There is no fear of my wanting it for myself—it will all be in the newspapers !

The other defendants now said it was Woo who had got them all into the scrape.

The Mandarin (to them)—Would not $50 be a ridiculously small sum to make him pay?

Qua, the detective, and the *tipaou* both said it would be too small a sum.

The Mandarin suggested $500 as being nearer the mark, but this met with no response.

It further appeared, however, that, several of the detectives belonging to the Force had, when matters were looking a little serious, been bribed to say nothing of what they knew. The fact of the money having thus been distributed, seemed to have much eased the magistrate's mind. Wu was persuaded to pay $100 ; the tipaou, who had received $500, was ordered to return $300, leaving him $200 the richer for his pains ; while the detective, who acknowledged to have received $350, was required to give up $300, leaving him actually fifty dollars, or four months' pay, richer than before ! As for Wu, a European friend, whose name unfortunately we are not told, stumped up on his behalf the hundred dollars ; but the others, well aware of the comforts to which prisoners are liable who have helped such powerful friends as the General and the Taoutai's grandson's foster-brother, preferred going to prison. As Mr. Stripling remarked, the latter would be no punishment. They had helped the order, and so would be allowed everything they wanted, and at the same time put by a couple of years' pay.

It is fortunate that prominence was given to this disgraceful affair. It is perhaps the most characteristic which has occurred recently, but it is by no means exceptional. The corruption which is engendered around Government officers all over China, it is attempted to introduce into the Foreign Settlements. One of the receivers of bribes to hush up matters, was a man who had been appointed to a responsible office about two months ago, and who had a few days afterwards been sentenced to three months' imprisonment, for being concerned in a disturbance connected with illegal exactions in the Settlements. It was found convenient, however, to let him out ; and on being told by the Mandarin that he should repay the bribe which he had taken, he boldly informed the Court he would do no such thing. So all in this affair go scot free. The General enjoys the company of the young lady ; Wu is championed by the Taoutai at Ningpo ; the tipaou and the detectives keep a couple of years' pay each, the getter-up of brawls, at the moment under sentence of imprisonment, "cheeks" the Court, and everyone is made happy, except the interests of justice and the well-being of the Settlements. We have often spoken of the necessity for the establishment of a Municipal magistrate, to take cognisance of all such matters. Even in foreign hands, the diversity of jurisdiction leads to a feebleness of execution by no means conducive to the general order of the Settlements. When, however, justice is reduced to the point it has been in this case, it is high time for those concerned to speak out. We believe the body of Consuls would be much relieved by the establishment of such a Court, so far as their own nationals are concerned. We hope that the Land Regulations Amendment Committee, of whose action we have not lately hea much, will take steps to have some such proposition inserted in their recommendations.

COREA IN 1874.

The King of Corea's three Prime Ministers are called Wonderful or Admirable Counsellor, Left Counsellor, and Right Counsellor. Then come six more, named Hpanso, or Judges, who are at the head of the Ministry composed as in China of War, Justice, &c., &c. Just now, Ni-you-ouen-i is first of the three Prime Ministers, and Kim-hpieng-kou-ki is second, although he is in retirement at present, being in mourning for his father. The third post is occupied by Pak-kiou-sou. The great potentates, however, whose authority is at this time superior to even that of the high ministers, are a relation of the King's wife, Min-seng-hi, and Queen Tcho's nephew, Tcho-seng-hâ, whom we have already mentioned more than once. These two men have arrogated to themselves the government of the capital and provinces, and they alone are masters ; selling as they please public dignities and places, Bachelors' and Doctors' degrees, or distributing them as they deem suitable, generally to the highest bidder. I must now explain something which seems to have thrown the two new masters of the kingdom entirely into the shade. Towards the middle of the year (1874) three successive envoys brought messages to Pien-men, from Peking. We don't know of what nature the two first messages were ; but the third was dated Peking, 2nd day of 6th moon, and was conveyed from Pien-men to the Capital by a courier on horseback, the man holding a flag in one hand, the message in the other (and the bridle I suppose in one or t'other), and screaming all the way "War—war—war !" This was the third message, as I am told :—

"The great European General Irikiao 日理格 is in Tyangkei [Japan] 長奇島 [probably Nagasaki.] Desiring to make war with Corea, he has united his forces to the Japanese Army. Europe finds it difficult to fight Corea alone, and Japan by herself would not attempt it. France, America and Japan (three kingdoms) have therefore united themselves for the purpose.—Prepare, therefore, and see whether you can make sufficient resistance. If not make a treaty of alliance and commerce—and all will be well."

Signed, Chinese Government.

The Royal Council was instantly called together, and the decision arrived at was this: "Let us do our best to prevent them, but if we cannot, then we will make a friendly treaty. That will be well."

It can be imagined that the population was considerably excited when the news was spread abroad ; the appearance of the comet in July, moreover, terrified the people beyond measure. Great preparations for war were made by the Government, and it was resolved to resist the barbarians in their attempt to invade the country, and to die rather than submit to its ruin. They feared the Japanese most, for, said they, "If the Japanese come, they will

spare neither man, woman nor child, and will take the country if they conquer us. Better fight to the death." In order to reassure the troubled minds of the people, the following proclamation was issued everywhere: "Do not you fear. It is true Europeans are powerful, but we must try to resist them, for we have before now got rid of them; then when we have fought them, if we find that we cannot stop them, we will make peace, and that is all it can end in. Let us first number (collect) our soldiers. Don't fear therefore."

The apprehension of the people is fully explained by the fearful recollections left from the Japanese invasion in the 15th century. Coreans are not aware that the Japanese are more civilised now, and that they are not likely to make war according to barbarous principles. As to Europeans, the people, particularly the trading classes, do not object to the opening up of the country. There might be some fighting, but a treaty of peace would be easily negotiated, they believe, if the invader could not be repulsed.

Every man that could hold a gun was enrolled, and the number of defenders was great—soldiers being posted wherever it was thought ships were able to come. At Kang-hoa, there were about 6,000. All the principal parts of the coast were fortified. The forts at Kang-hoa bristled with cannon. Wherever it was thought the enemy might land or pass, wide ditches were made, like tiger snares, the bottom garnished with lances and swords, but so well hidden that it was impossible to tell them. Coreans think these so dangerous that they believe it impossible for any one to live after falling into them. The manufacture of guns, lances, swords, &c., was universal. Night and day there were sentries on the mountains commanding the sea, men known for their clear sight, whose duty it was to signalise the arrival of the enemy. The population breathed only of war—thought and conversation were on war, to the exclusion of every other topic; and trade was at a standstill, wholesale traders, it is said, both in town and country, having stayed at home three days, and not dared to go to market. Cultivation was even impeded, as no one dared go out or travel. At the end of the 8th moon, there being no change, and the war-vessels not having appeared, doubts began to circulate, and soon people did not hesitate to say that the ex-Regent had been spreading the alarm—that he invented the idea of messages from China, his object being to regain his power, or at any rate a place in the Government. Whether the old Regent has lost caste or not, he has retired to some 60 *lis* north of the Capital, in a town named Yang-tjon, where he is busy building a mansion. Anyhow, it is evident the present Government is most determined not to yield to Japan, and that the Regent's fall does not appear to be caused by Japanese threats, for, on the contrary, the Regent would make such his excuse for regaining his lost position. Nevertheless, the country is far from tranquil. There is still an expectation of war-vessels; soldiers are kept on the alert, and encourage one another; but the people begin to murmur at being taxed for an army on a war footing, though no doubt this will be kept up till the river at the Capital be frozen over, and the precautions will be renewed next spring.

In conclusion, let me give you some other kind of news in regard to Corea. In the 7th moon (August 1874) some Russian soldiers arrived one night near the town of Kieung-ouen, situated south of Mikiang in Corean Tou Man-kang, 42.30 latitude and 128 longitude East, at a little distance to the southwest of Shong-tchong, a Chinese city. They forced the gates of the city wall, and took the place. The mandarin in charge of course cleared out at once, and as they had it all their own way, they helped themselves as they desired, taking away with them all the women (at any rate all the young ones,) and such cattle as they fell in with. The Coreans are under the impression that only Russians live on the frontier; and the general belief is that this disgrace has been inflicted by them, which it is almost too dishonorable to believe. It has evidently been done by brigands, who infest the neighbourhood. Their reputation is not a secret, and their great want is women, as was the case with the Romans at the time of the Sabinal abduction. The Kieung-ouen district mandarin, it is said, has been exiled, and his place has been given to Youn-hein-pi, marine prefect of Hoang-hai.

Perhaps it may be useful to refer to the following list of Kings and Queens of Corea, from 1784 till the present time:—

1° 正宗 Tjeng-tjong, 1775-1800.

2° 英宗 Yeung-tjong, 1800-1810.

3° 純宗 Sioun-tjong, 1810-1824, son of the foregoing married to Kim-tai-pi, who died in 1856. During his life he associated to his throne, his son

4° 翌宗 Ik-tjong, 1824-1830, married to Tcho-tai-pi. At the death of Ik-tjong, his father continued to govern from 1830 to 1834.

5° 憲宗 Hen-tjong, son of Ik-tjong and grandson of Sioun-tjong, 1834-1849. He married Hong-tai-pi and died without issue. The throne devolved on his next of kin.

6° 哲宗 Tchieul-tjong, 1849-1864, who married Kim-tai-pi, and died without issue also. Queen Tcho adopts

7° 當宁 the second son, Houng-soung-koun, a distant prince from the Royal family. The new king reigned from 1864 under the title of 當宁 Tang-tjiei.* He married Min-tai-pi in 1866.

Tai-pi means Queen, wife of the King—thus Tcho-tai-pi: Queen Tcho.

PHILO-COREANUS.

Newchwang, 15th Dec., 1874.

* Tang-tjiei: The Corean Kings who have no surnames during life, are called Tang-tjiei, which is tantamount to "Majesty."

Outports.

TIENTSIN.

During the day and night of the 29th ultimo; we had a furious gale from N.N.W.; and at daybreak on the 30th, the thermometer stood at three degrees above zero—the lowest point we have seen it sink to this winter. On the evening of the 29th, I saw a horse being led over the ice on the river; on which also tabogans (hand sleighs) might be seen engaged in transporting produce and passengers to and from the city. At daybreak to-day the thermometer had risen to 13°, with the river ice of the thickness of eight inches.

Amongst the sporting members of the community, fox-hunting is at present the order of the day, meets taking place some two or three times a week, as business and weather will admit. On the 31st ult., the meet took place in a range of wild country, known by the name of the Shan-ling-sze, lying on the east side of the river and beginning at some seven miles distance from the British settlement. A fine well-grown knowing fox was started, who at once went across country in gallant style, and gave the hounds a splendid run of about eight miles ere he took to earth and thus saved his life and brush. It is almost unnecessary for me to say that this is a splendid country for hunting on horseback, as it is open and almost free from obstacles which would prevent horsemen going straight; very different in that respect from the country arround Shanghai, where so many large creeks exist.

Immediately after the clocks struck the last twelfth hour of the year 1874, guns were fired from some of the vessels-of-war in port, to welcome the opening of the new year. The greater part of the first of January, in accordance with time-honored custom, was devoted by the gentlemen of the community to calling upon the ladies. Fortunately the weather was very favorable, being mild and pleasant. The walking about from residence to residence was of itself quite a delight, to say nothing of the pleasure derived from the agreeable occupation of personally calling upon one's friends to wish them a happy new-year.

His Excellency Sun Szeta, the acting Customs Taoutai, called upon the Consuls and the Commissioner of Customs on the 3rd instant, to wish them a happy new-year; and as he is popular with the community, from his tact and courtesy in his intercourse with foreign officials, and from his ability in discharging the duties of his office, his visit was as a matter of course received with cordiality.

As I have already mentioned, his Excellency Le Hung-chang, the Governor-General of this province, left here for Paouting on the 23rd ultimo; and I now learn that, while *en route*, he met Ying Han, the newly appointed Governor-General of Kwangtung and Kwangse, on his way to the metropolis. Ying Han, I suppose, will only stay to have audience, and then proceed to the south, overland. At one time it was thought he would stay in the north till the opening of the river in spring, and proceed from Tientsin to Canton viâ Shanghai, by steamer. He will now it is stated go from Peking overland to Chinkeang, and thence by steamer viâ Shanghai.

It will depend upon whether the Emperor will or will not require the presence of Le Hung-chang at the Imperial tombs in spring, whether the return of the latter to Tientsin after the opening of the port will be early or late.

In the Peking Gazette of the 30th December, there is a short Edict granting the great statesman Wanseang a further extension of three months' leave of absence to re-establish his health. In the Gazette of the 1st January, a decree appoints the Prince of Kung and other Imperial princes to repair on the 4th (to-day) to certain temples, to pray for further falls of snow.

PURITAN.

4th Jan., 1875.

CANTON.

A farewell address, signed by about ninety residents, and a testimonial of plate, have been presented to Archdeacon Gray,

on the occasion of his departure from Canton, after 22 years' residence. "Not only," says the correspondent of the *Daily Press*, "has the Venerable Archdeacon most acceptably discharged the duties pertaining to the incumbency of Christ Church, Canton, but he has also constantly conducted services at Whampoa on Sunday evenings, and during the period of hostilities, between 1856 and 1861, undertook extraordinary services at Hongkong and Canton in connection with the Army and Navy."—A farewell dinner was given on the 11th to the Venerable Archdeacon Gray, M.A., by Mr. Thomas and Mr. Rowe. The guests numbered about fifty, and included a number of ladies, Sir Brooke Robertson, the Rev. John Chalmers, M.A., and other old residents.—The correspondent of the *China Mail* says:—The removal of the remains of the late Viceroy to Peking is the sensation at present. The ceremony is to take place to-day, and great have been the preparations to make the procession as grand as possible. Those who are to take part in the procession have been put through a series of exercises preparatory to the final start. On the 7th inst., the men forming the procession were made to go through their lessons again inside the Viceregal Yamen. Along the route of the procession, it has been found necessary to remove some shops and other obstructions, and these have been carried out with a strong hand, without any regard to Fungshuey or otherwise, and the only consolation the owners of the houses removed have received is an assurance that their tenement will be rebuilt at the expense of the Government. Nothing, whatever, is said of the damage to them accruing from the loss of rents and tenancy in some cases. From this you will see that the irrepressible plea of Fungshuey raised, whenever any innovation is proposed, is simply bosh. I can assure you that Fungshuey only exists in the brains of the officials, who always find it a convenient excuse against the introduction of anything obnoxious to themselves or calculated to interfere with their peculating propensities.—The prevalence of small-pox in Canton is accounted for by the medical faculty (native of course) by the Emperor having it himself. However loathsome foreigners may consider the disease, the Chinese regard it as a matter for congratulation, for they speak of the person affected with it as "Enjoying the felicity of the heavenly flowers 天花之喜." This is the term employed in the Imperial Edict announcing the illness of the Emperor. The small-pox being the "Flowers of Heaven," and the Emperor the Son of Heaven, and all his subjects subservient to him, it is only natural to look upon the extensive affection of his subordinates for the disease as a fitting sequence. The fact of the eruption on the Emperor breaking out on the day of the transit of Venus is looked upon as significant, he being likened to the sun, as the sun was obscured by a dark spot (the contact of Venus) on the day in question.

HONGKONG.

Mr. R. Chatterton Wilcox has become editor of the *Daily Press*.—The *China Mail* and *Hongkong Times* have both come to the defence of the *L. & C. Express* in the matter of the recent offensive paragraph it contained on a late member of the Consular Service.—The *Mail* observes that the appointment of Mr. Maclean, as travelling inspector of the Hongkong and Shanghai Bank, has given undoubted satisfaction to the shareholders, but says it would be idle to assume that a similar feeling is entertained regarding the appointment of one of the late Directors to the temporary post of sub-manager in London. It is thought that, however little the Directors may have deserved distrust (the Bank's misfortunes being due to an unusually depressed state of trade and exceptional ill-fortune), it would have been better to have selected some gentleman not hitherto identified with the management. On the other hand, the *Mail* can see much to make the advice and aid of one who has been a successful business man in Hongkong of value, and it is quite credible that the Directors thought more of that than of the outcry which under the peculiar circumstances of the case might be raised. The Directors have probably made a mistake in selecting one of themselves; but they might have done worse as regards the selection individually.—The *Mail* asks would it not be well if some measures were taken to remove the many wrecks which now encumber the harbour?—We may localise an observation by the same journal made in reference to Life Insurance.—The "Positive," it says, although a newer company, is fast overhauling it (the Royal) in the race, simply because it recognizes the fact that the dangers of residence in Hongkong are not exactly the same as those attending travel in equatorial Africa.—In a charge for selling liquors without a license, which was not proved, a witness named Jenkins was fined $25 for giving false evidence.—A witness on bail in the *Spark* Piracy case has failed to turn up, and there is some probability that the bail of $400, deposited for him by a friend, will be escheated.—The day the *Alaska* (which was very slightly damaged by being lifted high and dry in the typhoon) came out of Aberdeen Dock, a congratulatory dinner was given on board by Captain Edward Van Syce, in the evening, to a few friends. As we stated to be the intention, the *Alaska* was at once announced to leave with the mail of 13th inst., for San Francisco.—As soon as the Dock Company succeed in landing the steamer *Leonor* in a spot where she may be patched up before being docked, and thoroughly repaired, they are going to raise the *Albay*, and put her through the same process.—The *Mail* says:—His Honor Mr. Justice Snowden was engaged for a good part of a day in the investigation of an interpleader suit of *Ho Asam* v. *Leung Shing*. The action arose in connection with the discovery and raising of the launch *Early Bird*. The plaintiff, while raising the barque *Corea*, discovered the launch first, and had the place buoyed. Meantime the defendant entered into a contract with Messrs. Hook & Co., to raise her for $500. The plaintiff put in a claim as original salvor, and Messrs. Hook & Co. paid the amount in dispute into Court. After hearing a deal of evidence, judgment was given in favour of the plaintiff for $250; the remaining sum was awarded to the defendant, the subsequent salvor, who finally raised her.—A despatch from Earl Carnarvon, Secretary of State for the Colonies, addressed to the Governor of Hongkong, which has been published, states that his Lordship submitted to Her Majesty the Governor's despatches describing the typhoon of 23rd September, and that in returning them, Her Majesty expressed her sincere regret for the sufferings occasioned by that sad calamity.—An address, numerously and influentially subscribed to, has been presented to Captain Warsaw, expressing entire concurrence with the decision rendered by the Court of Enquiry, so far as it relates to that gentleman, and conveying in the fullest sense appreciation and admiration of his "conduct under circumstances the terrible nature of which it is impossible to imagine could be exceeded." It also extends, and requests Captain Warsaw to convey, this appreciation to his officers and crew, who "almost without exception stood to their posts and did all that brave men could do, until all further effort to save the ship was useless."—Seventeen more bodies have been recovered from the *Leonor*, which went down in the typhoon.—An explanation has been offered regarding the non-appearance of the witness in the *Spark* piracy case, so that his bail will likely be safe.—The Peruvian ship *Emigrante* has been sold for $7150.—Messrs. Jardine Matheson & Co. have chartered the German steamer *Cassandra* for their Calcutta line. The Hongkong *Times* notices that among the cargo of the *Yungching*, which arrived on the 10th from Shanghai, were eighty coffins, containing the bodies of Chinese, which have been taken to Canton for burial.

AMOY.

A correspondent of the *China Mail* remarks on tigers, regarding which our correspondents nearer Shanghai have been exercised: "No news of our tigers lately, though parties are often going away, with poor bleating goats as bait, to keep watch at night, and get wet and cold and generally miserable. Shooting, too, this year does not appear to be very good: I mean for the smaller game. The largest bags are those that come from Shanghai by direct steamer. Wild fowl are very wild and pheasants are scarce." The tigers must surely have deserted Amoy for more northern hunting grounds, following up the game.—The same writer, in noticing the forthcoming Amoy races, which take place towards the end of February, says: "There are not many racing ponies here now, and I strongly suspect that if Foochow does not enter, the races will dwindle into a few friendly matches."

HIOGO.

The *News* reports that the *Berlin*, an iron steamer which for some years past has been running under native management between Osaka, Hiogo, and ports in the Inland Sea, was destroyed by fire on the 24th ultimo. The crew and passengers are reported to have been saved, and the cargo lost. The accident is supposed to have been occasioned through the catching fire of a paper lantern.—The betto whose apprehension on a charge of murder, committed four years ago, has been previously noticed, has been released, his arrest appearing to have been a mistake.

YOKOHAMA.

The *Mail* describes a serious fire which broke out on the night of Thursday, the 31st ult., on the premises of Messrs. Schwartz & Co., and which was not extinguished until several houses and their contents were destroyed.—The *Advertiser*, in a brief article on the steps taken by the local authorities to stay the spread of small-pox, says these have been prompt, vigorous and very successful. There has been a house-to-house visitation throughout the native town which has brought all actual cases to light, and it may be remarked that the number of people attacked is very small, only one fresh case per day on an average having been reported during the past week.—The Japanese Authorities have notified the Foreign Ministers that there will be another Exhibition at Kioto, commencing on the 1st of March and continuing for one hundred days. Foreigners are invited to visit it, and also to contribute articles for exhibition.—Some of the Japanese native newspapers are protesting against the abandonment of Saghalien to Russia.—The *Daily Bulletin* has ceased to exist, in consequence of the continued illness of Mr. Franklin. That gentleman announces, however, that all subscriptions and other money paid in advance will be returned.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

Dec. 19th.—(1 and 2) Decrees appointing the newly-made Grand Secretary Pao-yün to the post of Controller-in-chief of the Board of Civil Office; Kwang-show 廣壽 to succeed him as Manchu President of the Board of War, and Kw'ei-ling 魁齡 to succeed the latter as President of the Court of Censorate.

(3) The Governor of Nganhwei reports a peculiarly horrifying case of murder. The parties concerned belong to the district of Wu-hu, where they earned their livelihood in a small way, owning besides a trifling area of land. The family consisted of the following persons, viz., Wu Ts'ai, a worthless, dissipated fellow; his father, Wu T'ing-fu; his wife, Wu P'an-she; and their son, Wu Kwang-yung. Frequent quarrels took place on the subject of money between Wu Ts'ai and his father and wife, one of which having occurred on the afternoon of the 11th September last, when he endeavoured to get his wife's consent to the sale of a piece of ground. She refused, and he subsequently beat her until she gave him 100 *cash*, the woman, in her anger, exclaiming to her father-in-law and her son, after the husband had gone out, that they would all be ruined unless they put this ruffian out of the way. Wu T'ing-fu, himself reduced to despair, agreed that he should be put to death, and the woman then prepared a bag with some lime in it, heedless of the remonstrances of her son. When Wu Ts'ai returned home at night in a state of intoxication, he began again to abuse his wife, and she thereupon summoned her father-in-law and her son, who assisted in tying the victim's arms and legs. The bag of lime was then slipped over his head to smother him, and while the son held his legs down, his father sat upon his head until all struggles were over and life was extinct. On the following day, Wu Ting-fu alleged to a neighbour that the deceased had died during the night in a fit of intoxication, and induced him to assist in carrying out and interring the corpse. Information having reached the Magistrate, however, an inquest was held and the parties were made prisoners. On confession having been elicited, the mother and son have been adjudged as both subject to the most awful penalty of the law, and they have been publicly sliced to death accordingly, with the usual formalities. The father of the murdered man is liable according to statute to the penalty of 100 blows for his share in the crime, but being beyond the age of 70, he is entitled to commute this by a pecuniary mulct.

(4) The military authorities of the Amoor region report that a *gioro* (member of the Imperial lineage) named Che-ch'êng, alias Che-kwang, originally borne on the rolls of the blue banner at Peking, but without specific employ, who was transported into penal servitude at the Amoor in 1862, after being implicated in eight different cases of theft and burglary, has now made his escape from custody. Since his transportation, he has already committed the same offence on five occasions; and having been imprisoned lately on a charge of concerted robbery, he managed to break out of jail on the 24th September and get away. Reports have been sent concerning him to the Imperial Clan Court and the Board of Punishments.

Dec. 20th.—(1) A Decree ordaining that, by special grace, the Associate of the Court of Physicians, Li Teh-li, be awarded promotion to an appointment in the 3rd or 4th grade among the Government departments of the capital, and that a second professor of the art of medicine, named Chwang Show-ho, be similarly advanced to a grade one degree lower than the above. (N.B.—The two individuals above named are the physicians who have attended His Majesty during his attack of small-pox.)

(2) The joint-Governor of Fêng-t'ien (Manchuria) memorializes reporting the appointment of an official to take charge of the post of Taotai at Newchwang, in consequence of the death of the late incumbent of the office, on the 21st October. The importance of the post is dwelt upon, from its connection with foreign affairs and trade, as also the command of the foreign drilled force which pertains to it.

The remainder of the *Gazette* is occupied with memorials from Nganhwei, on the Governor handing over the seals of office to his successor.

Dec. 21st.—The Governor of Kwang-si, in a voluminous memorial, reports the result of a judicial enquiry into the conduct of a brigadier-general named Chên Teh-Kwei, on sundry charges of wrong-doing in connection with affairs on the Tonquin border. Some time ago a communication was received by the Governor from the King of Anam, Yüan Fuh-she 院福時 by name, (his title of Sze Têh, or Tuduc, not being admitted into Chinese correspondence), complaining that the officer in question had written directly to Anamese officials, calling upon them to grant free transit to certain foreign vessels conveying cargoes of arms; and further that he had sent a force to extort compensation, on account of a collision which had taken place between some messengers of his and the "barbarian" inhabitants of the Kin-ying district, whom he had therefore chosen to consider as robbers who had pillaged a treasure convoy. In June, 1873, the Governor received a rescript ordering Chên Téh-Kwei to be stripped of his rank and brought to trial, and this command has now been fulfilled. It appears that, having been stationed on the border of Tonquin in 1872 to guard the frontier against the barbarian rebels, Chên Téh-Kwei, who has fought his way up to his late position from the ranks of the Kwangtung irregulars, sent an agent to Ho-nui 內河 (Hanoi) in Tonquin to report on affairs at that place. On arrival there, the emissary, Liao King-shên by name, met an acquaintance, a cashiered official from Hupeh, named Li Yü-hi, who was employed as assistant to the French Consul T'u P'u-i 涂普義 (Dupuis), who was engaged in transporting a consignment of arms and ammunition on behalf of the General-in-chief of Yünnan, Ma Ju-lung. Li informed the emissary that the barbarian officials of Anam had stopped the vessels, in the absence of any communication from the authorites of Yünnan, and he exhibited to Liao the official instructions given to himself by the General-in-chief of that province. He further drew up in concert with Dupuis a despatch, which he sent by Liao to Ch'ên Têh-kwei, requesting him to call on the Anamese officials to allow them to proceed on their journey. On finding that the military stores in question were actually destined for use by the Yünnan authorities, Ch'ên Têh-kwei wrote as requested to the Anamese; but they, on finding out some discrepancies of quotation in the despatch, still refused a passage to the steamers. Dupuis upon this transhipped his cargoes, and found his own way of getting on into Yünnan. The remaining charges have been similarly investigated, with the result of clearing Ch'ên Têh-kwei of the liability to punishment beyond the temporary deprivation of rank, which it is proposed that he be allowed a further chance of redeeming; but Liao King-shên, who exceeded his functions by meddling in affairs that did not concern him, is adjudged guilty of a grave offence, and it is requested that he be deprived of his rank as a district magistrate and banished under the most severe conditions to the Amoor, there to be consigned to penal servitude. The memorial is referred by rescript for the consideration of the Board of Punishments.

Dec. 22nd.—(1)—Commands have been issued through the chamber of address, to the effect that all the princes, ministers, and officials going on duty within the Palace shall, up to the 18th of March next, appear in full embroidered uniforms. The government departments will continue to send in their documents as usual.

(2)—A Decree. The rank to be taken by Pao-yün, as Grand Secretary, is next below Tso Tsung-t'ang.

(3)—Yih-tsung (the Prince of Tun, commonly called the fifth Prince, eldest of the Emperor's four surviving uncles,) and his colleagues, memorialize as follows, laying before his Majesty their report in obedience to commands received. On the 11th Dec. the Prince of Kung and his colleagues of the Grand Council memorialized in the following terms: "Whereas your Majesty has happily met with an attack of small-pox 現遇天花之喜, the Sacred Person should enjoy rest and restorative care, and it would seem fitting that the sacrificial ceremonies to be performed at the Temple of Heaven and the Imperial Temples, as well as all presentations of officials on the part of the various departments of government, beside all matters of business in general, should be arranged in obedience to the exigencies of the case. We beg, therefore, that the Prince of Tun, the Prince of Fu (youngest of the four imperial uncles), and the Ministers of the Presence, may take action with ourselves in drawing up suitable rules and in laying them before your Majesty as the system to be pursued." To this the rescript was returned: "Be it as is proposed." This having been reverently received, your servants have jointly taken counsel, and they now submit a copy of the rules they have drawn up, for the imperial sanction.—Rescript: Be it as is proposed.

Upon the above follow the proposed rules with reference to the delegation of his Majesty's ceremonial functions during the hundred days of seclusion, ending March 18th, 1875.

(4)—The Governor of Chehkiang memorializes reporting the completion of the works undertaken for the restoration of the Temple of the God of the Sea at Hai-ning Chow, the building heretofore existing on the spot having been almost totally destroyed during the Rebellion. Only a portion of the several buildings which formerly constituted the temple have been restored, at a total cost of Taels 36,000, to which an additional sum of Tls. 9,000 has to be added for internal fittings and decoration. This amount is provided from the fund allotted to embankment expenditure. The divine assistance rendered by the God of the Sea since this temple for his worship was first built, by Imperial command, in A.D. 1729, has been most conspicuous. It is requested that a memorial board be conferred by his Majesty upon the building.

Dec 23rd.—(1)—The Governor of Chehkiang reports the conclusion of a trial for the murder of two men, father and son, named Chao Kwoh-kün and Chao Ping-lieh. The elder Chao, who was manager of a commune temple in the Si-ngan district, having interfered on one occasion, in July, 1872, to prevent some disorderly fellows named Lü from gambling with bamboo slips belonging to the temple, a fight ensued in consequence, and on Chao lodging a complaint against them at the district magistracy, one of their number, Lü Wu-urh, was apprehended and flogged. In revenge for this he determined to take Chao's life, and a couple of months later, having previously obtained the promise of assistance from four others of the same

surname, he looked out for an opportunity of carrying his purpose into effect. Having watched Chao Kwo-kün leaving the village one day, and surmising that he would return by the same road, he called together his accomplices, and arming himself with a bill book while another carried a chopper, he lay in wait for his victim. When Chao Kwoh-kün made his appearance, he was set upon and hacked to death, wounds being dealt all over the body. Shortly afterwards, the son of the murdered man, finding his father had not returned, went out to look for him, whereupon the assassins resolved upon murdering him also, to prevent his denouncing them. The young man was consequently set upon and cut to pieces as his father had been. A villager happened to approach the scene of the crime, and saw what had been done, but he was intimidated into holding his tongue, and the murderers got away. The eye-witness informed the relatives, however, of what he had seen, and pursuit having been instituted, the two principal criminals have been apprehended, and are sentenced to death in due form of law.

(2)—The Governor of Chehkiang memorializes presenting on behalf of the gentry and people of the province an application for permission to erect a memorial temple in honour of the former Governor of Chehkiang (afterwards a Grand Secretary), Yüan Yüan, 阮元 (who died in 1850). This high official is revered in the province not only for the literary attainments for which he is celebrated, but also for his skill in repressing disorder and in putting down piracy on the coast. He likewise conferred great boons upon the people by his amelioration of the water system and his arrangements for the relief of distress. In 1852, an application to admit his name upon the list for sacrificial honours received Imperial sanction, and the gentry of the province now wish to take the further step of erecting a temple dedicated to his memory.

Dec. 24th.—(1)—A Decree. We have received the benign mandate of their Majesties the Empresses-Dowager as follows:—

Whereas on his Majesty being this month happily attacked by smallpox, safety from harm has been vouchsafed through the silent protection of the Azure Vault above, profound indeed is the gratitude with which we are inspired. Remembering how paramount a consideration it should be with a humane and virtuous government to bestow a reverent regard upon those who lie in bondage, it is fitting to dispense a special act of grace, bestowing a measure of compassionate relief. For all prisoners whose trials have already been concluded by the Board of Punishments or any of the provincial Courts, with the exception of those guilty of crimes of serious magnitude and such as are not embraced within the action of a general pardon in ordinary, let the Grand Council join with the Board of Punishments in considering the circumstances of each case, and submit propositions for Imperial sanction as regards a reduction in the degree of penalty to be inflicted. In the case of criminals whose sentences are lower in degree than those of transportation, banishment (with or without penal servitude), and blows, let them at the same time have decisions recorded on a reduced scale of penalty. Thus, refreshed with the dews of widely-spreading bounty, may men be led to seek for the path of self-amendment; and thus be Our earnest intent made known, in the love We feel for the myriads of the people, to bestow a leniency beyond the limits of the law.

(2) A Decree. Whereas, on Our being this month happily attacked by small-pox, their Majesties the Empress (dowager) Ts'ze Ngan Twan Yü K'ang K'ing, and the Empress (mother) Ts'ze Hi Twan Yeo K'ang I, have tended Our person with a care which knew no bounds, and as moreover, in their loving affection, their Majesties have also deigned to give ear to Our request that the memorials handed in from all the Government departments be submitted for their perusal and decision, Our heart has been filled with the most profound gratitude and satisfaction. It is fitting that an addition be made to the titles of respect appertaining to their Majesties, as a return, however small, for their abounding love.—Let the proper department take, with all reverence, the steps which are needful for the accomplishment of the ceremonial.

(3) We have received the benign mandate of their Majesties the Empresses as follows: Let the imperial concubine of the second class, Hwei Fei 慧妃 be invested with the rank of the first class, as Hwang Kwei Fei 皇貴妃; the imperial concubine of the third class, Yü P'in 瑜嬪, be invested with the title of the second class, as Yü Fei; the imperial concubine of the third class Sün P'in 珣嬪, be similarly promoted to the second class; and the lady-of-honour 貴人 Si-lin Gioro 西林覺羅氏 be invested with the title of Tsin P'in 瑨嬪, as a concubine of the third class. (Note. The foregoing constitute one-half of the number of concubines, in addition to the Empress, who are said at present to complete the imperial seraglio, viz., two *fei*, two *p'in*, and four *kwei-jên*).

(4) A Decree bestowing honours and rewards on all the Princes and high functionaries of the court and capital, in token of rejoicing for his Majesty's convalescence. The Princes of Tun and Ch'un have their State salaries as Princes of the blood-imperial doubled; and as this has already heretofore been done on behalf of the Prince of Kung, the salary of his Highness is now to be trebled. The Prince of Fu is granted the salary of an imperial Prince, and similar allowances in different degrees are conferred upon the Mongolian princes of the Court, and upon the sons of the three imperial uncles and others. The Grand Secretaries Wên-siang and Pao-yûn, and their colleagues in the Grand Council, Shên Kwei-fên and Li Hung-ts'ao, are granted the distinction of the two-eyed peacock-feather, which is also extended to a number of the other high officials of the Boards, etc. Two reserve degrees of rank are conferred upon all nobles and officials throughout the Empire; and a donation of half a month's pay is bestowed upon the entire Manchu and Chinese garrison of Peking.

Public Meetings.

MUNICIPAL COUNCIL FOR SETTLEMENTS NORTH OF THE YANG-KING-PANG.

Council Meeting of 11th January, 1875.

Present:—Messrs. John G. Purdon (chairman), Geo. J. W. Cowie, W. Kidner, F. W. Lemarchand, R. Mackenzie, E. Seligmann, S. D. Webb, and the Secretary.

Dues on Merchandize for the month of November, 1874, amounted to Tls.	6,639.77
For the same month in 1873	7,484.13
Showing a *decrease* of ..... Tls.	844.36

Applications for appointment vacant in consequence of Mr. J. M. Fabris leaving on 31st January, were referred to the Finance Committee for consideration.

Shanghai Volunteer Corps—Drill Instructor.—It was decided to write to the Commanding officer of H.M's Forces in Hongkong, for a well-qualified steady sergeant, with a knowledge of the Henri-Martini drill. Providing the Volunteers took advantage of the opportunity afforded by having such a man, to perfect themselves in their drill, the Drill Instructor would be retained as long as he could be spared by H. B. M's. Government.

Staff.—Periodical leave to Officers.—The Council passed a resolution that officers on the permanent Staff be allowed after each term of five years' service in Shanghai, leave of absence for a period of nine months, on half-pay during such time, allowances being discontinued

It being understood that no two Heads of Departments should be away together, and no inconvenience to the public service be involved in such leave.

Mr. E. H. Oliver.—Draft agreement on term proposed by the Public Works' Committee, with Mr. Oliver, Municipal Engineer, for a further period of three years from expiry of present engagement, was approved.

Shanghai Fire Department.—The Election of the following officers of the Shanghai Fire Department for the year 1875, was approved and confirmed:—

Chief Engineer	R. Mackenzie
1st District Engineer	C. J. Ashley
2nd do. do.....	B. A. Clarke
3rd. ,, ,, ...	A. Charrier

THE CHINESE POLYTECHNIC INSTITUTION AND READING-ROOM.

Minutes of a meeting of the Committee for the Chinese Polytechnic Institution and Reading Room, held at Mr. Medhurst's office, on Friday, the 8th January, 1875.

Present.—Messrs. Fryer, Hsu Chung Hu, Wang Yung Ho, A. Wylie, Tong King Sing, and W. H. Medhurst.

Letter read from Mr. Forbes, offering his resignation, on the ground of his approaching departure from China.

Mr. Medhurst presented financial statement of the resources of the Institution. The Bank book shewed a balance to credit of Tls. 4,154.83 on the 31st December last. Since then a contribution had been received from Messrs. Boyd & Co. of Taels 333.33; Mr. Tong King Sing had received contributions amounting to $600, $150 of which were annual subscriptions; Mr. Hsu Shou had received another Taels 400, and Mr. Medhurst had cash to the amount of about $30—so that they might count upon an aggregate of considerably over Tls. 5,000 to the credit of the Institution.

It being indispensable to nominate some member of the Committee to represent the institution with the Bank, Mr. Medhurst was requested to act as Treasurer.

On the motion of Mr. Medhurst, Mr. Fryer was requested to act as Secretary.

On the motion of Mr. Medhurst, Mr. T. W. Kingsmill was invited to join the Committee as member. And on the motion of Mr. Fryer, Mr. Hsü Chung Hu was likewise placed upon the Committee.

Mr. Fryer stated what progress he had made in negotiating for a suitable piece of land. He was requested to continue his efforts, and Mr. Tong King-sing was asked to assist him in reference to a particular plot which the Committee thought would suit them. The price to be paid for land was for the present limited to Tls. 2,500.

Mr. Hsü urged the necessity of accelerating proceedings as far as possible in the purchase of land and construction of a house, as he thought that H.E. Li Hung-chang was prepared to extend his support the moment that he found practical progress made.

Mr. Fryer explained that, judging from what Mr. Hsü had told him, it would appear that H.E. Li Hung Chang's hopes ran principally in the direction of establishing and maintaining a School of Science and Art; and it was agreed that this object could be met in the

plan of the Institution as at present projected—if only more funds could be secured.

Mr. Fryer gave most encouraging accounts of the interest taken in the Institution at Home, as reported by his correspondents; and his only fear was that there would be difficulty in finding enough room for all the specimens of machinery, apparatus, &c., which might be expected to arrive. A letter of thanks to Messrs. Boyd & Co., for their munificent donation and courteous offer of assistance, was read by Mr. Medhurst, and approved.

Mr. Fryer was requested to address the Managing Directors of the Peninsular and Oriental Navigation Company, a warm letter of acknowledgment for their courteous consent to carry packages, free of freight, addressed to the Institution.

A question was raised as to whether it would not be possible to commence operations in a hired building, as agreed to at a former meeting, but in view of the fact that several lots were under consideration, and that a building suitable for all preliminary purposes could be erected in three months, it was resolved to purchase land and to build with all reasonable despatch.

Mr. Fryer submitted the Prospectus of the object and plan of the Institution, which he had been requested to draw out for publication in China and at Home; and having been read and slightly amended, it was approved as hereinafter annexed.

A letter was submitted from J. D. Bishop, Esq., offering for exhibition in the Institution a valuable collection of apparatus used in Electrical Science; and Mr. Fryer was requested to acknowledge the loan in fitting terms, and to state the conditions on which it would be accepted.

W. H. MEDHURST.

PROSPECTUS FOR THE CHINESE POLYTECHNIC INSTITUTION AND READING-ROOM.

1. *Object*:—The object of this Institution is to bring the Sciences, Arts, and Manufactures of Western Nations in the most practicable manner possible before the notice of the Chinese.

The means proposed are:—

1st.—An Exhibition of machinery, apparatus, manufactured goods, etc.

2nd.—Lectures and Classes for Scientific Instruction.

3rd.—A Chinese Library and Reading Room.

It is hoped that after this Institution has been a few years in operation, it will lead to the establishment of branch Institutions by the natives themselves, in different parts of the Empire.

2.—*Management*:—The affairs of the Institution, as far as Shanghai is concerned, are to be managed by a Committee of Eight members—four being Europeans and four Chinese. A Committee is also to be formed in London, to co-operate with that in Shanghai, and manage all that is required to be done for the Institution in England and Western countries generally. Each Committee is to elect its own Secretary and Treasurer. A half-yearly report is to be drawn up in English and Chinese for general distribution, shewing the state of the funds, the names of subscribers, new articles received, and the progress made in the different branches of the Institution generally.

3.—*Funds*:—It is hoped that the Institution will eventually become to a great extent self-supporting. But as at the outset a considerable sum is required for the purchase of land, for erecting a suitable building, for the purchase of books, apparatus, and furniture, and for current expenses, Foreign subscription lists are to be issued by the Committee in Shanghai, and by that in London, while a Chinese list is to be circulated among the native officials and gentry in all parts of China. A suitable house is to be hired for the use of the Institution until a permanent building has been erected. The Institution will be free to all respectable Chinese for at least a full year after it has been formally opened.

4.—*Exhibition*:—The Exhibition is to consist of models or specimens of machinery, apparatus, tools, and manufactured articles of all kinds—in fact, of anything calculated to promote the introduction and general use of Western manufactures in China. Such articles may either be presented or lent to the Institution. If lent, the expenses of freight and delivery must be borne by the exhibitor, who will not be allowed to remove anything till it shall have been exhibited for one full year. If presented, all expenses are to be borne by the Institution, after the articles have been placed in the hands of its agents in London. For the present, and until suitable premises are ready, of which due notice will be given, by advertisement or otherwise, no articles of great bulk or weight are to be received. The Committees will allow a reasonable amount of space to each exhibitor gratuitously, as far as the size of the building permits; but they reserve the right to refuse space to anything they may consider unsuitable, and also, after the Institution has been opened at least a full year, to establish a fixed charge for articles lent on exhibition, should a deficiency of funds render such a step necessary.

It is also proposed to devote a portion of the building to the reception of any articles of Chinese manufacture that may be considered of sufficient interest for exhibition. While promising to use every precaution for the safe keeping of all objects entrusted to their care, neither Committee holds itself responsible for any loss, accident, or injury that may occur. The name and address of the exhibitor, together with the price, and any explanatory details that may be sent, are to be translated into Chinese and affixed to each article. A descriptive catalogue is to be prepared in Chinese and circulated as widely as possible. The blocks for engravings of articles exhibited, may be forwarded for gratuitous insertion in the catalogue. Advertisements will be inserted at reasonable rates.

It is hoped that Foreign Mercantile Firms in Shanghai and other parts of China, will see that it will be greatly to their advantage not only to countenance this Exhibition themselves, but also to prevail on the Firms they are connected with at Home, to render as much assistance as possible. Detailed Regulations for this Exhibition are to be drawn up and published at an early date.

5.—*Lecture Room and Classes*:—The Lecture-room is to be provided with a collection of philosophical apparatus. It is hoped that manufacturers may be induced to send presents of such apparatus. The Committees are to complete the collection if necessary from the funds of the Institution. Free Lectures are to be delivered in Chinese on scientific subjects, as occasion offers; and the apparatus is to be of a kind suitable for lecturing purposes. Classes are to be formed for teaching such scientific subjects as a sufficient number of respectable natives may desire to study. The Committees will receive applications for admission into the classes, and will select such candidates as may appear to them to be the most eligible. No fees will be charged; and the Chinese and Foreign gentlemen who conduct these classes, will give their services gratuitously. The Rules for Lectures and Classes are to be determined at a future date.

6.—*Library and Reading Rooms*:—The Reading Room is to be furnished with all the Chinese newspapers and periodicals that can be procured, and the Library with all the translations into Chinese of European scientific and other useful works that are obtainable, as well as all native works of general interest. Rules for the Library and Reading Rooms are to be drawn up by the Committee at a future date.

Amusements.

FOOCHOW RACE MEETING.

Stewards—A. W. Walkinshaw, Esq.; E. Sheppard, Esq.; H. Hickling, Esq.; S. W. Pomeroy, Esq.; F. Temple, Esq.; C. G. Tatham, Esq.; J. G. Hart, Esq.; Judge—F. Temple, Esq. Clerk of the Course—J. A. H. Drought, Esq. Starter—S. W. Pomeroy, Esq.

The Foochow Autumn Race Meeting took place on the 7th and 8th inst., and was, says the *Foochow Herald*, one of the most successful gatherings of the kind that ever took place in Foochow. On both days the weather was bright and genial; the Course was in splendid order; an unusual number of ponies were entered for the different events, and there were large fields. On the first day the usual party of Mandarins—including the Fantai and Taotai—were present. The latter brought with him some rolls of silk, one of which he presented to each successful jockey. Sporting men in Shanghai, equally with those at Foochow, will regret to hear that the veteran pony Grasshopper, after running a game race for the Welter Stakes, and coming in a winner, dropped down dead a little beyond the post.

The following are the events and winners:

FIRST DAY.

1.—NANTAI PLATE.—$100—For all China Ponies. Weights as per scale. Half-mile. Twelve entries; eight ran.

Mr. Willwynn's *Benachie* 1
,, Skelton's *Caractacus* 2
,, Sheppard's *Prince Charles* 3

Caractacus led the greater part of the way, but towards the close was collared by *Benachie*, who won easily. Time, 62 4/5s.

2.—MAIDEN STAKES.—Of $10 each and $100 added. For all China Ponies, *bonâ fide* Griffins at the date of entry. Weights as per scale. ¾ mile. Six entries; three ran.

Mr. Frederick's *Pioneer*.....1
,, Pomeroy's *Mumbo Jumbo* 2
,, Skelton's *Royal Tiger* 3

Pioneer led throughout, and won easily. Time, 1m. 43s.

3.—"FEI MA" CUP.—Presented. Value $300. For all China Ponies. Weights as per scale. 2 miles. Eight entries; six ran.

Mr. Willwynn's *Caprice* 1
,, Skelton's *Tallapoosa* 2
,, I'Anson's *Rouble* 3

This was a splendid race. *Rouble* and *Tallapoosa*—the two favourites—led three times round, and appeared to be winning easily, when *Caprice*—ridden in fine form—came up and secured the race, by about half a length. Time, 4m. 40 2/5s.

4.—HACK STAKES.—A Sweepstake of $10 each. For all China Ponies not otherwise entered at this Meeting, except for the WELTER, CONSOLATION, and STEEPLE-CHASES. Weights 12st. Half-mile. Seven entries; four ran.

Mr. Hickling's *Blackmail* 1
,, Annandale's *Kickshaw* 2

Meprisè led throughout, and won as he liked, but on weighing out, his rider was found to be 4lbs. short, and was consequently disqualified. *Saunterer*—who was second—was disallowed first place, owing to his neglecting to weigh out in the paddock.

5.—CRITERION STAKES.—Of $25 each. For all China Ponies. Nominations to close one month before the races, half forfeit. Weights as per scale. 1¼ mile. Nine entries; five ran

Mr. Willwynn's *Benachie* 1
,, Skelton's *Tallapoosa*.....2
,, Sheppard's *Prince Charlie*.....3

This was a very close race between *Benachie* and *Tallapoosa*, the former winning by about half a length. *Prince Charlie* a bad third. Time, 2m. 48 2/5s.

6—SUBSCRIPTION CHALLENGE CUP.—Value $. For all China Ponies *bonâ fide* Griffins at the date of entry, to be won 2 years in succession, at the Autumn Meeting, by a pony or ponies the property of the same owner or owners, the pony to be allowed to run 2 years in succession. Half entrance Fees to go to the winner, and half to an accumulating Fund for the ultimate winner. Nominations to close one month before the races. Entrance $15—$5 forfeit. Weights as per scale. 1 mile. Three entries; two ran.

Mr. Frederick's *Pioneer* 1
,, Armstrong's *Vanity* 2

Won easily by *Pioneer*, who led throughout. Time, 2m. 22s.

7.—Chaa Sze Cup.—Value $150. Presented. A Steeplechase for all China Ponies, three times round, over a Course selected by the Stewards. Catch weights over 10st. 7lbs. Ten entries; six ran.

Mr. Hickling's *Bintang*.....1
,, Skelton's *Royal Tiger* 2

Bintang and *Royal Tiger* had the race to themselves from the second round.

Second Day.

1.—Leger Cup.—Presented. Value $100. For all China Ponies. Weights as per scale. Winner of Nantai Plate 10lbs. extra. Once round and a distance. Fifteen entries; five ran.

Mr. Willwynn's *Caprice* 1
,, I'Anson's *Rouble*.....2
,, Skelton's *Caractacus* 3

A good race; won by about ¾ length. Time, 1m. 27½s.

2.—Hongkong Cup.—Value $—. For all China Ponies. Weights as per scale. Winner of Fei Ma Cup 7lbs. extra. 1½ miles. Twelve entries; four ran.

Mr. Willwynn's *Benachie*.....1
,, Joey Bagstock's *Bar Sells*.....2
,, Hickling's *Grasshopper* 3

The race lay between *Benachie* and *Bar Sells* all through, and the former won by half a length. Time, 3m. 31s.

3.—Souvenir Cup.—Value $100. Presented. For all China Ponies. Weights as per scale. Griffins at date of entry and not winners previous to this race allowed 7lbs. 1 mile. Nineteen entries; four ran.

Mr. Willwynn's *Caprice* 1
,, Skelton's *Tallapoosa* 2
,, Sheppard's *Sir Galahad* 3

Time, 2m. 15s.

4.—Welter Stakes.—Of $10 each with $50 added. For all China Ponies that have run at this Meeting. Winners excluded. Weights 12st. 7lbs. Half-mile. Ten entries; four ran.

Mr. Hickling's *Grasshopper* 1
,, James' *Sentry Go!* 2
,, Clearall's *Leechcraft* 3

This was *Grasshopper's* last race—after running gamely, and coming out victorious, he dropped down dead—a few yards from the post. Time, 63 4/5s.

5.—Compradores' Cup. — Presented. Value $245. For all China Ponies. Weights as per scale. Winner of the Fei Ma Cup, or Hongkong Cup, 7lbs. extra, if of both 12lbs. 1¾ miles. Ten entries; three ran.

Mr. Willwynn's *Benachie*.....1
,, I'Anson's *Rouble* 2
,, Skelton's *Tallapoosa* 3

Time, 4m. 5.

6.—Consolation Stakes.—Of $5 each with $30 added. For all beaten Ponies that have run at this Meeting. Weights as per scale. 1 mile. Six ran.

Mr. Willwynn's *Meprisé* 1
,, Joey Bagstock's *Bar Sells*.....2
,, Caldecott's *Little Squerries* 3

Time, 2m. 17s.

7.—Champion Stakes.—Compulsory on all winners at this Meeting to enter, (except winner of Hack Stakes.) Weights as per scale. Entrance $10 for first, and $5 for each subsequent race won. 1¼ miles. Two ran.

Mr. Willwynn's *Benachie*.....1
,, Skelton's *Tallapoosa* 2

Benachie in a walk. Time, 2m. 56s.

8.—Visitors Cup.—Value $—. Twice round and a distance, over a course to be selected by the Stewards. Catch weights over 11st. Winner of Chaa-sze Cup 7lbs. extra. Eleven entries; three ran.

Mr. Snaffle's *Shadow* 1
,, Sheppard's *Sir Galahad* 2
,, Hickling's *Bintang*.....3

Sir Galahad's rider made a mistake about the distance—taking it to be three times round.

Third Day.

"Caprice" Cup.—Value $100. 1½ mile. 1.—*Bar Sells.* 2.—*Tallaposa.* Time, 3m. 28½s.

Match between *Rouble* and *Caprice.* 2 miles. Won by *Caprice.* Time, 4m. 39s.

Law Reports.

H. B. M. SUPREME COURT.

Shanghai, January 15th.

Before Sir Edmund Hornby, *Chief Judge.*

Reg. *v.* Saliman Morbrook.

Wounding with a Knife.

The prisoner was indicted, on three counts,—1st, for wounding with a knife, on the 23rd November, 1874, causing grievous bodily harm; 2nd, for an assault, causing actual bodily harm; and 3rd, for a common assault.

The prosecutor was a Chinaman, named Hsü Zin-sheng; the prisoner was an Arab, or native of Muscat, who had formerly served on board the P. & O. steamer *Delhi.*

Mr. H. Brougham Miller appeared for the defence.

The following answered to their names as jurymen, and went into the box, but were not sworn, the prisoner not being formally arraigned, for reasons which appear below:—Messrs. Rowley Miller, H. R. Hearn, R. Johnstone, T. G. Williamson, and F. T. Williams.

The Judge asked if there was an interpreter present?

Yang Heding, the Consular interpreter, was in Court, to interpret for the prosecution; but there was no one present who could interpret Hindostanee or Arabic.

Acting-Superintendent Stripling said he had despatched a messenger for one, who would probably be in Court presently.

The Judge, after an expression of regret that the Jury should be delayed, tested the prisoner's knowledge of English, by reading the indictment over to him, and asking him if he was guilty of the offence imputed to him.

The prisoner uttered some almost inarticulate sounds, but did not seem to understand what had been said to him.

The Judge—The Court cannot proceed without an interpreter. These men (alluding to the prisoner) serve in our ships a number of years, but they never understand English when it suits their convenience not to do so.

The Court sat for some time in solemn silence, during which the jurors in waiting quietly departed, leaving their five less fortunate brethren sitting in the box, one of whom, with much resignation, requested that a message might be sent to his mafoo to take his trap home.

Another interval of silent waiting followed, during which three grave-looking, but dirty Chinese entered by the public door, followed in haste by a police-sergeant. This official whispered something to

Mr. Stripling, who afterwards informed the Court that the sergeant had been unable to find an interpreter.

The Judge—Then I cannot detain the Jury any longer. The prisoner must be remitted to prison. (To the Jury)—Gentlemen, you are dismissed.

Mr. Brougham Miller—Would the Court, before the Jury are dismissed, consider the question whether the prisoner is a British subject or not?

The Judge—Have you been able to communicate with him? No one else has.

Mr. Miller—No, I have not.

The Judge—Then for his own sake the prisoner had better go back to gaol. If that question is raised, and the prisoner prove not to be a British subject, nor the subject of any Treaty Power, he will have to be handed over to the Chinese authorities. It will be better in the interests of the prisoner not to raise the question.

Mr. Miller asked if the adjournment was *sine die?* If so, it would be rather hard upon the prisoner, who had already been in gaol for some time.

The Judge said the adjournment was not occasioned by the absence of witnesses, for they were all present; but because there was no interpreter, and the trial could not proceed without one. His Lordship added that if, ultimately, the prisoner be found guilty, he would of course take his previous imprisonment into account.

Mr. Miller—Yes, my Lord, we none of us suppose you will do your worst. But suppose he is found not guilty?

The Judge intimated that he had mentioned the best course under such unlooked-for circumstances.

It was stated that the prisoner had been detained in gaol because the prosecutor was unable to leave the hospital.

Mr. Miller said the wound appeared not to have been a very serious one.

The Judge, referring to the surgical testimony taken at the committal, read to the effect that if the wound had been very little deeper it would have been very dangerous.

The Court shortly afterwards rose, and the accused was taken back to prison.

CIVIL SUMMARY COURT.

Shanghai, Jan. 16th.

Before R. A. Mowat, Esq.

Wha Ching *v.* J. S. Morphew.

Claim $20, for goods sold and delivered. Defendant admitted his liability to the extent of $14.25, and said that plaintiff, who was a boot and shoe maker, had been in the habit of supplying him with boots and shoes for the last twelve months. He had recommended him to other customers, and very lately had discovered that shoes which plaintiff charged him $4 per pair, he had only charged his friends $3.00 per pair, therefore he (defendant) had cut $6 for six pairs of shoes supplied during the year.

Plaintiff said that he had charged $3 per pair for shoes for cash only.

Defendant said that when he made the deduction in the bill, the plaintiff agreed to take the amount due, less the $6.00

Plaintiff said that he made the agreement to accept the amount less the deduction providing he was paid the 1st day of December, but as he had not been paid, he now claimed the full amount.

His Worship said that if defendant only paid once a year he thought that plaintiff was justified in making a higher charge than he would on a cash transaction. But apart from that, the plaintiff must have judgment on the simple ground that he had agreed to supply goods at a certain price, and that having supplied them, he was entitled to be paid the contract price, whether it was higher or lower than the price for which he supplied other customers with the same goods. Judgment with costs for the plaintiff.

Wa-shing *v.* F. W. Templemore.

Claim $5, for work and labour done.

Defendant not appearing, and plaintiff having proved his claim, judgment was given by default.

POLICE COURT.

Shanghai, January 14th.

Before R. A. Mowat, Esq.

Edward Jones, a seaman of the British str. *Glenroy,* was charged by Capt. Hogg with being absent without leave, and with refusing duty.

Defendant admitted the charge, but said that he was willing to return to his duty if the captain would let him have his clothes.

Capt. Hogg explained that he feared that defendant would run away, and as a matter of precaution, he had taken the bulk of his clothes aft: he allowed him to have whatever he needed out of them.

His Worship ordered defendant to return to his duty; to forfeit two days' pay, and pay the costs of the summons.

Monday, Jany. 18th.

R. *v.* John Battiste.

Defendant, a coloured seaman, residing at the Sailors' Home, was charged by Mr. Bowen, Superintendent, with the theft of a pair of blankets, the property of the Home.

Mr. Stripling said that the blankets were usually served out at 7.30 p.m., and last night, shortly after 8 p.m., defendant was seen by two of the inmates of the Home going out of the gate with the blankets under his arm. The blankets had not been found.

Defendant admitted that he took the blankets, but he was drunk, and did not know anything about it at the time.

Mr. Stripling said that defendant had just served three months with hard labour for refusing duty on board the *Lucerne*.

His Worship sentenced defendant to two months' hard labour, and to be deported.

Jan. 19th.

R. *v.* EDWARD JONES.

Desertion.

EDWARD JONES, A. B. of the steamer *Glenroy*, was charged with desertion. In answer to His Worship, defendant said he left the ship because he was badly treated by the mate, and had all the dirty work on board put upon him; altogether he was leading a far different life to what he had expected, more especially, as he had letters of introduction from influential people connected with the firm. He left the ship on Saturday evening, taking only a part of his clothes. The ship sailed on the following morning. He expected to get some employment as a clerk on shore.

His WORSHIP—How can you expect to get a situation after having been before me now twice, this time for an offence that I must punish by sending you to prison? Notwithstanding the warning I gave you on the last occasion, you deliberately break the law. If the mate had ill-used you, you should have complained at once to the captain.

Defendant.—I asked him for my discharge, but he refused to give it me.

His Worship.—Then you had no right to break your agreement by leaving the ship, thereby putting the captain to great annoyance and trouble. I shall send you to prison with hard labor for one month; if your ship returns to this port within that time, you will be sent on board. You had much better have stayed on board your ship.

Defendant.—I think so too, now, Sir.

U. S. CONSULATE.

Shanghai, Jan. 18th.

Before O. B. BRADFORD, Esq.

Drunkenness and Assault.

BERNARD QUINN, a seaman of the U. S. S. *Kearsage*, was charged with being drunk and assaulting a jinrikshaw man, and also resisting a native constable who endeavoured to arrest him.

It appeared that the defendant came from the French Concession, and on being asked for his fare at the foot of Garden bridge, he violently assaulted the jinrikshaw man, striking him in the face with his fist. A native constable came to the rescue of the jinrikshaw man, when defendant turned upon him, rolled him in the mud, and pulled a handful of hair out of his head.

MR. BRADFORD ordered defendant to be kept in confinement for one week on bread and water, and to pay 20 cents to the jinrikshaw man. The defendant was informed that his sentence was made so light, on account of its being expected that his ship would leave before the end of the week.

MIXED COURT.

Shanghai, Jan. 12th.

Before GEO. F. SEWARD, Esq., U. S. *Consul-General*, H. E. the TAOTAI of Shanghai; and Dr. YATES, acting as Interpreter.

C. E. HILL *v.* ESTATE OF YANG TAIKEE.

The hearing of the above case was resumed by adjournment from the previous Saturday. The Court at once proceeded to hear further evidence, and the first witness called was

C. J. ASHLEY, who deposed—I am an American citizen. I was at one time employed with the Soonkong, or Ward's Force, in suppressing the Taeking rebellion. I mean the "Ever-Victorious Army." I joined it in the early part of 1861, and remained in it until 1863. My position was Quartermaster-General and Paymaster. There was no difference in the officers of the Force until after Ward's death in 1863. There was no change whatever in the Chinese management of the Force while I was with it. My chief dealings for funds, &c., were with Taikee. I had no dealings with any other Chinese officials. I received the funds for payment of the foreign officers, steamboats, and the troops generally, from Taikee. I remember the steamer *Keor-jeor* being employed with that Force. In the early part of summer, I think in May, I was ordered by General Ward to take an engineer, and make a trial trip with her. I did so, and reported favourably to the General. There were some little alterations made in her, and she was turned over to the Force. She was used while I was with the Force—until I went to Hongkong, in September, 1862, in connection with the Force. After that I saw her no more, but heard by common report that she was still used. My offices, &c., were then turned over to Benson. I went to Hongkong for arms and ammunition for the Soonkong Force. I furnished coals and stores afterwards for the steamer. She had no name that I knew of at that time. The engineer I took was the second engineer of the *Zingari*. I do not remember his name; he was drowned during the trial trip. He was a British subject, and his name will be found probably at the British Consulate. All I know of Woo Taotai's connection with the Force was that I was at times employed by Ward to go to him with despatches. I never saw the charter-party. The steamer was used as a despatch-boat, but she had a gun put on her, to fight when up the creeks. There were several other steamboats here, but they were larger, and employed in the silk trade. Fletcher and Co. had two or three. I cannot say positively that they were here at the time the *Keor-jeor* was chartered. They were here after the rebellion. The *Keor-jeor's* charges for running were more economical than any other boat. She was very small. I only know by hearsay about her capture. It was common report that she was captured up the river.

By Mr. DRUMMOND—I had my chief dealings with Taikee, and with no one else. I never saw Taikee sign any papers himself, but I saw his compradore, Li, do so for him. He is in Court. (Witness identified him.) He was the man who invariably handed to me all cheques for payment of steamers, &c. I simply went there with my bills for expenses, and Li read them over and paid me. Taikee was at times there, and at other times he used to take them to Taikee's private room, and then bring me the money. I have often seen native chops on Taikee's writing table. I cannot read or write Chinese. I never saw Woo Taotai sign or seal any documents in connection with the Force. I always saw to the correctness of all payments in connection with the Force. It was my duty to do so. I think there were eleven steamers in connection with the Force. They were the *Confucius*, *Pluto*, *Zingari*, *Williamette*, *Hyson*, *Bopeep*, *Cricket*, *Keor-jeor*, *Rose*,—I can hardly remember, it is so long ago. I think there were eleven, but do not remember the other two. The *Confucius* and *Pluto* were guild boats—I believe the Shantung guild. I do not know how the other boats were engaged. It was commonly understood that the *Rose* was Taikee's own property. The *Zingari* was a Chinese owned steamer. The *Hyson* was purchased from Russell & Co. by General Ward. The *Martin White*, a tow boat, was also used in the Force. She was half owned by Ward and half by Taikee. I know about the *Keor-jeor* simply because Ward ordered me to take her on the trial trip. It was reported that she belonged to Mr. Hill. I had no authority from Mr. Hill to receive the vessel. We took her from Hunt and Company's wharf. Mr. Hill was a partner there at that time. She was taken from their machine shop. As Paymaster of the force, I paid the expenses of those steamers. The money for the boats at Soonkong was paid by the Paymaster there. I sent the money to him. The boats at Shanghai were paid by me. I only paid the portage bills. I do not know who paid the hire of the steamers. The steamers that were chartered I know Taikee paid, because I chartered them for him myself. I did not charter all the steamers. There were some chartered by other people. I chartered four before I went to Hongkong.

The TAOTAI asked if the witness could remember the four he chartered?

Witness—The *Nanzing*, *Lotus*, *Shum-li*, and *Annette*. The charters were drawn up for me in Trautmann's office. I took them to Taikee, and he approved them.

Cross-examination resumed—Taikee did not sign them. I think the only sealing was the chop that Li used to put on them. I did not see him attach any seal to them; but I think that was the way it was done. I seldom saw the Tautai when I went to his Yamên, but sometimes I received a despatch back in answer to the one I took. I never got any orders from the Taotai. I believe all the orders for the Force came from General Ward. I do not believe he received any orders form Woo or anyone else. I do not know whether Taikee gave orders to General Ward what was to be done. I never heard any dispute as to the hire of the steamer *Keor-jeor*. There was no dispute while I was in the Force; and the first I heard of one was after the first arbitration in 1863 for settling the claims of the Soonkong Force. I do not know who were the first arbitrators. I never was present at any of the meetings. I know nothing of the second arbitration. I know there was a first and second arbitration, nothing more. I had a claim, which was against the Soonkong Force. It went in with the first arbitration. It is not settled yet. I heard of no disputes in connection with the steamers. So far as I know, there has been no trouble with any of the other boats. The money for the *Hyson* came from Taikee's hong. That was the only vessel I saw cash paid for. The *Keor-jeor* was only used for the Soonkong Force, while I was in it, as a gunboat and despatch-boat. She was not used privately by Taikee that I know of. I did not see the *Keor-jeor* at Shanghai, after she was blown up. I believe she was blown up and sunk during an engagement between the Imperialists and rebels, in the summer of 1864, but I am not sure as to the date. She was then in the hands of the rebels. I never heard any reason given why the payment on account of the *Keor-jeor* was disputed, nor that Mr. Hill ever attempted to seize the steamer. I do not know that Taikee was the agent for the suppression of the rebellion. We looked upon him as one of the head men, and went to him for money. I supposed that Woo was of higher rank than Taikee; I did not know that Taikee was an official. I knew nothing as to his official capacity whatever. I simply went to him for money and stores.

Captain JOSEPH ROUSE, deposed—I was employed on the *Confucius*, and was engaged with the Soonkong Force from early spring 1863 to 1864. I remember the *Keor-jeor* being employed for the Force. It was said by general report that she belonged to Mr. Hill. I think she ceased to belong to the Force through being captured by the rebels in 1863. I think we were sent to try to recapture her. I did not see her recaptured. I was told she was taken by the United States Marshal. I know nothing about the chartering of the *Keor-jeor*.

The TAOTAI asked if the witness knew where she was captured?

Witness replied—At the East or water gate of Soonkong.

The TAOTAI—And that you know by others telling you?

Witness—Yes.

Examination resumed—From the capacity and work required of the *Keor-jeor*, I think she was a very economical boat.

The TAOTAI asked who was captain of the *Keor-jeor* when she was captured?

Witness—She was then in the hands of Dr. Macartney She had had two or three captains at different times.

The TAOTAI—Was Macartney captured in her?

Witness—No; I believe he was up in the city at the time.

Cross-examined by Mr. COWIE—I was master of the *Confucius*. She was employed to protect the junks in the silk trade along the coast. She belonged to a guild—a Chinese Chamber of Commerce. When we were employed with the Soonkong Force there was always a Mandarin on board from whom we received our orders, and I always knew when we were employed for the force, because we received orders and coals &c., through the Mandarin. I never knew Taikee in connection with the Force. I knew the *Keor-jeor* was at that time employed as a despatch-boat, running to Soonkong. I do not know of her being employed except in connection with the Government Forces. I never knew anything of this claim until within the last four months. I received my wages from the Mandarin on board. The money came, I believe, from the Shanghai junk guild. I do not think it came from Tai-kee. I was formerly, 1863, in the Harbour-master's office, but left voluntarily.

Re-examined by Mr. EAMES.—Our ship, the *Confucius*, was sometimes sent up to Tientsin;

but I never knew the *Keorjeor* employed with any other than the Soonkong Force. I think I can swear to that as a fact.

Colonel Edward Forester deposed—I am an American citizen, and was engaged in Ward's Force from early 1861 to early in 1863. I was second in command, next to General Ward. I always had general control when Ward was absent. He was seldom in Soonkong, which was my head-quarters. The Force originated with Taikee, as the moneyed man, and Ward did the work. I looked to Taikee for my authority. He was known as the originator, the getter-up of the Force, and we looked to no one but him. Eventually Woo had something to do with it. The first time he appeared upon the scene was when Burgevine and Taikee had trouble. I never knew Woo in connection with the Force before that time. It was in February, 1863. Taikee had nothing to do with the immediate command in the field, but he used to give directions where we should go. I am speaking of this Province, and only before the time of the dispute with Burgevine. After this time, things changed, and Li Futai took command of the entire Force. Before this, the Chinese officials, by my request, interfered with the Force, but not without my request. I remember the *Keorjeor*. Mr. Hill asked me to use my influence with Taikee and Ward to get her chartered. She was not then completed, but was in the water. That was about April 1862. General Ward thought she would be a first-rate boat for the service, and went with me to Taikee, and she was chartered. I never knew whether there was a written charter or not. She was employed, and remained in the service until March, 1863, but I cannot say how long after. She was not to my knowledge in any other service than with the Soonkong Force. She was under the control of Taikee, General Ward, and myself. There were two or three reasons why she should be employed. At that time we were entirely cut off by the rebels from Soonkong by land. The other boats were side-wheel boats and expensive, and I recommended the *Keorjeor* because she was low and narrow and we could get her at any time under the bridges and into the city of Soonkong, where no other boats could go. Her consumption of coal was I do not think so much as the least steamer we had before. I know nothing of her loss. I can be positive that the amount of her charter was to be Tls. 3,000, or $3,000, per month. The term taels was more frequently used in those days, and that gives me the impression that it was taels. I saw the *Keorjeor* the last time between the 6th and 10th of March, 1863, when I left for home.

Cross-examined by Mr. Drummond—I know nothing of the chartering of the other steamers, except by reputation. I heard General Ward speak of their expenses, but I know nothing about them. I never saw the charter parties of any of the other steamers. I do not know if there was one for the *Keorjeor*. I have every reason to believe there was. Ward had nothing more to do with the Chinese Government than I had. It was Taikee,—not Taikee and Ward. I do not know who employed Taikee except the Government. I think he got something for every place recaptured from the rebels. When the original owners went back upon their land, they paid 33⅓ per cent, which Taikee received, and out of it paid the Force. I have every reason to believe it to be so, as it was so translated to me by Taikee, some Mandarins, and smaller officers. I cannot say who employed Taikee. Li Hung-chang was Futai at the time, and Woo was Tautai. I cannot say if Taikee got his authority from the Provincial Government or from Peking. I knew afterwards that Li Hung Chang was the man, but whether he acted by authority from Peking I do not know. Taikee told me he had the authority of the Government to raise the Force. The Soonkong Foo, a very high officer, never took any interest in the Force, and we never had a bag of rice from him. After the dispute with Burgevine, Li Futai came forward and took the command of the entire Force. After this time I had communication with Li Futai and Woo Taotai. They offered me the entire command of the Force, after Burgevine's dismissal. There was mutiny under Holland's command, and Li Futai offered me $1000 to go and quell it. I went, and the mutiny was quelled. When I last saw the *Keorjeor*, she was under Holland's command, that is, in connection with what was still known as Ward's Force. I never heard that Hill tried to seize the steamer, and know nothing more of her, as I went home in 1863.

Re-examined by Mr. Eames—The mutiny at Soonkong arose in consequence of Li Adong being put in command with Holland.

Mr. Eames here submitted several affidavits of other witnesses, who were absent.

Mr. Cowie said he had only received press copies, which were very indistinct. He thought clean copies should have been supplied.

Mr. Drummond objected to the admission of those documents in such a case as this; and thought it was only proper that all the witnesses should be heard in Court.

The Taotai, on the request being interpreted to him, declined to receive any documentary evidence. The witnesses must be present in Court.

There being no other witnesses present to-day,

The Consul-General, at the request of Mr. Cowie, made the following statement:—When General Ward died, Burgevine succeeded to the command, at the recommendation of Admiral Hope. He was not at all successful in making things go smoothly at Soonkong. At the latter part of 1862 or beginning of 1863, I heard that Taikee had refused to give any more money. I heard also that Burgevine came to Taikee's house, and that there was an altercation. Burgevine then returned to Soonkong, and received orders to turn over the command to some one else. He refused to do so, and said he should hold the steamers there at the time. Among them was the *Confucius*. I advised him to reconsider his decision, and he appeared soon afterwards at Shanghai, on board the *Confucius*. He represented to me that there were large amounts due on account of the Forces. Woo then asked that I would remove Burgevine from the steamer, and return her to the guild. I asked Woo what agreement could be made to pay the claims, and it was arranged that a commission should be appointed, to which they should be referred, he to appoint one commissioner and I the other. When that paper was drawn up and signed, I requested Burgevine to leave the steamer. The Taotai named on his own part, Mr. Jenkins, and I named Mr. Rodgers, managing partner of Wetmore, Cryder & Co. An advertisement was inserted in the papers asking all parties to send in their claims to the commission. After about two months, the commission reported to me. I reported to the Taotai the result, and asked him to make payment of the sums awarded. The Taotai said that many of the claims were not good ones, that he would pay some of them, but declined to pay in full. He entered into details, and I found that some of his objections were well founded. I found that the cause lay not with the commissioners, but in consequence of a failure on the part of the Taotai and Taikee to enter full statements. I then thought it right to enter into an examination of these claims myself. This examination occupied several months. We arrived at a result, which shewed that some of the claims which the Taotai had objected to were good, and he then agreed to admit them. I asked him to pay the sums he admitted, but he still refused, because Benson, who acted as Paymaster under Burgevine, had not sent in full statements. I then proposed that a second arbitration should be called, to examine the claims more fully and his charges against Benson. He agreed to this, and documents were fully drawn up in Chinese and English. The second Arbitrators were Messrs. Cunningham and Hanbury. I had myself rejected some of the claims which appeared bad. None of the claimants appeared before the Arbitrators. Most of them were my own countrymen, and they appeared content to leave their matters to me. The Arbitrators brought in their decision in February, 1864, but whether this claim of Mr. Hill's was urged before Messrs. Hanbury and Cunningham, I do not remember. I remember that Mr. Hill had made some sort of sale of this steamer to Taikee, and that he was dealing with Taikee himself; and I remember very distinctly thinking that if any of these claimants can manage their own business, so much the better. My impression therefore is that Mr. Hill's claim was not submitted, but that those of some foreign officers on board the *Keor-jeor* were. The Arbitrators admitted very many claims which the Taotai had rejected. They decided that Benson had done nothing wrong. I called upon the Taotai to make payment upon the award. In response he sent me a cheque to cover the claims he had never disputed. The others, which he had disputed, but which were admitted by the Arbitrators, he refused to pay. The sums entrusted to my hands were duly distributed; the others remain unpaid to this day.

Mr. Drummond asked that copies of the two awards of Arbitrators might be produced, as he thought it could be shown that Mr. Hill's claim was preferred before Messrs. Cunningham and Hanbury.

The Consul-General was understood to say there could be no objection to the production of those documents,

Mr. Eames again asked that the several affidavits he had before alluded to might be put in as evidence.

The Taotai, on this being interpreted to him, refused to permit the adoption of the suggestion, saying that much had been said by the witnesses who had already been examined, and he would not accept the statements of other persons who were not in Court.

Mr. Eames, in reply to a question, said there were several other witnesses to be examined, and he might include among them Dr. Yates, who probably would not refuse to make a statement.

Dr. Yates said he would not object to state matters, so far as he knew them.

The Consul-General remarked on the inadvisability of either Dr. Yates or himself, looking to the position they held in the Court, being called upon to make any statement at all. He (the Consul-General) had been alluded to in such a way, however, in regard to the transactions connected with the arbitrations, that he had considered it better to make the statement he had made, when asked to do so.

Some further conversation ensued as to the production of documents and witnesses, and the case was again adjourned.

Foo, one of the late Taikee's representatives, and said to be a defendant in the case, made personal application for a prolonged adjournment, on the ground that his mother, aged 73, had just died at Ningpo, and he must pay honour to her memory.

A consultation ensued upon this request, and ultimately.

The Taotai declined to allow a further adjournment, and Foo consented to remain in Shanghai.

The Court then rose.

18th Jan.

The hearing was resumed to-day. Mr. I. B. Eames appeared for the plaintiff, and Mr. Drummond and Mr. Cowie for the defendants.

The several papers asked for by Mr. Drummond, at the former hearing, on behalf of the defendants, were produced.

William E. Sherman was first called, and deposed—I am an engineer and machinist, and am an American citizen. I arrived in Shanghai about the middle of April, 1863. I got employment the day afterwards, at Thomas Hunt & Co.'s machine shop. I remained there until sometime in September or October following. I was engaged in setting up sundry small steamers. One was a steamboat for Fletcher & Co., the *Yuen-fah*. I think the *Haining* had been finished shortly before that. Two other small steamers were set-up in the same yard at a later date. I remember the *Keorjeor*, and saw her soon after I arrived here. There were no others of the same class then running here. I went up to Tunka-doo with Captain Jones to arrest her. I think that was about June, 1863. I had no communication with Mr. Hill about it. I only heard from Captain Jones that there was some trouble about money matters, between Mr. Hill and the Chinese. He asked me to go and get the steamer, and bring her down before Hunt & Co.'s—what is now the Hongkong and Shanghai Bank. We did so, but I think she went away again sometime next day. I do not remember that Captain Jones told me under whose instructions he acted. I inferred that he received instructions from Mr. Hill. The other small steamers were about the same size as the *Keorjeor*—a little larger, with a greater draught of water. I do not think those other steamers could have gone up to Soonkong.

By the Tautai—I was on board the *Keorjeor* at the time I speak of.

The witness was not cross-examined.

Mr. EDWARD CUNNINGHAM deposed—I remember having been one of the arbitrators on this matter of the claim of Mr. Hill. I should state that after ten years' interval since the arbitration my memory was indistinct, until I had refreshed it by reference to documents in the possession of the U. S. Consulate-General. The claim was presented to us, and it was disallowed because there was no evidence of a properly executed charter-party to the Chinese Government. No charter-party was produced. If a charter-party executed by Taikee had been produced, I do not think it would have been sufficient for us to have allowed the claim upon, against the Government. I should add that Taikee acted sometimes for the Chinese Government. Mr. Hill did not appear before us. We did not notify him to appear. I sold the *Hyson* to the Chinese Government. I should say she was larger than the *Keorjeor* and more than twice as valuable. We sold her for Tls. 30,000. That was in 1862. The *Hyson* could have gone up to the water gate of Soonkong, but not through it.

CHEN said there was a very small steamer also called the *Hyson*, bought for Tls. 1500.

Witness resumed—The *Hyson* was a side-wheel steamer. I remember the *Keorjeor*. Steamers of this description were very valuable at that time, and very large prices could be got for them. I should say that Tls. 3,000 per month was not exorbitant for such a steamer at that time.

By Mr. DRUMMOND—I acted as arbitrator on behalf of American citizens, through Mr. Seward. Mr. Hanbury acted for Woo Taotai, on behalf of the Chinese Government. As usual in arbitrations we acted jointly and equally for both sides. There was no difference between us. The claims were placed before us by Mr. Seward. No claims were put before us by anyone else or through any other channel. The evidence placed before us was chiefly documentary,—evidence taken before the other arbitrators. That is as near as I recollect. The claims were solely between foreigners and the Chinese Government. No claims were made against any Chinese official personally. They were against Woo Tautai, as representing the Chinese Government,—at least I presume so.

The CONSUL-GENERAL recalled to the witness's recollection a claim in connection with General Ward's private estate, which was personal to Woo Taotai, and which was included in those submitted to the arbitrators and upon which the arbitrators made a separate award.

Witness resumed—I had forgotten that matter, until Mr. Seward reminded me. I think we called for further evidence both for and against the claims, before making our award. We endeavoured to satisfy ourselves in every possible way that a claim was improper, before disallowing it. A copy of the first award was placed before us, together with the other papers. We noticed that the claim of Tls. 12,000 was awarded by the former arbitrators. I do not think there was any reference in that award to the charter-party, or to evidence supporting it. We went entirely upon the documents, and paid very little attention to the first arbitration. We did not think it was carefully done. We had a strong impression it was not satisfactory, and thought it easier to go through it again. I do not recollect asking for a charter-party. Whenever we were in doubt about a claim, we asked for other documents. I have no doubt we did ask for special information as to this claim, it being a very large one, and having been allowed once. I remember nothing about documents having been lost in connection with this claim. I do not recollect whether we considered it a claim upon the private estates of Woo Taotai or Taikee. I presume so. We thought those claims we allowed were supported by sufficient documentary evidence. They were all claims in connection with the suppression of the rebellion; and all such claims were regarded solely as properly to be made against the Chinese Government. I supposed the claims in general had no reference to private individuals, with the exception of the one against Gen. Ward's estate. If we had had a charter-party presented with the seal of Woo Taotai affixed, I think we should have considered that sufficient to have bound the Government. Taikee was undoubtedly acting as a sort of broker on behalf of the Chinese Government, but he had no official position that we knew of.

Re-examined by Mr. EAMES—We made no special enquiry as to this claim of Mr. Hill himself.

The TAOTAI asked if the witness remembered to have cast out several other claims, one of Tls. 895.78 for Hunt & Co?

Witness said he could not remember without referring to the award, and the document was handed to him. He then answered in the affirmative; and in reply to other questions from the Taotai, mentioned other and smaller accounts which had been rejected. Mr. Hill's claim of Tls. 12,000 was thrown out, as against Woo Taotai for the Chinese Government.

J. I. MILLER deposed—I am a British subject, and was in Shanghai in 1862 and 1863. I was in the house of Jarvie Thorburn & Co.; I was in the silk-room. There was considerable difficulty in those days in getting silk down from the country. I cannot say at this period of time that I remember the names of steamers so employed. A small steamer that could have gone though the water-gate of Soonkong would have been very useful. The usual price for conveying silk down was then Tls. 10 a bale, either by steamer or foreign house-boat. I do not think Tls. 3,000 per month was an exorbitant price to charter a steamer for at that period. She might have earned four or five times as much by chartering her to Chinamen.

A. C. WESTALL, a British subject, was the next witness, and gave exactly corroborative evidence.

PETER JACOB ROHDE, a German subject, deposed—I was in the Soonkong Force, the "Ever-Victorious Army." I joined it in March, 1862, and remained till it was dissolved in May, 1864. I held the rank of colonel. I remember the *Keorjeor*. She was in the service of the Force from May or June, 1862, till she was taken the next year by Burgevine. She was a screw-boat, about 70 feet long, and drew from 2½ to 3 feet of water. She was the only boat we had that could go up to Soonkong. A steamer at that time with a gun, as the *Keorjeor* had, had a considerable effect upon the rebels. There was no free communication by land between Shanghai and Soonkong. She was an economical boat, consuming about a ton of coal in 24 hours. The other steamers were much more expensive. I had no knowledge of or communication with Taikee.

By Mr. COWIE—I know nothing about the chartering of the *Keorjeor*.

GUSTAV T. BAFFY deposed—I am a Prussian. I was in the Soonkong Force late in December, 1862, and remained till it was disvolved in 1864. I was a Captain in the first regiment. The *Keorjeor* was employed to run dispatches between Shanghai and Soonkong. She was taken by the rebels in 1863. She is now running for the Chinese between Nankin and Nganking, on the Yangtsze river, and to Soochow. I was told that by a Chinese, and do not know it of my own knowledge.

The TAOTAI asked if the witness could give the name of the Chinaman who told him?

Witness said he could not, but would enquire.

The TAOTAI asked if the Chinaman lived in Shanghai?

Witness said no, he was engaged on board one of the Yangtsze river steamers.

The TAOTAI asked what business witness pursued now?

Witness said he was steward of the German Club Concordia.

The TAOTAI asked if the Chinaman alluded to was engaged on board one of Russell's steamers?

Witness replied in the affirmative, but did not know which one.

The TAOTAI asked, when the Chinaman was found, that he might be sent to the U. S. Consulate-General.

JONAS HOWGATE, a British subject, deposed—In the latter end of 1862, I was engaged in the Shanghai Arsenal of that time, teaching the Chinese to make shot and shell. It was afterwards removed to Soonkong, and I was there in the same capacity, remaining in it for two years. The *Keorjeor* came up to Soonkong, and to the best of my recollection Dr. Macartney and Dr. Jamieson were on board. Some men boarded her and took her away. Dr. Macartney and Dr. Jamieson came into the city about four o'clock, and said the steamer had been taken from under their feet. When Soochow was given up to Li Hung Chang, the Arsenal was removed to Soochow, and I saw the *Keorjeor* there. It was close to Li's Yamên. Her bows had been blown out, and she was brought there by the Mandarin who raised her. A man named Reed, living in Shanghai, was to receive $500 for repairing her. He built a coffer-dam around her, and so got her in position to be repaired.

The TAOTAI asked if Reed was here now?

Witness replied that he did not know. All he knew was that the boat was raised, that houses were built upon her, and that she had steam up. The man who offered the $500 was a Chinese Mandarin, who had a small Arsenal next to the other, and made mortars, &c. He was a Government official.

Examination resumed—The *Keorjeor* was used by the Chinese authorities in connection with the Soonkong Force. She was peculiarly adapted for going up small creeks in shallow water.

By Mr. COWIE—I am of opinion that when I was going to Hankow in the *Shanghai*, I saw a steamer very like the *Keorjeor*. I cannot swear that, but I could soon prove it by the plates that were put in her at Soochow. I cannot say anything as to the chartering of the steamer.

ALFRED SILVERTHORNE deposed—I am a British subject, and was connected with Ward's Force from May, 1862, till the latter end of 1873. I was Major in command of the 3rd Regiment. The *Keorjeor* was in use when I joined the Force. She was handy for going up the Soonkong Creek. We had no other steamer that could do it. I remember nothing more about the *Keorjeor*.

The CONSUL-GENERAL asked if that closed the plaintiff's case?

Mr. EAMES said he was now in the hands of the Court to a certain extent, and must ask for a little latitude in the case. He proposed to take the evidence of the next witness, which would be very brief, and so close his case so far. If the counsel for the other side, however, should set up some startling or novel defence, which he thought was very likely from what had been already said, he should ask for permission to put in more evidence.

Mr. DRUMMOND said permission to do so could be asked when occasion arose.

The witness alluded to was then called.

J. F. MACLAUGHLIN deposed—I am an American citizen, and was engineer of the steamer *Confucius* during the rebellion, when Burgevine was in command. I remember the *Keorjeor* as engaged with that Force. I do not remember when she ceased to be so employed. I do not think there was then any other boat that could go up the Soonkong creek. I was sent up to try to recapture her, after the rebels had taken her.

By the TAOTAI—Captain Rouse was then in command of the *Confucius*, and of course he gave me the order to go.

Examination resumed—I believe the *Keorjeor* was a very economical boat.

Mr. EAMES said that was his case, with the reservation he had previously mentioned.

Mr. DRUMMOND applied for an adjournment for some days, as there were papers to look through.

The TAOTAI asked how many witnesses there were on the defendant's side?

Mr. DRUMMOND said there were about six, including both Chinese and foreign testimony.

The Court granted the application, and immediately afterwards rose.

Miscellaneous.

INDIAN NOTES.

We cull from the Indian papers received by the *Sarpedon* (in advance of the mail), a number of items which will probably interest our readers.

Regarding the progress of Tea cultivation, the following information is given:—

The cultivation of tea continues to prosper in the Chittagong district, the outturn last year being very favourable. The outturn of tea in the Darjiling District has risen from 21,000 maunds in 1870 to 45,000 maunds this season. Indian tea to the extent of 29,4101lbs. was exported to Australia in October last; and the total exports in November were

2,040,771lbs. Since the beginning of the year they have amounted to 16,556,842lbs.

The *Englishman* has the following with reference to the Burmo-Chinese Expedition :—

The Burmo-Chinese Expedition, which is now on its way to Yunan, will probably be absent from six to eight months. It is commanded by Colonel Horace Brown, one of the most distinguished officers of the Burmah Commission. The party is accredited to the Viceroy of Yunan by passports from Peking, and is accompanied by two attachés from the British Embassy there. Mr. Ney Elias, who received a gold medal from the Royal Geographical Society for boldly penetrating alone and unarmed into Mongolia, is a member of the Expedition, and Dr. John Anderson goes as Scientific Officer with a small staff of Eurasian and native collectors. Dr. Anderson is already well known as a traveller, having accompanied the former Expedition to Bhamo and Yunan, and written a valuable work describing the country through which he passed. The expedition starts from Bahmo, and proceeds along the route followed by the Expedition of 1867-68 to Teng-ye-Chew (Momien), whence it is intended to go to Yunan City and to Talifu. From there the Expedition is to proceed to the river Yang-tsze-Kiang, by sailing down which Shanghai may be reached. The members of the Expedition, should they attain their object, will be the first Europeans who have ever crossed China from the West. Two Arab horses, with a handsome saddle and trappings, have been sent with the Expedition as presents for one of the native chiefs.

The following is a useful effort to remedy very prevalent misapprehensions as to the populations respectively of India and China. :—

The authorities of the India Office have ascertained, from a careful examination of the whole of the results of the late Indian Census, that the population of India is not less than 283,000,000. But they are of opinion that if it were possible to obtain a perfectly accurate census of the inhabitants of the whole of the Protected States, of the hill and forest tribes, and of the tribes of the eastern frontier and the Sub-Himalayas, the total population of our Indian Empire would actually amount to not less than 300,000,000. It will be remembered that, a few years ago, the "one hundred and eighty millions of our Indian subjects" used to be spoken of, and latterly this has given place to the more liberal estimate of "two hundred millions". And now, it appears that we must talk of two hundred and eighty millions at least, when we speak of the population af India, if we wish to be even approximately accurate. But this is not all. A few years ago it used to be stated that the population of China amounted to 500,000,000. At the present time it is generally reckoned at 400,000,000. But there has been no census of China, as there has been of the greater part of India. Indeed there are many reasons for the growing opinions of some that, after all, the population of China may be found not to amount to more than 300,000,000.

Medical men in China, who have tried in vain to find a cure for leprosy, will be interested in knowing that "Dr. Dougall has cured 16 out of 37 lepers at Port Blair with gurgan oil." A Native Assistant Surgeon has also discoverd that liquor lyttœ gives instantaneous relief in cases of scorpion bites.

There has been some talk of the possibility of starting a cotton-spinning factory in Shanghai, and we have even heard that a gentleman who was engaged in erecting mills at Calcutta has paid these Settlements a visit with the view of introducing that industry. The speculation seems to be taking in India, for we notice that "another spinning mill, called the Dunbar Cotton Mills Company, Limited, with a capital of Rs. 1,000,000, is to be started near Calcutta."

From a memorial in the *Peking Gazette*, it would appear that the King of Burmah, after an interruption of two centuries, has again expressed his readiness to acknowledge China's supremacy in the south-west, by sending tribute to Peking. In view of this circumstance, it is curious to notice that he is also said to have sent two officers to Russia to ask for Russian officers to drill his troops. And another paragraph states that two tame white elephants—a very pretty pair—have been sent down to Rangoon by the King of Burmah, to be forwarded by steamer to Europe as a present to the King of Italy. His Majesty, says the writer, seems to be wooing by turns all the sovereigns of Europe.

India is likely to be honoured with a visit from His Majesty the King of Portugal, who wishes to see Portuguese India and Macao. At the same time a tour is contemplated through the important parts of British India. During His Majesty's absence, the Regency of the Kingdom will, it is expected, devolve on his August Consort. The Duc de Saldanha, among others, is spoken of as likely to form one of His Majesty's Staff, and it is just possible that the Honorable Sir Charles A. Murray, the British Ambassador at the Court of Portugal, may, with the consent of Her Britannic Majesty's Government, also accompany His Majesty.

We already know by telegraph the result of the investigation into the identity of the alleged Nana Sahib, and though the papers do not yet give that result, they seem without exception to have anticipated the discharge of the prisoner.—A correspondent of the *Bombay Gazette* at Alláhábád gives a new version of the capture of the supposed Náná. He says :—

"When the Maharaja Scindia first intimated to Colonel Osborne, the Political Agent, that he was in possession of the Nana's person, before delivering him up, the former attempted to make some stipulation about guaranteeing the prisoner his life. Hot words passed between the Agent and Scindia. The former peremptorily demanded an absolutely unconditional surrender. The upshot was that Colonel Osborne threatened Scindia that, if his prisoner was not delivered up within three hours, he would order out the British troops, and march them on his (Scindia's) luskur. The Agent then left the palace, and drove to the Residency. After a couple of hours Scindia sent a message to the Colonel, saying he was ready to surrender his prisoner, and made over he was accordingly—not the Nana himself, it is said, but some one who had, in the meanwhile, been substituted for him. It is the prevailing opinion amongst well-informed circles here, that Scindia was, or is, in possession of the real man, and that he has flouted our Government with a lay figure—though a live one withal."

Clippings.

A communication has been forwarded to us which may prove interesting to our nautical friends. Last Friday night, the 8th inst., was clear but dark, and the Amherst Rock was distinctly seen from the deck of a pilot boat at a distance of 9½ miles, Shaweishan light being also visible at 24½ miles. The bearing of the North Saddle was S.E. by E. ¼ E., and the Amherst Rocks N.N.E. ¼ E. Again, with Gutzlaff bearing south, and the Lightship N.W. by W., the North Saddle Light was plainly in sight though at a distance of 29½ miles. The night in question was one of so dark and yet clear a description as is seldom experienced in these latitudes.

There is something almost touching in an announcement like that recording the last victory of the well known racing pony *Grasshopper*, which dropped dead after passing the post as winner of the Welter Stakes, at the Foochow Meeting, the other day. *Grasshopper* began his career on the turf at the Shanghai Spring Meeting of 1873, when he ran second for the Griffins Plate and the Brokers' Cup, and on the third day of the Meeting won no less than three races, including the "Champions." He was sent South soon afterwards, and ran with some success at Hongkong, as well as at a former Meeting in Foochow.

The following Masonic appointments have recently been made. At the meeting of the Royal Sussex Lodge (No. 501) on 28th Dec.—H. D. Camajee, W.M.; G. C. Stent, P.M.; J. Brown, S.W.; R. Pestonjee, treasurer; U. Harris, secretary; J. Passmore, S.D.; C. Minck, J.D.; T. Ford, I.G.; T. Hore, tyler. At the meeting of the Tuscan Lodge (No. 1024) on 4th inst.:—J. J. Miller, W.M.; T. W. Eckfeldt, P.M.; L. Moore, S.W.; J. F. Goodfellow, J.W.; H. J. C. Barlow, treasurer; J. C. Hughes, secretary; B. Palamountain, S.D.; W. Hopkins, J.D.; T. Hore, tyler. The officers of the Northern Lodge of China for 1875 are:—E. Tobin, W.M.; W. A. Turnbull, P.M.; H. Watson, S.W.; R. Fergusson, J.W.; M. Hawtrey, treasurer; C. V. Housman, secretary; H. S. B. Usill, S.D.; A. Bean, J.W.; W. Brand, I.G.; T. Hore, tyler.

Under the head of Missionary Wall Papers for China, a contemporary says :—Some curious specimens of the new system of photo-lithography as applied to Chinese have recently been brought to our notice. They consist of a series of "Wall Papers," intended for gratuitous circulation in China, each of which contains in the centre a large engraving of a Bible subject, taken from the *British Workman*, and on either side a description in Chinese, rendered in the words of the Bible. These Chinese characters were penned by a Chinese scholar, and by means of photography were transferred by Messrs. Partridge and Co. to stone. They have, therefore, all the appearance of written characters—a circumstance which will, we doubt not, attract the attention of the Chinese, who have the taste to prefer the rounded and easy strokes made by a native brush to the hard and angular lines stamped by the metal type usually employed by foreigners in printing Chinese.—*Athenæum.*

COMMERCIAL INTELLIGENCE.

SHANGHAI, JANUARY 20TH, 1875.

Arrivals.—*Fleurs Castle* from London, and *Sarpedon* from Liverpool.

Telegram—London, 16th January.—*Cotton Mid. Orleans*, 7⅞d. strong; 8¼-lbs. *Eagle Grey Shirtings*, 9s. 9d.; *Iron*, £10; *Lead*, W.B., £24 15s.; *Disconnt.* 4 per cent.

Piece Goods.—The business in Piece Goods since 13th instant has possessed but little to commend it to the favorable attention of importers. A few heavy operations in 7 and 8¼-lbs. *Grey Shirtings* have taken place, but the rates paid, viz., Tls. 1.35 *a* 1.36 per piece for common qualities of the former, and Tls. 1.62 *a* 1.64 for fair ordinary, and Tls. 1.78 *a* 1.80 per piece for Collie's *Eagle* 8¼-lbs., show some decline on former currencies, justifiable perhaps in the face of the heavy December export from home (which has been confirmed as 28,000,000 Yards of Plain Cottons to Shanghai) and the fact, that for years past prices have been higher before than after China New Year; although—and with reference more particularly to the latter ground—one might have fancied that there was not room for much decline on late quotations. A portion of the Settlements are destined for Japan, and some will be distributed locally, but the bulk of them are on speculation, and will probably remain in godown until the Northern season opens. 6-lbs.—Small sales of this weight at Tls. 1.30 *a* 1.32 per piece continue, but in heavy makes scarcely anything has transpired.—Sales, about 75,000 pieces 8¼-lbs; 7-lbs. 23,000 *a* 25,000 pieces, 10-lbs. 500 pieces, and 6-lbs. 17,000 pieces.

White Shirtings.—Excepting an enquiry and a few small transactions in fine cloths, at from Tls. 2.60 *a* 3.00. There is little or no movement to record in hard cargo 64 Reeds, but floating supplies have been placed to some extent at former rates, viz., Tls. 2.05 for good chop, and Tls. 2.20 for Dewhursts' best.

T-Cloths.—The lower counts of 6 *a* 7-lbs. have been wanted, but stocks of both are light, and sales consequently limited. The ruling rates have been Tls. 1.06 *a* 1.10, and Tls. 1.18 *a* 1.19 per piece, respectively. The tone of the market for the inferior *Mexican* descriptions is not so strong as it was, and importers could not now sell at the quotations of a fortnight ago, but good medium qualities have been disposed of to the extent of about 16,000 pieces at Tls. 1.38 *a* 1.42 per piece. Special chops of 8-lbs. find their customary retail market, but otherwise there has been little done in that weight.

Drills.—On or about Saturday last, an enquiry for *Dragon* chop 15-lbs,—common quality—price under Tls. 2.35 per piece, came from Yokohama, but thus far buyers have succeeded in satisfying it in part only. There is not the cargo here, and holders do not care to accept current offers. This turned the demand on to other chops, but the success has not yet been divulged. Good *Dutch Drills* have also been asked for, but buyers expect to get them at about Tls. 2.25 *a* 2.27 per piece, at which there is no sellers. *American Drills* ex *Golden State*, are held for Tls. 3.35 *a* 3.50 per piece, which will probably be the opening prices this season.

Jeans.—Rather heavy sales of *English* cloth were effected whilst last mail was under despatch. Since then the business comprises only 5,000 pieces at Tls. 1.85 *a* 1.88 per piece, and the market closes quietly. Tls. 2.75 has been offered for *American Jeans*—Beaver—ex *Golden State*.

Sheetings.—For the *American* cloth in stock buyers are gradually raising their offers, but they have to go higher yet before they can get supplied. Tls. 3.75 per piece is the figure last tendered. Of the *English* fabric no sales have been disclosed.

Fancy Cottons.—A few *Turkey Red Shirtings*, *Velvets*, and *Printed Twills* have changed hands, but otherwise there is little to report. The sales comprise: *Turkey Reds* 700 pieces finest at Tls. 2.70, and 800 pieces fair 2½-lbs. at Tls. 1.80 per piece. 500 pieces *Velvets* at Tls. 0.16 *a* 0.19 per yard, and 280 pieces *Printed Twills* at Tls. 2.00 per piece.

Woollens.—The scarlet *Long Ells* C.P.H. sold ten days ago at Tls. 7.25 are not yet worked off, and so the dealers have done nothing further in the article during the past week. The last Hongkong advices report lower rates there. *Camlets.*—On this market there has not been much done in *English* Camlets—beyond the sales by auction on 14th instant—but 400 *a* 500 pieces of best *Dutch* have been taken at Tls. 18½ *a* 19 per piece.—In Hongkong, C.P.H. assorted have been sold at prices comparing very favorably with those current here. *Medium Cloth.*—A small business continues to be done, but the enquiry is neither lively nor strong. *Spanish Stripes.*—A quiet market, and unchanged rates, but weak. *Lustres* and *Lastings.*—Nothing to report. At auction yesterday some very badly damaged *Figured Orleans* sold well.

Overland letters from Tientsin to 4th instant have been received, but commercially they do not contain anything of interest, and from Hankow the only business reported are a few pieces of heavy *Grey Shirtings*, and 64 Reed *White Shirtings*, Dewhurst's *Taiping Eagles*, at Tls. 2.60 and Tls. 2.20 per piece, delivery after China New Year, 6th proximo.

METALS.—*Nail Rod Iron.*—Sales consist of 9,000 bundles "M.M." quality at Tls. 2.80 per picul and 2,000 bundles "Dawes best" at Tls. 3.10 per picul less 1 per cent brokerage—delivery after China New Year. The latter sale is at an exceptionally good rate, on account of the assortment of sizes being very suitable. *Lead.*—Buyers have not yet ventured out of the old groove. They still buy only to supply pressing wants. Yet the market is firm upon them, and they have to pay for L.B. Tls. 6.15 *a* 6.20 per picul nett for what they require. Higher rates in Hongkong have strengthened holders here. *Copper.*—Very little going on, but a small sale of *Sheet Copper,*— old Japan,—at Tls. 19.60 per picul, shews an improvement on former prices for this description. *Tin.*—A slight reaction has set in and present quotations show an advance of 1 *a* 2 mace per picul. The business done is small, but holders seem very firm and look for better things after China New-year.

COTTON—We have no change to mention to-day. Purchases of best staple have been made for the Upper Yangtsze districts, and the hongs have supplied the demand willingly at last quotations.—Business for the Southern ports also continue on former terms, and small parcels have been pressed for the English or Continental markets.

EXCHANGE.—There is no alteration to report in Sterling quotations. Banks still quote 5s. 8¾d. *a* 5s. 8⅞d. for drawing, and all are buyers of Private Paper at 5s. 9⅛d. *a* 5s. 9⅜d. for Credits and documents, respectively. On India, the rate closes at 302 *a* 302½ post. On Hongkong, the demand for Bank paper is limited; the rate may be quoted 26⅝. Francs have been placed to a small extent at 7.31¼.

SILK.—Home *public* telegrams continue to report a firm market in London with limited business. The P. & O. str. *Golconda* with the mail of 14th January, had 632 bales silk on board, (375 bales for England, 202 for the Continent, and 55 bales for India and the Coast), the Pacific mail of the 13th inst. took 177 bales to America, and the P. M. S. steamer leaving this morning has about 310 bales engaged for New York. During the past week a large business has been transacted, and settlements are estimated at 1,600 bales, increasing total from 1st June, 1874, to date, to 61,800 bales. Amongst the most notable purchases reported are :—

	Per picul.	Per lb.	Per kilo.
Cock and Worm Chop, Nos. 3, 3½ & 4 Tsatlees	395, 370 & 340	19/6, 18/4, 16/10	Tls. 54.45, 51.10, 47.00

"Tung Sen's" "Lan Ling" / "Ting Chan Kee's" "Vun Yuen"	292½	14/6	Tls. 41.20
Common Tsatlee	275 & 285	13/8 *a* 14/2	Tls. 38.20 *a* 39.55
"Tae-ho's" "Pang-ling" Kahing Taysaam	315	15/7	Tls. 43.60
"Ching-yuen-sing's Gna-ling" do. do.	310	15/4	Tls. 43.00
Market No. 3 Kahing Taysaans	270 *a* 280	13/5 *a* 13/11	Tls. 37.50 *a* 38.90

About one-third of the settlements are said to be shipped joint account with Chinese. The arrivals continue very small, and the unsold stock is reduced to barely 7,000 bales. A good demand has existed for re-reels for the American market, and about 400 bales have been purchased at ₮335 *a* 440 for Hainings, and ₮340 *a* 410 per picul for Tsatlees.

sent, and the Governor-General therefore asks that a proper form be supplied from Peking, to replace that which was lost among the official archives destroyed during the rebellion.

Dec. 25th—(1)—A decree in reply to a memorial from the Censors superintending the north division of Peking, denouncing the conduct of a member of the Imperial lineage, the *tsung-shih* Siang-nêng, *alias* Siang-ling. Having been found to be dwelling at an opium-shop, he was called to account by the Censor Liu Kwoh-kwang, at whom he roared back in an unseemly manner, and on enquiry it was found not only that he was keeper of the shop, but that he was in league with a pretended *tsung-shih* and a number of other bad characters, who made his house a rendezvous and a receptacle for stolen property. The accused person is handed over to the Imperial clan Court and the Board of Punishments, to be stringently dealt with. In reply to a further representation by the same Censor, to the effect that members of the Imperial lineage who take up their residence in the outer city are constantly resorted to by bad characters for protection against official pursuit, it is ordered that all *tsung-shih* are for the future to confine themselves, as the regulations provide, to residence within the Tartar city alone.

(2 and 3.)—Decrees setting forth mandates from the Empresses Dowager, the first conferring one degree of advancement in rank respectively on five of the surviving concubines of the Emperor Tao Kwang (who died in 1850), and the second similarly on seven of the concubines of the Emperor Hien Fêng (died 1861).

(4)—A Decree in reply to the report handed in by the Board of Punishments on the conduct of General Ma Ju-lung in connection with the rebel outlaw Chang Chau-show, who came to Peking in his train. (See *Gazette* of Dec. 6th). Ma Ju-lung's offence, in having failed to detect this, admits of no excuse, and it is ordered that, as the Board proposes, he be stripped of his official rank, but left as incumbent of his post (as General-in-chief of Hunan).

Dec. 26th.—The Court Circular records [illegible] of thanks by Ma Ju-lung on being deprived of his rank and left in office. (See *Gazette* of Dec. 25th).

Dec. 27th.—This day's *Gazette* contains nothing beyond administrative details.

Dec. 28th—(1) The Governor-General of Sze-ch'wan renews his application for leave to retire from the service on the score of ill health. He has already received by Imperial grace a congé of two months, but his maladies, which date from the period of his tenure of office as Taotai in Northern Kiangse, 15 years ago, continue to weigh him down, and he feels incapable of sustaining the burden of his important office longer. He begs that he may be allowed to retire to his native home, and assures his Majesty that so soon as amendment declares itself in his condition he will ask again to be employed.—Rescript. Let Wu T'ang have a congé of two months.

(2)—The Governor-General of Sze-ch'wan further memorializes reporting the devotion of two wives to the memory of their deceased husbands. In the first case, a daughter of an official was married in 1864 to a licentiate from Yunnan, who came to Szech'wan for a wife in consequence of the troubled state of his own province. Two years afterwards he returned to Yunnan, to compete at the examinations, and it was not until June last that he came back to fetch his wife home. Having been unhappily attacked with cholera, he succumbed to the disease. In her grief for this loss, his wife took no sustenance of any kind after his death, but she kept silence respecting her intentions in order to spare the feelings of her parents. When the funeral ceremonies were completed, she swallowed gold-leaf, and then, kneeling down to beseech her parents not to grieve overmuch, and saying that her husband's concubine in Yunnan was with child, and that it was her hope that she might bring forth a son to continue the ancestral sacrifices on her husband's behalf, she passed away, seated decorously beside her husband's coffin. In the second case, a bereaved widow is reported as having led a life of chaste devotion to her husband's memory for 26 years after his death. A mark of Imperial approbation is solicited on behalf of both these virtuous ladies.

(3)—The same high official reports that the timber for masts cut in the wild forests of the western frontier of Sze-ch'wan, to serve as lantern-poles for the Temple of Heaven at Peking, was to a large extent injured or destroyed whilst being floated down through a mountain stream, the district Magistrate in charge being at the same time drowned (as already reported; see *Gazette* of Oct. 9th.) On a survey being held by the district Magistrate of Wu-Shan, it is found that only eleven spars of six *chang* in length remain available for use. Thirteen pieces of timber forming part of the convoy, were dashed to pieces among the rapids. Officials have now been sent into the country of the barbarian tribes to provide a fresh supply, but as they have been obliged to go further than before in search of trees of fitting magnitude, the forest now selected being at a distance of more than 100 *li* from any river, with steep and rugged precipices intervening, over which roads must be made to drag the timber along, no time can be named for the probable completion of the work.

Dec. 29th.—(1).—A decree cashiering an official holding an appointment in the Board of Punishments at Moukden, for the offence, as reported by his chief, the vice-President Ming-ngan, of making a special application to him, at his private residence, for actual employment.

(2).—The Brigadier-general of the Taining division memorializes reporting his proceedings in connection with the care of the Western Imperial Mausolea. It was provided in 1852 that a sum not exceeding Tls. 300 should be expended annually in keeping the small river or canal which runs through the approaches to the tombs in repair and free from weeds. The total length at present requiring attention is 22,867 *ch'ih*. The same official, feeling it incumbent upon him to offer a loyal contribution from his own resources, proposes to provide 3,540 young cedars, which are required for replanting some of the Imperial grave-mounds. He has likewise supervised the usual autumn clearing of the boundary road 火道 encircling the mausolea.

Dec. 30th.—(1).—A Decree. Wên-siang memorializes again beseeching leave to resign his office on the ground of protracted ill health. Let him be granted a further congé of three months without resigning his office.

(2)—The acting Governor-General of Yünnan applies for the issue of a new Imperial mandate constituting the death warrant, with the usual official archives and books of reference, for the Brigadier-General commanding at T'êng-yüeh (Momein) on the south-west frontier of the province, to replace those destroyed on the capture of the city by the Mahommedan rebels.

Dec. 31st.—(1)—The Governor of Honan reports the rehearing of an appeal case referred back from Peking. A man named Han Wên-têh having been fatally stabbed in 1869 by a fellow-villager named Sung Kwook-kin, and the murderer having taken to flight, the victim's brother, Han Wên-ping, brought a groundless charge of complicity in the murder against certain of his fellow villagers, who were tried and discharged as innocent. He subsequently complained at Peking against these men and the police of the magistracy, whom he represented as having connived at the escape of the murderer. These charges have been reinvestigated, and found to be devoid of foundation; but as the appellant was actuated by grief for the loss of his brother in taking the steps in question, he is exempted from punishment.

(2)—The same Governor reports that a district Magistrate who was stripped of his official button in 1870 for a deficit of Tls. 6,000 and odd in the revenue, for which he was accountable, has now made good the amount; and he begs that the button may be restored in consequence.—Rescript: Let the request be granted.

Public Meetings.

THE RACKET CLUB.

The half-yearly meeting of members was held at the Racket Club on the 26th instant. Present:—Messrs. W. A Turnbull (in the chair), Cooper, Cumine, Dalgliesh, Goodfellow, Gundry, Jaffray, Jones, Hamilton, Lang, Miller, McAllister, Scott, Stephenson, and Wheelock.

The notice convening the meeting was read, and the minutes of the last meeting were read and confirmed.

The Chairman said the Report and Accounts had been some time in the hands of members, and might probably be taken as read. An error in printing the accounts, which placed the stock at Tls. 361 instead of Tls. 391, had been brought to their notice by the Honorary Secretary. He did not know that the Report called for any special comment at his hands, but he would be glad to answer any question.

Mr. Wheelock proposed, and Mr. Cumine seconded—

That the Report and Accounts as laid on the table be passed.—Carried.

The Chairman said the next business was to consider whether they should floor the East Court also with Portland Cement. Subsequent to the late meeting, the floor in the West Court having risen in some places, caused so much uncertainty regarding it, that the Committee thought it would be foolish to go on blindly until they found through what fault the deterioration had occurred. The bad portion had been since relaid, and the floor was now level and good. The weather having been wet at the time, the Committee had sold the remainder of the cement to avoid risk of its spoiling; but it could be easily replaced by a new order, and it was for the members to instruct the new Committee to complete the other Court if they thought proper.

In answer to a question, the Chairman added that he considered the floor slippery; others did not. The light was excellent, but the existence had been ascertained of some better colouring matter which could be obtained at a small cost.

Mr. Wheelock proposed, and Mr. McAllister seconded—

That the laying of the floor of the East Court be proceeded with, and that Mr. Kidner be asked to import coloured cement, and make a contract with Weikin as before.—Carried.

The Chairman next asked the opinion of the meeting about getting lightning conductors. The building had fortunately escaped for eight years, but in the event of its being struck, it would probably suffer severely, and they would be put to large expense. They seemed to be running an unnecessary risk, and if an accident did happen, they might have difficulty in getting funds to pay the cost of repairs.

Mr. Cumine remarked that they had a Reserve Fund in the Bank. But—

The Chairman said that would all be wanted in a year or two, for a new roof.

Mr. Jones proposed, and Mr. Dalgliesh seconded—

That the Committee be authorized to arrange to have lightning conductors placed

over the building, as soon as convenient.—Carried.

The CHAIRMAN next called attention to the balance sheet, which showed that the Club property was at present represented by 70 shares. Following their instructions, the Committee had during the year bought up ten shares. The question was whether the members wished the capital further reduced, or whether they thought the number of shares was now not too many.

Mr. GUNDRY congratulated the Committee on the good management which had enabled them to buy so many shares during the half-year, but thought that a limit had now been reached, beyond which further reduction would be unwise. The Club property was valuable—certainly worth much more than the Tls. 8,400 at which it stood in their books, and they should not reduce it to a point at which it would become worth the while of a few men to buy up the shares as a speculation. It was already possible that the whole of the shares should be collected in the hands of ten men; the existing rule limiting the number of shares to be held by any one member, to 7. It might be unlikely this would ever happen, but he thought it would at least be unwise to reduce the number further, and would propose—

That the Committee be instructed to cease purchasing shares on account of the Club.

He also gave notice that he would, at the next meeting, propose an alteration in the rules, reducing the number of shares to be held by any one member to 5. They had instances in Shanghai of how easily shares might be collected into a few hands, and it would be wise to take precaution against their own property becoming similarly hampered.

Mr. DALGLIESH seconded the proposal, which was carried unanimously.

The question of enlarging the stone facing on the front wall was then brought up by Mr. WHEELOCK. There is at present a diamond of Nagasaki granite surrounded by bricks. The granite answered well, and several members expressed an opinion in favour of extending it. The following resolution, proposed by Mr. WHEELOCK, and seconded by Mr. GUNDRY, was carried:

That the incoming Committee be requested to extend the granite facing on the front wall, if in their opinion the cost will be within the means of the Court.

A ballot was then taken for a new Committee, and resulted in the election of Messrs. Cooper, Cumine, Gundry, Jones, Hamilton, McAllister, Scott, Phipps, and Wheelock. Messrs. McAllister and Scott, however, declining to serve, Messrs. Findlay and D. Brand, who had the next highest number of votes, were declared elected.

Several other matters were discussed, and the meeting eventually broke up with a warm vote of thanks to the retiring Committee, and especially to Messrs Cooper (Hon. Sec.) and Scott (Hon. Treas.), for their services.

NORTH-CHINA BRANCH OF THE ROYAL ASIATIC SOCIETY.

At the meeting of the above Society, on Wednesday night, Mr. Wylie read an interesting and valuable paper, written by the Archimandrite Palladius, entitled, "Elucidations of Marco Polo's Travels in North China, drawn from Chinese sources." The deep research evidenced in the compilation, coupled with the author's personal acquaintance with the regions traversed centuries ago by "Mark Million"—a *soubriquet* given to Marco Polo by his countrymen on account of his frequent use of the latter word when describing the riches and wonders of the countries he had seen—give the paper a unique value both historical and geographical.

The chair was taken by Mr. F. B. FORBES, President of the Branch, who in commencing the proceedings, begged to tender his resignation of that office, as he was shortly leaving Shanghai to visit America and Europe. He need not assure the members how highly he appreciated the honour of having been appointed delegate of the Branch to the Parent Society in England, and would use the influence such a position gave him in every possible way to promote its usefulness. He would perhaps be able to obtain some contributions to the Library and in other ways advance the interests of the Society, during his stay on the two continents.

Mr. A. J. LITTLE said he was sure the announcement they had just heard made by the President, would be received with regret. The Society owed more of its prosperity and success to him, than to any other man in China. He had been on the Council during the last six or seven years, and for the latter two years, he had very worthily filled the office of President. Among other matters successfully brought to a good issue by his efforts, might be mentioned his intercession with the Government with reference to the ground on which the present building stood. The Society had had other places in Canton and Nanking Roads, but until they were located in that building they never felt they had a home. They had also to think Mr. Forbes for the nucleus of the Museum, which he (Mr. Little) was glad to see making what must be considered satisfactory progress, and which would, he had no doubt, ultimately become of much usefulness, and conduce to the welfare of the Settlement by assisting the spread of knowledge and enlightenment in a very interesting branch of study. He thought that when they found a gentleman who, like Mr. Forbes, though occupied in business matters during the day, was willing to work for the good of the community in such ways as those, they ought to acknowledge the excellent services so rendered. In conclusion, Mr. Little referred again to the Asiatic Society, characterising the North-China Branch as a nucleus around which gentlemen in Shanghai, fond of scientific pursuits, could gather for the interchange of thought and opinion. In the name of the members of that Branch, he begged to thank Mr. Forbes very much for what he had done for them, and to assure him that they all wished him a prosperous voyage, and would be glad to welcome him here again.

Mr. REDING had much pleasure in seconding the resolution, which was passed by acclamation..

Mr. FORBES, in reply, said he was deeply grateful for the complimentary remarks which had fallen from Mr. Little, and for the way in which they had been received by the meeting. It had been a pleasure to him to aid in the erection of the Society's building, and in the creation of a public Library and Museum. It was pleasant to observe a growing interest in these institutions; and if, as he hoped and believed, the community continued to give them a kindly support, he and those with whom he had the good fortune to work, would be more than repaid.

Mr. WYLIE said he rose with a feeling of melancholy to offer a tribute of respect to the memory of one who had just departed from among them. In the late Mr. Lang, they had one who was not only welcome at every meeting he attended, but who had the happy faculty of imparting to every meeting that kindly cordiality which he himself possessed, and for which indeed he was remarkable. They would all regret that they would see him no more among them.—Mr. Wylie suggested that a large outline map of Asia, to hang upon the wall at the rear of the platform, would be very serviceable in assisting hearers to follow the reading of geographical papers with g reater pleasure. At present they heard a number of names read, with nothing to guide them as to the localities of the places. He therefore thought a large outline map would prove very serviceable. He then proceeded to read the paper above-mentioned.

Law Reports.

H. B. M. SUPREME COURT.

Shanghai, January, 22nd.

Before Sir EDMUND HORNBY, *Chief Judge.*

Motion to Review the Taxation of Costs in re the Collision between the Brig "St. Francois" and the steamer "Cawdor Castle."

Mr. ROBINSON, in moving, said this was an application to the Judge to review the taxation of the costs in the above action, and it was based upon two points. The first was, whether the plaintiff was entitled to the costs of a material witness, even though it should prove that his evidence was needless; the second point was, what is meant by costs of reference? Those were the two points on which he was going to ask the opinion of the Court. No issue was joined at the time the witness was examined, though they knew perfectly well what the issue was going to be. The plaintiffs maintained, and the defendants denied, that the vessel should be treated as a total loss. If he failed in his first contention that she was a total loss because she was sunk, he was bound to be provided with evidence in support of his second contention, and the witness in question was a most material one on the point that she was at any rate so damaged as to amount to a total loss, officially appointed by the French Consul. It was felt sure that considerable weight would be attached to his evidence on the point as to whether the vessel was so damaged as to be a total loss. The Registrar and Merchants decided that as she was sunk, she was entitled to be treated as a total loss, and it was not necessary to examine the witness on the second point in the case. But he (Mr. Robinson) would have been guilty of great negligence if he had not been prepared with that evidence, supposing the Registrar and Merchants had come to a different view. Therefore, it was upon that possibility that he was entitled to have the witness's evidence, and he was very much surprised at its being disputed as being evidence not taken. Independent of any merits whatever, it was a question of principle in the Courts that the plaintiff was bound to be provided with any evidence that might be required, and if he succeeded that he was entitled to the expenses of providing such evidence. On this point, Mr. Robinson referred the Court to Chitty's Archbold, on page 512, under the head of costs, which he read.

His LORDSHIP said that referred simply to the expenses of witnesses—what was paid to witnesses at so much per day.

Mr. ROBINSON felt bound to differ from that view. In his opinion it also included the cost of the preparation of a witness's evidence. Counsel must be instructed in his brief as to evidence that might be called. There was a case in Admiralty bearing upon the argument—the case of the *Biddick*, (38, *Law Journal*; Admiralty; page 24.) It was a case of damage, and the material question was whether the vessel injured had patent furling appliances to her topsails. That was the question for the Board to decide. The defendants were prepared with two witnesses to prove that fact, but the fact was clearly admitted in the course of the evidence for the other side and consequently the two witnesses were not examined, and the Registrar disallowed their costs. But the Judge before whom the appeal was heard, said their evidence was material to the case, and that it was the defendant's duty to be provided with it, and that the Registrar should first consider whether a witness was necessary before disallowing his costs. In the case quoted it was considered necessary, and the Judge therefore referred it back to the Registrar to allow reasonable costs. He (Mr. Robinson) proceeded to say that in the *St. Francois* case he had provided a material witness, that he was bound to provide such evidence as he could give, and therefore he was entitled to reasonable costs on this account.

His LORDSHIP said he could not see how the question of total loss could arise as it was put, on the second issue.

Statement of Deliveries of Cottons and Woollen Piece Goods from 1st to 18th Jan., 1875, compiled from the "Customs Daily Returns," Nos. 4 @ 13 both numbers inclusive.

Imports for 1875—None declared.

* Exclusive of import cargoes ex *Horatio, Bangalore, Omba, Star of the West, Hankow, Menelaus, Ajax, Anadyr, Golconda, Ocean, Glenroy, Provence, Gwalior, Golden State, Velocity, Fleurs Castle, Sarpedon,* and several Coasters, and of sundry re-exports.

COMMERCIAL POSTSCRIPT.

JANUARY 21, 1875.

ARRIVALS.—(Not given above)—January 15th, Danish barque *Korsör*, and 16th, British barque *Star of Jamaica*, from Freemantle; 18th, German brig *Peri*, from Newcastle, N.S.W.

DEPARTURES.—None.

The French mail steamer *Provence* takes about 1,200 bales of SILK and about 300 tons TEA.

EXCHANGE.—On London, Bank Bills, 6 months' sight, 5s. 8¾d. *a* 5s. 8¾d. First-class Credits to Bank, 5s. 9¼d. First-class to Private buyers, 5s. 9d. Private and Documentary, 5s. 9⅛d. On Paris, Bank, Frs. 7.25. Private, Frs. 7.32½. On India—Bombay Bank, Rs. 302½. Calcutta Bank, Rs. 302½. On Hongkong, Bank Bills, demand, 26⅝ per cent. discount. Private, 15 days' sight, 27⅛. Gold Bars, Tls. 173.30. Bar Silver, Sh. Tls. 111.25. Mexican dollars, Sh. Tls. 74.20 per 100. Carolus dollars, Sh. Tls. 81.10 per 100. Copper cash, 1,540 per tael.

SHARES.—Messrs. J. P. Bisset & Co. report:—

Hongkong & Shanghai Banking Corporation.—Shares continue 2 per cent. prem., nominal, with neither buyers nor sellers for cash; but buyers offer 2 *a* 3 per cent. for March.

S. S. N. Co.—A fair business has been done at Tls. 79 *a* 80 cash, and the market closes with sellers at Tls. 79½.

Fire Insurance Shares.—Hongkongs are in demand at quotations. *Victorias* and *Chinas* firm, with no sellers at quotations.

Marine Insurance Shares.—Sales of *China and Japans* at Tls. 77 *a* 77½ cash, and at Tls. 79 for March. Buyers now offer Tls. 78 cash. *Yangtszes* are in demand at Tls. 575, and *Chinese* at $188 per share.

Hongkew Wharves.—Sales at Tls. 85 cash; and Tls. 90 for June, with sellers for March and April at proportionate rates.

Chinese Imperial Loan.—Business is reported at £98 and ex 5/7, at which rate there are buyers.

The weather has been very cold, the thermometer ranging from 30 min. to a little over 40 max. during the week. There was a good deal of rain in the end of last week.

NOTICE.

THE interest and responsibility of Mr. JAMES MACKENZIE, of 4, Great St. Helens, London, in the firm of MACKENZIE & Co., Shanghai, ceased on the 30th June, 1873.

18te 50 Shanghai, 27th January, 1875.

THE publication of the *North-China Herald and Supreme Court & Consular Gazette* commenced at 5.30 P.M.

The North-China Herald.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, JAN. 28, 1875.

RETROSPECT OF 1874.

Tea. In reviewing the course of the *Black* Tea market during the past year, it cannot be said to offer much subject for congratulation. A season in which the London market, from its exceptionally favorable statistical position, offered a more than usually promising prospect, has been ruthlessly and recklessly sacrificed by the unreasoning impatience of shippers, and their obstinate adherence to the time-honored, but worn-out, tradition, that an interest in first shipments, on any terms, is sure to be profitable. This again caused such undue competition for first arrivals from the country, before any accumulation of stock was permitted, that at the very commencement a range of prices was established unwarranted by the experience of former years, and which, though saved from resulting disastrously by that same exceptional position of the article, had its effect in causing a high standard of price during the whole season. It is true, it might be argued, that this favourable position did justify a bolder action than usual; but as it cannot be known at the opening of the market how much tea is coming forward, and as the reduction in stock it had taken years to arrive at, might be neutralized in a few months by increased production, and consequent heavy shipments, this argument falls to the ground.

It was calculated that when the first of the new teas arrived home the stock of Congou in London would be smaller than had been known for many years; and this expectation was confirmed when the Board of Trade returns to the end of June were published. It was then found that the stocks of Congou in bonded warehouses were:—

			lbs.		
	On June 30,	1874	33,000,000	or	3½ mths. consptn.
Against	,,	1873	41,000,000	,,	4½ ,,
	,,	1872	49,000,000	,,	5 ,,
	,,	1871	50,500,000	,,	5 ,,
	,,	1870	58,000,000	,,	6½ ,,
	,,	1869	49,000,000	,,	5½ ,,
	,,	1868	45,000,000	,,	5½ ,,
	,,	1867	63,000,000	,,	7½ ,,
	,,	1866	70,000,000	,,	10 ,,
	,,	1865	68,000,000	,,	9½ ,,

The first arrivals at Hankow took place on the 23rd May, when 16 chops were shown, and on the same day three parcels, Cheong Sow Kye teas, were purchased at Tls. 37 *a* 37.50, or about 4 Taels over the opening rates of the previous season. The standard of price having been thus established, settlements were continued on the same basis during the next fortnight, by which time nearly the whole of the first crop, amounting to one-third of the whole season's export of Black from Northern Ports, had been settled. Teas from inferior districts realized proportionately high prices. The following table will shew the comparative prices of the two seasons for the first 22,000,000 lbs.

	1874.	1873.
Costing 2/6 *a* 3/6.	2,300,000 lbs.	1,500,000 lbs.
2/0 *a* 2/6.	7,600,000 ,,	5,600,000 ,,
1/1 *a* 1/6.	500,000 ,,	1,300,000 ,,
	22,000,000 lbs.	22,000,000 lbs.

The quality of the crop, with the exception of the Ningchows, was hardly up to the average, but the teas from this district were probably the best that have ever come forward, their quality almost justifying the excessive rates that were paid for them. Most of these kinds were taken for the Russian market.

The first vessel to leave was the *Agamemnon*, on the 26th May, but she was unfortunately delayed through grounding in the river, and left eventually on the 28th: followed by the *Glenartney* on the 29th, and the *Glenfalloch* and *Hongkong* on the 31st May. The rates of freight, and the rate of exchange, ruling up to the time of the departure of the last steamer were as follows:—

1874. Freight by steamer £5.10. Exchange 6/3 *a* 6/3¾
1873. ,, ,, 5. ,, 6/3 *a* 6/4
1872. ,, ,, 5. ,, 6/4 *a* 6/7

The sailing-vessels *Ada* and *Cutty Sark* loaded at £4. 12s. 6d. *a* £5. 0s. 0d. per 50 feet.

The *Glenartney's* was the first cargo of new tea put on the London market, where with so bare a stock it could not meet with other than a ready demand; and, had it not been that prospective profits had been discounted in China, and already gone into native hands, must have given a most satisfactory out-turn. As it was, cost on this side had been so high, that willing as dealers were to pay full prices, they were not prepared for the excessive rates necessarily demanded to cover China cost; and consequently contented themselves with buying for their immediate requirements. It was a fact pregnant with significance that, while they refrained from making offers high enough to cover prime cost of really good teas, they took freely almost anything that was offered for price with very little regard to quality. The loss of the *Gordon Castle*, however, helped the position of the high cost teas, and they were gradually quitted at prices for which the most that can be said was, that they did not lose much. Common grades by the first two ships, and occasional parcels of well bought fine teas, paid fair profits.

By the first week in June, the great scramble in Hankow was over, and on the 9th, the Shanghai market was opened. Prices were about on a par with Hankow rates, with the exception of a few remaining parcels of fine teas, which were bought shewing a loss on Hankow offers. During the whole of the latter part of June, however, supplies were scanty, and business consequently restricted, for second crop teas had not yet had time to arrive, while the first crop was already exhausted, and never before has the interval between the first and second crops been so distinctly marked. The latter began to come forward about the first week in July, and found buyers up to 27 Taels for Oopacks, and 33 [illegible] the quantity of these teas was by no means good, but arrivals were so scanty, partly owing to the large quantity settled in Hankow, that teamen were easily enabled to maintain rates, which averaged fully 2 Tales above those of the previous season, were equal to the prices of 1872, which resulted so unfortunately, and were Tls. 5 *a* 6 higher than those ruling in 1870 and 1871. During the early part of August there were much freer supplies, but daily settlements were so large that stock never reached over 35,000 chests, against a maximum of 42,000 chests in 1873, 56,000 in 1872, 66,000 in 1871, and 100,000 in 1870. Third crop teas began arriving about this time, and were eagerly taken at full prices. As each batch of musters was put on the market, a steady and continuous falling away in quality was apparent; and by the end of September it was evident the season was drawing to a close. From this date till the middle of November, when the last muster was shewn, arrivals were small, and the season finished at the earliest date on record. The total export of Congou from Northern ports aggregated 77,200,000lbs., which was divided as follows:—

To	1874-75 lbs.	1873-74 lbs.	1872-73 lbs.	1871-72 lbs.
Great Britain	68,000,000	63,500,000	65,000,000	70,500,000
America	1,600,000	800,000	1,300,000	2,000,000
Australia	....	....	....	600,000
Continent	4,000,000	4,700,000	4,100,000	1,900,000
Siberia via Tientsin	3,600,000	6,800,000	5,000,000	2,200,000
	77,200,000	75,800,000	75,400,000	77,200,000

During the year there had again been a considerable amount lost at sea, which reduced the actual quantity of black leaf Congou available for consumption.

		Were lost with
In 1874-75.	The *Canton* and *Gordon Castle* ..	2,518,130 lbs.
1873-74.	,, *Drummond Castle & Singapore*	4,550,621 ,,
1872-73.	,, *Parnassus, Lahloo,* and *Lalla Rookh*.....	3,875,389 ,,

The greater portion of the above export has already arrived in England, and although no serious losses have been made, the result to shippers has been very bare. The most satisfactory out-turn was on common teas early in the season, a few "on fine" Ningchows, which were bought shortly after the opening of the Shanghai market, and the earlier shipments of medium second crop teas. While the worst results have been on inferior second and third crop teas, especially clean common Oonam kinds, which, falsely called Oonfaas, were bought at Tls. 19 *a* 22, and in many instances could only be quitted at a loss of 1d. to 2d. per lb.

The proportion of tea shipped by steamer and sailing vessels, has been more in favor of the latter this year than last. Many shippers anticipated that by the time of the arrival of the sailing vessels the market would have recovered from the weight of shipments, crowded forward by steamer, and that their teas, being of earlier growth and consequently better quality than those arriving at the same moment by steamer [illegible] have the preference, and realize full rates. This anticipation has, with a few exceptions, proved fallacious. The great bulk of the business at home, seems to be done in the first few months after the arrival of the new tea. After that, with the exception of an occasional spasmodic period of speculation, dullness prevails. Stocks decrease month by month, without assisting matters. Prices drag and droop, and there are no signs of life in the market, till the next arrival of new teas set things going again. There can be little doubt, also, but that teas shipped by steamer arrive in better condition, and fresher, than those by sailing vessel. The proportion of tea (Black and Green) shipped by steamer and sailing vessel from Shanghai and Yangtze ports to the United Kingdom is as follows

	Steamer.	Sailing Vessel.	Total.
In 1874-1875	53,500,000	24,500,000	78,000,000
,, 1873-1874	57,500,000	14,500,000	72,000,000
,, 1872-1873	45,500,000	30,500,000	76,000,000

During the past year Foochow teas have been recovering the position they had so long lost. After the bad crops of 1868, 1869 and 1870, red leaf Teas fell into disfavor with the home trade, and the prejudice against them was so great that, till within the last two years, black leaf teas were taken in preference to red leafs, even when the latter were palpably superior to the former. During the last two years, however, this prejudice seems dying away. This has had an effect decidedly adverse to Northern Teas, which is increased by the excessive export from Foochow.

A new element of loss to shippers, has been becoming prominent during the past season, and this is the risk they incur by the scandalous way in which their property is treated by nearly every line of steamers from Shanghai, with the exception of those belonging to Holt's and the Mail Companies. It has been found lately that many outside steamers deliver a portion of their tea so burnt and dried up through being stowed near the boilers, that heavy claims are put in by the retail buyers of the tea for difference in sample. There is no hope of obtaining restitution from the ship, as no proof

can be maintained. An instance was advised a few mails ago, in which an invoice was sold and gave £150 profit, but on inspection a great many of the chests were so dried up that instead of a profit the loss is nearly £200. In another line the owners have the vessel put into dock and work overside, so that it is generally two or three weeks before the lower tiers of teas come to light; and even samples can only be obtained with difficulty, application to the owners themselves being met with the utmost discourtesy and contempt. Another item is the careless way in which Singapore cargo is taken in without any pains to separate it properly from the tea. Captains of steamers leaving China, and calling at Hongkong and Singapore and other ports for freight to fill up, place essential oils, pepper, &c., &c., and such like deleterious matters, on the top of the tea; and whole cargoes are not unfrequently deteriorated 1d. *a* 2d. per lb., through this cause. It is so difficult to enforce any claim on this account, that instances frequently are allowed to pass without notice. But the remedy lies on this side; and that the evil is allowed to continue without protest, is characteristic of the way in which business is usually conducted in China.

Summary of News.

The London mail of 4th Dec., by the M. M. str. *Tigre*, was delivered on Sunday, 24th inst.; and that of 11th Dec., by the P. & O. str. *Hydaspes*, on the following day.

A homeward mail leaves to-morrow, by P. & O. str. *Gwalior*.

The following Reuter's telegrams have been received during the week.

The *Times* announces that Persia having granted a Railway concession to Russia through General Faekenhagen, notwithstanding Reuter's existing concession, Reuter has lodged a protest at Teheran.

Lord Derby has instructed the Minister at Teheran to support the protest officially and formally.

The Reichstag have voted for obligatory civil marriage.

Alphonso assumes the command of the army of the North, and declared in council his desires to maintain Religious liberty.

Spain is sending three war vessels to the North to obtain satisfaction for the Germans.

Germany accepts the promises of reparation by Spain.

Mr. Tapp has been gazetted as the Registrar of Shipping.

The most startling news of the week is the announcement of the death of his Imperial Majesty Tung Che, which occurred at Peking on the evening of the 12th instant. His Majesty was attacked by small-pox on the 9th ultimo, and after being reported convalescent, had a relapse on the 5th instant, from which he never rallied. His successor had not been nominated at the time the mail left Peking. The event is more fully recorded and commented on in our other pages. On receipt of the news, the flags in the Settlement and harbour were put at half-mast, in token of respect, although we understand that, having no official intimation of the death, the Chinese officials do not yet exhibit in their yamens the usual signs of mourning. The death of an Emperor can only be communicated, it would appear, by an Imperial proclamation issued in the name of his successor—the Chinese in this, as in most other matters, reversing the etiquette of Western States. The nation is not supposed to be without its Emperor for a day; and first therefore comes the "*Vive le roi!*" to be followed by "*Le roi est mort!*" The embarrassing situation in which the somewhat sudden demise of his late Majesty has placed the heads of the Government, accounts for a little delay in the appearance of such a proclamation; and meanwhile the only public intimation to the provinces of he loss which the Empire has sustained is the placing in mourning of the official seals, in the manner we mentioned yesterday. A change of colour from the [illegible] black to the mourning blue was adopted in printing the edition of the *Shunpao* containing the announcement of the Emperor's death, and this simple fact appeared to be accepted by Chinese as convincing proof of the truth of the intimation, which many among them had previously doubted. The Chinese are not credited with taking much interest in newspapers, but they are beginning to appreciate a popular Press, and the *Shunpao's* enterprise was rewarded by an extra sale during the day, in Shanghai alone, of over four thousand copies.

Mr. Margary's many friends, and the public generally, will be gratified to hear that Mr. Consul Medhurst has received a telegram from Rangoon, announcing that Mr. Margary had successfully accomplished his journey overland through China to Bhamo, on the 17th instant, and that the British Mission from India left that place on the 23rd following. It is to be presumed, therefore, that he has been fortunate enough to meet the mission, and that it is now *en route* downward to Hankow.

Owing to the discovery of some defect in her crank shaft, the departure of the O. S. N. Co.'s str. *Sarpedon* was postponed a few days. The shaft is being replaced by a spare one on board, and the steamer will leave on Saturday.

The French brig *St. Francois*, which was some time ago much injured by collision with the s.s. *Cawdor Castle*, has been sold at auction to Mr. Nils Moller for Tls. 4,550.

The sailings of the P. M. S. steamers have been rearranged. Instead of leaving on certain days of the week, they will in future start at fixed dates, viz., the 1st and 15th of every month. The *Oregonian* left for Hongkong on Sunday afternoon, whence she will take a mail on 3rd proximo, to connect with the *Vasco de Gama* at Yokohama. The present movement, we have been given to understand, is made with the view of having some extra freight accommodation at disposal, for tea-shippers who may wish to anticipate the re-imposition of the tea duty in the United States, which will probably commence about 1st March.

On Thursday, H.M.'s gunvessel *Curlew* was fouled by a large junk, which did considerable damage to the bowsprit and its rigging, &c. The case was referred next day to the British Consul on the question of amount to be paid for repairs, but was, later in the day, we understand, amicably settled between the parties interested.

Reuter tells us that Mr. W. H. Tapp, lately in charge of the Shipping Office of H.B.M. Consulate, has been gazetted Registrar under the new Order in Council which makes Shanghai a port of registry for British vessels. As most of our readers are aware, Mr. Tapp went home to render that assistance in connection with the framing of the Order which his knowledge of shipping and local conditions peculiarly qualified him to do; and although his preferment to the newly-created post of Registrar was a foregone conclusion, his friends here will be glad to know that the appointment is officially notified.

A meeting of shareholders in the Racket Club was held on Tuesday. The accounts, showing a profit of Tls. 332.99 on the half year's working, were passed. It was decided to lay the East Court also with Portland cement; and the incoming Committee were recommended to extend the facing of Nagasaki stone on the front wall, and to erect lightning conductors. It was resolved to discontinue the purchase of shares on account of the Club, the capital having been sufficiently reduced. The following gentlemen were elected a Committee for the ensuing year—Messrs. Cooper, Cumine, Findlay, Gundry, Hamilton, Jones, Phipps, Wheelock, and D. Brand.

The report for the past year has been issued by Messrs. Nachtrieb, Leroy & Co., Agents for the French Gas Company. Although there has not been any great increase in consumption, that which has actually occurred, taken in connection with a fall in the price of coal, enables the Agents to present a very satisfactory report. The net profits are Tls. 8,642.33, of which it is proposed to add half to reserve, raising that fund to Tls. 6,967.14; Tls. 4,180 is absorbed by two dividends, making 11 per cent. for the year, and Tls. 141.17 is carried to new account.

A clever forgery was successfully imposed upon a Chinese clerk at the Hongkong and Shanghai Bank on Thursday. A respectable looking Chinaman presented what purported to be an order for the payment of Tls. 1,000. This document bears the chop of one of the most influential firms on the Bund, and was made payable to a well-known wholesale teaman, whose chop was also stamped upon it. The man who presented it, said he had been sent by this gentleman to collect the money, and it was paid over to him without hesitation, in ten Tls. 100 notes. Subsequent inspection and enquiry proved the order to be fictitious, and that a double forgery had thus been perpetrated. A somewhat singular feature of the fraud is that the forger is quite unknown, even by appearance; but the fact that the notes paid are all for large amounts, it is thought likely will lead to his detection. Information having been given at the Central Police Station, Mr. Inspector Fowler immediately took the

necessary steps. Of course the Bank will not suffer, and it is understood that the clerk is also secured against loss; but the ease with which the fraud was committed should lead to the adoption of means to test bank orders presented by Chinamen before payment is made.

We give to-day the Chief Judge's decision in the motion for a review of certain items in the taxation of costs, by the Registrar, in the *St. Francois* and *Cawdor Castle* case, which was argued on Friday. His Lordship, on grounds stated, supports Mr. Robinson on the first point raised by the motion, whether the plaintiff was entitled to the costs of a material witness, M. Chagneau, even though it proved that his evidence was needless. On the other items, his Lordship concurs with the Registrar. The costs of the motion are divided.

The case of "C. E. Hill *v.* Estate of [illegible] Court on Saturday afternoon, before George F. Seward, Esq., U. S. Consul-General, and H. E. the Taotai of Shanghai, Dr. Yates being interpreter. Mr. I. B Eames appeared for the plaintiff, and Mr. Drummond and Mr. Cowie for the defendants. The afternoon was occupied in hearing the case for the defendants, in support of which Mr. Drummond submitted a number of letters, bills, &c., which had passed between the persons concerned more than twelve years ago, and having reference to various matters connected with the "Ever-Victorious Army," in which the plaintiff was interested in connection with Woo Taotai and Yang Taikee. Dr. Jamieson was examined on behalf of the defendants, and deposed as to the capture of the *Keor-jeor* at Soonkong by Burgevine and Jones, but his evidence on other points, he said, was based only upon hearsay. Two Chinamen were also presented as witnesses. They had been in Yang Taikee's service a number of years before his death, and said they were intimately acquainted with his ordinary business matters, and also with his connection with Woo Taotai in supplying and paying the "Ever-Victorious Army." Both denied that they had ever seen a charter-party for the *Keor-jeor*, or that they knew the plaintiff in any way, either now or at the time of the rebellion. There were no other witnesses called on behalf of the defendants; and, at the close of their cross-examination, it was arranged that the arguments of counsel on each side should be submitted in writing to the Consul-General and the Taotai, copies being supplied both in Chinese and English.

There was a capital muster of the S. V. C., for battalion drill, on Tuesday afternoon, in the Consular Compound, about 120 rank and file, including the band, answering to their names at the time appointed. The attendance of the band, under the leadership of M. Remusat, was another excellent feature, and added life and spirit to what would otherwise have been in some respects a tame affair. The number of spectators was large, including many ladies; and their gratification was enhanced by the bright weather and the capital music they listened to. A good word is also due as to the manner in which the drill was performed, the various evolutions being executed with a precision that drew forth an expression of satisfaction from Major Hart and the officers generally.

There was a large field out for Saturday's Paper Hunt, and the ponies seemed in splendid fettle after their fortnight's immunity from the severer trials of cross-country riding. The meet was close by Mr. Major's bungalow, where a biggish jump over a good sized creek had to be negotiated as a sort of preliminary exam. Most of the mounts got well away, though not in the spick and span style in which they appeared as they essayed the jump, but nearly a dozen failed to cross it at all, and had to join the hunt by a circuitous route, disqualified by the omission, or abandon their afternoon's sport. The weather was lovely; the ground was well selected and in good condition, though [illegible] influence of the sun on its frost-nipped surface; and spectators at Sicaway had not long to wait after the arrival of the foxes, before the hunt appeared. Mr. Walker rode in first, but is disqualified by previous successes this season; and not a dozen yards behind came four or five others, among whom the winners were Mr. R. Johnston, light weight, and Mr. E. J. Caldbeck, heavy weight. It was remarked that at no previous hunt did the field generally come in more nearly together.

At the annual meeting of members and associates of the Shanghai Temperance Society held on Saturday. Mr. Blethen was unanimously re-elected President; the Rev. J. Thomas, Vice-President; Mr. J. L. Mateer, Honorary Secretary; Mr. T. Scott, Treasurer; and Mr. L. Hassall, Librarian. The following is the new Committee—the Rev. C. Butcher, Rev. W. Muirhead, Rev. G. B. D. Miller, and Messrs. W. R. Kahler and J. Morgan.

The fourth of the series of lectures given under the auspices of the Shanghai Temperance Society, was delivered on Monday in the banquet room of the Masonic Hall, to an audience of about a hundred, including a fair proportion of ladies, by E. C. Taintor, Esq., on "The Iliad, and the recent discoveries at Troy." Commencing with an admirably condensed narrative of the mythical, or rather heroic, period of the history of Troy, and the events which followed the elopement of Helen, as described by Homer in his great epic, the lecturer, by the aid of carefully drawn diagrams, proceeded to illustrate the geographical position, long, and as the recent discoveries have proved, truthfully, believed to have been the site of the ancient city, showing beyond all possible doubt that the Homeric Troy really existed and that those events were actual historical facts. The discoveries principally described in the lecture were those made by Dr. Schliemann, whose excavations at the supposed site have led to the most unexpected and astounding results. Passing through several strata, the accumulations of succeeding centuries, each of which showed the remains of people of a less degree of civilization. Dr. Schliemann came, at a depth of over thirty feet, upon relics in gold, silver, and bronze, in the shape of arms, vases, cups, coins, female ornaments, and shields, of exquisite workmanship, all of which had evidently been subjected to the action of fire, and the forms of some of which tallied exactly with those mentioned in "The Iliad," and which must have thus lain buried for over 3,000 years. It is needless to add that a subject of this kind, treated in a popular manner, was listened to with the closest attention, and that a vote of thanks to Mr. Taintor, moved by the Rev. G. B. D. Miller, and seconded by Dr. Jamieson, was carried by acclamation.

A very large Chinese funeral procession passed through the Settlement on Sunday afternoon, on the way to deposit, in a boat at the Hankow road jetty, the remains of the gentleman whose demise was the occasion of the display, for transmission to his native [illegible] Kweichow. The deceased was a silk merchant, named Ya-kee, head of a hong in the Tientsin road, and one of his sons was formerly a compradore at Ewo, Messrs. Jardine, Matheson & Co.'s. Ya-kee died about two months ago, at the age of sixty-eight years, rich and respected. In accordance with a practice not uncommon among the wealthier merchants, he had acquired civilian and honorary rank as a red-button mandarin; and a large number of his official brethren were presented or represented in the *cortège*. The procession was decidedly imposing, and did space permit, we should endeavour to give our readers some description of it, although it is scarcely a novel subject now to residents out here. An enquiry as to the probable outlay entailed by it, elicited the reply from an intelligent bystander, that it could not be less than Tls. 2,000.

The Governor-General at Nanking, Li Tsung-hi, has obtained leave to retire on account of failing health, and the Governor of Kiangsi, Liu Kwen-yi, has been appointed to act temporarily in his place. In noticing the promotion of the Taotai of Shanghai to be Judicial Commissioner of Honan, we were led to state that the change was not a satisfactory one to his Excellency, because it precluded advancement as a territorial governor. We are assured, however, on good authority, that though the new appointment is of a less lucrative nature, no distinction exists between governmental and judicial posts, but that the change is rather in the ordinary line of promotion, when the official promoted is not fortunate enough to drop into a fat Salt Commissionership instead. One local precedent within recollection is that of Ting Taotai, who became a Judicial Commissioner and subsequently a Futai.

We hear that there was a heavy fall of snow in the Ningpo neighborhood on Friday night, and that the surrounding hills were covered, presenting a striking and unusual landscape. They probably intercepted the snow clouds which dropped a few flakes in Shanghai the other day, as these passed southward before the wind.

Coast, Hongkong and Japan news will be found under the heading "Outports."

Editorial Selections.

CHINA'S POLICY IN THE STEAMER TRADE.

THE first step is proverbially the most difficult; and the Chinese having found that they can go into the market and borrow, seem now to think that the way out of all their financial trouble is made easy. It is but the old story of the spendthrift, who fancies that in the purse of the miser he has found a mine of wealth, and caught by the facility with which the purse-strings were opened to his first application, digs deeper and deeper, till the mine is exhausted, and he finds the day of retribution on him. Already we hear rumours that the Chinese, pleased at the favorable acceptance of their first small venture in the borrowing line, are about, should the public like the security, to go in for a second instalment. Now it may be good policy for governments, as for individuals, to go borrowing occasionally. When money is required for really reproductive purposes, it may be the wisest and most politic thing to do. When we see a man, however, in the enjoyment of a fair income, in debt all round, and continually producing the hat to his friends for contributions, we naturally become alarmed. If we are his friends, we advise him to retrench while there is time; if he is a person for whom we entertain no particular regard, we drop him, to favour more profitable acquaintance. Now this is the condition in which we find China. The empire is in a state of peace—no foes are pressing on it from without, no insurrection worthy of the name threatens from within. The Government seems as content as the people; it has no ambition to increase the prosperity of the country at home by public works, or to raise its reputation abroad by placing its fleets and armies on a footing with European nations. A dreamy state of existence, or rather half non-existence, is its idea of perfection, yet withal it is unable to make both ends meet. If it have an ambition, it seems to be something like that of the oyster, to get rid of the foreign body which has found its way within its shell. It has not the weapons to expel it by force, so it tries to utilise what means it has. The oyster lays down a soft coating of nacre, bye and bye to become a pearl; and the Chinese Government, thinking to get rid of foreigners, buys itself a fleet of pseudo-merchant steamers, which, continually growing, will to all appearance finally expel the foreign body. While China is endeavouring to ease the pressing liabilities of her most wasteful of governments, it is interesting to observe the game which she thinks she is successfully playing. Could she but get the foreigners who have been making the country prosperous out of the way, she foolishly imagines that she herself will seize all the profits of trade. To gain this end she establishes a company which she calls with strange inappropriateness the China "Merchants'" Steam Navigation Co.—"Mandarins'" would be nearer the mark. She has one great financial abuse, which the pressure of circumstances, for a time to her own great profit and to the comfort of the provinces, nearly put an end to. We allude to the rice tribute, which for some years was converted into a money tribute, from the provinces. Nothing is dearer to mandarins, nor more wasteful to the empire at large, than this same grain tribute. Its collection, carriage, and distribution, all furnish squeezes to the lucky officers employed. It is under the special patronage of the Tienhow herself, as all abuses in China are sure to meet with a celestial protector. Now, as we said, circumstances for a time occurred to interfere with the grain tribute. The rebellion had rendered the carriage by the old route impracticable, and a money contribution was levied instead. We heard no complaint from Peking that the troops were starving for want of the grain, and none from the provinces that the commutation was oppressive. But if the grain tribute were abolished, what would be the result? In the first place, the money would be remitted at a small expense in sycee or bills—the latter, in the present state of trade, by far the most economical; but this would interfere with the perquisites of the numerous officials who fatten on the existing abuses. In the second place, supposing the money went north, what would it be used for? Marry, to buy rice. And how would this rice get to Tientsin? Marry, in foreign ships. Patriotism and self-interest would unite, therefore—so reasoned the mandarins—in keeping up the rice tribute and in conveying it in their own ships. Now it scarcely needed the last report of the C.M.S.N. Co., to show at what an extravagant rate the rice was being carried, in order to prevent its conveyance in foreign vessels. Nor is it only between the southern ports and Tientsin that the same wasteful extravagance is practised. The river Yangtsze is at the present moment the scene of a reckless competition, not carried on in the interests of trade, but at the expense of the finances of the empire, in order that a Chinese instead of a foreign flag may fly over the cargoes being conveyed between this and Hankow. Now were this done in the interests of Chinese traders, or were *bonâ fide* Chinese merchants to establish steamship companies, we could see a mark of progress in all this, however for the moment suicidal. But such is not the case. The monopoly is as hurtful to Chinese trade as it is to foreign shipping interests; and for all this the empire is taxed, and when it can yield no further, the foreigner is again applied to, to help himself out of the way. Now we will suggest a remedy whereby China shall not need to go to foreigners when she wants money. Do away with the grain tribute, pay off all the officials who have been fattening on its corruption, and dissolve the so-called China Merchants' Company. Instead, encourage by equable legislation the acquirement and use by native merchants of steamers of their own, genuinely worked for profit. Do away with the absurd squeezes which forbid trade; let no distinction be raised between natives and foreigners; let what is conceded to one because the Government could not help it, be granted to the other because it is just. Do this, and foreign banks and foreign capitalists need not be applied to, to grease the wheels of a Government, antiquated indeed, but still capable, did it only honestly stir, of much good and useful work.

DEFAULTING CHINESE COLLECTORS.

A CRIMINAL charge has been brought against a Chinese compradore in the Hongkong Police Court, which forms a notable instance of the dangers which may and do attach to the faulty system of collecting accounts so generally in vogue throughout the open ports as well as at Hongkong. Mr. Bell, the manager of the *Daily Press*, hands to his compradore or shroff, at the beginning of each month, a batch of accounts for collection. These accounts are receipted, but the compradore's returns are trifling in comparison with the amount of the bills entrusted to him. Being taxed with laziness (for apparently he was not suspected of dishonesty) the compradore offers a variety of plausible excuses. In the case which was made more especially the ground of the charge, he attributed the delay to the illness of the debtor; in others, he reported that he had left the bills for endorsement; while the prosecution now allege that the bills had been duly paid on presentation, but that their amounts have been retained by the compradore for his own use. As a natural consequence, under such circumstances, a creditor thinks his constituents dilatory, neglectful, and lacking that regularity and promptitude which ought to distinguish men of business. The status and credit of the latter suffer for a time, until matters have arrived at such a pass that explanation is sought. Of course, we do not comment on the case with any intention of prejudging the compradore's position, but simply because the charge is an illustration of the defects of the present system—a system under which we ourselves, and we doubt not many of our readers whose business involves the collection of numerous small amounts, have from time to time been made to suffer serious loss. The practice which opens up such tempting opportunities to Chinese collectors is that of endorsing the bills for payment by the compradore, a convenient arrangement doubtless for the payer, but which all experience has shown to be a very insecure one for the payee. It may be claimed that a *caveat creditor* principle should apply to any one who lets a receipted bill out of his

Mr. Robinson said it arose in this way: Supposing the case had gone against him on the first point, he should have proceeded to show that the vessel was so strained that they could not so repair her as to place her in the condition she was before the collision. A vessel might be so damaged, without sinking, as to become a total loss. The authorities showed that to have been held to be so.

His Lordship—The Registrar would have to consider the value of the ship just before the collision, and at the time immediately after it. The difference in value is what you would be entitled to.

Mr. Robinson—The defendants' contention was that she was so little injured, that the plaintiff had no right whatever to claim the value of the ship.

His Lordship—They would be required to bring evidence as to what it would cost to repair her. They might bring forward 20 witnesses to say they would repair her and put her in good condition for Tls. 100, and that would be the amount you would be entitled to.

The Registrar—The case was never [put before us in that way.

Mr. Robinson repeated that he was bound to be provided with the evidence he had mentioned. He would have been guilty of gross negligence if he had not been provided with it, and was at a loss to see how it would have been contested. He came now to the question, "What is included in costs of reference?" He had been taken by surprise by the Registrar taking upon himself to say that it was the fixed rule of the Court that one party should pay the costs of reference, and denied that it was inviolable. He had no opportunity of arguing the point, or he thought he could have shown that the justice of the case was not met in that way. How could it be said the defendants were damnified by a statement of claim? A plaintiff must state his claim—it was demanded by the nature of the case. The expense of getting up the statement was caused by the wrongfulness of the party who was held to blame.

His Lordship—But is he not supposed to state his claim in his petition?

Mr. Robinson—Not in Admiralty.

His Lordship—It would be a convenient way, as then it would be at once known what the claim was.

Mr. Robinson—But the defendant might say, "It is your business to file your claim, and after that I will say whether I will pay it or not." Until the claim had been delivered to the defendants, and until the plaintiff had failed to receive satisfaction for that claim, there was no reference at all. Without it, there would be no necessity for reference. (Williams and Bruce; Admiralty Practice, page 282.) If before reference, a formal tender had been made, the plaintiff would generally be required to pay the costs of reference; but supposing the plaintiff accepted the tender, of course the defendant would have to pay the costs of preparing the claim. In conclusion, Mr. Robinson asked his Lordship's attention to the case of the *Gazelle*, in which Dr. Lushington said, if the settlement of indemnification be attended with expense, the party giving rise to it must bear the cost. Again, in the case of the *Sir George Seymour*, before the same judge, a similar rule was laid down. Upon those grounds, he submitted, he trusted to the satisfaction of the Court, that the costs of pre- paration of this claim were expenses necessary through the wrongful act of the defendants, for which they ought reasonably to pay.

Mr. Wainewright, in opposing the motion, said with reference to the first point, all he had to say was that in the getting up of this case it was based solely upon the right established in the case of the *Columbus*, which was the right of a man whose ship was sunk, to oblige the man who sunk her to pay the full value of his ship. To charge the defendant with the costs of evidence that was not made use of, the plaintiff's case being a sound one, admitted of no defence. Looking through his friend's whole bill of costs, in the present case, the inference was that he had done something that was not necessary; and he (Mr. Wainewright) thought it was unfair that the defendants that they should be called upon to pay for evidence that was not necessary. It was clear it was never intended to call evidence of that kind, for the bill mentioned only the evidence of an isolated witness. He contended that his friend had failed to show that the decision of the Registrar and Merchants should be altered. With regard to the second point, the Registrar had decided, in accordance with the practice of the Court, that defendants were not to pay the costs of the reference to the Registrar and Merchants. The preparation of a claim was the very first step in regard to a reference; it was, in fact, an integral part of it. There could be no reference without a claim—therefore the claim was the first part of the reference. Then as to the question, how could the defendants be damnified by the preparation of a claim? That was quite possible, because the claim might be made an unreasonable one, and they might be put to a great deal of expense in meeting such a claim. The Court said to the plaintiff, You make your claim, but you make it at your own peril, as a check upon you in the preparation of your claim; and he could not see that the defendants should be called upon to pay the expense of preparing the claim, for it seemed to him that they could not separate the claim from the rest of the reference. In conclusion Mr. Wainewright cited the case of the *Peerless* (Pritchard's Digest; page 111; par. 231), in which costs for the reference and of the referent were disallowed.

His Lordship, having heard Mr. Robinson in reply, said he would look up the cases cited. An important question of principle had been raised, and he would give his decision on a future day.

Shanghai, January 22nd.

Reg. *v.* Michael Martin.

The prisoner, who was brought up in custody, was sentenced on the 23rd of July last, to six months' imprisonment, on an indictment for sending a threatening letter to Mr. Alfred Silverthorne, of the Little Astor House. The question of deportation was left to be considered at the expiration of the sentence.

The Judge—Are you able to find security?

Prisoner—I do not know. I did not know it would be wanted.

The Judge—Why not? You know your sentence. The finding of security is the only way in which you can stay here.

Prisoner—Will your Lordship allow me to make it clear to you?

The Judge—What have you to say?

Prisoner—I have been resident in Shanghai for ten years, and this was my first offence. It was committed when I was pressed by unhappy circumstances. I should like to see the Order in Council, as to whether deportation should ensue on a first offence. By an old copy I have seen, it does not appear so.

The Judge—I have nothing to do with the old Order—that is repealed.

Prisoner read over a list of first offences in the old Order for which deportation followed, and then said—My first offence was simply sending a threatening letter, and that is not included.

The Judge—I know; but the old Order, as I have said, is repealed. The Order now stands—"Where it is shown on oath, to the satisfaction of any of Her Majesty's Courts in China or in Japan that there is reasonable ground to apprehend that any British subject in China or in Japan is about to commit a breach of the public peace,—or that the acts or conduct of any British subject in China or in Japan are or is likely to produce or excite to a breach of the public peace,—the Court within the jurisdiction whereof he happens to be may cause him to be brought before it, and require him to give security to the satisfaction of the Court, to keep the peace, or for his future good behaviour, as the case may require. Where any British subject is convicted, under this Order, of any crime or offence, the Court within the jurisdiction whereof he happens to be may require him to give security to the satisfaction of the Court for his future good behaviour. In either of these cases, if the person required to give security fails to do so, the Court may order that he be deported from China or Japan to such place as the Court directs." That is the present Order in Council; the sentence upon you was that you should be imprisoned, and that unless you could find security at the expiration of your sentence for your future good behaviour, you should be deported.

Prisoner—Will your Lordship grant me my liberty so that I may try to find security?

The Judge—I have no power to do anything of the kind. The Order in Council is explicit.

Prisoner—Will you give me only a day to go round and see what I can do?

The Judge—I cannot do anything of that kind. My powers are limited by the Order in Council, which says plainly that the person shall be detained in custody until the time for his deportation shall arrive.

Prisoner—Then what security will be required?

The Judge—I shall require two good sureties in $500 each.

Prisoner—For what time

The Judge—For all time—that is, for the time you remain in China. I cannot release you from custody until the sureties are forthcoming, but you can write to who you like on the subject, and every facility will be given you for doing so.

Prisoner—My brother is at present unfortunately away up country, so I am prevented doing what I otherwise should have had a chance of doing. I should like to make arrangements to leave the country with my wife.

The Judge—I can delay your deportation for a time. When will your brother return to Shanghai?

Prisoner—Not until next Wednesday, I am told, my Lord.

The Judge—Well, then, in that case, you can be brought up again on Friday next.

Prisoner—And in the meantime, if I can get sureties, I can have my liberty?

The Judge—Yes; but they must be two British subjects of good repute and adequate means, each in $500.

Prisoner—Can your Lordship not grant me liberty on my own security, with one other?

The Judge—No; what would be the good? You are a bankrupt, supposed not to have one farthing in the world of your own. No; it must be as I have said.

Prisoner was then removed in custody.

CIVIL SUMMARY COURT.

Shanghai, Jan. 21st.

Before R. A. Mowat, Esq.

Tsang Zing *v.* A. Fergusson.

Claim, $13, *wages.*

Defendant admitted that he owed the plaintiff $11.10, but said that on the 13th inst. a Tls. 10 note was missed from the house, and plaintiff in common with the other servants of the house were told that they would have to find it. Plaintiff immediately ran away, therefore the natural conclusion was that he was the thief. He had never asked for his wages.

Plaintiff said that he was locked in a room and beaten by his mistress, and threatened with a pistol, so he ran away because he was accused of stealing Tls. 10. His clothes had been detained, and were upstairs.

His Worship said there was no proof that plaintiff had stolen the money; if the defendant believed he had, there was a remedy by taking him to the Mixed Court.

Plaintiff—Well, I shall certainly do so; can I have him arrested here?

His Worship—You can give him into the custody of the first policeman you meet.

Defendant—While I am gone, he will disappear. I don't know where he lives.

His Worship—I am not a police officer, and you can hardly expect me to go and look for one for you. I shall, as you admit the amount of $11.10, order that amount with the cost of the summons to be paid into this Court, where it will remain for one week, to give you an opportunity of prosecuting the plaintiff in the Mixed Court; and you must let him have his clothes.

Yü Zu Shing *v.* S. W. Sang.

Claim, $60.50, *money lent.*

This case was called on, but the plaintiff made so much noise in the lobby of the Consular building, that his Worship, to punish him, postponed the hearing, the defendant being content that the hearing should be postponed.

Jan. 22nd.

San-ta-shing *v.* G. Tyler.

Claim $10, *money received by Defendant for and on behalf of the Plaintiff.*

His Honour asked defendant if he admitted the claim?

Defendant replied that he knew nothing whatever of the nature of the claim. He had

made enquiries of the officers of the Court, but could obtain no information on the subject whatever. He now recognized the plaintiff as having been formerly employed as a cook in the gaol.

Plaintiff, cautioned, said through Heding, the Consular interpreter—I was a cook at the gaol for 10 years. I was dismissed on the 17th of last month. I used to receive $7 per month as wages. Four months ago it was reduced to $5 per month. I claim $2 for each of the four months, and $2 for the 17 days of the month I was dismissed.

Defendant said that in July last plaintiff misconducted himself by consenting to be the means of communication between persons outside and the prisoners, for which offence he was disrated in pay. Instead of receiving $7 per month he got $5. But he was so lazy and dirty that eventually he was dismissed.

His HONOUR asked plaintiff why for four months he received the $5 instead of $7, if he thought he was entitled to the higher amount?

Plaintiff said that he did apply to the officers, but was told that Mr. Tyler would not pay him any more.

Defendant said that he joined the Gaol service in Nov., 1873, and on Jan. 1st., 1874, he took charge. The plaintiff had formerly been employed as cook for him (defendant) and the junior constables. The chit coolie also acted as his servant. He disrated the plaintiff in July for misconduct, but he still did the cooking. Both the plaintiff and the chit coolie received extra money from him and the constables for attendance upon them.

His HONOUR asked if the defendant had authority to discharge or disrate any of the servants employed by the Government?

Defendant thought that he had that right; at least he inferred so from the fact that it had been done by his predecessors.

His HONOUR doubted the authority, and expressed his opinion that men paid by Government for public duty should not be converted into private servants.

Judgment for plaintiff for $10 and the costs of the summons.

POLICE COURT.

Shanghai, Jan. 23rd.

Before R. A. MOWAT, Esq.

R. *v.* JOHN BATTISTE.

Stealing a pair of Blankets from the Sailors' Home.

Rehearing—prisoner having petitioned on the ground that when he was tried and convicted he was too stupid, through drink, to know what was going on, or the nature of the charge against him.

CHARLES BROWN, Constable of the Sailors' Home, sworn, stated: About half-past seven o'clock on Sunday last the prisoner came to me for blankets to go to bed, as he did not feel well. I took a pair to his room where the prisoner was in the act of undressing. At eight o'clock I told the boy to serve out the other blankets, less the pair I had already given out; he returned and told me that there were no blankets in the room and no one there. I went to satisfy myself, and then came downstairs. I met a man named Shea, who told me that he had just seen a coloured man going out of the gate with two blankets, one tied-up and the other loose on his arm. I went to look for the man, and also gave information to the constable on the beat near the Home. The blankets have not been found.

By the prisoner—There was no one else in the room when I supplied you with the blankets. Three others also sleep in the same room. It is the first pair of blankets I have missed since I have been constable—that is, from the 12th instant.

By His WORSHIP—I am quite sure there was no one else in the room when I gave him the blankets.

THOS. SHEA, sworn, stated: I am a seaman residing at the Home. On Sunday evening at about eight o'clock I was standing at the gate. I saw the prisoner coming out. He was carrying a red blanket tied-up in a handkerchief under one arm, and another, a green one, on the other. I stopped him and asked where he was going with the blankets. He replied to me, but I could not understand what he said, and then he went down the street. A man named Evans then came up, and I told him what I had seen. He asked if they were his own, and I replied to him, "blest if I know, the blankets have not been served out yet." I then went into the Home, and meeting the constable, told him also what had occurred.

Prisoner here admitted having met and spoken to the witness at the gate, but said that it was his coat and muffler that he had on his arm.

Witness again said that he was quite positive that they were blankets.

Sergeant SKINNER, sworn, stated: I arrested the prisoner at the Sailors' Home on Monday last. Prisoner at first denied the charge, but on the way to the Station he voluntarily made a statement that he had taken the blankets, and would shown me where they were, and that he would have told Mr. Bowen at first, only he spoke so sharp to him. I read the charge to him, and when about to lock him up, he said that he thought he could shew me the house where he had sold them. I went with him, and went to various places, but could get no tidings of them.

Prisoner denied this, and strongly averred his innocence of the charge against him.

His WORSHIP said, although prisoner had stated that he was under the influence of liquor when brought before him on the last occasion, he did not believe it, and was quite sure that he should have noticed the fact, had such been the case. He considered the charge fully proved, and the sentence would now be three months' hard labour, instead of the original one of two months.

MIXED COURT.

Shanghai, Jan. 23rd.

Before GEO. F. SEWARD, Esq., U.S. Consul-General; H. E. the TAOTAI of Shanghai; and Dr. YATES, Interpreter.

CHARLES E. HILL *v.* ESTATE OF YANG TAIKEE.

This case was further resumed to-day, when the case for the defendants was opened by

Mr. DRUMMOND, who said he took the opportunity of returning to the Court some of the documents handed to him by the Consul-General on a previous occasion in connection with the case. The rest of them, five in number, were also there; but he had to ask that one document—a note by the Consul-General—which was in Court on the former occasion, might be returned, as it was not there now.

The CONSUL-GENERAL said that was a note for his own information, and he did not know if it could be put in the case. It was not in the nature of evidence, being simply for his own use.

Mr. DRUMMOND said the document in question was handed to him in connection with the others, and when he looked at it, it appeared to him to be an utter condemnation of the plaintiff's case. He (Mr. Drummond) intended to place great reliance upon it, but he now found it was not in Court.

The CONSUL-GENERAL observed that he did not wish to interfere in the conduct of the case in any way, but if the document was put in, it must be in connection with a statement from him upon it.

Mr. DRUMMOND said he would not have the slightest objection to that.

The CONSUL-GENERAL said with that understanding, he would not object to the document being produced.

Mr. EAMES objected to the production of such a document, as it was not evidence, and especially as other documents had been rejected on former occasions.

Mr. DRUMMOND pointed out that those documents were rejected because they were affidavits of absent persons. The document he wished produced was a note by the Consul-General, who was present.

Mr. EAMES said that did not matter. He considered the note ought not to be produced, and asked, as a right, that his objection to its production might be recorded.

The CONSUL-GENERAL said, of course he did not wish to bias the case in any way. If the document asked for was not in Court, it was with other papers at his office.

Mr. COWIE said it was written on blue paper, and was not in Court.

Mr. DRUMMOND said he would have known nothing about the document if he had not seen it. Would it be produced at some period?

The CONSUL-GENERAL replied in the affirmative, but he could not then send for it, because it was amongst his other papers.

Mr. DRUMMOND said the only difficulty he had, then, was that he hoped to have concluded the case that afternoon, and could not do so without the production of the document.

The CONSUL-GENERAL said if that were so, perhaps it might be obtained, if Mr. Cowie would send a messenger to the office for a box containing papers.

A note was accordingly despatched by messenger for the box.

Mr. DRUMMOND said he now proposed to put in evidence for the defence, consisting of documents supplied from the U. S. Consulate on the former occasion, and including the document marked "C," which was the one that had been sent for. The first paper he would put in was marked "A," and was a letter addressed to the Consul-General by Messrs. Jenkins and Rodgers, the first arbitrators appointed to settle the claims, and included a list of claims approved by them against the Chinese Government, amounting to Tls. 343,590.91, together with their own bill for fees, Tls. 17,900.00, showing a total of Tls. 361,490.91; and amongst the claims so allowed was one by C. E. Hill, of Tls. 12,000. The date was March 3rd, 1863.

Mr. EAMES remarked that this was a peculiar Court, and he had no wish to take technical objections. He might, however, ask why the document just read was not produced in Court when Mr. Jenkins was examined as a witness?

Mr. DRUMMOND replied that he did not then have the document. It had been provided since by the U.S. Consulate, and if Mr. Eames had any objection he could make it now.

Mr. EAMES said the document as it stood made it appear that the amount named in it was the whole of Mr. Hill's claim. It was so at that

The CONSUL-GENERAL said if any explanation was necessary upon any document, he should ask the Tautai to permit the witness to be recalled.

Mr. DRUMMOND, proceeding, said, he would ask that the document "A," should form part of defendant's case, and the only other thing he need refer to upon it was that it had reference to a long list of claims allowed, but the only one the Court need trouble about now was that of the plaintiff.

Mr. EAMES asked if it included the agreement of reference?

Mr. DRUMMOND replied that it did not,—they had not seen it.

The CONSUL-GENERAL said it was among the papers. (He sought for it, and afterwards handed it to Mr. Drummond, who read it.)

It was an agreement come to between Woo Tautai and Geo. F. Seward, as to the settlement of the claims made with reference to the Soonkong Force, of which a settlement was to be made within three months. This document was dated February 2nd, 1862, and was drawn up on the appointment of the first arbitrators.

Mr. EAMES took exception to the date. At the time given, Mr. Hill had no claim.

The CONSUL-GENERAL said the agreement should have been dated February 2nd, 1863—it was evidently a clerical error.

Mr. DRUMMOND said he did not seek to put in that document.

Some conversation of a desultory nature ensued upon the document, and

The CONSUL-GENERAL said they would consider the document put in, as it was a copy in English of the agreement of arbitration.

Mr. DRUMMOND acquiesced, and went on to say, the next document he should submit was one marked "A.A." It was a bill against the Imperial Chinese Government, by Mr. C. E. Hill, for use of the steamer *Keorjeor*, during the month of January, 1863, Tls. 3,000, with a copy in Chinese. The next document "B," was also a bill for use of the *Keorjeor*, from October 1st 1862, to December 31st, 1862, three months, Tls. 9,000, and was approved by H. A. Burgevine. Next would come the paper marked "C," which had not arrived, and the following one, "D," was an affidavit made by C. E. Hill, before the Consul-General, and dated June 19th, 1863, as follows:—

CONSULATE OF THE UNITED STATES,
Shanghai, June 19th, 1863.

CHARLES E. HILL, an American citizen, resident of Shanghai, being duly sworn, deposeth:—

I made a contract with General Burgevine in September last, by which General Burgevine, agent of the Chinese Government, was to take the str. *Keorjeor*, and pay me Tls. 12,000. Papers of transfer were made out, and not delivered, because I did not get the money. The

Mr. Robinson said it arose in this way: Supposing the case had gone against him on the first point, he should have proceeded to show that the vessel was so strained that they could not so repair her as to place her in the condition she was before the collision. A vessel might be so damaged, without sinking, as to become a total loss. The authorities showed that to have been held to be so.

His Lordship—The Registrar would have to consider the value of the ship just before the collision, and at the time immediately after it. The difference in value is what you would be entitled to.

Mr. Robinson—The defendants' contention was that she was so little injured, that the plaintiff had no right whatever to claim the value of the ship.

His Lordship—They would be required to bring evidence as to what it would cost to repair her. They might bring forward 20 witnesses to say they would repair her and put her in good condition for Tls. 100, and that would be the amount you would be entitled to.

The Registrar—The case was never put before us in that way.

Mr. Robinson repeated that he was bound to be provided with the evidence he had mentioned. He would have been guilty of gross negligence if he had not been provided with it, and was at a loss to see how it would have been contested. He came now to the question, "What is included in costs of reference?" He had been taken by surprise by the Registrar taking upon himself to say that it was the fixed rule of the Court that one party should pay the costs of reference, and denied that it was inviolable. He had no opportunity of arguing the point, or he thought he could have shown that the justice of the case was not met in that way. How could it be said the defendants were damnified by a statement of claim? A plaintiff must state his claim—it was demanded by the nature of the case. The expense of getting up the statement was caused by the wrongfulness of the party who was held to blame.

His Lordship—But is he not supposed to state his claim in his petition?

Mr. Robinson—Not in Admiralty.

His Lordship—It would be a convenient way, as then it would be at once known what the claim was.

Mr. Robinson—But the defendant might say, "It is your business to file your claim, and after that I will say whether I will pay it or not." Until the claim had been delivered to the defendants, and until the plaintiff had failed to receive satisfaction for that claim, there was no reference at all. Without it, there would be no necessity for reference. (Williams and Bruce; Admiralty Practice, page 282.) If before reference, a formal tender had been made, the plaintiff would generally be required to pay the costs of reference; but supposing the plaintiff accepted the tender, of course the defendant would have to pay the costs of preparing the claim. In conclusion, Mr. Robinson asked his Lordship's attention to the case of the *Gazelle*, in which Dr. Lushington said, if the settlement of indemnification be attended with expense, the party giving rise to it must bear the cost. Again, in the case of the *Sir George Seymour*, before the same judge, a similar rule was laid down. Upon those grounds, he submitted, he trusted to the satisfaction of the Court, that the costs of preparation of this claim were expenses necessary through the wrongful act of the defendants, for which they ought reasonably to pay.

Mr. Wainewright, in opposing the motion, said with reference to the first point, all he had to say was that in the getting up of this case it was based solely upon the right established in the case of the *Columbus*, which was the right of a man whose ship was sunk, to oblige the man who sunk her to pay the full value of his ship. To charge the defendant with the costs of evidence that was not made use of, the plaintiff's case being a sound one, admitted of no defence. Looking through his friend's whole bill of costs, in the present case, the inference was that he had done something that was not necessary; and he (Mr. Wainewright) thought it was unfair to the defendants that they should be called upon to pay for evidence that was not necessary. It was clear it was never intended to call evidence of that kind, for the bill mentioned only the evidence of an isolated witness. He contended that his friend had failed to show that the decision of the Registrar and Merchants should be altered. With regard to the second point, the Registrar had decided, in accordance with the practice of the Court, that defendants were not to pay the costs of the reference to the Registrar and Merchants. The preparation of a claim was the very first step in regard to a reference; it was, in fact, an integral part of it. There could be no reference without a claim—therefore the claim was the first part of the reference. Then as to the question, how could the defendants be damnified by the preparation of a claim? That was quite possible, because the claim might be made an unreasonable one, and they might be put to a great deal of expense in meeting such a claim. The Court said to the plaintiff, You make your claim, but you make it at your own peril, as a check upon you in the preparation of your claim; and he could not see that the defendants should be called upon to pay the expense of preparing the claim, for it seemed to him that they could not separate the claim from the rest of the reference. In conclusion Mr. Wainewright cited the case of the *Peerless* (Pritchard's Digest; page 111; par. 231), in which costs for the reference and of the referent were disallowed.

His Lordship, having heard Mr. Robinson in reply, said he would look up the cases cited. An important question of principle had been raised, and he would give his decision on a future day.

Shanghai, January 22nd.

Reg. *v.* Michael Martin.

The prisoner, who was brought up in custody, was sentenced on the 23rd of July last, to six months' imprisonment, on an indictment for sending a threatening letter to Mr. Alfred Silverthorne, of the Little Astor House. The question of deportation was left to be considered at the expiration of the sentence.

The Judge—Are you able to find security?

Prisoner—I do not know. I did not know it would be wanted.

The Judge—Why not? You know your sentence. The finding of security is the only way in which you can stay here.

Prisoner—Will your Lordship allow me to make it clear to you?

The Judge—What have you to say?

Prisoner—I have been resident in Shanghai for ten years, and this was my first offence. It was committed when I was pressed by unhappy circumstances. I should like to see the Order in Council, as to whether deportation should ensue on a first offence. By an old copy I have seen, it does not appear so.

The Judge—I have nothing to do with the old Order—that is repealed.

Prisoner read over a list of first offences in the old Order for which deportation followed, and then said—My first offence was simply sending a threatening letter, and that is not included.

The Judge—I know; but the old Order, as I have said, is repealed. The Order now stands—"Where it is shown on oath, to the satisfaction of any of Her Majesty's Courts in China or in Japan that there is reasonable ground to apprehend that any British subject in China or in Japan is about to commit a breach of the public peace,—or that the acts or conduct of any British subject in China or in Japan are or is likely to produce or excite to a breach of the public peace,—the Court within the jurisdiction whereof he happens to be may cause him to be brought before it, and require him to give security to the satisfaction of the Court, to keep the peace, or for his future good behaviour, as the case may require. Where any British subject is convicted, under this Order, of any crime or offence, the Court within the jurisdiction whereof he happens to be may require him to give security to the satisfaction of the Court for his future good behaviour. In either of these cases, if the person required to give security fails to do so, the Court may order that he be deported from China or Japan to such place as the Court directs." That is the present Order in Council; the sentence upon you was that you should be imprisoned, and that unless you could find security at the expiration of your sentence for your future good behaviour, you should be deported.

Prisoner—Will your Lordship grant me my liberty so that I may try to find security?

The Judge—I have no power to do anything of the kind. The Order in Council is explicit.

Prisoner—Will you give me only a day to go round and see what I can do?

The Judge—I cannot do anything of that kind. My powers are limited by the Order in Council, which says plainly that the person shall be detained in custody until the time for his deportation shall arrive.

Prisoner—Then what security will be required?

The Judge—I shall require two good sureties in $500 each.

Prisoner—For what time

The Judge—For all time—that is, for the time you remain in China. I cannot release you from custody until the sureties are forthcoming, but you can write to who you like on the subject, and every facility will be given you for doing so.

Prisoner—My brother is at present unfortunately away up country, so I am prevented doing what I otherwise should have had a chance of doing. I should like to make arrangements to leave the country with my wife.

The Judge—I can delay your deportation for a time. When will your brother return to Shanghai?

Prisoner—Not until next Wednesday, I am told, my Lord.

The Judge—Well, then, in that case, you can be brought up again on Friday next.

Prisoner—And in the meantime, if I can get sureties, I can have my liberty?

The Judge—Yes; but they must be two British subjects of good repute and adequate means, each in $500.

Prisoner—Can your Lordship not grant me liberty on my own security, with one other?

The Judge—No; what would be the good? You are a bankrupt, supposed not to have one farthing in the world of your own. No; it must be as I have said.

Prisoner was then removed in custody.

CIVIL SUMMARY COURT.

Shanghai, Jan. 21st.

Before R. A. Mowat, Esq.

Tsang Zing *v.* A. Fergusson.

Claim, $13, *wages.*

Defendant admitted that he owed the plaintiff $11.10, but said that on the 13th inst. a Tls. 10 note was missed from the house, and plaintiff in common with the other servants of the house were told that they would have to find it. Plaintiff immediately ran away, therefore the natural conclusion was that he was the thief. He had never asked for his wages.

Plaintiff said that he was locked in a room and beaten by his mistress, and threatened with a pistol, so he ran away because he was accused of stealing Tls. 10. His clothes had been detained, and were upstairs.

His Worship said there was no proof that plaintiff had stolen the money; if the defendant believed he had, there was a remedy by taking him to the Mixed Court.

Plaintiff—Well, I shall certainly do so; can I have him arrested here?

His Worship—You can give him into the custody of the first policeman you meet.

Defendant—While I am gone, he will disappear. I don't know where he lives.

His Worship—I am not a police officer, and you can hardly expect me to go and look for one for you. I shall, as you admit the amount of $11.10, order that amount with the cost of the summons to be paid into this Court, where it will remain for one week, to give you an opportunity of prosecuting the plaintiff in the Mixed Court; and you must let him have his clothes.

Yü Zu Shing *v.* S. W. Sang.

Claim, $60.50, *money lent.*

This case was called on, but the plaintiff made so much noise in the lobby of the Consular building, that his Worship, to punish him, postponed the hearing, the defendant being content that the hearing should be postponed.

Jan. 22nd.

San-ta-shing *v.* G. Tyler.

Claim $10, *money received by Defendant for and on behalf of the Plaintiff.*

His Honour asked defendant if he admitted the claim?

Defendant replied that he knew nothing whatever of the nature of the claim. He had

made enquiries of the officers of the Court, but could obtain no information on the subject whatever. He now recognized the plaintiff as having been formerly employed as a cook in the gaol.

Plaintiff, cautioned, said through Heding, the Consular interpreter—I was a cook at the gaol for 10 years. I was dismissed on the 17th of last month. I used to receive $7 per month as wages. Four months ago it was reduced to $5 per month. I claim $2 for each of the four months, and $2 for the 17 days of the month I was dismissed.

Defendant said that in July last plaintiff misconducted himself by consenting to be the means of communication between persons outside and the prisoners, for which offence he was disrated in pay. Instead of receiving $7 per month he got $5. But he was so lazy and dirty that eventually he was dismissed.

His HONOUR asked plaintiff why for four months he received the $5 instead of $7, if he thought he was entitled to the higher amount?

Plaintiff said that he did apply to the officers, but was told that Mr. Tyler would not pay him any more.

Defendant said that he joined the Gaol service in Nov., 1873, and on Jan. 1st., 1874, he took charge. The plaintiff had formerly been employed as cook for him (defendant) and the junior constables. The chit coolie also acted as his servant. He disrated the plaintiff in July for misconduct, but he still did the cooking. Both the plaintiff and the chit coolie received extra money from him and the constables for attendance upon them.

His HONOUR asked if the defendant had authority to discharge or disrate any of the servants employed by the Government?

Defendant thought that he had that right; at least he inferred so from the fact that it had been done by his predecessors.

His HONOUR doubted the authority, and expressed his opinion that men paid by Government for public duty should not be converted into private servants.

Judgment for plaintiff for $10 and the costs of the summons.

POLICE COURT.

Shanghai, Jan. 23rd.

Before R. A. MOWAT, Esq.

R. *v.* JOHN BATTISTE.

Stealing a pair of Blankets from the Sailors' Home.

Rehearing—prisoner having petitioned on the ground that when he was tried and convicted he was too stupid, through drink, to know what was going on, or the nature of the charge against him.

CHARLES BROWN, Constable of the Sailors' Home, sworn, stated: About half-past seven o'clock on Sunday last the prisoner came to me for blankets to go to bed, as he did not feel well. I took a pair to his room where the prisoner was in the act of undressing. At eight o'clock I told the boy to serve out the other blankets, less the pair I had already given out; he returned and told me that there were no blankets in the room and no one there. I went to satisfy myself, and then came downstairs. I met a man named Shea, who told me that he had just seen a coloured man going out of the gate with two blankets, one tied-up and the other loose on his arm. I went to look for the man, and also gave information to the constable on the beat near the Home. The blankets have not been found.

By the prisoner—There was no one else in the room when I supplied you with the blankets. Three others also sleep in the same room. It is the first pair of blankets I have missed since I have been constable—that is, from the 12th instant.

By His WORSHIP—I am quite sure there was no one else in the room when I gave him the blankets.

THOS. SHEA, sworn, stated: I am a seaman residing at the Home. On Sunday evening at about eight o'clock I was standing at the gate. I saw the prisoner coming out. He was carrying a red blanket tied-up in a handkerchief under one arm, and another, a green one, on the other. I stopped him and asked where he was going with the blankets. He replied to me, but I could not understand what he said, and then he went down the street. A man named Evans then came up, and I told him what I had seen. He asked if they were his own, and I replied to him, "blest if I know, the blankets have not been served out yet." I then went into the Home, and meeting the constable, told him also what had occurred.

Prisoner here admitted having met and spoken to the witness at the gate, but said that it was his coat and muffler that he had on his arm.

Witness again said that he was quite positive that they were blankets.

Sergeant SKINNER, sworn, stated: I arrested the prisoner at the Sailors' Home on Monday last. Prisoner at first denied the charge, but on the way to the Station he voluntarily made a statement that he had taken the blankets, and would shown me where they were, and that he would have told Mr. Bowen at first, only he spoke so sharp to him. I read the charge to him, and when about to lock him up, he said that he thought he could shew me the house where he had sold them. I went with him, and went to various places, but could get no tidings of them.

Prisoner denied this, and strongly averred his innocence of the charge against him.

His WORSHIP said, although prisoner had stated that he was under the influence of liquor when brought before him on the last occasion, he did not believe it, and was quite sure that he should have noticed the fact, had such been the case. He considered the charge fully proved, and the sentence would now be three months' hard labour, instead of the original one of two months.

MIXED COURT.

Shanghai, Jan. 23rd.

Before GEO. F. SEWARD, Esq., U.S. Consul-General; H. E. the TAOTAI of Shanghai; and Dr. YATES, Interpreter.

CHARLES E. HILL *v.* ESTATE OF YANG TAIKEE.

This case was further resumed to-day, when the case for the defendants was opened by

Mr. DRUMMOND, who said he took the opportunity of returning to the Court some of the documents handed to him by the Consul-General on a previous occasion in connection with the case. The rest of them, five in number, were also there; but he had to ask that one document—a note by the Consul-General—which was in Court on the former occasion, might be returned, as it was not there now.

The CONSUL-GENERAL said that was a note for his own information, and he did not know if it could be put in the case. It was not in the nature of evidence, being simply for his own use.

Mr. DRUMMOND said the document in question was handed to him in connection with the others, and when he looked at it, it appeared to him to be an utter condemnation of the plaintiff's case. He (Mr. Drummond) intended to place great reliance upon it, but he now found it was not in Court.

The CONSUL-GENERAL observed that he did not wish to interfere in the conduct of the case in any way, but if the document was put in, it must be in connection with a statement from him upon it.

Mr. DRUMMOND said he would not have the slightest objection to that.

The CONSUL-GENERAL said with that understanding, he would not object to the document being produced.

Mr. EAMES objected to the production of such a document, as it was not evidence, and especially as other documents had been rejected on former occasions.

Mr. DRUMMOND pointed out that those documents were rejected because they were affidavits of absent persons. The document he wished produced was a note by the Consul-General, who was present.

Mr. EAMES said that did not matter. He considered the note ought not to be produced, and asked, as a right, that his objection to its production might be recorded.

The CONSUL-GENERAL said, of course he did not wish to bias the case in any way. If the document asked for was not in Court, it was with other papers at his office.

Mr. COWIE said it was written on blue paper, and was not in Court.

Mr. DRUMMOND said he would have known nothing about the document if he had not seen it. Would it be produced at some period?

The CONSUL-GENERAL replied in the affirmative, but he could not then send for it, because it was amongst his other papers.

Mr. DRUMMOND said the only difficulty he had, then, was that he hoped to have concluded the case that afternoon, and could not do so without the production of the document.

The CONSUL-GENERAL said if that were so, perhaps it might be obtained, if Mr. Cowie would send a messenger to the office for a box containing papers.

A note was accordingly despatched by messenger for the box.

Mr. DRUMMOND said he now proposed to put in evidence for the defence, consisting of documents supplied from the U. S. Consulate on the former occasion, and including the document marked "C," which was the one that had been sent for. The first paper he would put in was marked "A," and was a letter addressed to the Consul-General by Messrs. Jenkins and Rodgers, the first arbitrators appointed to settle the claims, and included a list of claims approved by them against the Chinese Government, amounting to Tls. 343,590.91, together with their own bill for fees, Tls. 17,900.00, showing a total of Tls. 361,490.91; and amongst the claims so allowed was one by C. E. Hill, of Tls. 12,000. The date was March 3rd, 1863.

Mr. EAMES remarked that this was a peculiar Court, and he had no wish to take technical objections. He might, however, ask why the document just read was not produced in Court when Mr. Jenkins was examined as a witness?

Mr. DRUMMOND replied that he did not then have the document. It had been provided since by the U.S. Consulate, and if Mr. Eames had any objection he could make it now.

Mr. EAMES said the document as it stood made it appear that the amount named in it was the whole of Mr. Hill's claim. It was so at that

The CONSUL-GENERAL said if any explanation was necessary upon any document, he should ask the Tautai to permit the witness to be recalled.

Mr. DRUMMOND, proceeding, said, he would ask that the document "A," should form part of defendant's case, and the only other thing he need refer to upon it was that it had reference to a long list of claims allowed, but the only one the Court need trouble about now was that of the plaintiff.

Mr. EAMES asked if it included the agreement of reference?

Mr. DRUMMOND replied that it did not,—they had not seen it.

The CONSUL-GENERAL said it was among the papers. (He sought for it, and afterwards handed it to Mr. Drummond, who read it.)

It was an agreement come to between Woo Tautai and Geo. F. Seward, as to the settlement of the claims made with reference to the Soonkong Force, of which a settlement was to be made within three months. This document was dated February 2nd, 1862, and was drawn up on the appointment of the first arbitrators.

Mr. EAMES took exception to the date. At the time given, Mr. Hill had no claim.

The CONSUL-GENERAL said the agreement should have been dated February 2nd, 1863—it was evidently a clerical error.

Mr. DRUMMOND said he did not seek to put in that document.

Some conversation of a desultory nature ensued upon the document, and

The CONSUL-GENERAL said they would consider the document put in, as it was a copy in English of the agreement of arbitration.

Mr. DRUMMOND acquiesced, and went on to say, the next document he should submit was one marked "A.A." It was a bill against the Imperial Chinese Government, by Mr. C. E. Hill, for use of the steamer *Keorjeor*, during the month of January, 1863, Tls. 3,000, with a copy in Chinese. The next document "B," was also a bill for use of the *Keorjeor*, from October 1st 1862, to December 31st, 1862, three months, Tls. 9,000, and was approved by H. A. Burgevine. Next would come the paper marked "C," which had not arrived, and the following one, "D," was an affidavit made by C. E. Hill, before the Consul-General, and dated June 19th, 1863, as follows:—

CONSULATE OF THE UNITED STATES,
Shanghai, June 19th, 1863.

CHARLES E. HILL, an American citizen, resident of Shanghai, being duly sworn, deposeth:—

I made a contract with General Burgevine in September last, by which General Burgevine as agent of the Chinese Government, was to take the str. *Keorjeor*, and pay me Tls. 12,000. Papers of transfer were made out, and not delivered, because I did not get the money. The

original understanding was that if the purchase money was not paid by 1st. Jan. 1863, the vessel was to receive charter money at Taels 3,000 per month, and all bills paid. I now render an account for the charter money, and Messrs. Thos. Hunt & Co. render an account for articles supplied and alterations. The alterations were made by order of General Burgevine. The charter money is for 3 months at Tls. 3,0 0—Tls. 9,000, and one month under General Holland, same rate, making Tls. 12,000.

General Burgevine approved the first account, and General Holland wrote me a letter stating that during January the vessel was in the Chinese service, that she was under his orders, and that she was the most useful vessel he had.

Before me

GEO. F. SEWARD,
U. S. C.
C. E. HILL.

The document "E," next in succession, consisted of a letter from the Consul-General to Woo Tautai, dated October 13th, 1863, containing the terms of the second arbitration determined upon by them, in which the arbitrators appointed were Messrs. Edward Cunningham and Thomas Hanbury, the matters submitted to them being the various claims against the Chinese Government or Woo Tautai, on account of the Ward Force, the Ward Estate, the *Keorjeor* steamer, and the account of E. J. Benson, Quartermaster General. The object of this arbitration was, as the letter stated, the closing up of the whole business named, and it was therefore expressly agreed that what the arbitrators said should be final, and binding on either party; that the claims which should be declared just by them should be paid by the Tautai within fifteen days from the time the decision was made; and that those claims which were declared not just, or unsupported, should be dropped by the Consul, and never brought forward again. The document "F" was Woo Tautai's answer to the preceding, on October 18th, and intimated among other matters, that he had put his seal to the agreement. The following document, "G," dated 18th January, 1864, gave the result of the second arbitration, and contained two inclosures, one of claims allowed, the other of those disallowed. He (Mr. Drummond) would only put in those disallowed, which would be found in document "H," and included that of C. E. Hill, the plaintiff, for Tls. 12,000. What he (Mr. Drummond) had already said with regard to those documents, would enable the Court and Counsel on the other side to follow what remained for him to say.

Mr. EAMES called attention to the understood arrangement, that all argument in the case was to be submitted in writing.

Mr. DRUMMOND said this was not argument, —he was going to make an application. With reference to "A," he thought he had given sufficient information; if not, he would ask Dr. Yates to interpret to the Tautai its purport.

The CONSUL-GENERAL said it had already been explained that all those documents had been translated, and were in the Tautai's office.

Mr. COWIE asked that Dr. Yates might give the Tautai the meaning of the documents before Mr. Drummond made his application, so that the Court might be reminded of the effect of them. It was possible the Tautai might not have seen them all.

The CONSUL-GENERAL consenting,

Dr. YATES commenced to interpret the meaning of the documents to the Tautai.

The TAUTAI said he had no recollection of any document with regard to the first arbitration, but he remembered very distinctly the appointment of Messrs. Cunningham and Hanbury.

Dr. YATES interpreted, by desire, why the award of the first arbitrators was set aside and a further one agreed to.

Mr. DRUMMOND next adverted to document "D," (the letter given above), and was about to comment upon it, when

Mr. EAMES offered a suggestion. He thought the Court understood why the claim was put in for Tls. 12,000—it was clearly explained in the plaintiff's testimony, and had no bearing upon the present claim.

Mr. DRUMMOND then passed on to the other documents above-mentioned, and asked that the Tautai's attention should be called to the list of claims disallowed by Messrs. Cunningham and Hanbury, amongst them being that of the plaintiff.

Dr. YATES accordingly did so.

Mr. DRUMMOND further called attention that in the list of disallowed claims, there was also an item, on account of the *Keorjeor*, by Thomas Hunt and Co., of Tls. 895.78, as well as the plaintiff's claim.

The TAUTAI said that four of the items disallowed at the second arbitration were on account of the *Keorjeor*.

Mr. DRUMMOND was not aware that there were four disallowed.

The TAUTAI said there was one by Colley and Lambuth, of Tls. 90 odd, but he could not remember the fourth.

Mr. DRUMMOND went on to say that at this stage of the case, he should simply ask the Tautai to dismiss it without listening to any further evidence at all. He based his application upon the documents he had submitted. His application was that the case should be dismissed against Taikee entirely.

Mr. EAMES repeated his observation that it was understood there was to be no argument.

Mr. COWIE said there would be no argument, it was merely an application.

Mr. EAMES said it would be likely to lead to argument, because he could not allow such an application to go by default. It seemed to him to be a palpable evasion of the understanding arrived at previously, and that his friend was seeking to take the case out of the hands of the Court.

Mr. DRUMMOND repudiated such an intention.

At this moment, the messenger returned from the U. S. Consulate, with the box before mentioned, and the document alluded to having been produced,

The CONSUL-GENERAL said—This is the memorandum for which you apply. It is a private document, and I do not see what it should be introduced here for. It cannot possibly be understood without being taken in connection with my statement.

Mr. EAMES asked if it would not be better to have the memorandum translated together with the statement, so as to enable both to go before the Tautai at one time?

The CONSUL-GENERAL decided to make his statement now, and at once proceeded with it. He said — Mr. Hill's affidavit was taken by me after the first arbitrators had made their award, and I had begun the discussion with Woo Taotai with regard to the claims in connection with the Ward Force. Whenever a claim was disputed by the Taotai, and it seemed to me necessary, I called the claimant before me and took his sworn statement of his case. That was the way Mr. Hill's statement was made—the statement of June 19th, 1863. I have in my hand a memorandum of my own, dated July 11th, 1863,—the year date is not given here, but I know it from the connection—which is simply a memorandum for my own information. This memorandum is to be read with Mr. Hill's affidavit, which shows that this claim of Tls. 12,000 was made on a contract, alleged to have been entered into between Mr. Hill and General Burgevine. Upon the statements contained in that affidavit, I did not hesitate to say that there was nothing to bind the Chinese Government, because I did not regard General Burgevine as qualified to make charters for steamers. At the same time, there was the fact that the steamer was used by the Force. This memorandum reads, "I am of opinion that the Government should pay a fair charter. I have no authority by Mr. Hill to say that he consents to a reduction of his claim, yet I think it impossible to require more from the Chinese Government than a fair charter. All the circumstances considered, it cannot be required"—(that means, legally required)—"to pay anything; but as the vessel was used and was of service, I should, as an Arbitrator, decide that a fair and reasonable amount should be allowed. I have talked the whole matter over with the Taotai, and he has strenuously refused to allow anything." It is to be understood that this memorandum has reference simply to a claim for Tls. 12,000 against the Chinese Government through Woo Taotai, and was written without knowledge on my part that there was a charter-party with Taikee or anybody else. I had not referred to this document when I made the previous statement here, and had utterly forgotten its existence. It has now refreshed my memory on certain points, and if any questions are put to me upon this statement, I am prepared to reply to them.

Mr. DRUMMOND—There is one question I would like to ask. You stated that at the time you wrote the memorandum, you had only Mr. Hill's claim and affidavit before you, and that you had no knowledge of a charter-party from Taikee to Hill. Have you ever seen or heard of one, since the commencement of this case?

The CONSUL-GENERAL—I do not remember seeing a charter-party, but I remember looking for it a long time afterwards, when Mr. Hill complained of the loss of his papers from the U. S. Consulate. It is not easy to remember all the matters connected with events so long ago. There has been no concord between myself and Mr. Hill throughout the case. I was proceeding one way, on what I believed a full statement of his case. He was going another way, and never explained to me why.

Dr. YATES interpreted the purport of all this to the Taotai.

Mr. DRUMMOND—The claim of Mr. Hill being against the Chinese Government and not against Yang Taikee, there was nothing to bring to your knowledge that there was a claim against Yang Taikee.

The CONSUL-GENERAL—I knew at a later moment that there was a claim made by Mr. Hill against Yang Taikee; it was this claim, while through me he was claiming against the Government, that I could not understand.

Mr. DRUMMOND.—The prayer of Hill's petition is that the claim is made through the Consul-General against Taikee and the Chinese Government.

Mr. EAMES said it must be borne in mind that the petition was drawn up by Hill himself, and was a statement to his Consul. But the whole thing is coming into Court.

Mr. DRUMMOND—Then it is not clear at the present time against whom the claim is made?

Mr. EAMES—Yes—we are going against the estate of Yang Taikee.

Mr. DRUMMOND—Then up to the time mentioned in the petition, there appears to have been no claim excepting that against the Chinese Government. You said that when Mr. Hill was taking steps through you against the Chinese Government, he was also taking steps himself against Yang Taikee?

The CONSUL-GENERAL—There was nothing done by Mr. Hill through me against Taikee. I do not know whether it was lack of logic on my part or on his part, that I did not get at his case, The double-headed nature of his case has led to a great deal of the delay that has occurred.

Mr. DRUMMOND—Then I shall next draw your attention, with reference to these remarks, to the passage in your letter to the Taotai, in which you undertook that what claims were considered by the second arbitrators to be unjust or unsupported, should never be brought forward again. That was the understanding?

The CONSUL-GENERAL—Yes.

Mr. DRUMMOND—That is, as against the Chinese Government?

The CONSUL-GENERAL—Yes, that was my agreement, as against the Chinese Government.

Mr. DRUMMOND—Then you consent to their being brought forward in this case as against Taikee, as being a different matter?

The CONSUL-GENERAL—I never had anything to do with Taikee in the matter of those claims, with the exception of the claim as to General Ward's estate. I never knew that Taikee had any official position, but regarded him simply as a kind of compradore, transacting ordinary business for Woo Taotai.

Mr. DRUMMOND—I might also ask, if your memory will serve you,—it is a very long time ago—whether it ever occurred to you at that time that this claim could have been bought forward at any time as against Taikee's private estate?

The CONSUL-GENERAL—It was never brought before me in connection with Taikee. I learned, but only at a late moment, when the Force was under Colonel Gordon's command that Mr. Hill had sold his steamer to Taikee. I supposed it was in consequence of this sale that he was pursuing Taikee.

Mr. DRUMMOND—And it only came to you by hearsay, and in Colonel Gordon's time, that he had sold the steamer to Taikee?

The CONSUL-General—Yes, by hearsay, and in Colonel Gordon's time.

Mr. DRUMMOND—That disposes of the point as to the claim being brought forward a second time. It makes it clear that it is a claim now against Taikee solely, and not against the Chinese Government. That claim you undertook should not be renewed.

The CONSUL-GENERAL—I by no means intend to say that the claim would not lie

against the Chinese Government still. I do not by any means say that my action would bar a proceeding against the Chinese Government now. The Taotai Wao did not carry out the terms of the arbitration, and the claims awarded have not yet been paid.

Mr. DRUMMOND—Then it amounts simply to this, that by his petition in the present case, Mr. Hill claims for the charter and use of the *Keorjeor* from June, 1862, to August 1863, a period of fourteen months right through, without break, and asks for judgment against Taikee's heirs to make them pay the full sum with interest; and he also swears that, in the very middle of the term, in September 1862, he makes a contract with General Burgevine to sell her for Tls. 12,000, and that he was to have Tls. 3,000 per month for chartering her if that amount was not paid, the months charged for being October, November, and December, 1862, and January, 1863—those four months being in the very middle of the fourteen months for which he swore he had chartered his vessel to Taikee alone. Those two statements, I submit, cannot possibly be true.

The CONSUL GENERAL.—We agreed to have no argument in Court. If you have anything to put to the Taotai, now is the time to do so.

Mr. DRUMMOND—Then, upon that, I ask that he shall dismiss the case without taking any further evidence.

The CONSUL-GENERAL—Let this application be interpreted to the Taotai, with the addition that I think we require to take all the evidence in the case, to enable us to arrive at a fair and just decision. I consider that to grant such an application would be unjust.

Mr. COWIE.—I should add that I quite concur in the application made by Mr. Drummond, and I think the case should now be dismissed.

Mr. EAMES asked if Mr. Drummond and Mr. Cowie represented different parties?

Mr. COWIE—No, we represent the same defendants.

The CONSUL-GENERAL—This is a thing I never knew before. The Counsel who speaks does so for himself and his associates. I cannot consent to have the application put with such emphasis, and I think that the application is one that cannot be acceded to. We cannot take upon ourselves to decide such a case so arbitrarily.

Mr. DRUMMOND—I have taken the step usual in an English Court.

Mr. EAMES—It appears to me that my friend on the other side is endeavoring by a palpable effort to set aside the arrangement made as to the conduct of the case.

The CONSUL-GENERAL directed Dr. Yates to ask the Taotai if he was disposed to decide the case upon the evidence at present taken, or to go on.

The TAOTAI said the evidence ought to go on until they knew all that both sides had to say. (He at once called a Chinese witness forward.)

Mr. EAMES said that Dr. Jamieson had been in Court for some time, and perhaps it would be convenient to examine him first.

This was acceded to, and

Dr. R. A. JAMIESON, examined by Mr COWIE, deposed—I am a physician and surgeon practising in Shanghai. I was in Shanghai in the years 1862 and 1863. I remember the rebels were then in this neighbourhood. I remember the Force called Ward's Force. It was organised for the purpose of driving the rebels out of the Province. I saw Taikee once only. I cannot say positively what was his connection with the Force. I believed he was paymaster of the Force. It was notorious at the time that he was so acting. I remember that Woo was Taotai during the early part of the time. I only know it by hearsay, and not by my own knowledge. I have always understood that the management of the Force was in Woo's hands, but that Taikee had the payment of it. I remember some foreign steamers were used in connection with the Force, and that the *Keorjeor* was one of them. I do not know if she was chartered by the Government. I know she was used in connection with the operations of the Force. I do not believe that Taikee held any official rank. I remember the capture of the *Keorjeor*; I was on board her a few minutes before she was captured. She was captured by a party headed by Burgevine and a man named, I think, Jones. I had no reason to think that if she had been lost, it would have been a loss to Taikee. When she was blown up it was regarded as a loss the Government would have to bear—that was my impression.

By Mr. EAMES—I have only stated common report, nothing of my own knowledge. I did not actually see her captured, but saw her five minutes afterwards, going down the creek, and also saw Burgevine on board. It was on the 1st or 2nd August, 1863—on a Sunday.

FOO-E-TCHOO, cautioned, deposed—I am agent and rent-collector of the late Taikee's estate, and have been employed by Taikee's family for 27 years. Fourteen years ago, when the rebels were threatening Shanghai, Yang Taikee was head of the establishment. Woo was then Taotai of Shanghai. Taikee was at that time acting as manager of Woo's outside business with foreigners, leasing steamers and things of that sort, Woo not being able to speak English. Taikee was not the agent of the Taotai, who used him only as a means of intercourse with foreigners. When steamers were used for the suppression of the rebellion, along with the "Ever-Victorious Army," Woo Taotai was the master, and Taikee only his mouthpiece. The steamers were chartered, and the Taotai signed the charter-party. I have never seen Woo Taotai affix his stamp to any charter. Taikee had no official seal, he used his own in all private business transactions, but not in chartering steamers. Taikee did not sign charter-parties. I remember all of the steamers' names, but know nothing about the *Keorjeor*. I do not remember that steamer. I do not remember taking any part in the transactions about the steamers, but used to hear Taikee talking about them as to which were good and which were bad. I knew Ward and Burgevine, and that they had no authority to lease a steamer unless the Taotai gave the order to do so. After the suppression of the rebellion, all Taikee's small straggling books and papers in connection with the Force were sent into the city for settlement by Woo. The larger accounts were settled by Taikee, the money being handed over by Woo to him for that purpose. Taikee died at Shanghai in the 4th year of the present reign,—about 1865. Woo Taotai died in the 11th year of the present reign,—in 1873.

By Mr. EAMES—I am 48 years old, and have been for 27 years in Taikee's service in Shanghai. I was at first godown keeper, next had charge of accounts, receiving and paying money. Was never book-keeper. I used to go out sometimes, but was with Taikee every day, and think I should have known if he had ever signed charter-parties. I was not shroff, nor compradore, nor book-keeper. I was a sort of manager; no particular name. I had charge of silk and other goods as they came in or went out. I was not a general manager, there were three or four above me. When the Taotai came to visit Taikee, I used to hear their conversation. There was a special man to attend about the steamers; I had nothing to do with it. The Taotai bought the *Hyson*, through Taikee, for a despatch-boat. The Taotai came to Taikee, and said he wanted the *Hyson* purchased. I do not know the plaintiff, I have never seen him before.

By the TAOTAI—I never heard of any charter of the *Keorjeor*, nor ever knew anything of her.

By the CONSUL-GENERAL—Taikee had no steamers of his own. I do not remember the *Martin White*. The *Tawah* was owned by General Ward and Taikee together.

LEE-WAY-SAN examined by Mr. COWIE, deposed—I belong to Ningpo, and am manager to the pawnbroker outside the North Gate Shanghai. At the time of the rebellion, I was book-keeper with Taikee. There were others above me. I was in the counting-room. The "Ever-Victorious Army" was inaugurated by Woo Taotai, and Taikee did business for it. There were several foreign steamers in connection with the Force. They were chartered by the Taotai. Taikee never chartered any. I remember the names of some of the steamers, but not all of them. I do not remember the *Keorjeor*. Taikee used to often ask me about the chartering of steamers, but I do not remember his asking about the *Keorjeor*. Taikee never used any official stamp; he had his own proper stamp, which was affixed to any important document in which he was concerned. It had four characters. That stamp was always in my charge. It was impossible for one man always to be present. There were three or four others who could use the stamp, but I was generally present. Taikee was a business man, and if he did not know of anything done at the time, he knew afterwards. I do not know the plaintiff. Taikee never spoke to me about this claim. After Taikee's death, parties came to see his widow about the steamers. She did not pay them, because she said the obligations never existed.

By Mr. EAMES—I never saw Woo stamp any charter-parties. I should not know Woo's stamp if I saw it. I have been stating not what I know of my own knowlege, but what should be in all business transactions. Taikee partly owned the *Tawah* and *Martin White* in conjunction with General Ward. That was in 1861 or 1862. The *Hyson* was purchased by the Taotai, and Taikee had nothing to do with it. I do not remember who chartered the *Firefly*. The two bills of Tls. 5000 each on account of the *Tawah* and of the Force, paid to Mr. Hill, I have no recollection of paying myself. I remember Dr. Yates coming to collect this claim. That was in the the fifth or sixth year of the present reign.

By the TAOTAI—Previous to the death of Taikee, I never heard of claim on account of the *Keorjeor*, nor that she was chartered. I never knew that she was used with the "Ever Victorious Army."

By the CONSUL-GENERAL—I never heard any conversation as to the charter-party of the *Keorjeor* between Taikee and Ward. No one came to me to make claim immediately after the death of Taikee. The *Tawah* was used to some extent. I do not know whether the claim on account of the *Martin White* was paid. There was no charter party for the Martin White and *Tawah*. I do not remember that I ever opened a book of Taikee's and saw an entry of Tls. 8,500 for the sale of the *Keorjeor* to Taikee by Mr. Hill. I never heard of any such sale.

This closed the defendant's case.

Mr. EAMES submitted two affidavits as to the loss of the charter-party for the *Keorjeor*. He said be believed they were admissible in any Court of Justice. They were the affidavits of Messrs. Lewis and Rodgers.

Mr. DRUMMOND objected to their being put in, unless the witnesses could be called for cross-examination.

Mr. EAMES would not press the matter, but it was customary in Courts of Admiralty or where loss of life occurred by fire, or in any case of loss of or destruction of documents, to receive affidavits as evidence; and he could not understand why the rule could not be extended to a case like this.

It was called to Mr. Eames's recollection that the Taotai, at an earlier part of the case, had expressed his unwillingness to receive this evidence.

Mr. EAMES asked that as Dr. Yates was conversant with the details of the case, he should be called to the stand to make the statement previously alluded to.

The CONSUL-GENERAL preferred that Dr. Yates should not examined, being of opinion that from the position both he himself and Dr. Yates filled in the Court, it would have been better if his (the Consul-General's) statements could have been avoided.

It was arranged that the arguments of Counsel on both sides should be submitted in writing, in English and Chinese, on Monday, the 1st proximo.

The Court then rose.

Miscellaneous.

TROUBLES IN THE TAICHOW PREFECTURE.

About ten days ago, we noticed the occurrence of a serious popular outbreak at Teentai, in the prefecture of Taichow. The following account of a rather formidable rising in the previous year, given by F. W. White, Esq., Commissioner of Customs at Ningpo, in the last volume of Reports on Trade, shows that the state of this part of the country has been very unsatisfactory for a long time past.

The long continued drought in the summer, which I have elsewhere referred to as causing the almost entire destruction of the Rice crops, both first and second, in the neighbourhood of Ningpo, was also the cause of much distress in other parts of the province, and, notably, in the

Shao-hing department, where it may be said to have been directly the cause of a somewhat serious disturbance which broke out in the Sinch'ang district in the latter part of June. It appears that in the month of April the Acting Governor at Tai-chow-fu, being apprehensive that some of the lawless people of the district over which he presided might have taken refuge in the border districts of the two departments of Taichow and Shaohing, requested the magistrate of Sinch'ang to cause investigation to be made to ascertain whether the "Mên-p'ai," or door-certificates affixed to the door of each family, gave the proper returns of the number of inhabitants, and, in this way, detect if any bad characters were being harboured. The task of carrying out these instructions (which reached Sinch'ang in June,) devolved on a member of the gentry named Yang Yü-ch'ow, who lived in the country close to the Yen hills, some 80 *li* south of the city of Sinch'ang. In order to carry out his work, Yang Yü-ch'ow required an office and a staff of clerks and writers, and he fixed on the family temple of one Chên-kia, as a convenient place for his purpose. The latter would not, however, consent to either lend or let the temple, whereupon Yang Yü-ch'ow took possession of it by force, on the plea that it was wanted for Government service. From the first, the people had looked with an unfavorable and suspicious eye on the new home examination scheme, feeling that they were suspected of dishonesty, or that, otherwise, it was merely a pretence to extort money or service from them. This feeling of distrust was at once fanned into a flame by Yang Yü-ch'ow's high-handed action, and the sympathy expressed for the Chên family was loud and open. Chên-kia, as the head of his family, felt constrained to make some public protest against the forcible occupation of his ancestral temple, but, while he was yet thinking the matter over, a well-known and influential leader of banditti, named Wang Chi-ch'êng, appeared on the scene, and so worked on Chên-kia's already excited feelings, that, at the head of a large crowd, they adjourned to the temple and ejected its occupants, killing in the mêlée a shupan named Shun K'oshao, who ventured to resist them. Yang Yü ch'ow was, fortunately for himself, absent, or he would, doubtless, have shared the same fate; as it was, the excited mob levelled his house to the ground. Yang Yü-ch'ow, hearing of the disturbance, sought refuge in the magistrate's yamên, and complained that "the people had risen," although he, naturally, abstained from mentioning his own share in the matter. The magistrate, acting on this information, sent out officers to quell the disturbance, and at the same time issued a proclamation stating that Chên-kia alone was responsible for the riot, and that no blame would attach to others if they delivered him up. The contents of this proclamation were no sooner public than the people rushed off to arrest Chên-kia, whom they found in his own house, somewhat anxiously waiting the issue of events. Whilst he was considering what course to follow, his former adviser, Wang Chi-chên came up to him, and prompted him to the following speech addressed to the crowd:—

"The magistrate promises you pardon if you deliver me up! He is only taking advantage of your ignorance, knowing you to be simple country people. Let me be given up, and you will also be punished. After all, what have we to fear? When the Rice riot occurred (some years ago) what did the authorities do? Nothing!! and this is far less important." This speech intimidated his auditors, and they anxiously asked what they should do. He replied: "We will take to the hills, and, guarding the approaches, protect ourselves from injustice and oppression."

Arrangements were then at once entered into for the collection of money and arms. Those who contributed readily were unmolested, but refusal to grant the insurgents' demands was severely visited, and what was required was taken by force. The insurgents then retreated to the neighbouring hills, and joined themselves to the local banditti, the combined forces amounting to about 8,000 men. Intelligence of this was promptly sent to the departmental city of Shaohing, and the military commandant there lost no time in moving to Sinch'ang, at the head of 3,000 men. On the 8th July he was joined by Kung Chia-chin, Governor of Shaohing, and an offensive movement was then made against the insurgents, who were strongly encamped amongst the Yen hills. The troops, however, were driven back on Sinch'ang, and daily harassed by the enemy, who kept up an incessant series of attacks; and the position of the city became an alarming one. Urgent appeals for help were sent both to Hangchow and Ningpo, and from the former place were sent 400 men, and from the latter 1,300 men—1,000 of which were Hunan braves belonging to the Hangchow garrison. The day on which the Hunan braves left Hangchow for Sinch'ang, under the command of Chung Chin-ch'ü (formerly Taotai of Ningpo) the insurgents made an attack on the city, but the troops kept their ground, and succeeded in repulsing them, with a loss of 30 killed and wounded, and 20 prisoners. Amongst the latter was one of the chief leaders, named Tang Chi-sin. This partial success inspirited the troops, and being joined, a few days after, by the braves from Hangchow, a combined forward movement was executed against the insurgents' stronghold, and, after a sharp struggle, the troops achieved a decisive success, having completely routed the enemy, who fled in all directions. The chiefs escaped southwards, it is supposed, to Kinhwa, and the movement, so formidable for a time, was completely broken up. For his action in the commencement of the affair the magistrate of Sinch'ang had been removed, and succeeded by an officer named Shih Yü-ch'i. After the above decisive affair quietness was soon restored, but there were still many refugees in the hills, who were afraid to return, and whilst they continued unpardoned the magistrate was afraid that an element of future trouble also remained; he accordingly took an escort of 50 men and penetrated into the hills, when—partly by persuasion, partly by threats—he induced all the disaffected to throw down their arms and resume their allegiance. Peace was thus restored about the middle of August, (the exact date is wanting) after two months and a half of disorder and anxiety. I am not aware that many suffered for their complicity in this outbreak, although it is probable that such of the ringleaders as were taken with arms in their hands were summarily executed.

Clippings.

Notwithstanding that the small-pox is still raging in Tokei with almost unabated virulence; that deaths among the foreign or Eurasian population take place every day; that no fewer than seventeen or eighteen foreigners have been stricken with the malady; that the Ecole Militaire has indefinitely prolonged the usual holidays; the authorities of the Go-Gakko still maintain that their recent action in refusing to close the school was justified. Considerable indignation exists at this determined opposition to the ordinary rules of sanitary science, and it is not impossible that further action will be taken. On Saturday morning studies were resumed at the Kaisei-Gakko, Go-Gakko and Eigo-Gakko, the latter being a new school composed of the English department of the Go-Gakko. As is usual, the resumption of studies was made the occasion of the meeting of the officials of the Mombusho and foreign professors at *déjeuners* given in the repective schools.—*Tokei Journal.*

Some months ago it was hinted in the journals that an Assembly was to be formed from the ranks of the *kahoku* or nobility of Japan; but unfortunate circumstances prevented the immediate assembly of the body, added to which, the intense hatred of Shimadzu Saburo to all works of progress or advancement, threw additional obstacles in the way of founding this institution, which really promises to be a very valuable addition to the legislative power of the Government. Most of the members of the Assembly are young gentlemen who accompanied Iwakura on his ambassadorial mission, and who have specially fitted themselves for the discussion of matters concerning the welfare of the country, by diligent study of the various institutions, social and commercial, found in Europe and the U. S. At length, after some considerable trouble, the Assembly has secured the authorisation of the Government, and meetings will be held in Nagata-machi, the assembly itself being styled the Kazoku Kuwai Kanjo, and numbering at present some two hundred members, Mr. Daijo being the Director, Mr. Akizaki Councillor, and Mr. Yamamichi Secretary. The objects of this Assembly are to discuss all matters of social and commercial importance to the welfare of the country, all political subjects being excluded; and though its numbers are as yet small, it is expected that they will be largely increased so soon as the inaugural session shall have been opened. Besides holding regular sessions, the Assembly proposes to found a school for instructing youths in English, French and German, and a periodical which, besides publishing reports of the sessions, will discuss the topics introduced from an independent basis. There is little question that such an Assembly will, if its labours be rightly directed, be able to work great good to the country, and from the energy which its members now display, we may augur that its career will be one of prosperity and success.—*Tokei Journal.*

COMMERCIAL INTELLIGENCE.

SHANGHAI, JANUARY 27TH, 1875.

ARRIVALS.—The M. M. str. *Tigre*, and the P. & O. str. *Hydaspes*, the latter bringing the London mails of 12th ul The cargo of the *Cassandra*, from Hamburg, has been brought on here from Hongkong by the S.S. *Amoy*.

TELEGRAM.—By that dated London 22nd instant, *Cotton* had advanced to 8d. for *Mid. Orleans;* but *Lead* declined to £24 per ton for W.B.; and *Discount* had fallen to 3½ per cent. The quotations for *Shirtings* and *Iron* st at 9s. 9d. and £10.

PIECE GOODS.—The early part of this week was distinguished by large settlements of *Drills* in fulfilment of the orders from JAPA in anticipation of heavy requirements for the NORTH when the season opens, the latest advices overland from TIENTSIN having rep an advance of 2 candareens per piece in the value of the article, and the native holders there all but cleared out. Cheap-priced l English were sought for at first, but there being few in hand, or at least few sellers under Tls. 2.35 *a* 2.36, buyers turned their attent 14-lbs. Cloth, and the sales since last mail-day, which well informed natives assert amount to 40,000 pieces, consist of that weight p pally. Ruling rates have been Tls. 2.33½ *a* 2.36 per piece for 15-lbs., and Tls. 2.30 *a* 2.31 for 14-lbs., the latter figure being the clo quotation for Mendel's *Pillar* chop, and holders firm for a further improvement. Business to the extent of 2,000 pieces in *Dutch D* of fair quality at Tls. 2.29, free of brokerage is reported, and for a lot of *Dragon* chop—good—Tls. 2.34 has been declined.

Grey Shirtings.—Speculation has been the motive power in these also, and considerable purchases of fair to good medium chops of 8½ have been made below the rates current for last mail, viz., Tls. 1.94 *a* 1.95 for Mendel's *Hand and Branch*, Tls. 1.89 *a* 1.90 for Dewhu *Eagle*, Tls. 1.80 for Dewhurst's *Red Pheasants*, and Collie's best *Lion*, Tls. 1.72 *a* 1.75 for the grades next under the last named make Tls. 1.59½ *a* 1.60 for C.P.H. *Peacock* Chop. Sales 65,000 pieces. *Heavy Shirtings* apparently possess the confidence of the dealers, have bought January shipments of Dewhurst's *Eagle* "to arrive" at Tls. 2.61 per piece. Cheap 7-lbs have occasionally been asked and 6-lbs. have been dealt in at Tls. 1.30 *a* 1.30½ per piece, the higher quotations being for 5,000 pieces of Dewhurst's *Red Pheasants*.

T-Cloths.—Some little demand for 14×16 square and Mexican 7-lbs. has prevailed, and although it cannot be described as active, sel more especially of the better classes, have extorted a further slight rise from the dealers—Mendel's *Hand and Branch* quality ha realized Tls. 1.50 per piece. Sales of ordinary Mexican cloth at former quotations, viz., Tls. 1.30 *a* 1.33 and Tls. 1.38 per piece, are made. The lower counts of 7-lbs. are low in stock, and not in great supply afloat apparently, consequently the value of such is maintained. 8-lbs. have received rather more notice of late, and, judging from the sale of a small parcel of Mendel's *Hand and Bra* at Tls. 1.75 per piece, the market wears a strengthening aspect. Of 6-lbs. it is unnecessary to speak; there has been nothing d principally because there is hardly any cargo in hand. Sales of all weights estimated at 25,000 *a* 30,000 pieces.

White Shirtings.—The desire for fine *White Shirtings* noticed last week still continues, but buyers of floating cargo, and of necessity must be connected with such, there being none here, get accommodated on the old terms, viz., Tls. 2.60 *a* 3.30 per piece for 72 *a* Reeds. These rates evidently are profitable to sellers, and hence probably their willingness to supply the demand. Latterly there been renewed enquiries for 64 Reed, and a small business likewise at former rates has taken place.

Jeans and Sheetings.—Nothing to report. Holders of *Jeans* are inviting offers.

Fancy Cottons.—Considerable sales of blue *Handkerchiefs* and of *Turkey Red Shirtings* have been effected; the former at a slight adva on previous rates, but on the latter buyers have obtained the advantage rather.

Woollens.—The death of the Emperor of China, news of which sad event reached Shanghai on Monday morning last, has had a stirri effect here, and the keen competition for *White, Black* and *Gentian Camlets, Lastings* and *Lustres*, the signs of the national mourning, already raised the value of these articles considerably. On the other hand, *Scarlet* and the other colors, which cannot be worn, are discount, and will probably remain so for a hundred days or so after the Imperial edict announcing the death has been promulgate The following were among the transactions reported yesterday:—1,300 pieces *Black Camlets* at Tls. 12.50 *a* 13 00 per piece, being a in the quotations of the previous day of about 6 mace per piece. 700 pieces of *Black Lastings* at Tls. 9.75 *a* 10.25 per piece, and 500 pie of *Black Lustres*, Plain at Tls. 3.80 *a* 3.90, which is an advance of 5 cand. *a* 1 mace per piece. For an inferior *Gentian Camlet* an offer Tls. 12.50 per piece was yesterday declined. The same cloth was unsaleable at Tls. 12.00 a few days ago; and the buyer of some floati *Scarlet Lastings*, settled at Tls. 13.00 per piece, has been making anxious enquiries as to their probable date of arrival. The native own of *Scarlet Long Ells* are likewise shewing signs of uneasiness, and of a desire to realise. C.P.H. *Scarlet* is barely quotable at Tls. 7. to-day. The only transaction in *Long Ells*, reported since last mail-day, is 740 pieces U. U. at Tls. 7.12½ per piece. For *Figured Orlea* of suitable color a better feeling exists.

Stocks.—On the 22nd instant the Chamber of Commerce published the Returns of Stocks of *Piece Goods* and *Metals* in Foreigners po session here on 31st ultimo. It is reproduced below, and is compared with the Stocks as returned for 1873. The comparison, even makin ample allowance for goods held by those firms who have not made any returns, as a rule favors the 1874 table. To-day, statistics, basi the Stocks upon the list issued by the Chamber of Commerce, are resumed, and it is hardly necessary to add, that, under the circumstance the stocks at date must be headed "estimated."

METALS.—*Nailrod Iron.*—No further business from first hands is reported, and the trade generally appears quiet, while ample supplies, here and on the way, are against any revival in prices. *Lead.*—Scarcely any enquiry from native sources, and prices closing weak. As to speculation, it is pretty well finished at present, and a confirmation of the telegram of the 22nd instant will probably settle it entirely. There has been, and is still some trouble amongst the speculators for delivery during this month. The market rate of a particular day seems to be the stumbling block. To-day's quotations are purely nominal. *Tin.*—Only a retail business to report, prices being unchanged. *Copper* remains as last quoted, without any enquiry, and the market for other metals is also quiet, and quotations unaltered.

ENGAGEMENTS.—*Velocity*, Br. bq., 490 tons, Monthly Charter, 4 *a* 5 months, no lay days—$1,600 per month; *Deogaum*, Br. bq., 447 tons, Nagasaki to London, no lay days—Private terms; *Georgina*, Br. bq., 222 tons, Nagasaki and back, no lay days—$2.45 per ton coal; *Sally*, Br. bq., 296 tons, Nagasaki and back, 14 lay days—$2.40 per ton coal.

COTTON.—Although business seems to be daily decreasing, the quotations of last week still hold. As formerly, the chief buyers are the Yangtsze dealers, and their purchases consist of best staple only. JAPAN seems to be out of the market entirely, and of the Southern ports, CANTON is the only one for which anything respectable has taken place.

EXCHANGE.—Rates looked firmer two days ago, Bank paper being procurable at 5s. 9d. while documentary paper was sold at 5s. 9½d. At the close however Credits can be placed at 5s. 9½d., and documents are held for 5s. 9⅝d. On India, the rate is 301½ nominally, but no business has been reported. On Hongkong the Banks quote 26½ *a* 26⅝, with but little done.

EXPORTS.

TEA.—Our export to date, as compared with that of last season, is :—

To Great Britain—Black	Excess	6,283,332	lbs.
,, ,, —Green	Excess	1,402,459	,,
To United States—Black	Excess	854,964	,,
,, —Green	Deficiency	3,787,589	,,

Shipments to date have gone forward as under :—

To Great Britain (per Steamer)	50,594,071	lbs.
,, ,, (per Sailing Vessel)	24,152,588	,,
To America (per Steamer)	10,047,390	,,
,, (per Sailing Vessel)	5,862,476	,,

Black.—There have been no settlements during the fortnight, and the unsold stock (against *no stock* in 1874) is estimated at 450 chests.

Green.—A fair business has been transacted during the past two weeks, and we cannot report any marked change in the position of our market. Fine lines of Teenkai and Moyune have been taken at Tls. 43 *a* 53, and country Teas generally have attracted attention, the lowest settlement reported being Tls. 20 for a chop of Fychow. Our stock is still considerable and largely in excess of that of last season ; it will also be noticed that the Export to England has increased rapidly of late, and is now as large as the total for last season.

					Against 1874.
Settlements—Fychows, Teenkais and Moyunes	23,700	½-chests.	Stock,	62,300 ½-chests.	8,157 ½-chests.

	15,909,866 lbs.	18,842,491 lbs.	22,764,976 lbs.

Total Export to Great Britain from all China is as follows:—

	1874-75.	1873-74.	1872-73.
From Shanghai to date	74,746,659 lbs.	67,060,868 lbs.	71,991,750 lbs.
,, Foochow to 2nd Jan.	59,805,269 ,,	52,916,648 ,,	50,863,674 ,,
,, Canton to 4th Jan.	18,555,161 ,,	14,796,041 ,,	19,162,698 ,,
	153,107,089 lbs.	134,773,557 lbs.	142,017,698 lbs.

HANKOW.—We have nothing further to report since the date of our last.

SILK.—Home public telegrams report a limited business doing in silk in London, at steady prices, and quote Red Peacock nominally worth 15s. 0d. per lb. The export of silk since last date, has been 623 bales for London, 1,194 bales for the Continent, 481 bales for New York, and 60 for India, &c., giving a total of 2,358 bales for the fortnight. For the French mail (which closed on the 21st) a large business was transacted, reported at 1,600 bales, for which the following prices were said to have been paid :—

	Per picul.	Per lb.	Per kilo.
Cock and Worm Chop, Nos. 3, 3½ & 4 Tsatlees	395, 370 & 340	19/6, 18/4, 16/10	Tls. 54.45.51.10,47.00
Ku Kee's "Kin Jan." and Kin hock	347½ & 320	17/2 & 15/10	Tls. 48.00 & 44.30
Black Lion, Nos. 3 and 3½	345 & 325	17/1 & 16/1	Tls. 47.70 & 44.95
Blue Elephant	330	16/4	Tls. 45.65
Red Peacock	315 & 317½	15/7 & 15/9	Tls. 43 60 *a* 45.10
Yellow Elephant and Green do.	305 & 280	15/2 & 13/17	Tls. 42.25 & 38.90
"Tung Sen's" "Lan Ling"	292½	14/6	Tls. 41.20
"Ting Chan Kee's" "Vun Yuen"			
"Tae-ho's" "Pang Ling" Kahing Taysaam	315	15/7	Tls. 43.60
"Ching-yuen-sing's Gua-ling" do. do.	310	15/4	Tls. 43.00

During the past week the settlements are estimated at 1,500 bales, giving a total of 3,100 bales settled for the fortnight, which is the largest business transacted for some time past. Amongst the most notable of the late purchases may be mentioned :—

	Per picul.	Per lb.	Per kilo.	
"Yah-kee" chop, Nos. 3, 3½ and 4 Tsatlee	397½, 372½, 347½	19/8, 18/6, 17/0	54.60, 51.30, 47.60	joint account.
Dancing Bear Nos. 1, 2 and 3 ,,	350, 330, 310	17/4, 16/4, 15/4	48.50, 45.70, 43.00	,,
Blue Elephant ,,	332½	16/6	45.90	
Red Peacock ,,	322½	15/11	44.60	
S.S S. Dollar ,,	297½	14/9	41.10	

Late purchases of chops show a slight advance, while on the contrary, market kinds are pressed for sale at somewhat lower prices, though the inferiority of nearly all silk now on offer more than counterbalances the slight concession in rates. These large settlements have decreased the unsold stock to 5,700 bales. A good demand existed for the American mails of the 13th and 20th, and fully 450 bales of *re-reeled* silks found buyers at Tls. 335 *a* 440 per picul for Hainings, and Tls. 340 *a* 410 per picul for Tsatlees. A few small parcels of *raws* were taken at Tls. 405 *a* 417½ for Tsatlee chop 3, and Tls. 310 *a* 315 for No. 2 Kahing Taysaams.

COMMERCIAL POSTSCRIPT.

January 28, 1875.

Arrivals.—(Not given above)—January 25th, German barque *J. H. Jessen*, from Sydney; 27th, British steamer *Priam*, from Liverpool.

Departures.—Jan. 25th, Am. ship *Golden State*, for New York, *viâ* Foochow.

The English mail steamer *Gwalior* takes about 1,600 bales of Silk.

Exchange.—On London, Bank Bills, 6 months' sight, 5s. 8¾d. *a* 5s. 9d. First-class Credits to Bank, 5s. 9¼d. *a* 5s. 9⅜d. First-class Private buyers, 5s. 9⅛d. Private and Documentary, 0s. 0d. On Paris, Bank, Frs. 7.25. Private, Frs. 7.32½. On India—Bombay Bank Rs. 302 *a* 303. Calcutta Bank, Rs. 302 *a* 303. On Hongkong, Bank Bills, demand, 26½ per cent. discount. Private, 15 days' sight, 26 Gold Bars, Tls. 173.20. Bar Silver, Sh. Tls. 111.25. Mexican dollars, Sh. Tls. 74.00 per 100. Carolus dollars, Sh. Tls. 80.50 per 10 Copper cash, 1,650 per tael.

Shares.—Messrs. J. P. Bisset & Co. report:—

Hongkong & Shanghai Banking Corporation.—Immediately after the issue of our last report, cash sales were made at 1½ % prem., a several lots were placed at 3 % prem. for March; but these rates were not maintained, sales having shortly afterwards been made at ½ prem. and at par. Sellers now offer shares at 1 % discount, and buyers offer 2 % discount.

S. S. N.'s.—With the exception of a few sales last week at Tls. 79½ cash, and Tls. 82 for March, little or nothing has been done in th stock. The market closes weak, with sellers at Tls. 78½.

Marine Insurance Shares.—*Japans* have advanced to Tls. 82 cash, with buyers. *Chinese Insurance* have been in good demand. A fe shares were placed at 190 *a* 192 some days ago, but sales have just been concluded at $196. *Yangtszes* are wanted at Tls. 580.

Fire Shares.—Business has been done in *Victorias, Chinas* and *Hongkongs* at quotations, and all these stocks are in demand.

Hongkew Wharf Company.—Cash shares are wanted, but shares are on offer on time.

We have had very fine winter weather during the week—cold, but sunny. Thermometer has ranged from 25 min. to 43 max.

SHANGHAI, THURSDAY, FEB. 4, 1875.

RETROSPECT OF 1874.

Green Tea.—On reference to the second paragraph of our retrospect of last year's business, we cannot but marvel at the report we have now to present to our readers, it being for the most part a recital of continuous losses and disastrous results to all concerned in the Trade.

At the close of season 1873-74, profits were advised on October and November shipments of 3d. *a* 4d. per lb. These advices had the usual effect of bringing forward extra supplies of the leaf, which being shipped off at the equivalent of London rates, —on the advanced scale—met a reacting market, and lost heavily. Some expectation was formed, therefore, that opening rates of the current season would be reasonable; the moderate stocks held in London and New York also afforded some confidence to operators at this time.

The increasing popularity of Japan Teas in America has stimulated their production considerably; so much so, as to interfere seriously this season with ordinary calculations regarding the shipments of Green Tea from this Port. The preference now given to steamers for early shipments direct to

the States, caused such an excess in the supply at an early period, that the results were simply ruinous, further impetus being given to the downward course of the market by Importers forcing off their Teas *without reserve*. This state of affairs in America had its effect upon the London market, and many shipments were realized there which were originally intended for New York.

Stocks in London were exceedingly moderate on the arrival of New Pingsueys, but any advantage to be derived therefrom was entirely dissipated by the dreary prospect in America, combined with the excessive quantities offered without reserve immediately on arrival. To the present time, the London market has gradually declined with remarkable consistency, and at the latest dates shews no signs of reaction. On the other hand, the American market [illegible] presumably to the prospect of a duty being imposed, and we think in some measure to a long pause in arrivals. Still, it has not more than reached the level of the English market, and although the advance amounts to the equivalent of about Tls. 6 per picul, quotations continue to shew a loss on shipments of first crop fine grades of Moyunes, Teenkais and Pingsueys.

Musters of New Pingsueys were shewn in bulk about the 20th June, and buying almost immediately commenced, much to the surprise of the natives, at prices some three to four taels above their anticipations, and certainly beyond what they could possibly expect from the position of the consuming markets; anxiety to secure early arrivals by first steamers in New York and London being the incentive to buyers. The decided improvement in the liquoring qualities of the teas, seemed such as to entitle them to a good reception by the Home Trade. This however, was more than counteracted by a general want of style and an unevenness of colour. A strong and advancing market was reported until the departure of the Pacific Mail of July 3rd; then a somewhat easier tone caused a decline of Tls. 2 per picul. The fact of there being two large steamers on the berth direct for New York, again induced firmness and a slight recovery from the decline in prices.

About the second week in July, a few Taiping and were Hoochow Teas were offered, and eagerly taken at fully last year's prices; the quality was improved in liquor, while in the leaf signs of hasty manipulation were apparent. At the close of the month, the arrivals were 40,000 half-chests in excess of the previous season; settlements being only 50,000 half-chests against 40,000 half chests, leaving the exceptionally heavy stock for this early stage of the season of 50,000 half-chests, against 21,000 half-chests. The new Teenkais and Fychows began to arrive on the 23rd July, and a chop was immediately settled at the extreme quotation of Tls. 47 per picul; the quality of these teas was good in the cup, and decidedly superior in make and appearance.

During August, the market declined 2 to 3 taels, leading to a large business for London and America. Moyunes arrived towards the close of the month, and met with eager competition, at rates on a par with the previous year; the quality was of a fair average. Telegraphic advices of first sales of Pingsueys in New York caused these grades to be neglected, except by a few sanguine operators for the London market.

In September, prices gradually declined, until a fall of fully Tls. 5 was established on all grades. Settlements were again heavy, although far behind supplies, the latter coming to hand with conspicuous rapidity; leaving a stock on the 20th of 73,000 half-chests, against 35,000 half-chests.

The export to [illegible] stood at 3,500,000 lbs., against 5,300,000 lbs., and to America 6,750,000 lbs., against 2,350,000 lbs.

Later, the favorable position of London statistics attracted buyers for that market, which arrested somewhat the decline consequent upon the extreme depression advised from New York, where the new imports were losing an average of 10 cents per lb.

The opening of October presented less disparity between supply and demand. Arrivals had fallen off considerably, and thus verified to some extent the Native reports of an unusually early season. A large business was reported the first week or two, at rather firmer prices. Before the close, however, the market receded Tls. 2 per picul, on account of advices giving bad news and serious losses all round. Pingsueys were left in the shade during the month.

Of November, there is little to remark, beyond a small but steady business—without change in prices—chiefly for London, that market being comparatively higher than New York. From the latter, the losses reported were in many instances 12 to 15 cents on Teenkais, and 20 cents on Pingsueys.

In the first week of December, a crisis appears to have been reached in New York, influencing this market to such an extent that Moyunes, Fychows, and Teenkais were bought on more favorable terms than has been known for years, the reduction from the opening of the season being from 8 to 10 taels per picul. This continued until the 13th, when Reuter telegraphed "New York market firmer," giving a stronger tone, and this was followed by a rapid rise in New York quotations to the extent of 10 cents from the lowest point. In the meantime holders here gained confidence, and with the aid of some hurried transactions for the Pacific Mail, succeeded in establishing a rise from the lowest point of two to three taels on common to medium, and four taels on fine to finest. The year closed with a strong although not very general demand, and an appearance of considerable firmness. Pingsueys remained neglected, owing to the enormous losses still advised from all the consuming markets.

Stocks 93,000 half-chests, against 33,000 half-chests.

The lateness of the present season compels us to halt here in our review, which is professedly of the year rather than of the season. In previous years the crop has been sold off earlier, and writing some weeks after the close of the year we have been able to give a complete sketch of the season's operations. This year however large stocks still remain; and we must close our review somewhat abruptly with the end of December's operations.

Summary of News.

The French mail of the 20th December, arrived yesterday, by the M.M. steamer *Amazone*.

A mail left for America on the 2nd inst. by the P. M. str. *Costa Rica*.

A mail leaves to-morrow for Europe by the M. M. str. *Tigre*.

The following telegrams only have reached us during the week.

The Powers are intervening to avert the Turco-Montenegrin conflict; nevertheless a collision is apprehended. The Porte has consented to the trial of Montenegrins by a mixed tribunal sitting at Montenegro.

Prince Leopold is better.

Garibaldi is at Rome, where he met with an enthusiastic reception.

Obituary—Kingsley; Lord St. Leonards.

Mr. Bright, at Manchester, has urged the policy of disestablishment.

[illegible] German Minister at Japan.

Mr. Bristowe has submitted his estimate to Congress, proposing the reimposition of the Tea and Coffee Duties.

The Chinese New Year opens on Saturday next; but it is likely to be shorn in this case of much of the usual festivity, on account of the Emperor's death. At any rate, overt rejoicing is forbidden, as shown by the following account of the customary proceedings in China, on the death of an Emperor:—

The "sorrowful proclamation," or official announcement of death, is not published until after the receipt of the "joyful proclamation," or announcement of accession. The proclamations are sent to the Generalissimos, Viceroys, and Governors of the several Provinces, and these in their turn make the contents known to their respective subordinates, instructing them to select a proper time and place for performing the necessary ceremonies. These being chosen, the officials collect in plain clothes (black, and free from colors or embroidery), and read out the announcement of accession. They then proceed to the temple dedicated to the Imperial presence, where they go through the ceremonials of court congratulation. This done, they select another public locality, where, dressed in mourning, they open and read the announcement of demise and solemnize the funeral service, which has to be repeated three successive days,

ace in the morning and once in the evening. The officials then wear mourning for twenty-seven days, keeping their heads unshaven for that period, and refraining from marrying or giving in marriage for 100 days, and from official music for one year. These intervals all reckon from the date of receiving the proclamations.—As regards the people, they are expected to wear mourning, the men as regards caps, the women as regards head ornaments. For twenty-seven days they may not shave, for thirty days they may not marry, and for 100 days all music is to be stopped.

A proclamation very much in this sense was posted on Sunday in the City and at the Mixed Court, announcing the death of the Emperor and giving orders as to the details of mourning to be observed. A translation will be found on another page.

It is said that Fêng, the new Taotai of Shanghai, was directed to take up office at once because, had he delayed till the period of mourning set in, it would be necessary to delay until it was over.

The A. D. C. gave their 42nd performance on Saturday evening. A full critique will be found elsewhere.

The fifth ball given by the Mih-ho-loong Fire and Rifle Company, came off at the Club on Tuesday night, and was in every respect a great success. A full account will be found elsewhere.

A meeting of the French Gas Co. was held on the 29th January. The account showed a profit on the year's working of Tls. 8,642. A divident of 11 per cent will absorb Tls. 4,180, Tls. 4,321 are placed to Reserve, and Tls. 141 carried forward.

We are sorry to find the Committee of the Eurasian school lamenting the want of adequate support. The fees, more purposely fixed at a very low rate in order to encourage attendance, and in the belief that sufficient numbers would be thus attracted to render the institution self-supporting. Up to a certain point the progress was encouraging, but the increase has not been maintained as the Committee were entitled to hope. The present number of scholars is, we believe, 31, and though the progress made by them has been satisfactory, disappointment is very naturally expressed that a much large number do not avail themselves of the institution. In principle, we quite agree with Mr. Hanbury that it is preferable the school should be worked as a public institution; but the Committee find themselves unable to do this without the public support for which they appeal.

Particulars will be found on another page of an attack made yesterday by some villagers near Kung-wang on an American gentleman, Mr. C. E. Hill. The men seem to have been excited by an old woman who was irritated at the prospect of a favourite pond being filled up by the works of the new road. Mr. Hill fortunately escaped without serious hurt.

A fire occurred on Thursday night, on the bank of the Defence Creek, at the upper side of the French Settlement. A Chinese bamboo-built dairy and out-buildings, the latter being filled with straw, had from some unexplained cause caught fire, and burnt with an intensity that destroyed them before the French fire-engines could get to the spot. The greatest danger lay in the proximity of some other Chinese houses, towards and on to which the wind carried quantities of the burning straw, but fortunately without setting them on fire. The Chinese authorities showed a somewhat unusual appreciation of the event, by turning out a strong guard of soldiers, fully armed with rifle, bayonet, &c., but each carrying the inevitable lantern, used on this occasion, presumably, to see their way to the blazing buildings.

The usefulness of the local electric telegraph was strikingly exemplified on the occasion In a very short time after the alarm bells were rung, the Hongkew detachments of the Fire brigade were ready to move, the Hook and Ladder Company had in fact started, and were toiling up the steep ascent of Hongkew Bridge, when the message was telegraphed that their services were not required. They were thus saved a long and useless journey.

We have received the Shanghai Customs Trade Returns for the last quarter of 1874, and abstract some of the principal figures. 457 vessels, measuring 311,865 tons, entered, against 451, measuring 292,615 tons, in the corresponding quarter of 1873; but only 440, measuring 296,640 tons, cleared against 491, measuring 323,436 tons. 124 in each case were sailing ships, the remainder steamers.

The import of Grey Shirtings shows a falling off from 910,918 pieces to 824,502; while T-Cloths show a slight increase from 348,058 to 356,709; the figures being however in this case less than a third of those shown in the corresponding quarter of 1871 and 1872. English Drills stand at 116,900 against [illegible] decrease is also notable in American and Dutch kinds. Sheetings, Chintzes, Velveteens and Handkerchiefs also show a falling off. Turkey Reds figure for 31,700 against 13,600. Woollens shew a total decrease of 10,000 pieces, Long Ells, Figured Lustres, Stripes, and Cloths having each fallen off; while Lastings show a considerable increase.—The import of iron was 65,895 peculs against 17,189; but that of lead only 4,952 against 17,731.—The marked increase of 4,000 chests occurs in opium; Coal, on the other hand, both native and foreign, showing a very marked decrease. There is a large increase in both import and export of Beancake; a considerable decrease in both import and export of Tea; Silk standing at nearly the same figure. The import of Brown Sugar fell off, while that of White more than trebled; the export of both shows a decrease.

There is again a decrease under nearly all heads in Internal Transit; except in that of Silk and Wool for export. The total Revenue for the Quarter was Tls. 828,636 against 931,434. The decrease is spread over every item except outward transit passes; the falling off in tonnage dues was nearly Tls. 10,000.

A motion is fixed for hearing at H. B. M.'s Supreme Court on Monday, before Sir Edmund Hornby, that is calculated to solve a somewhat important point in legal jurisdiction in China and Japan. It is well known that the Tientsin Treaty provides a tribunal for the adjudication of differences between British subjects and Chinese, in the shape of a Court presided over by the Consul and Taotai, who jointly investigate matters brought before them. But subsequently to this Treaty, the Order in Council (1865) was framed, establishing law courts entirely different from the treaty tribunal above-mentioned, and independent of the treaty. The latter court, being more perfect in organisation, and in accordance with English practice, has been exclusively resorted to by litigants. But the Order in Council not having interfered with the provisions of the Treaty of Tientsin in this respect, the Treaty tribunal still exists, and the two Courts are therefore, liable to clash in their jurisdiction. It is also well known with what laxity the Chinese officials enquire into matters of difference between persons of their nationality and foreigners. The motion that is to be argued in the Supreme Court is in reference to a suit heard at Foochow, before a Mixed Court composed of H.B.M.'s Consul in conjunction with H.E. the Taotai there. The suit was brought by Kwo-fuh Tih, master and owner of the junk *Kiu'tsai*, against G. D. Pitman, master of the steamer *Kwangtung*, agent for Douglas Lapraik & Co., and others, owners of the steamer. Mr. Wainewright, solicitor for the defendant, will move the Supreme Court either to declare the judgment of the Mixed Court to be null and void, or to direct the Consul to rehear the suit, in the manner provided by the Order in Council, or to remove it for hearing into this Court. Under the circumstances detailed above, the interest of the motion will appear to lie in the fact of the Judge having to consider the conflict of authority which at present might seem to the uninitiated to exist between the two tribunals; and the motion might definitely set at rest any doubt on the point.

The usual Summary of Mixed Court business will be found on another page.

At the Police Court on Monday, a somewhat unusual charge of robbery was investigated. Two young fellows, an able and ordinary seaman of the British ship *Corona*, were charged with stealing 400lbs. of fat, the skimmings of the ship's coppers. They took the fat, which was contained in two barrels, out of the fore-peak of the vessel on Saturday night, and sold it to a Chinese in Hongkew, bearing the euphonious name of "Buffalo," for $4.50 per barrel. The Chief Officer, on being questioned, said the oleaginous compound belonged to the owners of the vessel, and that he had sold two similar barrels of it in New Zealand, by the authority of the captain, for 25*s.* each. The defence was unique. It was to the effect that the fat was the produce of the boiling of the pork and beef served out as food to the crew, that it was part of the food of the crew, who, if they had chosen to do so, might have gone to the coppers and skimmed it off for themselves; and that, although it was skimmed off by the cook, and put into barrels, it did not belong either to owner or captain, but remained the property of the crew—in this case the

more especially as the cook of the vessel (who was discharged in New Zealand for drunkenness) had saved it, expressly by arrangement with the captain, for sale, the money to be divided among the crew. Mr. Mowat declined to solve this knotty or, rather, greasy point without an interview in Court with the captain. Everything else apart, the case is one which shows the necessity of a more perfect understanding between the captains, officers, and crews of merchant vessels as to the ownership of the refuse of food actually handed over for the men's consumption, and which they might have eaten if they could only have swallowed it.

The possibility of the establishment in Shanghai of a special agency for a purely Japanese line of steamers, plying between this port and Yokohama, to which we drew attention on the 20th ult., appears to have become an accomplished fact. Until further notice, one of the vessels of the "Mitsu-Bishi Steam Navigation Company" will be despatched every Wednesday for Nagasaki, Hiogo, Simonoseki and Yokohama. The Company appear to possess at present only four vessels, the *Tokio-maru* (late *New York*), the *Kanagawa-maru* (late *Madras*), the *Tokai-maru* (late *Acantha*), and the *Luzon*. The times for the despatch of the vessels from Yokohama are not yet notified, but we are informed that more complete arrangements are pending, and will be shortly published.

We understand that shippers of green tea to America, by the *Costa Rica*, escape the duty which is likely to be reimposed. Her bills of lading are dated the 31st January, which is the last day of exemption. Cargo under bills dated the 1st February will be charged.

The Danish barque *Korsor*, which left this port on the 27th, bound for Hongkong, has put back with damage to rudder, sustained by touching the ground during her passage down the river. She is now upon the hard at the Pootung side of the river, effecting the necessary repairs.

The *Ngapuhi*, which since 1862 and until very recently had done duty as Harbour-master's hulk, is now being broken up by her purchasers (Chinese) on the bank of the river at Pootung.

We are informed that the weather on the coast, although fine, has been exceedingly cold, the hills round Foochow and all the way up to this port having been covered with snow since the 23rd inst. Twenty-four hours before the *Costa Rica* left Nagasaki, a severe snowstorm was experienced at that port. The *Costa Rica*, when in Kü Channel, (80 miles from Hiogo), passed and spoke a German barque with her main and mizenmasts gone by the board, but although he proffered assistance, none was required.

The s.s. *Ocean*, while steaming down the river on Friday afternoon, came into collision with the C. N. Co.'s steamer *Ichang*, moored in mid-stream off the French Bund, and caused some slight damage to the rails, stanchions, and woodwork of the upper deck of the latter.

The barque *George Washington* was sold at auction on Friday, by Messrs. L. Moore & Co., for Tls. 2,960. The vessel was bought by the China Merchants' Co., to be made into a hulk, for use at Chinkiang we believe; and the sails, included in the above price, were sold to Mr. Reeves for Tls. 210.

The Treasury Department at Washington has issued a circular in the interests of American ships likely to pass through the Suez Canal; pointing out that the Government of Turkey and the Suez Canal Company have adopted the suggestions of the International Tonnage Commission held at Constantinople in 1873, "in regard to the "unification of tonnage and the deduction "of one franc per ton from the regular "Canal dues in the case of vessels which "are measured according to the Moorsom "system now in use" in the United States. To avail themselves of this arrangement, ships must be provided with a special certificate exhibiting the gross tonnage of the ship and the deduction therefrom authorised by the regulations of the Commissioners. The circular specifies what are these deductions, and contains a form of the certificate required to be signed—in America by the Collector of Customs, in a foreign country, we presume, by the U. S. Consul.

Foreigners who from past experience or present position know something of the inner working of Chinese officialdom, have not hesitated to declare that the agitation of the Formosan question was kept up an undue length of time, in the provinces at any rate, simply with the object of reaping the rich harvest of fresh squeezes which the imminence of war formed the excuse for exacting. Something apparently confirmatory of this view of the case comes to us on excellent authority. The Governor of Kiangse, anxious it is said to show his activity in preparing for the emergency of war that seemed likely to spring from the difficulty with Japan, imposed new taxation in his province which brought in about half a million taels to his treasury before the pacific termination of the affair. Oppressed with this *embarras de riches*, the Governor is now employing a portion of it in the purchase of arms and munitions, among the latter being five million percussion caps, an order which ought to clear the foreign market of these explosive and exploded articles. It is reported that he also intends to fortify the mouth of the Poyang Lake—presumably against sampans and teaboats; and both these patriotic operations will no doubt afford a wide field for jobbery. If, writes our informant, the money thus collected in this and other provinces had been fairly appropriated to meeting the late war preparations, China might have been saved recourse to the unnecessary and somewhat humiliating expedient of raising a foreign loan. Every one in power seems, however, to do the wrong thing. Foreign representatives are the last persons to hear of such matters; the Customs officials appear to have no influence to advise what is right; and there is an absence of homogeneousness in the government of this vast and wealthy empire which is nowhere more apparent than in the mal-administration of its fiscal affairs. In a country possessed of such ample means of its own, the small foreign loan recently contracted appears to be more an evidence of weakness than of wisdom on the part of its counsellors.

The influence of the Empresses-Dowager (of Hien-fung) in the Peking Court has decided the Imperial election in favour of a son of the Prince of Chun. The Prince of Chun is seventh son of the Emperor Taokwang, and his son is therefore of the same generation as the deceased Monarch. A more natural selection would have been the grandson of either the Prince of Tun or the Prince of Kung, both of a generation next to the late Emperor, and who could therefore have been adopted by the young Empress-Dowager. But the latter would in that case have become Regent; and the old Empress have had influence enough to carry the election of the young Prince Tsai-tien, who has to be adopted by them as a son of Hien-fung, and during whose minority therefore they become again regents. The arrangement is not viewed altogether with contentment; but there is no appearance thus far of opposition.

It is only natural that the death of the Emperor and the uncertainty in which the occurrence left the succession, should have given rise to rumours of trouble and all sorts of reports gained currency in Shanghai pending the arrival of certain news. It was rumoured at one time that the possession of the Dragon throne was already being contended for *vi et armis* that the palace was surrounded, and that a large army was at Peking, supposed to be Li Hung-chang's southern legion. Another rumour was that orders had come from Peking, forbidding the Chinese men-of-war in harbour to leave the river unless under direct instructions from the Peking Government. Later on again the Governor (Ah-lu-te) had committed suicide. But, as we have shown, all these rumours turned out to be pure canards, and we mention them only as indicating the uncertainty in the Chinese mind as to the course events would take.

As straws show which way the wind blows, some edicts that had lately appeared in the Peking Gazette suggest that a struggle had been lately going on at Peking between the rival parties whose influence was probably strained on the question of imperial succession. We need hardly refer to the late degradation of Prince Kung and his prompt re-instatement by the influence of the Empresses-Dowager. Later on, the Prince of Tun was put forward to offer certain sacrifices in the stead of the Emperor during his Majesty's fatal illness; while a decree of the 1st January, again, gives prominence to Prince Kung on a similar occasion. More significant than all, is a still later edict advancing Li Hung-chang to the post of Senior Grand Secretary; and the guess may be hazarded that, if we could say to whose influence this appointment is due we should have a clue to the probable bias of that great mandarin, and the view he may take of the present arrangement.

Our Newchwang correspondent complains again of the prevalence of brigandage.

There is no particular news from the South; what there is, will be found under the usual "Outports" heading.

Editorial Selections.

THE NEW EMPEROR.

WE have at last definite information as to the course of events in Peking since the death of the late Emperor; and learn that a boy named Tsai-tien 載湉, a cousin of the late Emperor, is the new ruler of China, under the style and title of Kwang-sü 光緒.

The death of the young monarch who had reigned since August 1861 under the style T'ung Che, took place at about 5 p.m. on the 12th January, in the nineteenth year of his age. Early on the morning following, it was rumoured in Peking that a grandchild of his eldest uncle, the Prince of Tun, had been selected for the succession, in the absence of a direct heir; but in the course of the day it became known that the two Empresses, *i. e.* the Empress Dowager and the Empress Mother (of T'ung Che), the well-known regents during the late minority, had selected the only son of the seventh Prince, the Prince of Ch'un. This child, who is at present, it is said, between three and four years old, was designated as successor to the Throne in a Decree of the Empresses, to which sanction was declared in the valedictory manifesto of the departed sovereign. The selection is popularly attributed to the choice of the Empress Mother, who is a sister of the Princess of Ch'un, and consequently aunt by blood as well as marriage to the child. These two august ladies are said to be daughters of a Manchu functionary formerly in office as Taotai of the Kwei-sui Circuit in Shansi named Chêng-lin 徵麟. The result shows that the Empresses have known how to maintain and exalt the position gained by their coup d'etat in 1861, when they seized the reins of power after the death of Hien-fung; and we cannot but admire the vigor and determination with which they dominate the rival parties and bend princes and ministers to their will. The effect of the present selection is to make them again ex-officio regents, and among the Peking Gazettes which we publish elsewhere will be found an edict appointing them to that office. The youthful sovereign-elect was conveyed to the Palace from his father's residence, at about 4 a.m. on the 13th. The decrees published in the Peking Gazette on that and the following days record the successive official stages of this historical episode. The adoption of the new *Kwoh Hao* or style of the coming reign of the new Emperor was announced in the Gazette of 16th January. The characters chosen are *Kwang Sü* 光緒, which may be translated Continuation of Glory. They appear to have been selected from a sentence occurring in a state-paper of the Sung dynasty, by Ts'ui Yung 崔融; entitled "memorial requesting the bestowal of a title of Honour [on an Imperial person]." The sentence is as follows: 光復丕緒—*i.e.*, gloriously renew the great dynastic continuation.

So far, then, all appears to be settled; everything is tranquil at Peking; and the great mass of the Chinese people care little whether their ruler be Tsai or Yih or Mien or Pu, so long as order is kept, and they are left in peaceable enjoyment of their earnings. There is perhaps a possibility of further rivalry within the walls of the palace; and Peking news will be looked for with special interest for months yet to come. The grandsons both of Prince Tun and Prince Kung were looked on as having better claims, and there seems to be feeling of dissatisfaction at the choice made. Still that feeling has found no open expression, and the same influence which enabled the Empresses to secure the appointment of their nominee may continue to overpower and stifle opposition. Our correspondent says that a regency is about to be constituted on the same basis as the last. But whether he means as to form or *personnel*, is not clear. In the latter case it may be inferred that all are in accord, and that the late foreign policy will be followed out. Otherwise it seems unlikely that Prince Kung will allow himself to be quietly effaced. Of Prince Chun, whom the turn of events has brought into prominence as father of the new Emperor, we know little. He has not, we believe, come much in contact with foreigners, nor is he thought to view them with a very kindly eye. Report credits him with military tastes, and he has, we believe, a position at the head of the Manchu garrison of Peking, which gives him strength to support the new order of things.

THE PRESS AND THE MACAO COOLIE TRADE.

THE *China Mail* very justly complains of the total want of all recognition, on the part of the Anti-Slavery Society, of the efforts made by itself and the other papers in China towards getting rid of the abominable Macao coolie trade. In this protest against the fickleness of public opinion, especially when conducted by the band of would-be philanthropists, the *China Mail* has a right to take the lead. We do not desire to run down the efforts of the Anti-Slavery Society, but at the same time it is only right and fit that they should know, and acknowledge, that while the work undertaken by them was conducted with no loss, social or pecuniary—that in fact, in protesting against the continuance of the traffic, they were doing a thing tending to raise them to a position of philanthropic greatness—no such immunity was vouchsafed to those who, on the spot, boldly and honestly, and for the good of their fellow creatures, exposed the iniquities of the traffic, and finally led to such official action being taken as resulted in its suppression. While philanthropists at home were dreamily waking up to the practices carried on at Macao, the *China Mail*, at the instance of the law officers of the Colony of Hongkong, was being subjected to an expensive and vexatious prosecution. It fortunately happened that the fact of this prosecution having taken place, led to a further investigation of the circumstances attending the continuance of the traffic; but for the loss and the annoyance to which our contemporary was put, in the exposure of practices which the Government finally had to use all its power at home and its influence abroad to suppress, we are not aware that the *China Mail* has ever received one word of thanks or acknowledgment. Although the coolie trade was generally reprobated in Hongkong, and although mercantile houses, notoriously Messrs. Jardine, Matheson & Co., had attempted to procure official interference with its vile practices, the abuse in all probability would have continued to the present day, were it not for the stand made by our contemporary. More than this, the traffic, from the close connection between Macao and Hongkong, was really undermining the mercantile morality of the place. A traffic so lucrative could not fail to attract adventurers; and as a large amount of capital was invested in it, and this capital had mainly to be worked in Hongkong, there was perforce a corresponding effect on the legitimate trade of the Colony. It was in effect becoming a power in the money market of the Colony; and those who hated it most, and held most aloof from it, were yet, however unwillingly, brought in the daily course of business in contact with its secondary effects. It is true that the general public opinion of the Colony was adverse to the traffic; yet there was undoubtedly an under-current of feeling favourable to its continuance, and this under-current became for a time stronger when the Acting Attorney General of the Colony appeared as the prosecutor of the *China Mail*, for alleged libel in exposing the iniquities of the traffic. The other papers of Hongkong gave way, more or less, to this tide, and produced at various times articles having a tendency to gloss over the grosser parts of the traffic. Had not by an accident, in the case of the *Maria Luz*, the venue of the affair been, as it were, transferred from Hongkong to Japan, it would possibly still have been looked upon as a local matter, to be discussed with due discrimination by the local Press at Hongkong. We ourselves were glad of the opportunity afforded to press the arguments put forward by our contemporary the *China Mail*, but we have not had, nor shall we now probably have, with it the honour of martyrdom. We did indeed so far fall under the displeasure of the Attorney-General of the Colony as to incur being denominated by him a mischievous and libellous newspaper, but fortunately his power to bite was not proportionate to his ability for barking,

and we were left alone. The action of the Supreme Government, the bold stand made by the *China Mail*, and possibly, to a small extent, the strictures passed by ourselves on the apathy of the Chinese Government, at last led that sluggish body to make some move; and the first real blow was struck when the harbour of Canton was closed to vessels engaged in the coolie traffic; If it had not been for the bold exposures made by the *China Mail*, the opportunity would not have presented itself of publicly denouncing the traffic; and if it had not been for the denunciations which proceeded from the English Press of China, the iniquities of the traffic would never have become the subject of public comment at home. Philanthropic writers discussing those matters at their ease at home, find it convenient to forget these facts, and the Press in China not only gets no credit for its conduct, but is passed over with a slur.

A PUBLIC MARKET.

The want of a public market in Shanghai has been so long felt, that in opposition to the views of our correspondent Citizen, we are glad to hear that the Municipal Council are taking preliminary steps in the matter, and that there is a likelihood of a definite scheme being submitted to the Ratepayers at the next Annual Meeting. As a matter of fact, Smith's Market has not been found to fulfil all the requirements of the Settlements. It has been found necessary to allow the impromptu market in the Maloo to remain, pending the erection of a suitable building. Our correspondent tacitly admits the inconvenience of this innovation, but can hardly appreciate the extent of the nuisance when he doubts the efficacy of the suggested remedy. A market can hardly under any circumstances be made an æsthetic institution, or one whose neighbourhood would be sought and coveted. But a market in a covered building, especially adapted and carefully supervised, is a thing as different from a market in the open street—as the foreign Settlement from the native city. It is true that early removal of the Maloo stalls is insisted on, and the annoyance thus reduced within the least possible limits. But the fact remains that a street market, in a place having the pretensions Shanghai may claim, to be a well-built and well-ordered city, is very badly out of place.

Some years ago, the then Council suggested to certain private individuals who had offered a site for a market, that they should erect one at their own expense, and that the Council would guarantee that the streets should no longer be made use of. But it was replied that, in case of success, the public would see in this arrangement nothing but the setting up of another monopoly, and that it would probably be found impossible to put such promises in action, for the apparent benefit of private individuals. On the other hand, without such guarantee, the native produce-sellers would prefer to make use of the Maloo pathways, where they were but little interfered with and had to pay no market dues. It became evident, therefore, that no means of avoiding the dilemma existed, short of the Council itself undertaking the proposed market, in the interest of all; and we repeat that we are glad to see the present members are taking up the question. Citizen can surely have but little experience of sanitary arrangements, when he advances the argument that markets must of necessity increase the unhealthiness of the Settlement. Doubtless, if the entire community of Shanghai, native and foreign, could do without supplies, a great improvement in the appearance and the sanitary condition of the Settlement could be effected. As, however, Shanghai must be supplied with the various articles required for food, it behoves the Council to see that their supply shall be effected in the readiest manner and with the least interference with the sanitary condition of the place. It is too evident to need further proof, that these measures can be best carried out in a building erected for the purpose, and under the immediate supervision of the Council. Miss Burdett Coutts' market may not have proved financially a success, but this has not deterred the authorities of London from erecting public markets, when public convenience or public health required them; the latest being the recently rebuilt Billingsgate market, now transformed into a handsome and substantial edifice. The want of public markets has indeed been felt so widely, that scarcely a town exists now in England where the market is not one of the most notable features of the place.

So much for the sanitary aspect of the question. The question of site is quite another, and one about which there will be great difference of opinion. Though the market may be adopted in principle, it does not at all follow that the proposal will be agreed, to build it at the corner of Honan and Foochow roads. That the Council should have suggested this site is very natural. Owing to the fortunate acquirement of premises suitable for carrying on the Municipal administration, the Council has now at its disposal a central plot of ground, and very naturally suggests the utilisation of this ground in connexion with the new scheme. But whether the Ratepayers will wish the property in question so occupied, is quite another question. A market, however well cared for, is, as we have said before, not a desirable neighbour; and a site further back from the foreign quarter would be clearly preferable, if one can be obtained in a convenient situation. It has even been suggested that it would be worth while to keep the plot in Honan Road open, as a lung, in a town which is yearly extending and becoming more crowded. Our correspondent's impression that the value of property would be deteriorated by the presence of the proposed market, is we think exaggerated. The only foreign hong which would really suffer is Chung-wo. Otherwise most of the property about is Chinese and the Honan Road itself is the street par excellence of Chinese stores dealing in those commodities which naturally supplement a market. The corner of the Maloo and the Honan roads would be a good and central position, but the acquisition of the necessary land there would be expensive and perhaps impossible. The need of a market, we may at any rate assume to be indisputable, for we have the experience of the world to guide us. The only question is, has the Council made the best and most practical suggestion as to site? We doubt if the Ratepayers will think so, and surmise that a position further back, in the Chinese quarter, will be deemed preferable. There cannot be any serious difficulty in purchasing a block elsewhere; and the sale of the present plot would furnish ample funds, if fresh outlay is thought undesirable.

REVIEW.

A Handbook of the Canton Vernacular of the Chinese Language by N. B. Dennys, Ph. D., M.R.A.S. &c. Hongkong, 1874.

Unlike the settlement of North China the colonization of Kwangtung falls within historic times. About the year 220, B.C. She Hwangti having firmly established, as seemed to him, the power of the Ts'in dynasty in the north of China, determined to extend his dominion over the south, at that time inhabited by aboriginal tribes whose descendants still exist in scattered communities as Miautsze, a name allied to the Sanskrit *Mlechchha*, our own *Welsh*. With this object in view, he despatched a General named Tu Hwei, to cross the mountains at the head of a formidable army. Tu Hwei was slain in the contest, but his successor, Jên Ngao, retrieved this disaster; and in the following year the newly conquered territory was formed into a province of the empire under the title of Nanhai, a name the recollection of which is still preserved in the Namhoi *hien*, forming one of the districts into which the prefecture of Canton is divided. To quote Mr. Mayers (Journal N.C.B.R.A.S., 1873) "The tribes who successfully encountered Tu Hwei were enabled to resist the disciplined legions from the North, not by force of warlike appliances, or of military skill, but by the craft of the forest born and unfettered savage, with the aid of natural difficulties presented by a wild and pathless country, overgrown with impenetrable woods, and offering neither supplies for the support of an advancing army, nor facilities for the retreat of a force overtaken by disaster. Under the direction of the Chinese Generals, however, military colonists were poured in thousands from the cultivated regions beyond the mountain-barrier of the Mei-ling, into the

newly acquired dependency; forests rapidly disappeared before the axe and fire; fortifications rose where cities were shortly to grow up; the noble rivers disclosed by the labours of the woodman served as a ready means of transport, and where these natural highways proved insufficient, artificial canals were dug to expedite the movements of the subjugating and colonizing armies. A central position for the seat of government was selected at the hills of P'an and Yü, where already a native town existed, and, by a well directed choice, the foundations were planted here of what was to become in future the city of Canton."

On the fall of the T'sin dynasty the province became independent, under the rule of Chao T'o, Jên Ngao's successor, who declared himself sovereign prince of Nan Yüeh, and remained so till, at the close of the 2nd century B.C., it was a second time, under the Hans, added to the empire of China. This short description will enable us to understand many of the peculiarities of the Cantonese. Their occupation was sudden and, so far as it went, complete; and, like colonists under similar circumstances all over the world, they succeeded in retaining many of the archæisms of their original stock. Surrounded by hostile tribes of Miautsze, speaking, as the name given to them by the northern colonists indicates, an incomprehensible jargon, *(mlechh, indistincte loqui)* little communication of a friendly nature took place, and the colonists occupying the plains of the provinces of the two Kwangs appear to have preserved with greater purity than elsewhere both the blood and language of the original founders of the Chinese empire. If we desire to find those links which bind Chinese with the original languages of High Asia, we are forced to have recourse to this furthest off colony of the great She Hwangti. In the common speech of Canton we can trace such words as *mat, honey*, our own *mead*, Sanskrit *madhu*, Greek *methu &c.; lâp* wax, Sanskrit *lepa, unguentum*, Greek *lipos; pak*, a cypress, Greek *peukê*, Latin *picea*; *ch'âm*, a fir, Sans. *druma*, Gr. *drûs*, our own tree, &c. &c.—words the connection of which we should be totally unable to comprehend were we dependent on the modern northern Chinese forms of *mi, la, pai* and *shan*. What is true of the vocabulary of the Cantonese is likewise true of their grammar. There is no such gulf between the ancient literature of China and the spoken dialect of the city of Canton, as exists between the former and the dialects of the north and centre, and more especially the, philologically speaking, utterly degraded patois of the present capital. Many of the old particles, and much of the old structure of the language, still survive in the common speech. Comparing, again, Cantonese with the dialect spoken about Shanghai, a degenerate relic, according to Chinese tradition, of the elder stock of the original language, we notice in both a complete series of four high and four low tones. The presence of a full series of tones in these two dialects, so unlike in other respects, seems to afford strong evidence that already, before historic times, tones as a characteristic of the language were in existence, and that these tones had even then separated into a high and low series. The process of change, therefore, in modern Chinese, would seem to have been from a greater to a lesser number of tones, instead of, as is suggested by the Rev. J. Edkins, the reverse. Pekinese, the furthest removed from the original stock, has therefore but four, compared with the eight of Cantonese. At present, Chinese and some of the languages of the Indo-Chinese peninsula, stand alone in their affectation of tones as altering the meaning of sounds, and this peculiarity has doubtless survived in consequence of the degradation of inflected forms having left few other means of distinguishing identical vocables. A system not unlike tones seems to have, however, prevailed in ancient Sanskrit, and the probable resemblance to tones of the ancient Greek accents has likewise been suggested. In fully inflected languages they rapidly become an excrescence, while in those which for some reason adopted a monosyllabic form, their presence was found useful if not essential. In the progress of language, as in that of species, redundancies have a natural tendency to be cast off or become merely rudimentary; and viewed in this light we can perceive how, while one branch preferred inflexions it naturally lost its tones, another preferring tones as naturally got rid of its inflexions, or reduced them to the rudimentary forms in which they exist in modern Chinese.

To return to our more immediate subject, Dr. Dennys' book on the Canton vernacular is not the first book, nor even the first important and well arranged book, on this subject. For all practical purposes, it is however a new book. Dr. Bridgman's Chrestomathy, a book of the generation which produced Dr. Morrison's Dictionary, has long been out of print. So rare has it become, that the writer has seldom met with a copy. The book was the production of a rare scholar aided by a powerful mind, and few books on Chinese are so well deserving of study. Another book on the vernacular, that of Dr. Williams, is equally rare; the writer does not remember having met with a copy. To have followed these two scholars is no discredit to Dr. Dennys, who has, besides, adopted a course of his own admirably suited for affording a gradual yet thorough insight into the language. "It is customary," he tells us, "to assert that Chinese has no grammar, and if by that it be meant that its construction outrages Western ideas of grammar, the assertion is true. The same word constantly does duty for various parts of speech—just as if we, taking the word '*ambition*,' used it as a noun, adjective, adverb, verb, &c., as convenient; and were to say, he likes *ambition*, he is an *ambition* man, he did it *ambition*, he *ambition* that post. Now we do, with such a word, use it very much in that way (ambition, ambitious, ambitiously, &c.), but we *inflect* it. The Chinese do not, and moreover they use almost any word in a similar manner. But to assert that they have no grammar is to assert a manifest absurdity, as no language can exist without some *custom* of forming sentences, which in time becomes the grammarian's rule."

By means of two sorts of type, italic and roman, as in Mr. Chalmers' little dictionary, the distinction is made between the upper and lower tones of the dialect, which in Cantonese are so marked as to impart a sing-song effect to the spoken language; while the four tones of each division are further marked by the use of two accents, the first or *p'ing sheng* needing none, and the fourth or *juh sheng*, as ending in a consonant, requiring no further distinction. A little practice, with the help of a native well-skilled in the vernacular of Canton city, will readily enable the student to master the tone inflexions of this, the most marked in this respect of Chinese dialects. The headings of the various lessons include each a chapter on a special topic of Chinese grammar. For example, let us take that of Lesson III. "Most Chinese nouns signifying objects, take before them a syllable or word termed by foreigners a classifier or numerative. This is, to a certain extent, generic; *i.e.*, a similar word applies to a large number of nouns having some analogy to each other. Thus, the word CHI, meaning a branch, is applied to pens, candles, whips, pencils, muskets and other straight things; *e.g.*, *a pen*, YAT CHI PAT, 一枝筆; a whip, YAT CHI MA PIN 一枝馬鞭.

"The adjective comes between the classifier and its noun when following a numeral; thus, *a large pen*, YAT CHI TAI PAT, 一枝大筆.

"The classifiers are distinguished in the vocabularies of these lessons by being placed within brackets."

A note is appended giving a fuller description of what are for convenience sake called classifiers, Dr. Dennys' acknowledging that the word, though sufficiently useful to be retained, is, like many similar words, to a great extent a misnomer. In a similar manner, the student is led by degrees to comprehend the more abstruse parts of Cantonese grammar. A useful innovation is that the separate sentences under each heading take to a great extent the form of a continued conversation, thereby addressing themselves better to the comprehension, and taking a firmer hold on the memory than would ordinary disjointed sentences. For the sake of the general student we would have desired to see an index to the lessons. Many will doubtless appeal to the book for evidence as to the existence of some particular idiom, and its value as a work of reference would thereby be much increased. Dr. Dennys has likewise adhered to what we conceive to be the objectionable system of marking short instead of long vowels. To any one accustomed to the contrary system, made use of in alliterating Greek or Sanskrit vocables, of representing the long vowel by a circumflex, the result is more or less perplexing.

We are glad to acknowledge Dr. Dennys' book as a valuable contribution to the study of Chinese generally, as well as a vast help

to those for whom it is more immediately intended, the students of the vernacular of Kwangtung; and to congratulate the author on the fact of the book having been approved of as a text-book for the examinations in Chinese by the Colonial Government of Hongkong.

Outports.

NEWCHWANG.

Our Newchwang correspondent complains of the frequency of robberies in the neighborhood. A foreign missionary was plundered the other day on the highway, not 40 miles from Newchwang.—Writing on the 1st January our correspondent says—Although the Thr. (Fahrt.) has ranged between five and twelve degrees under Zero during the last few days, the river is not yet frozen over opposite the settlement. Higher up, where the water is not impregnated with salt, carts have been crossing for two weeks. A great deal of snow has fallen, and next year's crop will be none the worse for that. Produce is arriving in large quantities, if one may judge of the long strings of carts along the roads, from early morning till dewy eve.

In business there is nothing doing, the last few sales of goods having been forced to pay off old scores—and rates obtained are therefore not reliable.

Messrs. Bush Bros.' Circular says:—Malwa remains dull, the quotation being nominally Tls. 470 to Tls. 480 per chest. Produce quotations are—for cash now, delivery in spring:—

Beancake.....	Tls.	2.70	per 10 pcs.
Peas.....	,,	2.12	,, 300 ,,
Oil	,,	2.10	,, picul.

AMOY.

The *China Mail's* correspondent writes on 18th January that the *H. C. Orsted* was at Amoy with the small end of cable which is to connect the Foochow line with Kulang-sou, but H.E. the Taotai, in the absence of any instructions on the subject, is opposing its being laid. It would appear that the Great Northern Company has commenced this line without the proper authority from the Imperial Government, and that though allowed to lay the wires from the Foochow end, the officials at this end have no power to grant permission to do the same. The *Ling Fêng* was to leave on the 18th for Takao, with Mr. Henderson, Lighthouse Engineer, on board. The races have been definitively settled *not* to take place this year, for want of ponies. Still training goes on, for the Hongkong meeting.

FOOCHOW.

A reward is offered for the apprehension of a late Chinese steward of H.M.S. *Kestrel*, who is supposed to have left for Shanghai, after committing various robberies on board.—The *Foochow Herald* states that an 18-ton Armstrong gun, or "Woolwich Infant," has been added to the Arsenal armaments, and will shortly be placed on one of the batteries recently constructed in that neighbourhood.—The telegraph line to Pagoda Anchorage was cut on the 16th instant, near the Arsenal, and about 1,500 feet of wire stolen. The line has been repaired. The *Herald* reports that H.B.M. Consul, who was instrumental in obtaining permission to build the line, has absolutely refused to assist in the apprehension and punishment of the culprits. The other Consuls, however, have taken up the case on behalf of the Company.—Captain Hoskier, the Engineer-in-Chief to the Great Northern Telegraph Company, started on the 11th instant, overland, for Amoy. Captain Hoskier, is instructed to push on the construction of the line between Foochow and that place.—The *Herald* of 21st January contains a statement regarding the difficulties raised by the Chinese in connection with this enterprise, which we quote elsewhere. The *Herald* understands that the Chinese authorities contemplate establishing a Dockyard at Sharp Peak, for the building of men-of-war.—It is reported that a number of Chinese pupils, at present studying at the Arsenal, will proceed to England after the Chinese New Year holidays, for the purpose of pursuing their studies in that country.

HONGKONG.

The *China Mail*, in noticing the retirement of the Postmaster-General, Mr. Mitchell, remarks that his pension is calculated on a basis which, though it gives a result strictly just, can hardly be termed generous. Mr. Mitchell, in fact, receives precisely what any other official of equal length of service, without any special claims to consideration, would receive. In view of the fact that he has served on almost every commission ordered during the past twelve years, has conducted several enquiries, and has undoubtedly displayed unusual zeal in the performance of duties bearing essentially on the welfare of the revenue, the *Mail* very properly urges that the Government should draw some distinction in his favour.—On the retirement of Deputy Inspector-General Loney from the charge of the Royal Naval Hospital, Admiral Shadwell has written him a letter expressing cordial appreciation of the able and efficient manner in which Dr. Loney has conducted the duties, which the Admiral further intends to bring under the notice of the Admiralty.—Mr. Philip Davis has been convicted on the charge of obtaining goods under false pretences, and sentenced to three years' imprisonment.

An inquest has been held on the death of J. C. Bobsen, a master mariner, native of Hamburg, who died from the effects of opium. He had been drinking for some time before.—A Chinese signalman, engaged on night duty, has been starved to death on the Peak, the coroner's jury finding that insufficient food and scanty clothing led to his death. It seems the unfortunate man was paid $6 a month, and 20 cents for oil. The jury recommended that the Chinese signalmen should in future be provided with some clothes, in addition to their overcoats.—An attempt is being made to raise the *Albay*. The *Leonor* is now in Dock, and the *Times* says her repair will occupy at least four months. The external damage is nearly all on the starboard side, where some yards of the iron-plating were completely smashed in. The fittings are of course much damaged by being so long under water; but the machinery, except that it is quite rusted, has not greatly suffered.—The *Hanyang* is to be run as a day, instead of a night boat on the Canton river.—A public meeting has been held to consider the advisability of establishing a Temperance Hall in Hongkong, somewhat similar to that carried on in Shanghai. The meeting, which was well attended, was unanimous as to the desirability of such an establishment, and a number of those present gave in their names as subscribers. A Committee was ultimately appointed to look out for a suitable building, and it is intended to have the institution ready for opening, if possible, early next month.—News has been received that the bark *Pepita* is a total wreck at Sual.

HIOGO.

The *News*, in speaking of the new postal arrangements at Kobe, made by Mr. Carr, the foreign superintendent there, says, "Letters for Nagasaki, Shanghai, &c., may in future be posted up to 9 o'clock on t evening preceding the departure of t mail steamer, and letters for Yokoha and beyond up to within one hour of t time fixed for the vessel's departure." The statistics of trade for the ports Hiogo and Osaka for the six months en ing December 31st, 1874, as compiled the Chamber of Commerce, were pu lished in the *News* on the 23rd instan The result, generally, shows an increa of $87,000 in the imports, and $585,000 the exports. Some of the items show falling-off, and among these are tha which appeared in the return for the lat half of 1873, which have, says the *New* "now disappeared altogether, or hide the diminished heads under the style 'Sundries.' Of these rice is by far t most important; this, from figuring as export to the amount of $417,049, h become an import to the figure of $7,56 Wheat, which was good for $67,637, now no longer placed. Silkworm's egg from descending to the modest sum $1,250, have now disappeared entirely and silk, after gradually dwindling dow to $10,080, at length has reached zero." An English paper pulp manufacturi company, of considerable capital, is abo to commence operations at Kobé. T works are to be under the control of Mr Charles Rickerby, a gentleman long ident fied with journalism in Yokohama.

YOKOHAMA.

The *Mail* says, "The sudden death Mr. Albert G. Bates from suffocation, whi in a bath heated by a charcoal stove, h caused much sensation and grief amon his friends in Yedo. Mr. Bates w attached to the foreign educational sta of the Government, and was esteemed as promising and industrious member of t This is by no means the first case in whi a foreigner has lost his life by the use this seductive, but unquestionably dange ous kind of bath, against the use of whic any warning at this moment would b supererogatory."—The same paper say the petition sent to Japan by the Corean according to a native journal, was to th effect that if the Government would ove look their past misconduct they woul receive the next Ambassador from Japa with greater deference. Arrangement were accordingly made to despatch Mori yama to the Corea, but the execution o the contemplated mission has been post poned for the present."—The *Herald* states that the battalion of Royal Marine only remains here until arrangements ca be made for their return to England so that it might be inferred that th removal of the English troops from Japan at an earlier period than ha been generally supposed is intended.—The *Herald* announces the appointment of Mr von Brandt as German Envoy Extraordinary and Minister Plenipotentiary to Peking, t be replaced here by Mr. von Holleben now *Chargé d'Affaires* at Peking. During Mr. von Brandt's long residence in Japa he has been extremely popular. Mr. Consul Zappe is to discharge the functions o *Chargé d'Affaires* between the time of depar ture of Mr. von Brandt and the arrival o his successor.—On the night of the 14th instant, another shock of earthquake, last ing a considerable time, was felt in Yoko hama, and caused much alarm.—A match at football between the Patriarchs and Juniors was played on the 14th, and was won by the former.—The Ja panese Government is making prepara tions to send productions, both natural and manufactured, to the 1876 Exhibition in the United States.—On the 9th inst. a grand banquet was given at Hamagoten in honor of General Saigo and his officers who have returned from the Formosan expedition, and other gentlemen who were concerned during the late difficulty wi China. General Le Gendre, M. Boissonade,

Mr Hill, and Mr. Smith were present.—The libel case of W. G. Howell (*Japan Mail*) *v.* J. R. Anglin and C. D. Moss (*Japan Gazette*) occupied the whole of the 19th instant, in H. B. M.'s Provincial Court. The jury, after retiring for a quarter of hour, brought in a verdict for the plaintiff, giving the nominal damages of $1. The question of costs was reserved by the Court.—Two Japanese officers left here on the morning of the 19th, by the M. M. S. S. *Tanais*, on a mission from the Japanese Government to Siam, but the exact object of their journey remains unknown.—Dr. J. J. R. Dalliston, for many years an esteemed resident of the community, died of fever on the 20th instant.—On Monday, the 18th, a petition was filed in H. B. M.'s Bankruptcy Court, on the application of the Hongkong and Shanghai Banking Corporation, that respondent, E. Wallace, be adjudicated bankrupt, he having failed to pay bills owing to appellants to the amount of $8,700. The case was adjourned until the 2nd prox., respondent to file an amendment to his answer to the petition, and to state clearly what his defence would be.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

Jan. 1st.—(1)—A Decree. Let Shên Ping-ch'êng (the present Taotai at Shanghai) be appointed to the vacant post of Judicial Commissioner for the province of Honan.

(2)—A Decree. Whereas, since the commencement of winter, the fall of snow at Peking has been very slight, and the need of moisture experienced by the soil is of serious importance, Our heart is stirred profoundly with devout anxiety. We ordain therefore that on the 4th instant, the Prince of Kung, Yih-sin, do reverently offer incense on our behalf at the Ta Kao-Tien,—and that incense be at the same time offered severally by the Princes of Tun, Yih-tsung, at the Shih Ying Kung, by the Prince of Ch'un, Yih-hwan, at the Chao Hien Miao; by the Prince of Fu, Yih-hwei, at the Süan Jên Miao; by the Prince of Hwei, Yih-siang, at the Ning Ho Miao.

(3)—Wu Yüan-ping, 吳元炳, the newly appointed Governor of Kiangsu, reports his arrival on the 27th November at Nanking, where on the 30th he received the seal of his office from the Governor-General, who had been temporarily in charge of it, together with imperial death warrant, archives, etc. He will immediately set out for Soochow, to enter on his official residence.

(4)—Ting Pao-chêng 丁寶楨, Governor of Shantung, reports having received on the 3rd December, on his return to the provincial capital, the imperial rescript negativing his application for permission to visit Peking and present himself before his Majesty. (See *Gazette* of Dec. 13, 1874). He consequently resumed his seal of office on the 6th December. His *locum tenens*, Wen-pin, the Governor-General of the Grain Transport, at the same time reports his withdrawal from the acting Governorship.

Jan. 2nd.—(1)—A Decree. Let Fêng Tsün-kwang 馮焌光 be appointed to the vacant post of Intendant of the Su-Sung-Tai Circuit (Taotai at Shanghai).

(2)—A Decree, in pursuance of a further report from the Boards of Civil Office and War, conferring donations, in honour of the Empress-Mother's 40th birthday, on two more octogenarian ladies. The mother of Chang Chao-tung, Governor of Kwangtung, receives a tablet imperially inscribed, a sandalwood sceptre inlaid with jade, and a number of rolls of silk and satin. The mother of a Brigadier-General in Kwangsi is honoured with similar gifts.

(3) The Governor-General of Shensi and Kansuh memorializes with reference to the conduct of the late Magistrate of the Tunkwang district (the extreme western frontier-city included within the limits of Kansuh). This officer is accused of having been in league with one of his clerks, some relatives, and a *Kü-jên* graduate of the district, in extensive malversations of the grain stored under his jurisdiction, under pretext of supplying the army commissariat, and further of extorting large sums of money by means of requisitions from the people. He is also charged with having wrongfully caused the death of a petty official delegated on a mission by a Taotai in Kansuh, with some scores of the soldiers accompanying him. The Magistrate himself, having been brought as a prisoner to the provincial capital, has there died from disease, and he is consequently beyond the reach of punishment; but steps have been taken to cause the arrest at Hami of his late retainer and confederate, who is found to have purchased the rank of assistant magistrate under an assumed name, and to have obtained employment as a volunteer under the *amban* of Hami. It is further requested that the *kü-jên* graduate be stripped of his degree, and of honours and promotion conferred upon him owing to misrepresentations.—Rescript assenting to these proposals.

(4)—The Assistant Resident at K'urun (Urga, the capital of Western Mongolia), memorializes representing that the city in question is the seat of government for the two eastern tribes of the Khalkhas, and that since insurrectionary troubles began to make themselves felt, it has become the headquarters of the troops employed for defensive purposes, as well as of traders from far and near. The officer charged with the superintendence of the traders has been directed at once to enforce a stringent control, and also to encourage the growth of the commercial population, in order to promote the assemblage of the supplies that the increase in the number of inhabitants has rendered needful. It now appears, however, that with a largely augmented population, the number of houses in the trading quarter, which is limited by regulation, is insufficient, and there is not storage-room enough to guard the merchandise brought to the spot from exposure to the weather. The Assistant Resident has therefore granted permission to the trading community to build houses as they see fit, to meet the demand for accommodation. Rescript: It is noted.

(5)—The Resident and Assistant Resident at Kobdo memorialize reporting that for some time past the post road through the region of Urianghai and of the Turgut tribe has been infested by bands of Mongol robbers, who have made the country about the Burkhan river their especial haunt. A party of 20 soldiers was sent out in August last to scour the country in pursuit of these banditti, and one morning at daylight, four of their horses were stolen from the picket by two of the robbers of whom they were in search. After a long chase, the four stolen horses were found tethered outside two Mongol tents in a secluded valley, with seventeen others, and after a sharp struggle the occupants of the tents, four Mongols, were captured and brought in as prisoners. They have been executed, and their heads suspended as a warning, at the scene of their offence.

Jan. 3rd—(1) A Decree. Let the Board consider and report with reference to the memorial from the Censor Hü T'ing-kwei, who requests that the revenue and expenditure of the several provinces be stringently audited, with a view to the enforcement of economy.

(2) A Decree, based on a memorial from the Superintendents of the Imperial carriage department, complaining that heavy arrears of revenue are left owing to the funds of that establishment. The Governor-General of Chihli is directed to cause an immediate payment of Tls. 8,700 to be made, and to give orders to his subordinates for the collection and payment of the long-standing arrears of ground-rent appropriated to this department.

Jan. 4th.—(Court Circular). The Governor-General of the Two Kwang paid his respects on his arrival at Peking.

(1) The Assistant Governor and Literary Chancellor of Fêng-t'ien (Manchuria) memorializes impeaching the sub-Prefect of Kin-chow T'ing for having arbitrarily and illegally flogged certain licentiates of his department. No less than 29 petitions have been lodged with the departmental supervisor of instruction, on the part of the civil and military graduates under his jurisdiction, protesting against this violation of the privilege of their order. It appears that the three individuals who suffered the indignity complained of had been summoned with others to take their turn of military duty, and happened to be behind time on the 4th November last, when the magistrate required them to escort his family to the provincial capital, whither he was sending them in consequence of a rebellious outbreak that had occurred. He flew into a rage at their delay, and, not content with pommelling them with his own hands, he caused them to be stripped and to be beaten to the extent of upwards of 300 blows. Scarred and bleeding, they were still further outraged by being thrown into confinement in chains. According to the regulations laid down in the handbook for the literary directorate, trivial offences on the part of licentiates are to be notified by the district authorities to the superintendents of instruction, who will inflict penalties; and in the case of offences of a serious order, the guilty person is to be sentenced only after having been deprived of his grade by the Literary Chancellor. The sub-Prefect who has inflicted corporal punishment regardless of the immunities secured by these regulations, has incurred a severe penalty, and he is accordingly denounced. A rescript cashiering the official in question has already appeared.

Jan. 5th.—(1)—The Governor of Shensi, Shao Hêng-yü 邵亨豫 renews his appeal for leave to retire from the public service. In the course of last year he twice had *congés* granted him for the care of his health, and having with a great effort returned to the discharge of his duty, he has hoped for a gradual recovery, but in vain. He is troubled with asthmatic cough, bowel complaints, and a continually increasing weakness. He is compelled to rely on assistance when moving about, and grows dizzy after being seated for a short time at his table. He assures his Majesty that his application is dictated by no selfish desire for rest, and that if he should be so fortunate as to recover his strength in the least, he would hasten to lay his forehead in the dust before the Palace gate and ask for re-employment. The people within his jurisdiction are happy and prosperous, steps having been taken to relieve, where necessary, the distress caused in certain localities by floods and hailstorms.—Rescript: Let Shao Hêng-yü take one month's congé. He need not vacate his post.

(2)—The military Governor of Ili, Yung-ts'üan 榮全, memorializes beseeching the speedy appointment of a successor to relieve him in his present post. He is oppressed with maladies of different descriptions, and although he has obtained remedies from Peking, there are no physicians on his wild border station who can properly diagnose his complaint. His breathing is at times affected, and his speech confused—of late he has been unable to sleep at night, and both his lower

extremities suffer from increasing muscular contraction, whilst at the same time his eyesight is growing dim. He feels that the responsibility of military command is too heavy for him to bear. The present memorial, he adds, is drafted on his behalf by the chief of his staff.—Rescript: Let Yung-ts'üan take two months' congé. He need not vacate his post.

(3)—The Military Governor of Fêng-t'ien reports the conclusion of the autumn patrol of the Corean frontier, according to the regulation which imposes the duty four times per annum. In the summer and autumn quarters, the duty is discharged by Chinese and Corean officials jointly, the object being to keep an eye on squatters who would, if not restrained, cross the frontier and take possession of the uncultivated border-lands. In August last a Manchu colonel was appointed to discharge the duty of the autumn patrol, and the King of Corea was notified in due time by the Board of Ceremonies at Moukden to give orders to the authorities of his own country to the same end. Colonel K'ing-si has now reported that he has proceeded to the Corean frontier, and has patrolled it in concert with a Corean official, who, on the 8th October, delivered to him a stamped certificate setting forth the fact that the border is in a state of tranquillity.

Jan. 6th.—(Court Circular). Audience was given to the Grand Council, the Ministers of the Presence, the Comptrollers of the Household, and the Ministers of the Imperial Study. (N.B.—This in consequence of the grave relapse in his Majesty's state of health, which declared itself yesterday).

(1)—The Presidents of the Board of War memorialize on the case of the rebel outlaw Chang Chao-show, who was detected lately in the train of General Ma Ju-lung on his visit to Peking (see *Gazette* of Dec. 6, 1874). On being brought to trial, the culprit confessed his identity, stating that after assuming a false name he had enlisted as a brave in the service of Ma Ju-lung, to whom he never revealed the circumstances of his past history. Ma Ju-lung likewise steadfastly denied any knowledge of the antecedents of the man. Upon this the Board of Punishments solicited that the Board of War be called upon to pronounce a decision as to the penalty which should be inflicted upon Ma Ju-lung, and the present report is in pursuance of a rescript to that effect. The only legal enactment which can be discovered as applicable to the case is the following: If any convict under transportation to Turkestan, who by law has incurred the penalty of death, make his escape, and if he take up his abode in any other place for a period exceeding half a month, the district authority who has failed to detect him shall be degraded by one step, and left in office. Further provisoes define the additional degrees of severity that may be given to sentences of this kind, for laches in the discharge of official duty; and it is proposed that the severest degree of penalty be now inflicted, to wit, entire deprivation of rank, with retention of office.—A rescript confirming this has already appeared.

(2)—The Vice-president Ho T'ing-k'ien present a report embodying the result of his survey of one of the buildings of the Eastern Mausolea, which is in a completely ruined state. Details are given of the works of reconstruction that are required.

January 7th.—The Censor Ying-chên, a member of the Imperial lineage (*tsung-shih*), and his colleagues, charged with the supervision of the roadways, memorialize reporting misconduct on the part of a member of the Imperial lineage who has been found keeping an opium-shop. On the 11th December last the Censor Liu Kwoh-kwang, in the execution of his duty, was passing along a certain street in the north part of the city, when he observed a heap of liquid mud in front of a shop, which he ordered the keeper of the shop to level. The man not only refused to obey, but also raised an unseemly clamour; and when the Censor's attendants were directed to make him a prisoner, five or six men came forward who resisted the arrest. On their being asked as to their occupation, they acknowledged themselves to be keepers of an opium-shop, and another person next came forward, wearing a button, who stated himself to be a *tsung-shih* (Imperial clansman), belonging to the bordered white banner, named Siang-ling, who made opposition to the enquiry, and raised violent uproar in the public street. As he was a *tsung-shih*, he was not apprehended at the time, but was subsequently summoned before the proper military authority, together with a companion named Fêng-kw'ei, also a bannerman; a set of articles used in opium smoking and the house-register being at the same time produced. The individuals were subsequently brought before the Censors, when Siang-nêng (*alias* Siang-ling) alleged that he had taken possession of the opium-shop on the absconding of the actual proprietor, a man named Li, from whom he had claimed repayment of a debt. In the house-register, however, which was issued in October last, the shop is entered as kept by Siang-ta, of the bordered white banner, and the names of three assistants are given. It further appears that Siang-nêng was in league with a self-styled *tsung-shih*, a notorious bad character, and that the opium-shop was frequented as a receiving house for stolen property by a numerous gang of vagabonds. Numerous charges have been preferred in the Imperial Clan Court against Siang-nêng; and it is now solicited that proper legal proceedings be instituted against this delinquent and his associates.

In a postscript memorial, it is requested that the regulations be put in force which prohibit the members of the Imperial lineage from living in the outer or Chinese city. It is found that their immunities are availed of by certain members of the clan, to give shelter and assistance to criminals.

(2)—The Governor of Kwang-si, Liu Ch'ang-Yeo, memorializes reporting that the Anamese envoy P'an She-shuh, and his suite, on their return from the tribute embassy to Peking, having arrived at the provincial capital on June 22nd, set out subsequently on their further journey homeward, and are now reported by the local authorities as having crossed the frontier at the Chên Nan border-station 鎮南關 on the 20th September.

Jan. 8th.—The Governor of Shantung reports the rehearing of an appeal case referred back from Peking (see *Gazette* of May 15, 1874). The complainant, Ma Ch'ao-i, a native of K'ai Chow in Chihli, complained that his uncle, a ferryman named Ma King-fêng, had been carried off as a prisoner to P'u Chow, in Shantung, by a police runner named Fang Man, and others, in revenge for the capture of certain highwaymen with whom they were in league, and whom Ma King-fêng had delayed by refusing to ferry them across a river when pursued. It was alleged that Fang Man and his fellow police runners had put Ma King-fêng to death in an inn, and that all attempts to bring them to justice had been defeated. The Governor now reports that on Ma Ch'ao-i being sent to the province from Peking, and an investigation being ordered, an official was despatched to P'u Chow to investigate the case in concert with the department Magistrate. Their enquiry elicited the fact that there was no such person as Fang Man employed as a police runner. The two other persons implicated, Fang T'ing-lin and Fang T'sing-piao, being ill, were unable to undertake the journey to the provincial capital, and only the documents relating to the case were consequently transmitted to the Judicial Commissioner. On this being done, the appellant, Ma Ch'ao-i, came forward and voluntarily acknowledged the fact of the case to be that his uncle, having been induced by certain persons who are not in custody to commit divers acts of robbery, had been apprehended by the P'u Chow authorities, and had died from disease in prison. He had not been wrongfully laid hold of, confined in an inn, and put to death by the police, (as stated in his appeal). He had brought forward this charge in ignorance of the real facts, while filled with grief for his uncle's death; but now, having assured himself of the true particulars, he would not venture to persevere in a false charge, and he begged that the production of witnesses to be confronted with him might be dispensed with. He acknowledged that there was no such person as Fang Man. On referring to the documents it appears that in January 1873, the then department Magistrate of P'u Chow apprehended a culprit named Ma Urh-ma Tsai, who was the same with Ma King-fêng, and who confessed to sundry acts of robbery at different places. The prisoner's father, Ma Sin-kien, and a relative, came to the Magistracy to apply for his release on bail, but it was refused, and he died in prison on the 15th February. Investigation has thus proved the falsity of Ma Ch'ao-i's complaint, but as it originated in grief for his uncle's death, there is a distinction between its nature and that of a wantonly calumnious charge. As, moreover, he acknowledged the fact before trial, he is entitled to lenient treatment, and should be exempted from punishment. Rescript: Let the Board of Punishments take note.

(2) The Governor of Shantung reports the settlement of another appeal case, with the invariable result, viz., the establishment of the utter falsity of the charge preferred at Peking.

Jan. 9th.—(Court Circular). Had audience—the Grand Council, the Ministers of the Presence, the Comptrollers of the Household, and the Ministers of the Hung Têh Tien (imperial study).

A Decree. Let Li Hung-chang be Grand Secretary of the Wên Hwa Tien 文華殿; Wên-siang be Grand Secretary of the Wu Ying Tien 武英殿; and Pao-yün be Grand Secretary of the T'i Jên Koh 體仁閣.

(Note.—The above indicated re-arrangement of the titles of three out of four *Ta Hio Sze*, or Grand Secretaries, the fourth being Tso Tsung-t'ang, Governor-General of Kansuh and Shensi, is consequent upon the death of Juilin, Governor-General of the two Kwang, and Grand Secretary of the Wên Hwa Tien. The localization of each of the four titles connects them with certain buildings within the palace-city, without any active significance as regards functions attaching to the post—indeed, the position of Grand Secretary, although the highest prize of the Chinese bureaucracy, and analogous to the honourable distinction of Field Marshal in the British army, does not necessarily carry with it any increase of influence or voice in the affairs of the Government. What is remarkable in the present re-arrangement is that the senior post is given to a Chinese, Li Hung-chang, who moves up from the Wu Ying Tien, instead of to a Manchu, to whom precedence has almost invariably been assigned under like circumstances hitherto).

Official Papers.

DECREES RELATING TO THE EMPEROR'S DEATH.

Decrees on decease of the Emperor of China, Jan. 12th, 1875. (Peking Gazette, Jan. 13th, 1875).

1.—Yih Tsung, Prince of Tun,
Yih Sin, Prince of Kung,
Yih Hwan, Prince of Ch'un,
Yih Hwei, Prince of Fu,
Yih Siang, Prince of Hwei,
Tsai Che, Prince of 3rd rank,
Tsai Ch'êng, do. do.
Yih Mu, an imperial duke,
Peh-yen-na-mó-hu, Yih Kw'ang, King-show, } Ministers of the Presence.
Pao-yün, Shên Kwei-fên, Li Hung-tsao, } Ministers of the Grand Council,
Ying-kwei, Ts'ung-lun, Kwei-ling, Yung-luh, Ming-shan, Kwei-pao, Wên-si, } Comptrollers of the Household,
Sü T'ung, Ung T'ung-ho, Wang K'ing-k'i, and } Ministers of the Imperial Study,
Hwang Yü, P'an Tsu-yin, Sun I-king, Sü Fu, Chang Kia-jang, } Ministers of the Imperial Library,

have received as follows the benign mandate of their Majesties the Empress Ts'ze-An-Twan-Yu K'ang-King, and Ts'ze-Hi-Twan-Yeo-K'ang-I. *

Let Tsai' Tien 載湉 son of Yih Hwan, the Prince of Ch'un, become adopted as the son of the Emperor Wên Tsung Hien, and enter upon the inheritance of the great dynastic line, as Emperor by succession.

A special Decree.

2. The benign Mandate of the Empress Dowager and Empress Mother (titles as above) has been reverently received as follows:

Whereas His Majesty the Emperor has ascended upon the Dragon to be a guest on high, without offspring born to his inheritance, no course has been open but that of causing Tsai T'ien, son of the Prince of Ch'un, to become adopted as the son of the Emperor Wên Tsung Hien, † and to enter upon the inheritance of the great dynastic line as Emperor by succession. When a prince shall have been born to the Emperor, he shall become adopted as the inheritor of His Majesty now departed. A special Decree.

3.—The benign mandate of their Majesties the Empress Dowager and the Empress mother (titles as above), has been reverently received as follows:

Let the Prince of Tun; the Prince of Kung; the Prince of Ch'un; Peh-yen-na-mó-hu, Prince [by title] Potorakat'ai of the K'orch'in Mongols; the Prince Yih Kw'ang; King Show, consort of the Imperial princess; the Grand Secretary Pao-yün; the President of the Board of Civil office and comptroller of the Household, Ying Kwei; the President of the Board of Ceremonies, Ling-kwei; and the President of the Board of Works, Li Hung-tsao, arrange in reverence the obsequial rites and perform their duty with the solemnity that is fitting.

4.—The benign mandate of their Majesties the Empress Dowager and Empress Mother has been received as follows:—

Let the brevets of rank as expectant officials of the King T'ang class conferred upon Li Têh-li and Chwang Show-ho, ‡ be withdrawn and cancelled, and their buttons and peacock's feathers be taken from them.

5.—A Decree. Whereas on the 5th day of this moon (the 12th January, 1875) at the *yeo* hour (5-7 P.M.) His Majesty the Emperor departed this life, ascending upon the Dragon to be a guest on high,—the benign mandate of the Empress Dowager, and Empress Mother, (titles as above) was by Us reverently received, commanding us to enter upon the inheritance of the great succession. Prostrate upon the earth We bewailed Our grief to Heaven, vainly stretching out our hands in lamentation. For thirteen years, as We in humility reflect, His Majesty now departed reigned under the canopy of Heaven. In reverent observance of the Ancestral precepts He made the counsels prompted by maternal love His guide, applying himself with awe-struck zeal to the toilsome performance of His duty. For not a single day, in reverence for Heaven and in obedience to the Ancestral pattern, did he cease to be inspired with devotion in the cause of government and love on behalf of His people. He gave the charge of office to the attached and wise. He vanquished and subdued the great revolt. The welfare of the people and the policy of the State were ever present in His inmost thoughts. Sincere in the deepest measure must be, at this time, the grief and lamentation of all to whom the breath of life is given. Not in words can We give expression to the sadness which pierces Our heart and shews itself in tears of blood. Grave in Our mind is the trust bequeathed, the burden of which is charged upon Our unworthy person; yet know We that We are able to depend, in Our Capital and throughout the Empire, upon Our Ministers and servants, high and low, in the ranks of the civil and military administration. Unitedly they will strive in uprightness and loyalty to maintain on Our behalf an ever improving rule. It behoves the governments of all the Provinces to bear a gentle sway over the people committed to our charge. Thus will consolation be administered to the soul in heaven of His Majesty now departed. Fervent is our hope that this may be!

For the observance of the rites of mourning, we have reverently received a charge, by the testament of His Majesty now departed, that in obedience to previous usage the mourning garb be laid aside at the end of seven and twenty days. To do this our feelings, in very truth, will not consent. We shall observe with reverence, in strict adherence to the rule of ancient times, three years of mourning, that expression may in some slight part be given to the grief that fills our mind.

As regards all the acts of sacrifice and worship prescribed by canon for the Temples of the State, it is fitting nothing be diminished in the allotted ceremonial on account of the present mourning. Let therefore the departments that are concerned assemble to decide what steps it is right to take, as former precedent directs, for the appointment of officials reverently to discharge the duty on Our behalf, or for Our personal performance of the ritual, and make report to Us thereon. Let the rites of mourning to be observed by the officials and the people throughout the empire be conducted in conformity with the established rule. Let this be promulgated for the information of all in Our capital and throughout the Empire.

Valedictory Manifesto of the deceased Emperor.

6.—An Edict of His Majesty the Emperor, saith:—

It was owing to the exalted love of Our late Imperial father, Our canopy and support, that the Divine Vessel ¶ was bestowed upon Our keeping. Having set foot in Our childhood upon the Throne, as We succeeded to Our great heritage in reverent devoutness, from the moment of Our accession We had, gazing upward, to thank their two Majesties the Empresses for that, in ordering as Regents the affairs of Government, they devoted night and day to their laborious task. When, later, in obedience to their benign commands We personally assumed the supreme power, We looked on high for guidance to the Ancestral precepts of the Sacred Ones before Us, and, in devotion to Our government, and love toward Our people, made the fear of Heaven and the example of Our forefathers the mainspring of every act. Conscious of Our own deficiency, We have not dared to do ought but labour late and early with anxious application. To be unwearied day by day ‖ has been Our single purpose. For more than ten years past, blest with the counsels of maternal love We have striven earnestly to advance toward the highest path of order. It has, indeed, happily been true that the armies of the State, as they successively advanced from point to point, have vanquished and subdued the rebels of Yüeh and the Nien, and in the provinces of the South and West the Miao and Mussulman insurgents have been severally conquered, and brought into submission. Tranquillity has been everywhere restored; but though the miseries of war have ceased, the wounds of our people are not yet healed. Whenever this thought has occupied Our mind, sleep and repose have been alike denied Us. Whenever, too, in times of visitation by flood or drought, Our governors in the provinces have prayed Us to remit taxation or bestow relief, the immediate outpouring of Our bounty has in no case been withheld. The anxious care that in the seclusion of Our palace has filled our breast must have been witnessed by Our ministers and people throughout the empire.

Our bodily constitution has through Our life been strong, and when in the eleventh moon of this year We were attacked by small-pox, We gave the utmost care to the preservation of Our health; but for some days past Our strength has gradually failed, until the hope of recovery has passed away. We recognize in this the will of Heaven. Mindful of the grave interests of the dynastic line, We feel that it behoves Us to transmit Our charge to worthy hands, and We have now received the benign Mandate of their two Majesties the the Empresses, in these words:—"Let Tsai Tien, the son of Yih Hwan, Prince of Ch'un, be adopted as heir to His Majesty the Emperor Wên Tsung Hien, and enter upon the inheritance of the great dynastic line, as emperor by succession. A special Decree."

Our imperial successor is virtuously disposed and filial, and endowed with bright intelligence. We are assured that he will know how to accept with reverence the trust that is bestowed. Heaven, who gives the people birth, sets up a ruler for them, and makes him their governor and pastor. Let him exert himself continually with anxious painstaking and diligent awe. By making choice of his servants wisely § he will give the people ease, and will assure Our great inheritance for ever. Let him, moreover, cherish with filial devotion their Majesties the two Empresses, and look upwards to console their loving hearts. It is equally Our hope that Our Ministers and servants, civil and military, will unite in upright and loyal efforts, each zealous in the discharge of his allotted duty, that thus they may uphold for Our adopted successor a more and more glorious rule. If this be done, the cravings of Our breast will be assuaged.

In obedience to former usage, let the

* The first of the two Empresses, it may be well to note here, is the actual Empress Dowager, or consort of the Emperor Hien Fêng, at the time of his death in 1861. The second is the *mother* of the Emperor just deceased; who was raised in virtue of her maternity to the position of Empress adjoint The titles Ts'ze-An and T'sze-Hi indicate in their meaning the peculiarity in their position of each of the two Imperial ladies. If the liberty be taken to borrow a rendering from the Latin, and to translat Ts'ze-an by *Placidia* and Ts'ze hi by *Felicia*, the unfamiliarity in the appearance and sound of these titles may be diminished for the reader unacquainted with Chinese.

† The title by canonization of the Emperor Hien Fêng, who died in 1861.

‡ The two Imperial physicians, who were promoted on his late Majesty's apparent convalescence.

¶ The Divine Vessel or instrument—*i.e.*, the throne. This metaphor, invariably employed on occasions such as the present, is derived from a passage in the Chronicles of the Han dynasty.

‖ The exhortation addressed by Yu to his sovereign, Shun-Shoo King, Book IV., ch. 1.

§ A quotation from the "Counsels of Kao Yao," Shoo King, Book III., Ch. 1.

robes of mourning be laid aside at the end of seven and twenty days. Be this proclaimed throughout the Empire for the information of all.

7.—A Decree. Whereas in the eleventh year of Hien Fêng (1861) on the decease of His Majesty the Emperor Wen Tsung Hien, His Majesty now departed excused, in conformity with precedent, the Manchu Generals, Governors-General, Governors, Commanders-in-Chief, provincial Commissioners of Finance and Justice, together with the Comptrollers of the Salt and Customs' revenue and Superintendents of the manufactories, from the duty of coming to the capital to do homage before the imperial coffin—now, inasmuch as His Majesty has departed this life and ascended to the empyrean heights, let all the high officials concerned take note that they need not ask permission to come to the capital to do homage before the imperial coffin, to the end that no neglect be entailed in the functions of their office. What is incumbent upon them is that they do exert their efforts for the complete fulfilment of their duty, and thus shew themselves not unworthy of their trust. The mere form of ceremonial observance is not that which is important. Let this be promulgated for the information of all.

8.—A Decree.—Twan Siu has memorialized, stating that his complaint gives no hope of speedy recovery, and he implores that he may be relieved of his official duties, and that his state allowance as a duke of the imperial lineage be terminated. Let Twan Siu be relieved of his duties and his allowance cease.

9.—A Decree. In the 3rd moon of the 26th year of Tao Kwang (1846) His Majesty the Emperor Süan Tsung Ch'êng, Our imperial Ancestor, issued a special edict, in the following terms :—

"The two names [given to an emperor] should not be capriciously altered in demonstration of respect. Henceforward, on a successor to the Throne being declared, let the first character of his name, as before, remain unchanged ; neither let any diminution be made in the strokes of which it is composed. As regards the second character, let decision be taken at the time with reference to the stroke that should be dispensed with. Let this be enrolled among the fundamental institutes."

This having been reverently received, We now, in respectful obedience to the will of Our august predecessor, ordain that the first character of the imperial name be written as before, without necessity of alteration. For the second character, let the last stroke be omitted, and alteration as a token of respect be made by writing the character as 浒. All books that have been printed before the issue of this decree remain unaffected by it.

The Court Circular contains only the following announcements :—

The Prince of Ch'un applies for a congé of ten days.

The Grand Council had audience.

Decree declaring a Regency to be constituted. (Peking Gazette, Jan. 15th, 1875.)

A Decree.

We have this day received a memorial from the Princes and nobles, Grand Secretaries, and Presidents of the Six Boards and Nine Superior Courts, beseeching that their Majesties the two Empresses should take upon themselves the functions of a Regency. Having reverently presented this for the affectionate perusal of their Majesties, We have reverently received the benign Mandate of Her Majesty the Empress Ts'ze-An-Twan-Yü-K'ang-K'ing and Her Majesty the Empress Ts'ze-Hi-Twan-Yü-K'ang-I in these words :—

The perusal of the memorial which the Princes and ministers have presented, ha made Us to feel with added poignancy the sorrow We are unable to dispel. The institution of a Regency from behind the Curtain §§ is essentially a temporary expedient. In consideration of the fact that His Majesty who has succeeded to the Throne is at present of a tender age, and moreover that, in times so filled with trouble the Princes and Ministers cannot be left without a source to look to for authority, We have no choice but to yield consent to their entreaty, until His Majesty who has now succeeded shall have fulfilled the period of his education, when We will forthwith return the government into His hands.

In reverently receiving this Decree, We have cause indeed to feel devoutly grateful for such benign commands. Notwithstanding the deficiencies of Our unworthy person, their Majesties the two Empresses have deigned to cause Us by their benign Mandate to enter upon the succession of the great dynastic line, magnifying Us to become recipient of the resplendent Commission from on High ; and, looking upward, We have been charged with the burden of the trust committed to Our keeping by His Majesty who has departed. Great is the bequest and difficult the task bestowed ! Sorrowful, sorrowful is Our distress ! ** Yet, as it has happily been ordered, the protection of their two Majesties the Empresses is vouchsafed until in person We take into Our hands the Supreme power. It behoves ye, Princes, nobles, and ministers, and officers high and low, to put forth your strenuous efforts, striving one and all in uprightness and loyalty to yield with joint accord support to an ever improving rule. Thus will ye give comfort above to the soul in heaven of His Majesty now departed, and gratify below the hope of our subjects within the limits of the seas. Great in such case will be the happiness vouchsafed to Us ! Let the Princes, nobles, and Ministers as aforesaid duly decide in consultation, and memorialize upon the arrangements which it is proper should be made for the conduct of the Regency.

Let this be promulgated throughout the empire for the information of all.

The following is a rough translation of a Notification regarding the Emperor's death, which was posted on Sunday in Shanghai. It is in substance a memorial by the Board of Rites, and is prefaced, locally, by the usual announcement that the Taotai has received it with instructions to promulgate it &c. The Mixed Court Magistrate adds that he has received verbal orders from the Taotai to post it, and that all officials are to govern themselves accordingly.

The Li-poo (Board of Rites) respectfully petitions. Whereas the deceased Emperor (Ta-hing—great departed) has been borne aloft on a dragon to be a guest on high, it is therefore proper that his parting notification (E-chao 遺詔) should be respectfully issued. Your Ministers have ascertained that by established law the Li-poo should respectfully engrave and issue copies to each of the Governors-General and Governors, to the yamens of the eight banners, to the Imperial city, to all the yamens of Shung-ching (the native place of the Imperial family), to Thibet, and to the yamens of the Manchu Military Governors. The notification will be given to the Board of War, to be issued to the Governors of each province. The custom heretofore has been to send a messenger to carry the proclamation ; and on the day that it arrives in each province, the civil and military mandarins, in conjunction with the literati old a young, the fringe taken off from their ha and in mourning clothes, will go o to the suburbs and, kneeling on t ground, reverently receive it. When th get back to their yamens, they will kn three times and kotow nine times ; and, st kneeling, will listen to the reading of t proclamation. When it is finished th will arise and, lamenting, will agai perform three kneelings and nine kotow The civil and military mandarins wi thenceforward all wear complete [mourni dress for 27 days, and for three days th will lament morning and eveni in conjunction with the literati. T wives of officers and such others will al wear mourning clothes for 27 days, and the officers of the 18 provinces will refra from marrying during the year. Neith must they have any music.

All the military and the people of t 18 provinces will wear mourning for days ; for one month they will not marr and for 100 days they will not have musi The officials, military and people, will n shave their heads for 100 days. The G vernors-general and Governors, and suc officials, will refrain from burning incen before the Gods (acts of public worship.)

It is further written in the law, th Ambassadors shall be sent to take noti of the event to Corea. It will be the du of the Board to petition to this effe And when the notice arrives, the King the said country will respectfully me it dressed in mourning clothes ; no mus being allowed at the ceremony. The Am bassadors will not be present at any banqu during their stay. To all the other depende cies of the Empire, such as Mongolia, it wi be the duty of the Colonial office to send officer to carry forth the message, whi will be received with like ceremony as the case of Corea.

It is also ascertained that it is writte in the Wai-tien (book of ceremonies), th in the 42nd year of Kienlung, a petition w made by the Li-poo, and consent was give to send the [obituary] notice to the Boar of War, which should transmit it to each the 18 provinces for promulgation.

Not only in this way will the trouble Post-horses be saved, but each province wi be earlier in getting into mourning. A this is on record.

Now on this occasion, in order to th respectful promulgation of the notice the Emperor's death, besides sending t Corea, it will be the duty of the Board Rites to prepare a petition (to the throne that the distribution to all the Chiefs Mongolia shall be entrusted to the Colonia office. In regard to the distribution t the 18 provinces, it will be right to ac in accordance with the regulation of th 42nd year of Kienlung. It will be for th Li-poo to deliver the notice to the Boar of War to be distributed ; that all th Mandarins of the provinces may at a early date be able to put on proper clothe and perform their required ceremonies With this view, this petition is respectfully submitted for hearing.

§§ *Chui-lieu-ting-chêng*—the expression sanctioned by historical usage for the regency of an Empress, who, with "a curtain dropped before her gives ear to the affairs of government."

** *K'iung-k'iung-tsai-kiu*—an expression attributed by the historian Tso K'iu-ming to Duke Ai of Lu, on hearing of the decease of Confucius.

Public Meetings.

THE FRENCH GAS COMPANY.

The annual meeting of the French Gas Company was held on the 29th January at the offices of the Agents. Present:— Messrs. S. A. Viguier, (in the chair), F Nissen, A. Hennequin, Dr. Pichon, J. F Rodewald, Capt. West, and A. Nachtrieb representing 315 shares.

Dr. Pichon and Mr. Rodewald were elected scrutators, and Mr. Nachtrieb secretary.

The Chairman said that as the Report had been printed and issued to the shareholders some days ago, it might be taken as read. The accounts had been

audited, as formerly, by Mr. Morel and Mr Brandt, who had carefully performed their duty. He now had to propose—

That the Report of the Agents for the year 1874, as printed, be adopted and passed.—Carried.

Precis of Report.

The number of street lamps remains without change, there being 191, of which 172 only are lighted each evening; and no augmentation can be expected under this head until the Council reconsiders the resolution it arrived at some time ago, to light but half the lamps on the Bund and dispense with five in other parts of the settlement. The consumption for street lighting has scarcely varied, being 62,456 cubic metres, against 62,090 the previous year, on which no increase can be expected while the Council's decision not to light the streets till midnight on moonlight nights (14th to 19th of Chinese moon inclusive,) remains in force. On the other hand, private consumers have increased from 75 to 81, and the consumption from 73,252 to 81,492 cubic metres. No actual change has taken place among Chinese; the native consumers numbering at the end of the year what they did at the beginning, viz., eleven, and this notwithstanding that the Company has offered special facilities and in various ways endeavoured to lead them to appreciate the advantages of gas-lighting. The loss by escapes is 7 per cent. against 4.18, but the Agents consider this very satisfactory, in presence of the works which have been going on, the repairs executed on the mains, and above all the loss incurred by the riot in the Concession last May, as to which no favourable reply has yet been received respecting a claim rendered. The following table is given of the quantity of gas made, the consumption, and the total waste during the year :—

Chiffres indiqués au Compteur de l'Usine	Le 31 Déc. 1874..	982,856
	Le 31 Déc. 1873..	822,725
Fabrication des 12 mois en mètres cubes		160,131
Consommation.— de la Voie Publique		62,456
des Compteurs		81,492
de l'Intérieur de l'Usine		5,970
Fuites Totales de l'Année		10,213
Totale..		160,131

The financial situation of the Company is equally very satisfactory, the year terminating with a cash balance of Tls. 723.77, while the only debt is one of Tls. 249.39 to the Agents. A new gasometer, the purchase of which was entrusted to Mr. A. Nachtrieb, has arrived in perfect order, and the cost, which was over Tls. 7,000, has been entirely defrayed. The profits of the year still exceed those of the preceding one, arising from increase in the sale of gas, and from a decline in the price of coal, which latter has cost Tls. 5 a ton, while during 1873 it could not be bought at Tls. 5½. In February last a dividend of 6 per cent. was declared on the last half of 1873; in July an interim dividend of 5 per cent for 1874, and one of 6 per cent for the second half of the year is now recommended, making 11 per cent for the year. It is proposed to divide the total net profits, of Tls. 8,642.33, as follows :—

Half to the Reserve Fund	₹4,321.16
Dividend already paid on ₹38,000 @ 5 %	1,900.00
Dividend payable on ₹38,000 @ 6 %	2,280.00
Carried to new account.....	141.17
	₹ 8,642.33

Mr. NISSEN proposed and Dr. PICHON seconded—

That the Accounts for the year 1874 be accepted and passed.

It was resolved, on the motion of the CHAIRMAN—

That the profits of the Company for the year 1874 be divided as follows :—

To Reserve Fund .....Tls.	4,321.1.6
Dividend of 5 % already paid on Tls. 38,000 ,,	1,900.0.0
Dividend of 6 % to be paid on Tls. 38,000 ,,	2,280.0.0
Carried to new Account ..... ,,	141.1.7
Tls	8,642.3.3

Mr. NACHTRIEB proposed—

That the payment of the six per cent dividend commence on 15th February.

This in consequence of the interruption to business caused by the Chinese New-year. The proposition was agreed to, and the Agents were instructed to carry it out.

Mr. NACHTRIEB then proposed, and Mr. PICHON seconded—

That the retiring Directors, Messrs. Viguier and Nissen, be re-elected.—Carried.

A vote of thanks to the Chairman, and to the Directors and Agents for their excellent management of the Company's affairs during the past year, concluded the business.

HONGKEW SCHOOL REPORT.

W. H. Medhurst, E. Iveson, R. S. Gundry, R. Miller, Arch. Little, A. N. Brown, Committee.

The last printed Report was dated 21st March, 1874, since which time the school has progressed steadily, and the children have kept up their number.

As the Committee found difficulty in awakening public interest in the institution, an effort was made to make it self-supporting by allowing Mrs. Gill to take the fees, she herself paying all expenses, and by changing the name from "Eurasian" to "Hongkew" school, thus inducing the attendance of children other than those of Eurasian birth, and meeting the expenses thereby. This plan has not met with the approval of Mr. Thomas Hanbury, who gave the use of the building rent free for a term of years; he wishes the school to remain a purely public institution, and one in which the community should take an interest, contributing towards its support.

The Committee, therefore, are compelled to appeal to the public for contributions to enable them to carry out the original plan; or they must admit their inability to conduct the school, and the institution must fall to the ground after expiry of the present lease. To enlist public sympathy, the Committee would suggest a personal inspection of the school, and they would point out that Eurasians as a class, demand that attention from this community which they receive in India and elsewhere.

It is difficult to form any estimate of the number of Eurasians in these Settlements, but without doubt they are gradually increasing; and it is necessary, not only in the cause of philanthropy, but in the interests of the community itself, that their education should be attended to, in order to prevent their becoming a burdensome and possibly troublesome class in the future.

An examination was lately held by the Committee, and the children did credit to Mrs. and Miss Gill's teaching; the discipline was good, and the health of all was satisfactory.

In conclusion, the Committee would beg those having charge of Eurasian children, to send them to this school; so that by greater numbers the expenses may be proportionately reduced and the institution flourish.

Amusements.

SATURDAY'S PAPER HUNT.

Bright, genial weather on Saturday afternoon induced a large company of ladies and gentlemen to attend the meet for the Paper Hunt at Overweg's Bungalow, where, at about three o'clock, a field of some forty horsemen assembled for the start. The country selected for the run was over the Pagoda side, leading from the bungalow towards Sicawei, crossing the creek of that name, and several others, and so round by the Hermitage to the finish at the Lawn, a spin of about nine miles, covered in little over fifty minutes. The foxes were merciful as regarded jumps, none of those to be negotiated being extra-formidable, and the paper was so judiciously laid, that although two or three checks occurred, only one was of any duration, affording excellent breathing time, and enabling the ponies so far to keep pretty well together. But a worse enemy even than creeks and ditches presented itself in the course of the run. The continuance of dry weather had converted the surface-mud of previous days into a dry and almost impalpable dust, which rose in clouds as the leading ponies gallopped onwards, enveloping those behind in just such a cloud as might be supposed to have concealed Ixion during his interview with Juno, and so bewildering the ponies that they stumbled and fell in all directions, in several instances cantering at their own sweet will over the plain for a long distance before suffering themselves to be caught and remounted. One of the amiable quadrupeds indeed got so far away, that his whilom rider, a Naval tyro, gave up the hunt altogether, both for pony and paper, accepting the opportune offer of a seat in a friendly trap, and adopting the doctrine of chances as to the pony finding its way home. The Lawn, at the finish, presented a pleasant and animated scene. Many ladies were there, and a large concourse of the sterner sex, while outside, waiting in the road, was such an assemblage of traps, broughams, &c., as reminded one strongly of the suburban meets at Egham or Hampton. The last jump was easy enough to look at, and in fact, several bipeds cleared it easily during the afternoon, but when the quadrupeds came to look at it, more than three-fourths of them refused, and it was only by dint of whip and spur that the recalcitrants were got over at all. Perhaps the large crowd of spectators just in front of them at the time operated as a deterrent. But "all's well that ends well," and this afternoon's sport ended pleasantly. For the light weights, Mr. Walker and Mr E. H. Gore-Booth, whose ponies each took a flying leap over the final obstacle, came in first so near together that it was almost a question of a dead heat. Mr. Walker was less than a length in front, and was thus first of the light weights. Mr. H. J. Limby won the honours for the heavies, Mr. Paynter being second, but both these were some distance behind several of the light weights.

THE A. D. C. PERFORMANCE.

The Amateur Dramatic Club gave their second performance for the present season in the New Lyceum, on Saturday night. The theatre was very well filled, from pit to gallery; and the first novelty to attract the eye was the neat and tasteful decoration by which the former white waste of its interior was replaced or relieved. Nothing obtrusive had been introduced, however; the white ceiling reflected as before the effulgence of the sunlight, but the now pale blue of the walls rested the eye as one looked around the house, and an edging of maroon velvet gave colour to the bald front of the dress circle and to the orchestra box, while a few narrow lines of gold contrasted agreeably with the very moderate display of colour.

The orchestra, under the direction of M. Remusat, having played a very pretty overture in spirited style, the curtain rose on the petite drama by Benjamin Webster, entitled "One Touch of Nature." As the piece has been already produced by the A. D. C., at a comparatively recent date, we do not require to give any detailed description of it now. It is enough to recall the incident upon which its interest hinges. An old copyist is accidentally placed in a position to rehearse, as substitute, the part of a father to a long-lost daughter, with the actress selected to play the part, but who has hitherto been unable to invest herself with it. In the actress the old man has recognised his own child, though she as yet is entirely ignorant of the relationship. The playwright's phrases fail to touch her, but when the old man casts aside his assumed part, and describes scenes and incidents of the actress's childhood, memory is awakened, and the "One Touch of Nature" calls forth the exclamation "My Father," in tones of genuine feeling, as she throws herself into the arms which have longed to embrace her. The author of the play is delighted, but his satisfaction is checked by finding that the newly awakened feeling which would secure the success of his piece is likely to be reserved for the father who has had his daughter restored to him, instead of being simulated on the stage.

The part of Mr. William Penn Holder, the copyist, was again taken by *Mr. Griffin*, who was careful never to over-act it, while he sounded all its depths of pathos. In a certain line of characters, and this was one of them, Mr. Griffin's acting is more than clever—it is gifted; when he comes on, he may be recognisable under the disguise of his make-up, but as the piece proceeds, his individuality is entirely lost in his assumed character. Thus the audience sympathised with Mr. Penn Holder, and were gratified that his "one touch of nature" had succeeded; but there was no special call for Mr. Griffin, when the curtain fell, though Mr. Griffin deserved the compliment. *Mr. Thomas Hawk* is a very important accession to the corps. His impersonation of Mr. Beaumont Fletcher, barrister and dramatic author, was unconventional and natural, yet had quite enough force, tempered by evenness of treatment. He is happier, however, in an active than a passive position; and when old Penn Holder poured into his ear the story of his wrongs and troubles, he found Mr. Fletcher a somewhat impatient if a sympathetic listener. But it must be remembered that Mr. Fletcher was irritated by encounters with a capricious actress and her jealous lover. The rather ungracious part of Mr. Belgrave, the jealous gentleman in question, who is "not to be imposed on," was given to *Mr. Montressor*, and he deserves not a little credit for the spirit and correctness of his performance. A slight air of consciousness showed that Mr. Montressor found himself in a novel position, but this scarcely detracted from the merit of his acting, and will have been overcome after a few appearances. *Mr. Isaacs* was well up in his part as Jones, the porter, but we doubt if he could be heard through the house. A nervous tendency to overdo the part, also, was traceable in his treatment; but he is a new actor, to the local stage at any rate, and with a little study, under judicious advice, will be a very useful one. *Miss Castor* was simply admirable in the rôle of Miss Constance Belmour—charming as to appearance; unconstrained, vivacious, and wonderfully natural as to manner; and word-perfect as to her acquaintance with the part. The piece on the whole went very smoothly, and the audience were lavish in their applause as the curtain descended.

The orchestra now gave a musical selection by way of interlude, played for the gratification of those of the audience (including of course all the ladies) who had not left their seats to "soothe their royal souls with pleasant reek," which a great many did in the lobby, talking the while of the drama in general and the A.D.C. in particular. The curtain then rose on Mr. W. S. Gilbert's very pretty burlesque "Thespis, or the Gods grown old," which had been thoroughly "acclimatized" by the literary, artistic, and musical talent of the A. D. C. But though Shanghai offered subjects enough, and any number of Josses, for the representation, Olympus there was none. Looking round for a substitute, the A. D. C. determined, doubtless from motives of economy, to patronise the native production; and selecting that which was most accessible, engaged the Feng wan-shan hills for the occasion. As it was inconvenient that Mahomet should go to the mountain, the local talent, (which by the way includes a Prophet), contrived to transfer the familiar eminences to Shanghai—on canvas. The ascent of the curtain, then, disclosed a very fine view of Feng-wan-shan and the creeks, which must have elicited a call for the artist, had not the mist partially obscuring it prevented full appreciation of its beauty until the grey mantle rolled away at the bidding of Apollo. As there is a possibility that the burlesque may be reproduced at no distant date, when some of the disadvantages under which it was, after all very successfully, presented on Saturday will not recur, we refrain from doing more at present than indicating generally its construction. The Gods are grieving over the disrepute and neglect they have fallen into, as they learn from a visit Mercury has just paid to earth, or rather to Shanghai. Thespis and his company of the Thessalian theatre visit Olympus on a picnicking excursion, navigating the creeks of course in a house-boat. After momentarily resenting the invasion of the sacred mount, Jupiter consults with Thespis, and in the end adopts his suggestion to visit earth for a year with his fellow-gods, while Thespis and his company fill their places, the father of the drama assuring Jupiter that he has often represented him on the stage, but did not find the part take with the public. The Gods depart, leaving Mercury to be consulted by Thespis in any difficulty; but though the latter gives his satellites *carte blanche* in the direction of human affairs, he hears no complaints, and assuming that all goes well, he believes old Jupiter has much exaggerated the difficulties of the position. Mercury, however, on the eve of the Gods' return, informs Thespis that so far from there being no complaints, there are a "thundering lot," but as they are only presented once a year, the Gods themselves will look into them. The return of the Gods is heralded by the P. & O. mail signals being hoisted on the Customs flagstaff, and the usual two guns. A "very mixed" Court is formed, and the Gods proceed to hear the petitions, which consist of complaints of mismanagement in Shanghai; and Thespis and his satellites are hard pressed to find excuses for the failure of their experiments. Thespis makes a grand exculpatory speech, and with a wave of his sceptre calls into view a "Model Settlement,"—showing a very effective picture of the Shanghai Bund, with the proposed new gardens. The audience applauded vehemently; and after repeated calls, the artist yielded to the demand that he should appear at the footlights. Mr. Prophet's brush has but lately been enlisted in the scenic service, and has proved an acquisition.

The burlesque, which is an excellent one in itself, has been localised with considerable ability, and put on the stage with great completeness. There were a number of songs and choruses containing local allusions, and hits in dialogue abounded, but it not infrequently happened that in delivery the latter failed to hit the mark. The leading parts were well acted, but there was sometimes a lack of smoothness, which argued insufficient study or irregularity at rehearsal. It should be remembered, however, that several important changes occurred in the cast at a late date; and for this reason the more praise must especially be given to *Miss Walbro's* very happy playing of Mercury, and *Miss Britannia Metal's* animated and comical acting and make-up as Diana. The Gods—Jupiter, *Mr. Will Honeycomb;* Apollo, *Mr. Doolittle*; and Mars, *Mr. Rewerb*, proved worthy of the positions assigned to them. *Mr. Drinkwater*, as Thespis, exerted himself at all points, but seemed to some extent oppressed with managerial responsibilities of a real as well as assumed nature. His stump speech kept the audience laughing, but the recurring phrase which formed the answer to his amusing category of great questions, failed altogether to tell, for the reason, no doubt, that it too closely resembled the refrain in his previous burlesque oration. *Mr. Honeycomb*, highly successful in his Jovian songs, was less fortunate with the jovial drinking chorus which he gave in the character of Waterion, the audience evidently regarding it as out of place. We should remark that the chorus was finely rendered, however. Thespis was fairly supported by his Thessalian Company, from among whom we may single out Preposteros, *Mr. Barkins;* Tipseion, *Mr. Carpenter*, (who was generally useful, and good); the ladies, Nicemis, (*Miss Castor*) (as attractive a brunette in this as she was a blonde in the other piece); Daphne (*Miss Jimny Rickshaw*), who certainly had a graceful carriage; and Imperia (*Miss Electra Plate*)—in a high state of polish. The Glee Club rendered very efficient aid with the choruses, and would probably have done better had not serious indisposition compelled *Miss Elliot*, early in the rehearsals, to relinquish her part as leading vocalist. Mr. Fentum followed the singers—" interpreted the symphonies," as the programme had it—very closely and skilfully, on the piano. The entertainment, as we have already said, was very successful; and since it would be a pity so much scenery, dressing, and adapting should be devoted to one representation, we hope the A. D. C. will "do it again," amending the burlesque wherever Saturday's experience suggested. We have little doubt that a second representation would be in some respects an improvement on the first.

THE MIH-HO-LOONG BALL.

If the Mih-ho-loong Company, like Goldsmith's dancing pair, desired to win renown by holding out to tire all others down, they might certainly claim to have attained the distinction in the matter of their annual ball, for it appears but too probable that no Company or society will attempt to divide with them the honour of giving the

grand assembly of the season. That success has always attended the Mih-ho-loong Ball is due greatly no doubt to the strength of the Company, socially speaking, but scarcely less so perhaps to the hospitable and liberal spirit which appears to animate the members in regard to these splendid entertainments. So far as the exertions of the Mih-ho-loongs themselves could ensure it, their fifth Ball, which came off at the Club on Tuesday night, eclipsed its predecessors in the various arrangements for the gratification and comfort of their numerous guests. The reward they most desired, however, the presence of their lady friends, was less encouragingly accorded than on some former occasions, although the number of acceptances led to high expectations in this respect. The cold weather of the past week appears chiefly to be responsible for causing a falling away from over seventy acceptances to an attendance of just fifty, by placing *hors de danse* not a few ladies who had purposed being present. There were still sufficient, however, to make a very gay and animated ballroom, and to carry the affair off without any appreciable diminution of its accustomed *eclat*.

The decorations should first be noticed in proceeding to a description of the scene, as they were the first thing to attract the attention of the visitor. In these the more conspicuous elements were of course those which, approved by the appropriateness and good taste of their design, have been given a permanent place in the ball-room armoury of the Company; but the introduction of much that was new, gave the interest and grace of novelty. A double chain of varicoloured Chinese lanterns spanned the Bund, from the Club to the jetty in front, and formed both a beacon and a barrier—in the latter view, something much pleasanter to be pulled up at, on a night journey, than those our Chinese friends interpose on water. It was discovered that another art had lately sent a representative to Shanghai, that of gas illuminating, and the work of the Shanghai Gas Company's artist was blazoned on the Club façade, where the letters "M. H. L.," and a finely formed star showed in the clearest manner what star was in the ascendant for the night. Having passed through the mat portico which sheltered from the keen night air, and pledged overcoats for the usual pawnticket, the visitor ascended to what may be called the ball floor of the Club, for spacious though it be, the ballroom, ladies' room, refreshment, supper, and card and smoking rooms, absorb all except the landing and verandahs, and these again, enclosed by the traditional pink and white banners, are utilised as withdrawing rooms and orchestra. A neat canopy is hung at the head of the stair, and the inner half of the landing has been made into a pavilion which is soon established as the favorite resort after the dances. Its principal ornament is a star of highly burnished bayonets placed on a red shield, around which is the motto "Shoulder to Shoulder." The bayonets are of the old triangular shape and we believe were lent from the Armory of the new Taotai, Fêng. Stands of arms also surrounded the pillars of the pavilion. At the head of the principal room, our old friend the fiery flying dragon is confined in his illuminated cage, from which radiate bayonets in bristling array, while underneath stands a row of rifles with swords fixed. In the other half of the ballroom are not less familiar decorations—in the shield with the motto "Defence not Defiance," and that which, round quarterings of hatchets and trumpets, announces in the words "Say the word and down comes your house," the prompt remedy the Company are prepared to apply when the enemy fire has to be cut off. A multiplicity of ornamental spears, banners, monogram shields, emblems and trophies, interspersed with evergreens in many forms, were grouped or hung about the rooms, which rarely if ever presented a more effective spectacle, or were more comfortably arranged.

Dancing did not commence till shortly before ten, when the excellent band of the U.S. corvette *Hartford* commenced the opening galop. A portion of the front verandah was made the orchestra, a very convenient arrangement at it seemed to us, although some of the dancers remarked that it led to the music being unequally diffused through the ballroom. The ladies' dresses were remarkable for variety and beauty; and the uniforms of British and United States Naval Officers, contrasting with the bright red shirts of the hosts, and these again with ordinary civilian dress, presented altogether a very effective scene. A few minutes after midnight, when two-thirds of the programme had been danced, the call to supper was heard, and half an hour was devoted to that pleasant interlude. The supper was on this occasion especially creditable to the caterer, Mr. Williams, the Club Steward, whose experience and reliability in matters of the sort we have frequently been called on to notice. It also deserves to be mentioned that the superior quality of some of the wines was the subject of general approval.

The remaining dances on the card were got through rapidly, and by two o'clock the ballroom was deserted by the ladies; while a few of their late partners sought consolation for a brief space longer by a visit to the supper room, where with a merry song and chorus they wound up the festivity.

Miscellaneous.

ATTACK ON A FOREIGNER.

An attack, which, from circumstances detailed below, it will be seen was evidently premeditated, was made yesterday forenoon, by a large mob of Chinese peasants and labourers, upon Mr. C. E. Hill, while on his way along the new roadway now making between Hongkew and Woosung. He had arrived at the village of Kungwang, about four miles from Shanghai, at about ten o'clock, and had sat down on a bank on the road to write an order for $100 for a man to take back to Shanghai, when he observed a well-known old woman of the neighbourhood, named Sw', with whom there had been several previous disturbances with reference to the new road, coming towards him at the head of some forty or fifty men, armed with bamboos and hoes. The old woman raised the cry, "Kill him! kill him!" in response to which the mob, which was rapidly increasing in numbers, made a rush towards Mr. Hill, who had hardly time to get up and stand on the defensive before they were upon him. He retreated, facing them, towards Woosung, the mob raising loud cries and screaming one to another, working themselves into a state of wild excitement, and crowding in upon him from all directions. By dexterously manœuvring, he managed to keep on the outskirts of the crowd, now increased to over 200, until he reached the banks of a creek, across which he succeeded in leaping, while for a time it operated as a barrier to the progress of his pursuers. The rearmost of these, however, soon pushed the foremost into the water, and they were all quickly across, giving utterance to the wildest yells, and rapidly continuing the pursuit of Mr. Hill over the adjoining paddy field. At the further side of this field there was another creek, across which he knew there was a rude stone bridge; towards this bridge Mr. Hill made his way, and succeeded in getting upon it just as the now infuriated mob closed with him a second time, numbers of them beating and punching him with their bamboos and hoes, tearing his overcoat to pieces, smashing his hat, and otherwise seriously maltreating him. He, however, managed to keep off many of the blows with a Penang cane he was carrying, and also wrested a bamboo from the man who carried it. With these in his hands, he made a stand on the stones forming the bridge, and soon laid half-a-dozen or more of his assailants on the ground; numbers, however, continuing to beat at him, amid shouts of "Kill him! kill him! Foreign devil! Throw him in the creek!" Near this place, there were a number of Chinese workmen, employed on the road, engaged in driving piles for a culvert, all of whom came to the spot, and though they seemed afraid to fight the rioters, exclaimed, "Don't hurt him, he's a good man, pays us money." Some in the crowd replied, "We don't want his money, we've got others." A large number of the mob at this point turned their attention to the workmen, attacked them violently, and, after beating them for nearly a quarter of an hour, left two of the headmen, Wong and Husey, for dead on the ground. After lying for some time in a state of insensibility, the men were removed to a neighbouring joss-house, and their injuries attended to. The other workmen all ran away, feeling their lives were in danger by having shown sympathy for Mr. Hill. They made their way to Hongkew, where they excited great consternation by spreading the report that Mr. Hill and his two headmen were murdered. While one portion of the mob was beating the workmen, the other continued the attack on Mr. Hill, but seeing one after another fall under his blows, they gradually drew off, and he took the opportunity of continuing his retreat towards the river—hatless and covered with mud and bruises. Fortunately he was not again followed, and pursued his way with difficulty on foot until he reached the house of Mr. Vail, at the Hongkew Wharf, where he was immediately put to bed and his bruises examined by Dr. Macgowan, who, fearful of internal injury having been sustained from the punching with the bamboos, ordered strict quiet to be maintained both by the patient and those around him, and the room to be darkened.

There can be no doubt that the plucky manner in which Mr. Hill defended himself at the joss-house bridge, alone saved his life; for there was no help near, and but for this, and the fact of the mob separating to attack the workmen, the chances are that an atrocious murder would have had to be recorded. It is, however, proper to state that some people working in the fields on the other side of the joss-house creek, shouted to the mob, "Do not come over here, or we'll beat you," under cover of which friendly remonstrance, seconded as it was by the knock-down blows some of them had received, Mr. Hill succeeded in getting away as above described.

The excitement in the Settlements when, by the arrival of some of the workmen, it became known that such a dastardly attack had been made upon a foreigner, coupled by their report that both he and two of his workmen were killed, can be easily imagined. The report flew like lightning, and many persons prepared to hasten to the scene. The news was immediately conveyed to the U. S. Consulate-General, and Mr. Seward at once telegraphed to the various police stations for all the available men to be sent to Kungwang. The arrival of Mr. Hill shortly afterwards, however, showed that this step was not needed, and the order was countermanded. Mr. Seward, Dr. Yates, and Mr. O. B. Bradford, with several other gentlemen, and followed by Acting-Superintendent Stripling and Inspectors Fowler and Wilson, with several constables, however, hastened to the village.

The party proceeded across country to Kungwang, and found that many of the assailants had gone to the district city of Pao-shan, taking with them the two head men who were so badly beaten, and also the old woman, no doubt with the view of giving such a version of the affair as would throw the blame on the foreigner and his native assistants, and so cause the latter to be punished according to the usual Chinese custom. Pursuit was instantly resumed toward Woosung, the party taking different routes across country. They arrived on the bank of the Woosung creek just in time to capture the last of the party, a respectable looking man, who had received a severe wound on the temple, which had bled profusely, and which he accounted for by saying the roof of his house had fallen in upon him. Others of the party were seen climbing the further bank of the creek, but there being no boats at hand the pursuit could not be continued. Mr. Stripling, however, despatched a *tepao* to Pao-shan to bring back the two headmen, and the pursuing party then returned to Woosung, in the neighbourhood of which place two more of the rioters were captured. The pursuing party returned to Shanghai in a steam launch, arriving about ten o'clock.

At eleven, the *tepao* came to Hongkew Police Station with the intelligence that the two headmen had been recovered from Pao-shan, and another of the assailants and the old woman captured. They were detained, he added, at Kungwang by a No. 1 *tepao*. Mr. Stripling directed that the men should be brought to Hongkew at an early hour this morning, and the old woman no later than nine o'clock, when a court of investigation will be opened at the U. S. Consulate-General.

The only known cause for such an attack appears to be that the old woman Sw', who was the owner of a house, some land, and a pond, in the line of the new road, refused to sell at a reasonable rate; while the negotiations were pending, the pond was filled up, and some neighbouring property purchased for $2,000, rendering the purchase of hers, with the exception of the pond, unnecessary. This seems to have exasperated the old lady so much, that she was heard to utter threats as to what she would do. Several warnings of what was about to happen were given to Mr. Hill by peasants of the locality, but he disregarded them so completely as to daily attend to his duty unarmed. His constant presence in the neighbourhood, associated him in the old lady's mind with the filling up of her pond and the non-sale of her property, and the result was as above described.

Correspondence.

THE PROPOSED PUBLIC MARKET.

To the Editor of the
NORTH-CHINA HERALD.

DEAR SIR,—A small paragraph appeared in the report of the Municipal Council's meeting of the 5th October, as follows:—"*Iron Market.*—Plans have been prepared and estimates sent for from England, for a Market, should the Ratepayers at their next Meeting approve of constructing a building of the kind on the Council's vacant land in the Honan road."

No notice appears to have been taken of the matter by the public in general, and certainly if the folly of any scheme would insure its being rejected, no notice would be necessary. Such, however, is, unfortunately, not always the case in Shanghai; and as I hear plans and specifications are now on their way out, for the perfecting of the scheme, I think it about time, at any rate, to endeavour to point out some of the objections to the plan.

I would suggest that no market is required; that "Smith's" is quite sufficient and well situated for the purpose, and that if the Municipalities are determined to endeavour to try and upset the present system, they had better try their success with Smith's Market, a space of ground already prepared for the purpose, without going to the expense of buying new buildings, and appropriating valuable ground for an idea.

That "markets make themselves" is a fact that (after the failure of nearly every known attempt to change them) needs no argument; you cannot force sellers of market-stuff into any one corner, unless you can clearly make it to their advantage. As soon as a strict surveillance of the Police is removed, the seller finds his way back to the old haunt, where, having a reputation, he easily disposes of his produce, and probably does better than his brother, who rents a stall in the "expensive foreign building;" so that, financially, the market would be like Miss Burdett Coutts' handsome one in London, and probably prove a *very* "white elephant."

That a market is a nuisance, is incontrovertible, and that such a thing could be permitted in the centre of any town, could only point to the ignorance or effeteness of the towns-people. Why should we have it here?

The present system of sewers is difficult enough to keep moderately sweet, without the addition of market drainage to ebb and flow up and down the length of the Honan and Foochow roads. But when one begins to estimate the amount of garbage that has to lie sweltering in the market during a summer's day, or has to be carried past one's doors through the hot atmosphere of 9.30 a.m., one would naturally suppose that the idea of this mass of decomposing matter would suggest visions of cholera and dysentery, sufficient to deter the most sanguine believer in the scheme from endeavouring to carry it through.

The noise and obstruction to the general traffic are minor disadvantages, after the all-important object of health, but even these deserve consideration; and if a market in the Maloo is decidedly undesirable, query if removing it to the proposed site will better matters?

I have only touched on public grounds for objecting to the plan. How far it would be just to property owners in the neighbourhood, is a point that is sure to receive the Landrenters' consideration.

I remain, dear Sir,
Yours faithfully,
CITIZEN.

Law Reports.

H. B. M.'s SUPREME COURT.

Shanghai, 26th Jan.

Before Sir EDMUND HORNBY, Chief Judge.

Motion to Review the Taxation of Costs, in re the Collision between the Brig "St. Francois" and the steamer "Cawdor Castle."

Mr. ROBINSON for plaintiffs.

Mr. WAINEWRIGHT for defendants.

Decision:—

His LORDSHIP, in deciding the points by this motion, said:—

With respect to the disallowance of the items under dates the 21st and 23rd November 1874, by the Registrar, I am inclined to direct that officer to review his taxation, and allow a proper proportion of them; and I do so on this ground, that Mr. Chagneau, the Surveyor appointed by the French Consulate, was leaving the Port, and in the probable event that the issue between the parties would ultimate in a question of the amount of damage sustained, his evidence would be necessary, and could not without risk have been passed over.

I sustain the objection to the item on the 24th of November, for attendance on Captain Deslandes. No issue was joined at the time, and there was then no occasion for the evidence of Mr. Deslandes, or of even any expression of opinion from him. To allow such an item would be to open the door to charges for attendance on any number of persons, who might call on a solicitor and express an opinion on some point in a case without being invited or asked.

I entirely concur with the Registrar in his disallowance of the items under dates from the 5th to 14th December, which are for the preparation of particulars of claim for damage referred to the Registrar and Merchants. The case of the *Peerless* (1. Prit., Dig. 111, p. 231) is a clear authority for their disallowance; but apart from this case, it occurs to me that on principle they could not be allowed. The costs of preparing a claim for a reference which is ordered by the Court, are only costs in the principal cause when no special order is made as to them; and when, in consequence of the allowance made, the party making the claim gets his costs as a matter of course. It seems to follow, then, that the practice—which is a good one—of not allowing the costs of the reference when a claim is reduced a fourth, refers to every part of the matters referred, and especially to that portion of them in which the offence, so to speak, originates, and which calls for the application of the penalty. On this motioneach party will pay their own costs.

An allusion was made in the argument to the case of the *Columbus*, on which the plaintiff relied as to the principle which should guide the Registrar and Merchants when assessing the damage incurred. I am anxious that it should not be assumed that I concur in thinking that case an authority in every case when a ship sinks after a collision. Under the probable facts of that particular case, Dr. Lushington's judgment was no doubt right, but it does not follow that the reasons he gives would be applicable to any other state of facts. I think the Registrar and Merchants were justified in looking upon it as an authority, but I am by no means clear that there were not facts in that case, not alluded to in the Report, which induced the learned Judge to depart from the usual principle of assessing damage. I shall endeavour to ascertain this by a reference to the Court of Admiralty in England.

CIVIL SUMMARY COURT.

Shanghai, January 30th.

Before R. A. MOWAT, Esq.

LING-AH-UNG, *v.* K. JESSOP.

This was a summons for $11, for wages as coolie. Defendant did not appear, and judgment was given for plaintiff.

C. R. ENGLAND *v.* C. D. RIDINGS.

Plaintiff, a storekeeper, sued defendant to recover $21.80, for goods sold and delivered. Defendant did not appear. Plaintiff said he had presented the bill a great many times, and had been promised payment, on the faith of which he had supplied the defendant with more goods.—Judgment for plaintiff.

C. R. ENGLAND *v.* C. CORNE.

In this case, plaintiff claimed $28 for goods sold and delivered. It was stated that defendant was sick, and could not appear to the summons; that he had no employment, and that his wife was obliged to go out to work to support him. It was further stated that defendant's household furniture was attached for rent, though the landlord kindly permitted it to remain in the house; and that the wife had said that many of the goods supplied must have been consumed while she was away from home at work, as she knew nothing about them.

His HONOUR asked what were the goods?

Plaintiff replied, meat, tinned goods, beer, porter, cooper, and a case of schnapps.

His HONOUR said he would give judgment against the defendant, but it seemed likely to be a barren one.

Feb. 1st.

YU-ZU-SHING *v.* T. W. SONG.

Both parties in this case were Chinamen, the defendant being a British subject from Singapore.

Plaintiff sought to recover $60.50, amount of Customs' duty he had been charged at Ningpo, upon seventy-nine slabs of tin sold to him by the defendant.

The case has been before the Court previously, but was adjourned till this morning, Heding now acting as interpreter for plaintiff, the defendant speaking excellent English.

The point of the case turned upon the quality of the tin sold, the defendant having given the plaintiff a Customs' exemption-pass for "tin" only; but when the slabs were landed at Ningpo, the Customs' Examiner found they were "compound tin," a different article altogether, and therefore liable to pay import duty. Had the metal corresponded with the description given in the exemption-pass, it would have been landed free of duty. Plaintiff therefore sought to recover the amount he had been obliged to pay through, as he alleged, the defendant's error. The quality of tin he ordered was "solder," or common tin, and not "compound" tin.

Defendant said he imported the 79 slabs from Singapore, the value being Tls. 9.8 per picul, upon which he had paid Tls. 1.25 per picul duty; and that they were sold to the plaintiff as common tin, and not as the best. The slabs were of the description mentioned in the invoice, as he thought. He considered the plaintiff's claim too high.

Plaintiff, in reply to a question, was understood to say that he had the Ningpo certificate as to what he had paid, at his house.

His HONOUR, after some time spent in examining the Customs' tariff and regulations as to these articles, said before he could decide the case, he must see the certificate from Ningpo as to what amount of duty the defendant had paid upon the slabs. It was perfectly possible that the defendant was telling the truth, that he had paid duty upon this particular metal as tin, which was not tin. With regard to the duty paid by the plaintiff at Ningpo, the defendant had better endeavour to prove an exemption-certificate, describing the metal as compound tin, and then plaintiff armed with this would probably get back the amount he had been charged. The defendant had also better go to the Customs' authorities here himself, and inform them of the circumstances under which he was being sued by the plaintiff.

POLICE COURT.

Shanghai, Jan. 27th.

Before R. A. MOWAT, Esq.

R. *v.* G. HADDEN.

Defendant, a seaman out of employ, was charged with being drunk and assaulting a Chinese boy, employed at the Sailors' Home.

In answer to his WORSHIP, defendant said he supposed he had struck the complainant, but he was not quite sure about it, as he was drunk.

Complainant deposed that he had some plates, &c., in both hands, containing food for sick men in the Home, when defendant struck him. Defendant had also struck him a week ago.

Defendant admitted that he did so, because complainant called him a thief.

His WORSHIP sentenced him to one week's hard labour, in default of paying a fine of $5.

R. *v.* RICHARD GREENWOOD.

Defendant in this case was quartermaster of the steamer *Fleurs Castle*, and he was charged with being drunk and making a disturbance on board, on the morning of the 26th instant.

The Second Officer proved this portion of the case; and J. Brewer, another quartermaster, deposed that defendant, when he came on board, used abusive language toward him, and also struck him, but he returned the blow, and a scuffle ensued.

Captain DICKIE informed the magistrate that he heard a great disturbance on board, and that the defendant was the principal cause of it. He had frequently used insulting language towards the officers, and had been reprimanded for it.

Fined $5.

Captain HUBBACK, of the steamer *Estepona*, was summoned by a Japanese boy, who had acted as his servant on board, for assaulting him on the 3rd January, and on several other occasions, during the voyage from Yokohama to this port.

Complainant's testimony, to the above effect, was interpreted by the Japanese Consular interpreter.

Defendant, who denied the charge, said that the boy was not used to the sea, and sometimes falling down, had broken several pieces of the dinner service. He emphatically denied having at any time struck the complainant, but admitted having taken him by the ear on one occasion, as he did not attend when he was speaking to him. Complainant was not on the articles. His wages were to be $10 per month.

His WORSHIP did not consider that the complainant had made out his case, but asked if the Captain was willing to take him back to Japan?

Defendant said he would give him a passage to Yokohama, but that he would not have him again as his boy. He left the ship very unceremoniously, and went to the Japanese Consul. The Interpreter came on board, and the result was that the lad had taken out this summons. The charge was a fabrication from beginning to end.

The case was settled by his Worship instructing the complainant to go on board either on Saturday night or Sunday morning, when he would be taken back to Yokohama.

Jan. 28th.

R. *v.* JOHN CREIGHTON.

Drunk and Incapable.

His WORSHIP said that this was defendant's fourth offence.

Defendant said that he was to be sent home in the steamer *Sarpedon*, but that she did not sail until Saturday morning.

His WORSHIP ordered that defendant be imprisoned until the ship was ready to sail, when he would be taken on board by the constable.

R. *v.* HENRY MCCLOUGHLIN.

Henry McCloughlin, a seaman of the steamer *Fleurs Castle*, was charged with being drunk and creating a disturbance on board, and also with being absent without leave.

Defendant admitted the charge.

Fined $3 for making a disturbance, to pay the cost of the summons, and to forfeit two days' pay, for being absent without leave.

Jan. 29th.

R. *v.* WATSON.

JOHN WATSON, who said he had been an A.B. on board the British barque *Deogaum*, Captain Burlar, gave himself up to be dealt with by the Court, under the peculiar circumstances narrated below.

His WORSHIP having told the man to go into the dock, asked him if he gave himself up as a deserter from the barque?

Defendant—I must leave that to you, because I came on shore to see you, and while I was away the ship sailed. I had asked the captain to let me come on shore to see you, and he said, "I will not give you permission, but you can go."

His WORSHIP was obliged to question the defendant very closely to elicit a connected story, his replies being as follow:—It was on Thursday, the 21st instant, I first asked leave to come ashore, and on Saturday I asked twice, but the captain refused on each occasion. When I asked him the first time on Saturday, he threatened to strike me with a poker. Twenty minutes afterwards, I asked him the second time. The ship lay in the river about seventeen days. The complaint I had to make against the captain was that the food was not properly cooked. The time was about 11.30 on Saturday morning when I first asked leave on that day to come ashore, and the barque sailed the same afternoon. I came on shore, and went to the Shipping-office, but was told I could not see the shipping master until two o'clock.

His WORSHIP—Then I suppose you give yourself up as being absent without leave?

Defendant—The captain would not give me leave. He has had difficulties several times with others of the crew about the food, since he has been on this coast.

His WORSHIP—I have not heard of any, and was going to remark about it.

Defendant—It was so, I assure you, Sir.

His WORSHIP—But you knew the ship was going to sail the same afternoon?

Defendant—I knew that, and that was why I wanted to come ashore and get a summons in the morning, but the captain would not allow me.

His WORSHIP—Where was the *Deogaum* going?

Defendant—From Shanghai to Nagasaki, and then to England.

His WORSHIP—How long were you on board?

Defendant—Three months and about thirteen days, and there were $18.40 due to me for wages. My clothes were sent on shore, and I received them. I believe they were sent by one of the men.

His WORSHIP—Did you not know that one of the men sent them?

Defendant—I did not know they were to be sent, but by a note that was in the bag I saw that one of the men did send them. They were brought in a sampan to the steps at the back of the Sailors' Home, while I was standing there. The barque was lying off the Sailors' Home. There was no name on the bag, but the sampan man said it was "for the man with one eye,"—(defendant has but one eye.)

The Usher, who had been sent to ascertain the correct dates of the barque's clearance and sailing, returned and said she was cleared on the 21st and sailed on the 23rd instant. She had gone to Nagasaki, but was expected here again.

Defendant said he heard the captain say she had cleared for England.

His WORSHIP—If you did not know your clothes were coming on shore, how was it you were standing at the steps at the precise time they were brought?

Defendant—I was at the Sailors' Home, and happened to be on the steps.

His WORSHIP—If you had any complaint to make against your ship, you had plenty of time to do it in. But she was here for sixteen days before you made any complaint, by your own showing. If there had been any real ground of complaint, there is no doubt that either you or some other of the crew would have made it known earlier. I must take it, therefore, that there was no complaint made, and that is borne out by the fact that there is even now no complaint by any other of the men on board. By your own account you seem to have hung on until the very last minute, and then stole ashore, or came ashore, in some way—I do not know, from what you have said, how—but you came ashore in some way, and there is no doubt as to the fact that you did so to get away from the ship. Then your clothes being sent after you, shows it is pretty clear that you left her without any intention of returning, and they must have thought so on board by sending your clothes so soon after you. Your leaving the ship in this way—being absent without leave—within twenty-four hours of sailing, amounts nearly to desertion, and I am not sure it is not desertion. With respect to your having $18 due to you as wages, I am not sure about that either; I shall sentence you to a month's hard labour.

Defendant was removed in custody.

January 30th.

R. *v.* GRAHAM.

GEORGE GRAHAM, a youth, came to the Court, in company with Mr. Bowen, Superintendent of the Sailors' Home, under the following circumstances:—It appears that on Friday, he shipped from the Home, for the *Inverness*, bound for New York, as an ordinary seaman, and was to have gone on board the same night. He refused to go on board, and the vessel had sailed without him. He said he did not wish to go. He (Mr. Bowen) told him it was not permitted for men to ship and then refuse to go on board, and urged him to go at once, but he still refused.

The Defendant, in answer to the charge, said he met the Captain of the *Inverness* between five and six o'clock the same evening, who told him to come on board at nine o'clock the next morning, as the ship would sail at eleven. It was at 9.30 on Friday night when Mr. Bowen spoke to him, and he (defendant) told him what the Captain had said.

Mr. BOWEN said it was the defendant's duty to have gone on board on the night of the day on which he had signed articles. He told him the vessel was to sail at daylight the next morning, and he said he would go on board in the morning.

His WORSHIP—Then he did not refuse altogether to go on board?

Mr. BOWEN—No, only on that night.

His WORSHIP—I understood you to mean that he had refused altogether.

Defendant said if he had not met the Captain, he meant to have gone on board on

Friday night. He got up at 6.30 on Saturday morning, and went off in a sampan to get on board, when he found the vessel had sailed.

His Worship asked in what vessel the defendant came to Shanghai, and how long he had been here?

Mr. Bowen replied that he came in the *Sooloo*, and had been in the Home about two months. He had had an opportunity of going to England, but did not care to go. His conduct in the Home had been very good. It was his (Mr. Bowen's) duty to bring such a case as this before the Court, as a check upon others who might also wish to act in a similar manner, which there was a tendency towards. Otherwise, the men would become an expense to the Consul. The defendant told him the same thing that he had now told the Court.

Defendant, in reply to further questions by his Worship, said there was a gentleman with the Captain when he met him on Friday evening, whom he believed to have been the Captain of the *Corona*.

His Worship said it was quite possible the Captain did tell the defendant to come on board in the morning, and if he (the Captain) went away earlier than he at first intended, the defendant was not to blame. It was only because defendant had been well-behaved in the Home that he was inclined to believe his story. It was very easy to make up such a story, however; and, as there were many seamen in Court, he wished them not to think it was easy to come there at any time with such a story, unless it was the truth. The truthfulness of the defendant's statement prevented his case becoming one of desertion. It was an unfortunate thing for him, but he must go back again, and Mr. Bowen could inquire of the Captain of the *Corona* if he was in company with the Captain of the *Inverness* at the time named by the defendant. At present, he believed the defendant's statement, for if the Captain had altered his time of departure, of course the defendant was not to blame.

February 1st.

R. *v.* John Symons.

Defendant, a stoker, was charged by a foreign constable with being drunk and disorderly in the Broadway, Hongkew, at 12.40 on Sunday morning.

Fined $2, and ordered to go back to his ship.

R. *v.* John Skeat and Richard Jones.

Charge of Larceny.

Defendants are seamen of the *Corona*, and were charged under peculiar circumstances with having stolen two barrels of pork and beef fat, each containing about 200 lbs.

The defence was that they were guilty of having sod the fat, but they did not know whether they were guilty of stealing it, as it was the property of the crew and did not belong to the ship at all.

H. C. Pearce, Chief Officer, who represented Captain Robertson, deposed that it had been an understanding between the captain and a cook who was formerly in the ship, that the latter was to have all the fat from the ship's coppers as a perquisite at the end of the voyage, if he did his duty properly. He was, however, discharged in New Zealand or account of drunkenness. Four barrels of fat had been saved by the cook on the voyage from England to New Zealand, there having been a number of enigrants and a crew and a half on board, which made it worth while to save it. Witness sold two of the barrels in New Zealand by the authority of the Captain, and would have also sold the remaining two if he could have got a good price for them. There was none saved on the voyage between New Zealand and Shanghai, because there were fewer people on board and it was not worth while. For the two barrels sold, he obtained 25*s.* each, the other two remaining on board the ship, in the fore peak. There was no lock, the peak being closed with a hatch, but not fastened. The fate belonged to the owners of the ship, and not to the prisoners.

The prisoner Skeat said that during the voyage from England to New Zealand no salt meat was consumed in the cabin—the cook told him so the day he was discharged, and he also said he had saved four barrels of fat during the voyage from the meat served out to the crew, but the Captain refused to let him have it, although it belonged to the crew.

The Chief Officer denied the statement that no salt meat had been consumed in the cabin on the voyage out.

William Sinclair, second officer, deposed that on Saturday night about 7.30, he heard a noise on deck, and on going out to see what caused it, he saw the prisoners rolling a barrel each along the wharf, away from the ship. He went after them and spoke to them about it, but they took no notice, and went on. They rolled the barrels to "Buffalo's," a Chinaman, near the wharf, and went into the shop. Witness also went there, and ascertained that they had sold the barrels for $4.50 each. The barrels were taken back to the ship.

By Skeat—When I saw you on the wharf, I told you to take the barrels back to the ship.

Skeat—You said "all right," after you had looked at them, and then went away. He then asked that the Chief Officer should be recalled to prove that the cook signed for the fat.

The Chief Officer said it was not the practice for a cook to sign for the fat. It was a perquisite that might be granted to him, on the condition that he behaved himself well. It might sometimes happen that the cook signed for the fat, but witness did not think it was so in the present case. The ship remained about 40 days in New Zealand, and arrived at Shanghai on the 8th ult.

Skeat stated, and his statement was supported by Jones, that the fat was saved out of the crew's allowance of 1½-lb. of meat each per day. The cook saved it, in order to sell it and divide the money amongst the men. If the men went to the coppers and skimmed it off themselves, they could have taken it in that way. It was part of their food, and the prisoners said they did not see that the Captain had the right to take it from them. It was not fat cut off the meat, but that which boiled out in cooking and rose to the surface of the water.

His Worship asked how many men formed the crew?

Skeat said there were twenty-four.

His Worship—Why should you take the other twenty-two men's fat?

Skeat—We did not take it for ourselves. The money was to be divided amongst the eight men who are left on board. All the others are gone away, but we had their authority to sell the fat. We should not have sold it on Saturday night, but we asked the Captain to advance us some money and he would not give us any. He (Skeat) bought bread with his share of the money.

The Chief Officer said there must have been others besides the prisoners concerned in the matter, because the prisoners (who are mere youths) could not have got the barrels out of the fore peak without help. They had no right to go into the fore peak at all.

Skeat said the fat from the fresh meat consumed in the cabin was sold to the emigrants; a cook could sell any amount of fat from fresh meat in that way, but not that from salt meat.

Jones said there were plenty of witnesses in Court, who could prove what he and Skeat said to be true.

His Worship—How did they get into the fore peak?

The Chief Officer—By lifting the hatch.

Skeat—The hatch was more often off than on all night, but it was shut down on Saturday night and we lifted it.

His Worship—From your own account of the matter, there are a number of circumstances which seem to point to the conclusion that you felt you had no right to the fat, or you would not have remained 40 days in New Zealand without disposing of it; neither would you have remained here since the 8th January without selling it. The reason you give is, that you sold it because the Captain would not give you money; but if the fat was yours, you had a right to ask for it to sell without regard to the Captain's giving you money at all. But I should like to see the Captain on the subject here, at ten to-morrow morning. Let the men go back to the ship, and attend here also at the same hour.

The prisoners then left the dock.

February 2nd.

R. *v.* John Skeat and Richard Jones.

This case, which was remanded from Monday, was again proceeded with.

John Robertson, sworn, stated—I am master of the British ship *Corona*. On the voyage out from England to New Zealand, salt meat was from time to time cooked for the cabin. The four barrels of fat in question were saved from the meat cooked for the whole ship's company, in number twenty-four. I promised the cook (discharged in New Zealand) that he should have the fat on condition that he behaved himself during the voyage. He misbehaved, and consequently forfeited his claim to it. The fat saved is the ship's property. It is at the cook's option to skim it from the coppers. Many cooks throw it away. The men have nothing to do with it. They could have what they required for cooking purposes at the time, but if they do not ask for it they are not entitled to it. Two casks of fat were sold in Dunedin, New Zealand, by the chief officer, who handed the amount realized to me. I have the power either to credit the owners with it, or to give it to the mates. At all times in general it is used for ship purposes, greasing the masts, mixing with tar, &c., but if there is a surplus it could be sold for the ship's benefit. The casks in which the fat was saved in this instance are the ship's property. I have not credited the owners with the amount received for the other two casks sold.

In answer to His Worship, if he had any questions to ask the witness, Skeat said—I don't see how the captain can take our meat.

His Worship—It is absurd for you to talk about your meat.

Skeat—Well, Sir, the fat is weighed out to us with the meat.

His Worship—Then you should have claimed it at the time. The time for you to claim your share was when it was in the coppers.

Skeat—Why, Sir, most of the fat contained in the four casks was accumulated on the forecastle, and returned by us to the cook on the understanding that when it was sold we received a share of the proceeds. If we had not done so, he could not have saved one cask full, instead of four, during the passage. If you opened the casks you would find pieces of fat as big as that (holding up both closed fists).

Capt. Robertson—The beef is not fat, and is the best I have ever seen on board ship. The Doctor on board praised it. I am not a fat eater, but I can eat that on board, it is so nice.

His Worship—Do you press this charge against the defendants?

Captain Robertson—Yes, it is the ship's property, and I will not give way to them.

Skeat—If you please, Sir, we went on board yesterday, but we were not allowed to turn to, and there was nothing for us to eat.

Capt. Robertson, in answer to his Worship, said the men have no right in the fore-peak. Their character is very indifferent; Skeat's especially, as he is very insolent. I could not better myself, or I should not have kept him so long. He has tried to get away from the ship several times.

His Worship, to defendants—I cannot look at this case in any other way, than that the fat is the property of the ship. I am also clear that you knew that, and looking at all the facts of the case, I am quite sure that you felt that you had no right to it. If you had honestly believed that it was your property, you had nothing more to do than ask permission to take it on shore. Another fact was, that the barrels were in the fore-peak, where the Captain assures me you had no right to go and where the ship's property only is kept. You have been in port 20 days, and yet you did not take it, but when you do, you wait until half-past 7 o'clock, when it is dark.

Skeat—I beg pardon, but I forgot to tell you that on Saturday last I asked the Captain for my discharge. The Chief Officer asked me what I was saying to the Captain, I told him, and added that there was some fat on board which I intended to sell, as it belonged to the crew.

His Worship—You told me that you took it because the Captain refused to give you money. I shall sentence you to one month's imprisonment with hard labour, each, and you will have to pay the cost of your maintenance during your incarceration.

U. S. CONSULATE-GENERAL.

Shanghai, Jan. 29th.

Before GEO. F. SEWARD, Esq., *Consul-General.*

Desertion.

JOHN HENDRICKS, a seaman of the American ship *Star of the West*, was charged with the above offence.

Defendant came to the Consulate on the 28th instant, asking permission to ship, confessing that he had deserted from the *Star of the West*, but in extenuation said that he was dissatisfied on board, and that the Captain would not allow him to come to the Consulate to make his complaint. Since he had been on shore he had sold some of his clothes to get something to eat.

The COURT said that although the defendant had been on shore for two days, he did not come to the Consulate to make any complaint, thereby shewing that he intended to desert from his ship.

Sentenced to thirty days' imprisonment.

MIXED COURT BUSINESS.

At the Mixed Court, on Friday, before the Chinese Magistrate and A. Davenport, Esq., another well-known Chinese thief was brought up charged with the very English offence of stealing lead from the roof of a house, known to London thieves as "flying the blue pigeon." From 18-lbs. to 20-lbs. of the metal were missed from an unoccupied house in Broadway, Hongkew, and there was no doubt the prisoner was the thief. As he was in a very weak state of health, the magistrate only sentenced him to undergo a month's cangue; then to be brought up again for further punishment, "if he is able to bear it."

At the Mixed Court on Monday, before Mr. Davenport, British Assessor (Chên being absent), a remanded charge against Chinese for stealing coal ashes refuse from a foreign hong was brought up for disposal. The prosecutor failed to attend the Court on Saturday, which led to the case being remanded, the accused being detained in custody. Yesterday morning there was again no prosecutor, and the charge was dismissed. It was felt that it would be better for the interests of justice, in cases where foreigners are concerned against Chinese, that the charge should either be prosecuted or intimation given of its withdrawal. In the present instance, as in some others, the accused were detained in custody for more than two days upon an accusation only.

On Wednesday morning, a native constable doing duty on the Bund, stopped a jinricksha, in which a man whom he knew to be a suspicious character, was riding. The constable found the bottom of the vehicle crammed with a variety of Chinese clothing, and the man being unable to give a good account of his possession of the articles, was taken to the police station, and detained. Enquiry led to the discovery that the clothing had been stolen from a house in the Shanse-road. The prisoner was taken before the authorities at the Mixed Court yesterday, and being recognised as an old thief, was sentenced to receive 200 blows (which were then administered), and to undergo three months' cangue.

On Tuesday evening, at about the dinner hour, a Chinaman was found prowling about the boys' apartments in the rear of a gentleman's residence in Hongkew. One of the boys happened to leave the dining room for some purpose, and found the fellow in an upper room. On being asked what he wanted there, he replied that he had made a mistake in the house, as he intended to have gone into the next one, adding that he had been told by the cook engaged there that he might go and take out some clothing to pawn. He was given into custody, and yesterday taken before the Chinese magistrate and Dr. Yates, at the Mixed Court, when, after evidence of the above facts had been given, he was remanded for further enquiry.

Between six and seven o'clock on Thursday night, a seizure of opium, alleged to have been smuggled, was made in the Canton-road, under more than usually peculiar circumstances. It appears that some lekin runners watched a Chinaman go into a house in the above named road, and on his coming out again they suspected he had opium concealed on his person. They accordingly seized him, when several Europeans came up, and a struggle ensued for the possession of the drug which was found on him. The result was that one of the runners was severely cut on the hand, with, as is supposed, a flexible stick one of the Europeans was carrying; and ultimately they all went to the Central Police Station, and laid the case before Mr. Inspector Fowler. Four balls of the opium were taken to the Station, which one of the foreigners claimed as his, saying that four other balls had been "stolen." The case was brought before the authorities at the Mixed Court the next morning. The Europeans concerned in the matter did not appear, and the four balls of the drug seized were ordered to be confiscated.

A case thoroughly illustrative of Chinese duplicity and cunning, was investigated before the Chinese magistrate and Dr. Yates at the Mixed Court, on Thursday. It appeared that during Thursday night, a foreign constable noticed the door of a small shop, in the Fukhien-road, occupied by a Chinese repairer of watches, standing open. He went into the place, and finding no one there, remained in the neighbourhood until a native constable came up, who remained in charge. Towards morning, a Chinese came to the shop and entered it, telling the native constable, whose appearance there seemed to surprise him, that he was a friend of the proprietor. He next looked round the shop, and said that several watches and three clocks had been stolen, and then hastily went away. The owner of the shop came in about half-past seven o'clock, and on being questioned by the constable, said it was true that some watches and three clocks had been stolen. He was asked to go to the Louza Police Station and report the alleged robbery, and at once did so. At the Station, he was closely questioned by Mr. Inspector Wilson, and prevaricated to such an extent in his story, both as to his alleged loss and also as to where he had spent the night, that suspicion was aroused, and he was made to turn his pockets out. In them were found a number of pawn-tickets for the identical articles, and he was of course detained in custody, and taken yesterday to the Court. The prisoner is the same man who, about six months ago, reported that thieves had entered his house and stolen some watches. The Chinese magistrate was at first disposed to inflict a heavy punishment at once, for the illegal pawning of the property, but ultimately ordered the delinquent to be taken, in charge of a policeman, to redeem the whole of it, and to be brought up again for sentence.

The Mixed Court magistrate was induced in the end of last week to agree to an attempt being made to deal vigorously with the predatory classes of Chinese who infest the Settlements. In accordance with this understanding, the Police arrested, in little more than twenty-four hours, over twenty notorious thieves and dangerous vagrants, and on Monday this first instalment of the mass of iniquity was marched up to the Court. It was found, however, when they got there, that so far from being in a fair way to solution, the problem of how to deal with them only began to show its difficulties. The Magistrate was willing that they should be locked up, for three months if the Police pleased—at the Police Station; but this Mr. Stripling strenuously argued against, and his representations were supported by A. Davenport, Esq., H.M. Vice-Consul, who sat as Assessor. Mr. Stripling pointed out that to compel the Municipality to find these bad characters quarters and board during a term of imprisonment, would be to relieve the Chinese authorities of a responsibility as to their subjects which each nationality in Shanghai bore for itself. It was suggested that the prisoners should be sent to the Chehsien's Yamên, but this it was feared would only result in their liberation within a day or two, and their return to their old haunts The inadequacy of the punishments meted out to culprits who came before the Court, was referred to as having the effect rather of attracting the criminal class to this settlement than of driving them away; and it was noticed that the severer justice of the Chinese Magistrate from the French Settlement, who occupied his brother mandarin's seat during the absence of the latter on a philanthropic mission to Japan in connection with the *Maria Luz* coolie business, had a most wholesome result. Chên was understood to say that there was no accommodation at the Mixed Court for so many, but room could be found perhaps for half the number, if the Municipality looked after the other half. Mr. Stripling represented that the cells at the Stations were not intended to be filled by permanent prisoners. The police had already to keep too many, in confinement; while as to canguing the crowd, there were not collars available for so many necks. The kneeling prisoners swayed in unison by their interlaced and knotted tails, and cried out in chorus against being imprisoned—no slight hardship to them at the Chinese New Year, when business is briskest. They were of all ages, from an artful young dodger who is a clever artist at cutting and picking pockets, to an ancient Fagin who has grown gray in crime. The majority wore an interested but decidedly impudent air. Only one showed a modest desire to keep in the background—a noted burglar, who appeared anxious to escape attention. Consideration of the question of their disposal having been concluded, it was decided that they should be well bambooed the same afternoon, in presence of a foreign sergeant of police, and then given an opportunity of leaving the Settlement within two days, which if they neglected to do, they would be again punished on being caught. The modest "cracksman," as the most eminent member of the profession present, was singled out to wear the decoration of the cangue for three months, a distinction which to a person of his retiring nature will probably prove rather burdensome.

Clippings.

The steamer *Priam* left Liverpool on Nov. 26th, and arrived at Woosung on the 27th instant; having made the passage in sixty-two days, including all stoppages, although during the voyage she experienced a strong gale in the Bay of Biscay, and heavy monsoon up the China sea.

From the Trade and Navigation Accounts of British India for the six months ending the 30th September last, we learn that the increased value of Imports and Exports during that period over the corresponding period of last year amounted to Rs. 3,650,767, or 9.19 per cent.; of this sum Rs. 2,579,279 is due to Imports and Rs. 1,071,488 to Exports.—*Friend of India.*

Friday night. He got up at 6.30 on Saturday morning, and went off in a sampan to get on board, when he found the vessel had sailed.

His Worship asked in what vessel the defendant came to Shanghai, and how long he had been here?

Mr. Bowen replied that he came in the *Sooloo*, and had been in the Home about two months. He had had an opportunity of going to England, but did not care to go. His conduct in the Home had been very good. It was his (Mr. Bowen's) duty to bring such a case as this before the Court, as a check upon others who might also wish to act in a similar manner, which there was a tendency towards. Otherwise, the men would become an expense to the Consul. The defendant told him the same thing that he had now told the Court.

Defendant, in reply to further questions by his Worship, said there was a gentleman with the Captain when he met him on Friday evening, whom he believed to have been the Captain of the *Corona*.

His Worship said it was quite possible the Captain did tell the defendant to come on board in the morning, and if he (the Captain) went away earlier than he at first intended, the defendant was not to blame. It was only because defendant had been well-behaved in the Home that he was inclined to believe his story. It was very easy to make up such a story, however; and, as there were many seamen in Court, he wished them not to think it was easy to come there at any time with such a story, unless it was the truth. The truthfulness of the defendant's statement prevented his case becoming one of desertion. It was an unfortunate thing for him, but he must go back again, and Mr. Bowen could inquire of the Captain of the *Corona* if he was in company with the Captain of the *Inverness* at the time named by the defendant. At present, he believed the defendant's statement, for if the Captain had altered his time of departure, of course the defendant was not to blame.

February 1st.

R. *v.* John Symons.

Defendant, a stoker, was charged by a foreign constable with being drunk and disorderly in the Broadway, Hongkew, at 12.40 on Sunday morning.

Fined $2, and ordered to go back to his ship.

R. *v.* John Skeat and Richard Jones.

Charge of Larceny.

Defendants are seamen of the *Corona*, and were charged under peculiar circumstances with having stolen two barrels of pork and beef fat, each containing about 200 lbs.

The defence was that they were guilty of having sod the fat, but they did not know whether they were guilty of stealing it, as it was the property of the crew and did not belong to the ship at all.

H. C. Pearce, Chief Officer, who represented Captain Robertson, deposed that it had been an understanding between the captain and a cook who was formerly in the ship, that the latter was to have all the fat from the ship's coppers as a perquisite at the end of the voyage, if he did his duty properly. He was, however, discharged in New Zealand or account of drunkenness. Four barrels of fat had been saved by the cook on the voyage from England to New Zealand, there having been a number of enigrants and a crew and a half on board, which made it worth while to save it. Witness sold two of the barrels in New Zealand by the authority of the Captain, and would have also sold the remaining two if he could have got a good price for them. There was none saved on the voyage between New Zealand and Shanghai, because there were fewer people on board and it was not worth while. For the two barrels sold, he obtained 25*s.* each, the other two remaining on board the ship, in the fore peak. There was no lock, the peak being closed with a hatch, but not fastened. The fate belonged to the owners of the ship, and not to the prisoners.

The prisoner Skeat said that during the voyage from England to New Zealand no salt meat was consumed in the cabin—the cook told him so the day he was discharged, and he also said he had saved four barrels of fat during the voyage from the meat served out to the crew, but the Captain refused to let him have it, although it belonged to the crew.

The Chief Officer denied the statement that no salt meat had been consumed in the cabin on the voyage out.

William Sinclair, second officer, deposed that on Saturday night about 7.30, he heard a noise on deck, and on going out to see what caused it, he saw the prisoners rolling a barrel each along the wharf, away from the ship. He went after them and spoke to them about it, but they took no notice, and went on. They rolled the barrels to "Buffalo's," a Chinaman, near the wharf, and went into the shop. Witness also went there, and ascertained that they had sold the barrels for $4.50 each. The barrels were taken back to the ship.

By Skeat—When I saw you on the wharf, I told you to take the barrels back to the ship.

Skeat—You said "all right," after you had looked at them, and then went away. He then asked that the Chief Officer should be recalled to prove that the cook signed for the fat.

The Chief Officer said it was not the practice for a cook to sign for the fat. It was a perquisite that might be granted to him, on the condition that he behaved himself well. It might sometimes happen that the cook signed for the fat, but witness did not think it was so in the present case. The ship remained about 40 days in New Zealand, and arrived at Shanghai on the 8th ult.

Skeat stated, and his statement was supported by Jones, that the fat was saved out of the crew's allowance of 1½-lb. of meat each per day. The cook saved it, in order to sell it and divide the money amongst the men. If the men went to the coppers and skimmed it off themselves, they could have taken it in that way. It was part of their food, and the prisoners said they did not see that the Captain had the right to take it from them. It was not fat cut off the meat, but that which boiled out in cooking and rose to the surface of the water.

His Worship asked how many men formed the crew?

Skeat said there were twenty-four.

His Worship—Why should you take the other twenty-two men's fat?

Skeat—We did not take it for ourselves. The money was to be divided amongst the eight men who are left on board. All the others are gone away, but we had their authority to sell the fat. We should not have sold it on Saturday night, but we asked the Captain to advance us some money and he would not give us any. He (Skeat) bought bread with his share of the money.

The Chief Officer said there must have been others besides the prisoners concerned in the matter, because the prisoners (who are mere youths) could not have got the barrels out of the fore peak without help. They had no right to go into the fore peak at all.

Skeat said the fat from the fresh meat consumed in the cabin was sold to the emigrants; a cook could sell any amount of fat from fresh meat in that way, but not that from salt meat.

Jones said there were plenty of witnesses in Court, who could prove what he and Skeat said to be true.

His Worship—How did they get into the fore peak?

The Chief Officer—By lifting the hatch.

Skeat—The hatch was more often off than on all night, but it was shut down on Saturday night and we lifted it.

His Worship—From your own account of the matter, there are a number of circumstances which seem to point to the conclusion that you felt you had no right to the fat, or you would not have remained 40 days in New Zealand without disposing of it; neither would you have remained here since the 8th January without selling it. The reason you give is, that you sold it because the Captain would not give you money; but if the fat was yours, you had a right to ask for it to sell without regard to the Captain's giving you money at all. But I should like to see the Captain on the subject here, at ten to-morrow morning. Let the men go back to the ship, and attend here also at the same hour.

The prisoners then left the dock.

February 2nd.

R. *v.* John Skeat and Richard Jones.

This case, which was remanded from Monday, was again proceeded with.

John Robertson, sworn, stated—I am master of the British ship *Corona*. On the voyage out from England to New Zealand, salt meat was from time to time cooked for the cabin. The four barrels of fat in question were saved from the meat cooked for the whole ship's company, in number twenty-four. I promised the cook (discharged in New Zealand) that he should have the fat on condition that he behaved himself during the voyage. He misbehaved, and consequently forfeited his claim to it. The fat saved is the ship's property. It is at the cook's option to skim it from the coppers. Many cooks throw it away. The men have nothing to do with it. They could have what they required for cooking purposes at the time, but if they do not ask for it they are not entitled to it. Two casks of fat were sold in Dunedin, New Zealand, by the chief officer, who handed the amount realized to me. I have the power either to credit the owners with it, or to give it to the mates. At all times in general it is used for ship purposes, greasing the masts, mixing with tar, &c., but if there is a surplus it could be sold for the ship's benefit. The casks in which the fat was saved in this instance are the ship's property. I have not credited the owners with the amount received for the other two casks sold.

In answer to His Worship, if he had any questions to ask the witness, Skeat said—I don't see how the captain can take our meat.

His Worship—It is absurd for you to talk about your meat.

Skeat—Well, Sir, the fat is weighed out to us with the meat.

His Worship—Then you should have claimed it at the time. The time for you to claim your share was when it was in the coppers.

Skeat—Why, Sir, most of the fat contained in the four casks was accumulated on the forecastle, and returned by us to the cook on the understanding that when it was sold we received a share of the proceeds. If we had not done so, he could not have saved one cask full, instead of four, during the passage. If you opened the casks you would find pieces of fat as big as that (holding up both closed fists).

Capt. Robertson—The beef is not fat, and is the best I have ever seen on board ship. The Doctor on board praised it. I am not a fat eater, but I can eat that on board, it is so nice.

His Worship—Do you press this charge against the defendants?

Captain Robertson—Yes, it is the ship's property, and I will not give way to them.

Skeat—If you please, Sir, we went on board yesterday, but we were not allowed to turn to, and there was nothing for us to eat.

Capt. Robertson, in answer to his Worship, said the men have no right in the fore-peak. Their character is very indifferent; Skeat's especially, as he is very insolent. I could not better myself, or I should not have kept him so long. He has tried to get away from the ship several times.

His Worship, to defendants—I cannot look at this case in any other way, than that the fat is the property of the ship. I am also clear that you knew that, and looking at all the facts of the case, I am quite sure that you felt that you had no right to it. If you had honestly believed that it was your property, you had nothing more to do than ask permission to take it on shore. Another fact was, that the barrels were in the fore-peak, where the Captain assures me you had no right to go and where the ship's property only is kept. You have been in port 20 days, and yet you did not take it, but when you do, you wait until half-past 7 o'clock, when it is dark.

Skeat—I beg pardon, but I forgot to tell you that on Saturday last I asked the Captain for my discharge. The Chief Officer asked me what I was saying to the Captain, I told him, and added that there was some fat on board which I intended to sell, as it belonged to the crew.

His Worship—You told me that you took it because the Captain refused to give you money. I shall sentence you to one month's imprisonment with hard labour, each, and you will have to pay the cost of your maintenance during your incarceration.

U. S. CONSULATE-GENERAL.

Shanghai, Jan. 29th.

Before GEO. F. SEWARD, Esq., *Consul-General.*

Desertion.

JOHN HENDRICKS, a seaman of the American ship *Star of the West*, was charged with the above offence.

Defendant came to the Consulate on the 28th instant, asking permission to ship, confessing that he had deserted from the *Star of the West*, but in extenuation said that he was dissatisfied on board, and that the Captain would not allow him to come to the Consulate to make his complaint. Since he had been on shore he had sold some of his clothes to get something to eat.

The COURT said that although the defendant had been on shore for two days, he did not come to the Consulate to make any complaint, thereby shewing that he intended to desert from his ship.

Sentenced to thirty days' imprisonment.

MIXED COURT BUSINESS.

At the Mixed Court, on Friday, before the Chinese Magistrate and A. Davenport, Esq., another well-known Chinese thief was brought up charged with the very English offence of stealing lead from the roof of a house, known to London thieves as "flying the blue pigeon." From 18-lbs. to 20-lbs. of the metal were missed from an unoccupied house in Broadway, Hongkew, and there was no doubt the prisoner was the thief. As he was in a very weak state of health, the magistrate only sentenced him to undergo a month's cangue; then to be brought up again for further punishment, "if he is able to bear it."

At the Mixed Court on Monday, before Mr. Davenport, British Assessor (Chên being absent), a remanded charge against Chinese for stealing coal ashes refuse from a foreign hong was brought up for disposal. The prosecutor failed to attend the Court on Saturday, which led to the case being remanded, the accused being detained in custody. Yesterday morning there was again no prosecutor, and the charge was dismissed. It was felt that it would be better for the interests of justice, in cases where foreigners are concerned against Chinese, that the charge should either be prosecuted or intimation given of its withdrawal. In the present instance, as in some others, the accused were detained in custody for more than two days upon an accusation only.

On Wednesday morning, a native constable doing duty on the Bund, stopped a jinricksha, in which a man whom he knew to be a suspicious character, was riding. The constable found the bottom of the vehicle crammed with a variety of Chinese clothing, and the man being unable to give a good account of his possession of the articles, was taken to the police station, and detained. Enquiry led to the discovery that the clothing had been stolen from a house in the Shanse-road. The prisoner was taken before the authorities at the Mixed Court yesterday, and being recognised as an old thief, was sentenced to receive 200 blows (which were then administered), and to undergo three months' cangue.

On Tuesday evening, at about the dinner hour, a Chinaman was found prowling about the boys' apartments in the rear of a gentleman's residence in Hongkew. One of the boys happened to leave the dining room for some purpose, and found the fellow in an upper room. On being asked what he wanted there, he replied that he had made a mistake in the house, as he intended to have gone into the next one, adding that he had been told by the cook engaged there that he might go and take out some clothing to pawn. He was given into custody, and yesterday taken before the Chinese magistrate and Dr. Yates, at the Mixed Court, when, after evidence of the above facts had been given, he was remanded for further enquiry.

Between six and seven o'clock on Thursday night, a seizure of opium, alleged to have been smuggled, was made in the Canton-road, under more than usually peculiar circumstances. It appears that some lekin runners watched a Chinaman go into a house in the above named road, and on his coming out again they suspected he had opium concealed on his person. They accordingly seized him, when several Europeans came up, and a struggle ensued for the possession of the drug which was found on him. The result was that one of the runners was severely cut on the hand, with, as is supposed, a flexible stick one of the Europeans was carrying; and ultimately they all went to the Central Police Station, and laid the case before Mr. Inspector Fowler. Four balls of the opium were taken to the Station, which one of the foreigners claimed as his, saying that four other balls had been "stolen." The case was brought before the authorities at the Mixed Court the next morning. The Europeans concerned in the matter did not appear, and the four balls of the drug seized were ordered to be confiscated.

A case thoroughly illustrative of Chinese duplicity and cunning, was investigated before the Chinese magistrate and Dr. Yates at the Mixed Court, on Thursday. It appeared that during Thursday night, a foreign constable noticed the door of a small shop, in the Fukhien-road, occupied by a Chinese repairer of watches, standing open. He went into the place, and finding no one there, remained in the neighbourhood until a native constable came up, who remained in charge. Towards morning, a Chinese came to the shop and entered it, telling the native constable, whose appearance there seemed to surprise him, that he was a friend of the proprietor. He next looked round the shop, and said that several watches and three clocks had been stolen, and then hastily went away. The owner of the shop came in about half-past seven o'clock, and on being questioned by the constable, said it was true that some watches and three clocks had been stolen. He was asked to go to the Louza Police Station and report the alleged robbery, and at once did so. At the Station, he was closely questioned by Mr. Inspector Wilson, and prevaricated to such an extent in his story, both as to his alleged loss and also as to where he had spent the night, that suspicion was aroused, and he was made to turn his pockets out. In them were found a number of pawn-tickets for the identical articles, and he was of course detained in custody, and taken yesterday to the Court. The prisoner is the same man who, about six months ago, reported that thieves had entered his house and stolen some watches. The Chinese magistrate was at first disposed to inflict a heavy punishment at once, for the illegal pawning of the property, but ultimately ordered the delinquent to be taken, in charge of a policeman, to redeem the whole of it, and to be brought up again for sentence.

The Mixed Court magistrate was induced in the end of last week to agree to an attempt being made to deal vigorously with the predatory classes of Chinese who infest the Settlements. In accordance with this understanding, the Police arrested, in little more than twenty-four hours, over twenty notorious thieves and dangerous vagrants, and on Monday this first instalment of the mass of iniquity was marched up to the Court. It was found, however, when they got there, that so far from being in a fair way to solution, the problem of how to deal with them only began to show its difficulties. The Magistrate was willing that they should be locked up, for three months if the Police pleased—at the Police Station; but this Mr. Stripling strenuously argued against, and his representations were supported by A. Davenport, Esq., H.M. Vice-Consul, who sat as Assessor. Mr. Stripling pointed out that to compel the Municipality to find these bad characters quarters and board during a term of imprisonment, would be to relieve the Chinese authorities of a responsibility as to their subjects which each nationality in Shanghai bore for itself. It was suggested that the prisoners should be sent to the Chehsien's Yamên, but this it was feared would only result in their liberation within a day or two, and their return to their old haunts The inadequacy of the punishments meted out to culprits who came before the Court, was referred to as having the effect rather of attracting the criminal class to this settlement than of driving them away; and it was noticed that the severer justice of the Chinese Magistrate from the French Settlement, who occupied his brother mandarin's seat during the absence of the latter on a philanthropic mission to Japan in connection with the *Maria Luz* coolie business, had a most wholesome result. Chên was understood to say that there was no accommodation at the Mixed Court for so many, but room could be found perhaps for half the number, if the Municipality looked after the other half. Mr. Stripling represented that the cells at the Stations were not intended to be filled by permanent prisoners. The police had already to keep too many, in confinement; while as to canguing the crowd, there were not collars available for so many necks. The kneeling prisoners swayed in unison by their interlaced and knotted tails, and cried out in chorus against being imprisoned—no slight hardship to them at the Chinese New Year, when business is briskest. They were of all ages, from an artful young dodger who is a clever artist at cutting and picking pockets, to an ancient Fagin who has grown gray in crime. The majority wore an interested but decidedly impudent air. Only one showed a modest desire to keep in the background—a noted burglar, who appeared anxious to escape attention. Consideration of the question of their disposal having been concluded, it was decided that they should be well bambooed the same afternoon, in presence of a foreign sergeant of police, and then given an opportunity of leaving the Settlement within two days, which if they neglected to do, they would be again punished on being caught. The modest "cracksman," as the most eminent member of the profession present, was singled out to wear the decoration of the cangue for three months, a distinction which to a person of his retiring nature will probably prove rather burdensome.

Clippings.

The steamer *Priam* left Liverpool on Nov. 26th, and arrived at Woosung on the 27th instant; having made the passage in sixty-two days, including all stoppages, although during the voyage she experienced a strong gale in the Bay of Biscay, and heavy monsoon up the China sea.

From the Trade and Navigation Accounts of British India for the six months ending the 30th September last, we learn that the increased value of Imports and Exports during that period over the corresponding period of last year amounted to Rs. 3,650,767, or 9.19 per cent.; of this sum Rs. 2,579,279 is due to Imports and Rs. 1,071,488 to Exports.—*Friend of India.*

The departure, on the 14th instant, by the French mail steamer, of three of the best known residents in the Colony is worthy of notice. The Hon. R. Rowett, as a member of the Legislative Council, and Chairman (for a time) of the Hongkong and Shanghai Bank, was connected with many important movements in the Colony during his residence here, and he was very generally esteemed as a valuable and faithful public servant. The numerous friends he acquired in the Colony united in expressing regret at his departure. Mr. George Heard, whose failing health compelled him to seek a change of air, was as widely known and as generally liked. And Mr. S. D. Sassoon, who was known and respected as a leading merchant, and whose liberality, courtesy and kindly spirit had made him very popular with the commercial community, also left amidst much regret.—*China Overland Trade Report.*

We have received news from Persia which will carry grief to the hearts of every Parsee in Bombay. The chief of the Parsee community in the dominions of the Shah, a man of great personal weight and high in the confidence of his sovereign, has been basely assassinated. His death, it would appear, has been compassed at the instigation of certain functionaries who were known to have been jealous of his influence, and we understand that on a previous occasion a determined attempt had been made to get rid of him by the dagger of an assassin. Rasheed Mehrban gained great popularity amongst the Iranee Parsees by the energetic measures which he took during the recent famine to save the lives of his countrymen. The Shah, who always viewed him with favour, had conferred upon him magisterial rights over the Parsee quarter of Yezd, and he was empowered to flog Moslems who should without good reason trespass upon Parsee precincts. The possession of this and other privileges made him peculiarly obnoxious to certain classes of Mahomedans, especially among the inferior grade of the officials. These latter were scandalised at the spectacle of a Kaffir riding in a carriage and having a retinue. The fact that Rasheed distributed money and corn amongst the Moslem victims of the famine did not mitigate this fanatical dislike. On one occasion, a gang of armed ruffians got on the terraced roof of his house and surrounded him; but by his great strength and resolution he overmastered the leader and compelled the others to fly. But none of the miscreants were arrested, and his brothers and friends constantly apprehended a renewed attack upon him and advised him to go to Teheran, where he would be more safe. This advice he unfortunately disregarded, and on the 28th ultimo he fell by the hand of an assassin, at noonday in the bazaar. The local authorities appear to have taken no steps for the arrest of the murderer and his instigators. But since the Shah and the Vizier have been appealed to, there can be little doubt that for the credit of the Persian Government substantial justice will be dealt out to the guilty. Two of the brothers of the unfortunate Rasheed are well-known merchants carrying on business in Bombay under the name of Godrez Mehrban & Co. They were secretaries to the Persian Famine Relief Fund organised in Bombay.—*Times of India.*

In the pages of the China Commercial Reports just sent home by her Majesty's Consuls, there is new matter of much moment for those who administer the revenues of India. The solvency of our Eastern Empire depends, in a large degree, upon the enormous annual profits made by the Bengal and Malwa opium cultivation. Those profits, in turn, depend upon whether or no China grows the poppy for herself, and produces it successfully as regards quality and quantity. Let but two facts arise—the proof that the best opium can be manufactured from Chinese poppies, and the news that the Celestial Government resolve to legalise the manufacture, and at that instant the Finance of India would sustain a blow very serious in its commercial and administrative consequences. At present we know most Indian authorities stoutly maintain that no country can produce opium to equal the Patna and Malwa qualities; and that the Chinese will never buy, if they can afford the Indian luxury, any other samples. We are also aware that the returns of our opium-trade remain "magnificent," and that there is at present no marked diminution in the demand. Nevertheless Indian Chancellors and the Marquis of Salisbury should very carefully ponder the subjoined quotations from this China Blue-Book. Consul Sinclair, from Foochow foo, writes: "The chief feature to remark upon is a falling-off in the consumption of Patna, a reason for which is the China-grown drug having been in more plentiful supply, roughly estimated at about 1,700 piculs against 1,000 piculs in the year 1872." Consul Hughes, of Hankow, reports: "The smuggling of native opium was this year unusually large, as the triennial examinations for the degree of M.A. attracted great numbers of candidates, and many of those who came from districts producing opium or bordering on Hoonan or Szechuen, are said to have carried in their baggage—which in such cases is, as a rule, exempt from Customs examination — considerable quantities of opium." From Kewkiang, Vice-Consul King sends word, "In the province of Szechuen, which I visited in the autumn, the cultivation of the poppy appeared to be general, and the consumption of opium almost universal. From time to time the officials fulminate more or less severe orders against the cultivation and sale, but, from all I could learn, no prohibitive measures are put in practice." Acting-Consul Harvey, of Newchwang, reports: "There can be no doubt that the cultivation of the poppy is on the increase throughout the whole of Manchuria. The area under cultivation is greater last year than it was in 1872. The action of the Imperial and local authorities is very irregular and uncertain. Proclamations are issued from time to time forbidding the cultivation of the poppy; on the other hand, the existence of the native drug has been recognised in this place, and the tax upon it is fixed at one-third less than that charged on the foreign article." No one who knows the vast importance of this matter will deny that these messages are very ominous as to the quantity of the native drug, while as to the improving quality the subjoined remark from Consul Mongan, of Tientsin, is surely suggestive: "Shansi produced last year the best native drug, and it is reported to have been sold there lately at 544 taels per 100 catties, a higher rate than that at which Indian opium was disposed of here." The Indian Government has long been aware of this growing competition, and are bound to keep it in view, for, although at present we command the market, grave deficit or a fiscal convulsion would follow any sudden revolution.—*Daily Telegraph.*

THE YUNNAN EXPEDITION.

(Rangoon Gazette.)

We have been knocking for some years past at what may be called the front door of China, and from Tientsin, on the North, down to our own island of Hongkong on the South, at various ports along the coast we have succeeded to a limited extent in gaining admittance. The "Central flowery land" has, however, been practically closed to all excepting now and again some enterprising Jesuit Missionary. The expedition which left on Saturday, (12th December), and which after a week's detention at Mandalay is to start for Bhamo, and thence for the Chinese frontier, is about to attempt the back door—and taken in front and rear simultaneously by the advancing forces of civilization, it is to be hoped that Chinese exclusiveness and conservatism may yield. In fact, already hopeful signs of it are to be noted. The wonderful advances made by Japan in an incredibly short space of time, and the striking facility with which she has adopted and assimilated many of the leading features of occidental civilization, as traceable in the application of science, appear to have considerably impressed the Chinese authorities. It is only a few years since Sir Macdonald Stephenson visited China, and made great efforts—efforts doomed unfortunately to disappointment—to obtain the countenance and support of the Government of Pekin for a railway system he proposed to inaugurate. A pretty working model was sent to the Emperor, but the *fanqui* was told to go about his business—neither he nor his railways were wanted. . . . . (After noticing the Foochow and Amoy telegraph, the writer goes on to say):—But the Chinese mind is moreover becoming familiarized with the idea of railroads. The example of Japan and the recent invasion, which appears to have operated like an electric shock, has thoroughly stirred the country, and at Tientsin—tolerably close to Pekin—Li-hung-chang, a leading Chinese statesman, is projecting a railroad to connect those two places, and a second from the seaboard to the coalfields of Pao-ting-fu. The movement will in all probability deepen and widen. *Ce n'est que le premier pas qui coute*, and possibly it is not too much to expect, judging from what has been done in Burmah the last ten years, that before another ten elapse, in place of steamboat excursions terminating at Bhamo, we may be in a position to ask for a return ticket by rail to China.

THE PROGRESS OF THE TELEGRAPH TO AMOY.

(Foochow Herald.)

In a recent issue we announced the temporary suspension of operations in connection with the projected line of telegraph to Amoy. We are informed that the Great Northern Telegraph Company were induced to believe that by suspending the work for a short period they might, by direct negotiations with the Chinese Authorities, arrive at an understanding by means of which the terms originally agreed upon might be carried out in the full spirit of the original concession. It was also hoped that the native officials might, by calm argument, be convinced of the folly and inutility of interfering either directly or indirectly with the Company's property. In order to facilitate matters, the Chief Manager of the Company in China, Mr. Dreyer, assisted by the Company's Engineer in Chief, Captain Hoskier, and introduced by the United States Consul, held several interviews with the Fantai, the Taotai—Pan—who is notoriously anti-foreign, and the Commissioners of the Foreign Board of Trade. The only result of these interviews was that the Fantai—admitting the soundness of the Company's position—proposed to issue instructions to the officials on the route, to protect the line, and he also offered to appoint deputies who should accompany Captain Hoskier overland to Amoy. These propositions would have been reasonable enough had not the Fantai adroitly attempted to tack on another condition, viz.: that the Company should cause an official despatch to be sent from the Danish Consulate, to the effect that in the event of any trouble arising —through the turbulence of the people—the Chinese Authorities should not be held responsible. This proposal was at once—for obvious reasons—rejected by the Company. It would have been in the highest degree injudicious, if not absurd, to have consented for one moment to an arrangement by which the Chinese officials—ever watchful and intriguing—could disclaim all responsibility for the unlawful acts of their own people. We have seen the facility with which the wires were pulled at the time of the Tientsin massacre, by ruffianly and cowardly mandarins. We all know how the supposed popular feeling against foreign life and property is stirred up, not by the people, but by their natural enemies—the so-called *literati*; and knowing this, can we wonder that the Great Northern Telegraph Company declined to put their sole trust in the professed good faith of the Provincial Government.

Four days after the final interview between the Mandarins and the Company's representatives, Pan—Taotai—wrote to the latter, peremptorily ordering the removal of that portion of the line already constructed, otherwise threatening to pull it down. This very communication from Pan furnishes us with the key to the entire Mandarin policy. It is pretty evident that they were not sincere in their professed desire to carry out their engagements with the Company, and that in the meantime they are seeking by threats and intrigue to jeopardize the entire undertaking, in defiance of all recognized principels of political honesty and good faith. The Company, conscious of the soundness of its position, is not to be deterred from prosecuting the work, either by intimidation or deception, and we are glad to learn that the line is to be pushed forward with increased vigour. Let trust that ere long this important enterprise will become an established fact.

COMMERCIAL INTELLIGENCE.

SHANGHAI, FEBRUARY 3RD, 1875.

ARRIVALS.—The steamers *Priam*, *Nankin*, and *Scotland*.

TELEGRAMS—dated London 29th Jan.—*Cotton* 7 7/8d. for *Mid. Orleans*; *Lead*, W.B., £24 per ton; and *Discount* 3 per cent.; *Shirtings* and *Iron*, no change.

PIECE GOODS.—The business recorded since 27th ultimo does not amount to much in the aggregate. Still, sales have been of daily occurrence, and, considering season, and the disheartening advices that come from nearly every quarter inland, the wonder is that there has been anything done. At the commencement of the week, *Black*, *Gentian* and *White* Woollen goods, *Camlets* chiefly, were wanted in anticipation of the decree which was to order the natives into mourning for the late Emperor, and holders of such, being unwilling to break up their assortments without a due consideration, obtained good prices, comparatively, while the demand lasted. In the value of *White Camlets* an advance of nearly Tls. 2 per piece from the lowest point was established. *Black* have risen fully Tls. 1 per piece, and an inferior and mildewed *Gentian* color, which was formerly unsaleable almost, has been disposed of at fully 7 mace better than could have been got about a fortnight ago. *Black Lastings* also improved another quarter of a Tael per piece, and *Black Lustres* and *Medium Cloths* benefited slightly. But in the mourning department all excitement is now over and quietness reigns. *Woollens*, otherwise than as above stated, have received but little attention, the only business published being 200 pieces, *Gentian Long Ells*, at Tls. 6.60, and about 500 pieces C.P.H. assorted *Spanish Stripes* at Tls. 0.60 per yard. In COTTON fabrics, purchases have embraced *Grey Shirtings* of all weights at former quotations; *White Shirtings*, 56 *a* 66 Reeds, to the extent of 6,000 pieces at rather easier rates; *T-Cloths*, 14-lbs. *Drills*, *Gentian Shirtings*, *Turkey Red Shirtings* and *Handkerchiefs*, and most of the sales have been for immediate or early clearance, the principal buyers being the JAPAN and SOOCHOW dealers. The following is a *précis* of sales as reported since last mail day, viz. :—

Grey Shirtings—6-lbs.	4,000	pieces	at Tls.	1.29 *a* 1.31	per piece.
—7-lbs.	5,000	,,	,,	1.35½ *a* 1.37	,,
—8¼-lbs.	12,000	,,	,,	1.63 *a* 1.81	,,
—9 10/12-lbs.	5,000	,,	Eagles ,,	2.60 *a* —	,,
T-Cloths—8-lbs.	3,000	,,	,,	1.60 *a* 1.70	,,
—6-lbs.	600	,,	Dewhurst's M.T. ,,	1.25 *a* —	,,
—7-lbs.	6,000	,,	Mex. Ordinary ,,	1.31 *a* 1.35	,,
Drills—English—14-lbs.	3,800	,,	,,	2.30 *a* 2.32½	,,
Gentian Shirtings	1,000	,,	,,	2.50 *a* —	,,
Turkey Reds—2¼ *a* 3-lbs.	2,250	,,	,,	1.70 *a* 1.98	,,
Handkerchiefs	4,000	doz.	,,	0.51 *a* 0.63	per dozen.

At the close, there is some little enquiry for 64-Reed *White Shirtings*, 15-lbs. Dragon *English Drills*, and Ordinary 7-lbs. *Grey Shirtings* at cheap prices, but otherwise the market is quiet, and business is virtually closed for the holidays, which may be said to have commenced on 1st instant, the first New Year settling day.

METALS.—*Nailrod Iron.*—Prospects are still discouraging, and the arrival of the *Nankin* (s.s.) has placed further supplies on the market. This vessel brings the *Iron* sold to arrive at Tls. 2.95 per picul (as reported 2nd December,) but the buyer has *just* got out of his purchase through the steamer being a few days behind the time guaranteed, and the seller has accepted Tls. 2.85 from another dealer. The only other transaction is for 4,000 bundles similar quality—say "good ordinary"—at Tls. 2.80 per picul, and the market closes very weak. *Lead.*—Business, as far as the native is concerned, is almost suspended, and quotations to-day are purely nominal. The article has been exported more freely of late to Foochow and other consuming districts. The other kinds of Metals require no comment to-day.

COTTON.—An advance of 2 mace per picul in the value of finest Shanghai staple has been established since last mail day, and the market closes firmly on light stocks of this particular quality, the quotations for medium to common descriptions being rather weak, with only a faint enquiry.

EXCHANGE.—Owing to the near approach of the Native holidays, there has been little done. Bank paper is quoted 5s. 8¾d., but the demand is trifling. Credits have been placed mostly at 5s. 9⅜d. to Banks, and 5s. 9½d. to private buyers, but at the close, rates are slightly weaker, Credits having been sold to-day to Banks at 5s. 9¼d. Documents throughout have been quoted 5s. 9½d. Francs have been sold to a small extent at 7.32½. In Rupees, a few lacs have been settled at 303¼, for wire, in a week or two. On Hongkong, the closing quotation is 26½, with but little doing.

CLOSING RATES OF EXCHANGE.

On London.—Bank Bills, at sight	5s. 7¼d.	₱ Tl.

SILK.—Home telegrams report a moderate demand for silk, at slightly higher prices; holders firm; Red Peacocks 15s. 3d., and common No. 5 Tsatlees 12s. 9d.; deliveries for January 3,800 bales,—Stock 28,200 bales. A fair amount of business has been done, but transactions have been curtailed by the inferiority of the silk offered. About 1,000 bales have found buyers, increasing total settlements to date to 64,500 bales, against 50,550 bales last season. The following prices are said to have been paid :—

	Per picul.	Per lb.	Per kilo.
Gold Lion, Nos. 1, 2, 3, & 4	Tls. 390, 370, 350, 330	19/3, 18/4, 17/4, 16/4	Frs. 53.90, 51.20, 48.50, 45.75
Cat and Bee, Nos. 2 and 3	Tls. 352½ & 332½	17/6 & 16/6	Frs. 48.90 & 46.10
Beauti ul Woman, No. 2	Tls. 330	16/4	Frs. 4 .75
Yellow Elephant	Tls. 312½	15/6	Frs. 43.40
Market 4 Tsatlee	Tls. 330 a 350	16/4 a 17/4	Frs. 45 75 a 48.50
Common do.	Tls. 260 a 280	12/11 a 13/11	Frs. 36.40 a 39.00
Hangch w Tsatlees	Tls. 260 a 300	12/11 a 14/11	Frs. 36.30 a 41.70
Marke. Kahings	Tls. 250 a 290	12/5 a 14/5	Frs. 34.90 a 40.40
Coarse Taysaams	Tls. 245 a 260	12/3 a 12/11	Frs. 34.24 a 31.30
Market Skeins	Tls. 235 a 250	11/9 a 12/5	Frs. 32,88 a 34,90

The above purchases shew an advance, and the market closes firm at these rates. The unsold stock is further reduced, and is now estimated at 4,000 bales.

For the American mail of the 2nd instant, barely 50 bales of re-reels found buyers, and these were taken at quotations showing an advance on previous rates.

The Mail Steamer is expected to take 900 Bales, and the s.s. *Priam* has about 30 Bales engaged for New York.

Statement of Imports and Deliveries of Cottons and Woollen Piece Goods for the week ending 1st Feb., 1875, compiled from the "Customs Daily Returns," Nos. 20 @ 25, both numbers inclusive.

* Exclusive of import cargoes ex *Velocity, Fleurs Castle, Tigre, Hydaspes, Amoy, Nankin, Scotland, Priam*, and several Coasters, and of sundry re-exports.

COMMERCIAL POSTSCRIPT.

February 4, 1875.

Arrivals.—(Not given above)—None.

Departures.—January 31st, British barque *Petro*, for New York; February 2nd, *Sarpedon*, for London.

The French mail steamer *Tigre* takes about 800 bales of Silk.

Exchange.—On London, Bank Bills, 6 months' sight, 5s. 8⅞d. *a* 5s. 9d. First-class Credits to Bank, 5s. 9¼d. First-class to Priva buyers, 5s. 9⅛d. Private and Documentary, 5s. 9⅜d. *a* 5s. 9½d. On Paris, Bank, Frs. 7.25. Private, Frs. 7.32½. On India—Bombay Ban demand, Rs. 304½. Calcutta Bank, Rs. 304½. On Hongkong, Bank Bills, demand, 26½ per cent. discount. Private, 15 days' sight, 2 Gold Bars, Tls. 173.00. Bar Silver, Sh. Tls. 111.25. Mexican dollars, Sh. Tls. 73.90 per 100. Carolus dollars, Sh. Tls. 80.60 per 1 Copper cash, —— per tael.

Shares.—The most notable change in the share market since we last wrote, is a further fall in Banks, which are now quoted at 6 p cent. discount. S. S. N.'s are also quoted Tls. 3 lower, at 76. N.-C. Str. Co.'s have improved Tl. 1. There has been a general impro ment in Insurance shares. Yangtszes have risen from Tls. 578 to Tls. 585. China & Japans and Chinese Insurance having risen, respectivel Tls. 3 and $3, and Hongkong Fires $5.

Land.—The "Wae-nün" property, consisting of about 4 *mow* 5 *fun* of land, with a two-storied dwelling house of ten rooms, offices a godown beneath, tearoom, out-offices and stabling detached, and a small European-built dwelling house with large godown, was sold auction on Friday, for Tls. 18,100.

The Weather has again been perfectly fine during the week, the thermometer ranging from 25 min. to 54 max.

Crystal Glass Chandeliers,

Wall Lights, Mirrors, Lamps, Table Glass, China, Earthenware, & Fountains, for India, South America, &c.

The Patent Challenge "Punkah Lamp."

Table Glass, Cut, Engraved & Jewelled,
in great variety.

GILT DINNER SERVICES,
From £3, 10s. to 1,000 Guineas.

DESSERT, TEA, AND BREAKFAST SERVICES, IN GREAT VARIETY.

NEW DECORATIONS FOR THE DINING TABLE.

J. DEFRIES & SONS,
Manufacturers of Storer's
PATENT PERPETUAL CRYSTAL TABLE FOUNTAIN,

which, when complete with Flowers and Fruits forms the most Elegant Ornament for Dining-Rooms, Ball-Rooms, Drawing-Rooms, and Conservatories. They are portable, most elegant and new in design, and rich in appearance. Also the CONSERVATORY FOUNTAIN, 4 to 6 feet high, which is quite independent of a service of water pipes, tanks, and other expensive accessories, *most important for India*, and having no mechanism, cannot possibly get out of order.

The most wonderful invention of the day.

FOUNTAINS in Great Variety. For Perfumed Waters, from £2, 17s. to 100 Guineas.

FOUNTAINS in Crystal and Gilt, for the Dining-Room and Drawing-Room.

FOUNTAINS in Crystal, Electro Plate, or Gilt. } For India and other Markets.
FOUNTAINS for Conservatories. }

A large assortment to be seen at the extensive Show Rooms.

CLOCKS.

CLOCKS for the DINING and DRAWING ROOM, VESTIBULE, LIBRARY, and CARRIAGE, &c.

THE ANNUAL CLOCK with CALENDAR BAROMETER, &c., goes accurately fo Twelve Months when once Wound, in Marble Bronze, and Ormolu.

THE SINGING-BIRD CLOCK, quite new. MUSICAL BOXES and MECHANICAL PICTURES.

CHANDELIERS IN CRYSTAL,
BRONZE, ORMOLU AND SILVER.
CANDELABRA FOR GAS OR CANDLES,
With the True Oriental Colours.
FOUNTAINS and MOSQUES for INDIA
Registered designs of
Mirrors, Wall Lights, Lamps, and Chandelie for India.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, FEB. 11, 1875.

RETROSPECT OF 1874.

Political. The leading incident of the past year has been the quarrel between China and Japan about Formosa. Some years ago, a Liuchiuan junk was wrecked on the East Coast of Formosa, and the crew murdered by the natives. Japan claims sovereignty over the Liuchius, which were a more immediate dependency of Satsuma until the extinction of feudality during the late revolution; and the Satsuma clan were especially loud in their demand that the outrage should be punished. The cry was echoed by thousands of the military class, who were fretting for active employment; and the Japanese Government instructed its Ambassador to broach the matter at Peking in the Spring of '73. There seems no doubt that the Chinese Government repudiated responsibility for the action of the Formosans, and that Japan intimated

its intention, in that case, to take their punishment into its own hands. Accordingly, transports were bought and chartered, and an expedition was collected and sent; a landing was effected without difficulty, camps were created, roads made, various savage tribes were attacked, dispersed, or subjugated and,—symptoms were further shown of an intention to colonize and retain sovereignty over the eastern half of the island. It is very doubtful whether the Chinese had seriously considered themselves sovereign over this part of Formosa, or whether they did not really consider their rule and responsibility ceased at the line separating their settlements from the uninvaded territory of the aborigines. To escape trouble themselves, therefore, and to throw upon Japan the onus of punishing the savages, had seemed to the Peking Government marvellously astute; but the tables appeared to be turning most unpleasantly when the interlopers threatened to occupy permanently lands over which they had disclaimed control, but which national pride would not allow them to see tamely occupied by others. Sharp jealously was awakened at the prospect of a Japanese colony arising collaterally with their own. And the Fohkien Government, as more especially connected with Formosa, lost no time in requesting the intruders to withdraw, directly their avowed object had been attained. But the Japanese answer was clear. If you were sovereign in Formosa, you were responsible for the acts of your subjects; in denying responsibility you denied your territorial right, and can have nothing to object to the presence or proceedings of others.

It is needless to follow the course of negociations, which assumed a more and more warlike aspect till, in the autumn, collision seemed inevitable. The Chinese had collected large forces at Taiwan and on the mainland, while the Japanese had reinforcements available for despatch in case of final rupture. But, whatever may have been the wishes of the soldiery, there can be no doubt the two Governments were more or less afraid of each other, and anxious for peace. The question of withdrawal upon compensation was mooted—and entertained; but the Japanese demanded Tls. 5,000,000. The Chinese scouted the suggestion; and the two parties were on the verge of war—the suite of the Japanese embassy having actually left Peking, when the British Minister intervened and brought about a compromise. Japan eventually agreed to withdraw on a recognition by China that she had been right in her enterprise, and on receipt of Tls. 500,000, of which one-fifth as compensation for the murdered Liuchiuans and the remainder as payment for the buildings erected and roads made by them during their occupation; the Chinese further undertaking to keep the Formosans in order for the future. The text of the treaty setting forth those conditions will be found in the *N-C. Herald* of the 26th November.

Both parties have reason to be grateful to Mr. Wade for his share in bringing about this result. A war between China and Japan would not only have been a murderous and exhausting one, but would very probably have set loose the rebellious elements always present in China society, and only recently chained down by the successful action of the Imperialist troops in various quarters of the Empire. Japan has still sufficient work to do in consolidating her new system, and advancing the reforms she has initiated, without the trouble and cost of a foreign war. Nor have Foreigners less reason for congratulation that such a contingency has been obviated; for trade would have been seriously disturbed and hindered, and mercantile interests proportionately hurt. The best proof that the settlement was a fair one, lies in the apparent fact that both nations are pleased. The Chinese consider they have gained their point in asserting their rule over Formosa; while the Japanese consider it a mark of triumph that they have extracted an indemnity from their opponent. The excitement seems now to have quite subsided, and the general opinion is that the incident is closed. The indemnity has been paid, and the island is evacuated.

The preparations made by either side during the somewhat angry negociations, entailed large expense, and have been no doubt one cause of a loan recently negociated by the Viceroy of Fohkien through the Hongkong and Shanghai Bank. The loan is the first which has been formally contracted by the Chinese Government in the public market, and is guaranteed on the revenues of the Maritime Customs; the interest is fixed at 8 per cent. It was issued at £95, at an exchange of 5s. 7d. to the tael, and rose at once to a slight premium.

That the Government of so vast a country, having within itself so great resources, should be obliged to borrow so small a sum, is a strong condemnation of the financial system against which we are perpetually protesting. Trade is crushed by excessive taxation; its course is diverted by the oppressive levies of the inland Customs, and commerce is thus choked and languishes under the double difficulties of transit and exaction. A serious outbreak which occurred last year in the Taichow prefecture (*N.-C. Herald*, Dec. 31st), gives one instance of the extent to which this blind policy has been driven. The efforts made of late years to suppress rebellion in various parts of the empire have no doubt caused immense outlay and embarrassed the Government finances; but the means taken to get money have been the surest way of stopping its collection; the sponge has been squeezed dry, and dissatisfaction is rife among the people. As we wrote in commenting on the Taiche émeute:—"China ought now to entering on a long course of sperity. A rebellion which destro in many districts nearly the whol the population, and which has le the successors of the former inhabi a soil left fallow for years, and populated to one-half the extent it co easily support—has been put down, trade refuses to answer to the call m on it. Produce there is in abunda if only the people be permitted to m use of it. Yet, instead of prosper they can only earn a precarious liv hood from a land in many ways o flowing with wealth. The people everywhere oppressed, the interch of commodities is rendered impossi by repressive exactions, and the natu growth of capital put a stop to official interference. Such is the st of China at the close of 1874."

Very evidently, China now wa rest to recover from the exhaust caused by foreign wars and inter rebellions; and, in face of this f we cannot but consider unwise apparent purpose of trying to reco sway over the portions of East Turkestan which have been lately co stituted an independent kingdom und the Atalik Ghazee. These outlyi dependencies have been always a sour of weakness to her rather than strength, and the effort to recov them will mean a waste of substan for the sake of shadowy power. Th Viceroy Tso has been lately makin wise efforts to reorganise Chinese ad ministration over the recovered provinc of Kansuh, and the Peking Governme would do well to restrain his effor to that difficult task. There, as i Yunnan, large garrisons will still b needed; but garrisons can be maintaine at far less cost than standing armie and garrisons will suffice in both case to keep down and stamp out the embe of rebellion which still retain som spark of life.

Kweichow and Yunnan seem to be in this respect, much in the same con dition. Both are subjugated, but both are uneasy. Subdued, however, they are; and the whole eighteen provinces seem to be, at the close of 1874, as tranquil as they ever have been or are likely to be until the whole system of Government is changed.

The principle of Foreign audiences, which was admitted in 1873, has continued to be recognised. What we wrote, however, in describing the first audience in our restrospect of that year, has been fully justified by documents subsequently brought to light. Not only were measures not then taken to establish clearly, in the eyes of the Chinese, the true position and power of foreigners, by affirming the equality of footing on which the audience had been claimed; but a description of the incident was circulated in the inland provinces, having for its object to bring ridicule on foreigners and their repre-

entatives, in the eyes of all readers. *N.-C. Herald* July 4th, and *Times* ugust 17th, 1874.)

Our last retrospect chronicled the marriage of the young Emperor Tung-che, nd his assumption of the reins of power. he present article would be bald, if e omitted reference to his death. The ncident belongs, however, properly to he record of 1875, and will claim rominence when the close of the urrent year invites us to pen our nnual sketch of the events it shall ave witnessed. It would be out of lace for us to do more, now, than efer to the "departure." At the close of 1874, Tung-che was still Emperor of China, though his illness was well known, and a decree of the 18th Dec. had constituted the Empresses Dowager regents, pending its duration. The year's history has not enabled Foreigners, nor, certainly, his own subjects in the provinces, to gain much insight into the young Emperor's character. It is difficult to trace the impress of individual will in the current routine orders that find utterance in the *Peking Gazette*. The only really personal actions with which we have been able to connect him, are his visit in the spring to the Imperial Tombs (*N.-C. Herald*, April 25th), and his petulant degradation of Prince Kung in the following September (*N.-C. Herald*, September 19th.) It is possible to connect both these incidents with the Chinese belief that His Majesty was intolerant of restraint, and anxious always, for good or evil, to break out from the palace walls; but such an attempt would be pure speculation, and out of place, therefore, in an article which is professedly a record rather than an essay. Suffice it to say that His Majesty is credited with various nocturnal excursions, and with occasional exhibitions of self-will that excited anxiety among his relatives—though whether the honest anxiety of advisers fearing for his welfare, or the terror of *maires du palais* dreading a master who showed energy and might some day wish to see with his own eyes, we have no sufficient evidence to judge. The Empresses Dowager appear to have retained the influence naturally acquired during their long regency; and we find the Emperor obediently reinstating Prince Kung, at their desire, after his little ebulition in September, and looking to them to govern his Empire when illness overtook him.

The growth and the developement of the Chinese mercantile marine has been one of the most marked incidents of his late Majesty's reign; the Chinese Merchants' Steam Navigation Company, laboriously created by Li Hung-chang, on the idea apparently—however distorted—of European mail services, has grown during the year in strength and influence. Largely subsidised by an extravagant grant for the conveyance of tribute rice, it is able to hold its own against foreign competition; and, however false the economy of the measure, however patent the intention to ruin foreign interests, one cannot help but admire the patriotic, intent of the founder. Foreign steamers had destroyed the native junk trade; with foreign vessels should foreigners in turn be driven from the coast. The project may be romantic but certainly deserves the credit of boldness. The promoters seem to be at least earnest, for there is no doubt they intend adding largely to the number of their vessels.

The conclusion of a treaty with Peru is the only other political incident we recall, of note or interest. It is unnecessary to go over again, here, the often trodden ground of coolie emigration, or to repeat that Western humanity would soon have exacted a complete stoppage of the traffic, had not the two nations concerned agreed on measures for its proper regulation. China sent a mission to South America and Cuba, to enquire into the actual condition of the emigrant, at the same time that Peru sent a mission to China to negociate a treaty legalising emigration. Both objects have been accomplished. The Chinese Mission has returned, and Mr. Macpherson has gone to Peking to give, we presume, an account of his enquiry. The Peruvian envoy has negociated a treaty which has been signed and ratified. It only remains for us to hope that China will exercise a real and careful protectorate over those of her subjects whom the very treaty she has concluded encourages to adventure themselves on Peruvian soil. The treaty will be worse than useless unless she have the will and the intention to see its provisions executed.

Summary of News.

The English mail of the 25th December arrived on Tuesday, by the P. & O. steamer *Kashgar*.

A mail leaves to-morrow for Europe, by the P. & O. str. *Hydaspes*.

The following telegrams have been received from Reuter during the week:—

The Emperors of Germany, Austria, and Russia have received envoys notifying the accession of Alphonso.

Obituary—Sterndale Bennett.

A battle took place at Olerga yesterday, in which the Carlists were defeated. Pampeluna is relieved. The troops are advancing victoriously. The Royalists are advancing. The Carlists outflanked and retreating.

Parliament was opened by Commission. The Queen's Speech states that the Government continues to receive assurances of friendship from Foreign Powers. Trusts that peace will remain unbroken. Considering the importance of the principles involved, the widely divergent views expressed at the Brussels Conference, and the improbability of their reconciliation, proposals for further negociations had been declined. The past year had been generally prosperous. The progress throughout the Colonial empire had been steady.

Bills were announced relating to Judicature, the improvement of Workmen's dwellings, Sanitary Laws, Friendly Societies, amendment of Merchant Shipping Act, better security against personal violence, and the establishment of public prosecutions.

The re-imposition of the Tea Duties in America is doubtful.

The mourning observances on account of the Emperor's death have caused the New Year holidays to pass very quietly. The usual noises of crackers and gongs have been remarkably absent; and far less than the usual number of Chinese have been careering on the round of visits that usually entails double labour on chair bearers and 'ricksha and wheelbarrow men, while their masters take holiday. The men, however, do not probably much object, for they take the privilege of charging considerably higher fares during the five days the festivities are supposed to endure.

The official regulations regarding mourning for the late Emperor are giving opportunity to sharpers. A Chinaman dressed in a silk coat was stopped two days ago by a pseudo-runner, who asked him whether he did not know the order against gorgeous clothing, and pretended to arrest him for contravening it. The Chinaman gave up his coat to escape the threatened difficulty. In another similar case, however, the would-be thief caught a Tartar; a well dressed man, who was similarly accosted, regretted that he had no money to give as a fine, but invited the swindler to accompany him to a pawnshop where he would raise some. The latter consented, and the two went together. The money was raised, and handed to the rascal, who thought he had made his *coup*; but the other then at once arrested him, and gave him in charge for taking money under false pretences.

It is unfortunate that the stoppage of the river steamers, during the New-Year holidays, delays the arrival of the Peking mail just when it is most anxiously expected. At least, we presume the letters are lying in Chinkeang awaiting transport. The usual rumours are flying around very freely in the meantime. The new Emperor is dead; Li has a large army near Peking, has been beheaded, has seized the throne; one of the Empresses has committed suicide, &c., &c. The probability of some disturbance arising makes it just worth while mentioning the gossip; but the Chinese officials, who might have been expected to get early news, viâ Nanking and Soochow, profess to know simply nothing. It does seem strange that no official announcement of the new reign has yet been promulgated. We do not like speculating on the possible course of action of high officials and mandarins, when the arrival of the Peking mail may at any moment disprove our surmise; otherwise the situation gives room for very much conjecture.

The Municipal Council minutes which we publish elsewhere cover a great deal of ground, and will be read with interest by owners of property in the Settlement. We are glad to see the Council are following up the matter of widening roads. As we do not hold with Mr. Hart's reported view that the trade of Shanghai

will have migrated to Chinkiang in five years, we hold that few Municipal matters are more important than provision for the growing traffic. The report by the Works' Committee, which we publish elsewhere, records several steps in this direction. So long as the required land is ceded, the public will probably be content to leave the particular form of document in which the cession shall be recorded, to the discretion of the Council and their legal adviser. In other words, it was hardly necessary to publish the proposed "form" in these minutes.—The Tautai has conceived a fear that the people near Sinza, having never been accustomed to bad smells from slaughter-houses, may object to having one built in their neighborhood. The people near Pah-sen-djaw (near the Ningpo Joss-House) on the other hand are believed to like them, and H. E. thinks that site had better be retained. Mr. Seward has undertaken to calm His Excellency's paternal fears.—We are sorry to see that a difficulty exists in the way of lowering the Hongkew Creek bridge; the Chinese having objected that it will interfere with boat traffic. It remains to be seen whether the protest is well founded.

It is satisfactory to learn that the expenditure has been kept within the budget figures.—The Council ask for wider powers in regard to assessing property.—They also consider the number of wheelbarrows and jinrickshas plying in the Settlement needs reducing.—The Council have asked the various Fire Insurance Companies represented in Shanghai, to authorise the Fire Brigade to act for them at fires to the best of their knowledge, skill and ability, and have received answers fully satisfactory from some, but meaningless and non-committal in the case of others We are almost surprised that the Fire Department do not, some day, leave a fire on premises insured in one of these companies, to burn itself out. Perhaps the agents would then think it worth while to authorise action—or even to contribute towards the expenses of the Department.—The Defence Committee report in favour of replacing the howitzers at present worked by the Volunteer Artillery, by Gatling guns.

The proceedings of the French Municipal Council, at their sittings of the 12th and 19th January, were chiefly of a routine character. A report on the difficulty about the Rues de Ningpo and Saigon, near the Ningpo Joss House, was laid on the table, and it was resolved to circulate it and ask the aid of the French Minister to recover the land enclosed by the Ningpo Guild.—The Council have not yet succeeded in recovering the documents lodged in the Belgian Consulate during the trial of the tax-collector Godaert, and have asked the aid of the Belgian Minister to this end.—It was resolved to hire horses from Mr. Charrier at $19 a head per mensem; he taking over the present stock at Tls. 15 a head.

We are glad to learn that a project for establishing Water Works is rapidly assuming shape; and that there is a likelihood of the scheme being brought before the public in about a month. The idea is to bring water from the neighbourhood of Loonghwa; the cost will be great, but the lowest estimates of consumption show every prospect of a profitable return; it is believed the Chinese can be persuaded to take shares to a considerable amount in the undertaking.

The arguments of counsel in the case "C. E. Hill *v.* Estate of Yang Taikee," have been submitted to the Court in English and Chinese, as directed, and are now under consideration. The date for the delivery of judgment is not yet fixed.

The investigation of the circumstances attending the assault by Chinese on Mr. C. E. Hill, on the 3rd instant, is being pursued by the proper authorities. Three of the assailants have been already taken to the U. S. Consulate, but in the absence of the others, who were left in custody of the *Tepao* at Kungwang, and were to have been brought to Hongkew at an early hour, a remand was necessary.

An accident, which proved fatal, happened in the Maloo on Friday afternoon. An elderly native woman was getting off a wheelbarrow, just as a trap driven by a foreigner was passing. Contrary to the driver's expectation, the woman stepped backwards into the roadway, and was knocked down by the pony and so severely injured that she died in the Ningpo hospital the same night.

Telegraphic communication between Nagasaki and Vladivostock was re-established yesterday.

We have received a pamphlet entitled "A narrative of re ent events in Tongking," which we anticipate pleasure in perusing. It is from the pen of M. Cordier, and comprises the paper from which extracts were read at the meeting of the Asiatic Society in December last.

Some telegrams in the Calcutta *Englishman* convey the impression of rather serious complication in Baroda. It will be remembered that the British resident at Baroda, Colonel Phayre, was poisoned there some months ago, but fortunately recovered. Whether the present arrest is immediately connected with that crime; whether the Gaekwar is suspected of connivance—we cannot glean. But it is known that the Government had serious cause for dissatisfaction with his administration, before that occurrence; and it is quite likely that they have since pulled the reins tighter, and that he has become so restive as to necessitate sterner measures. A number of European troops have been moved up, and the Gaekwar himself has been arrested—on what charge, we must wait apparently for the papers to explain. It may perhaps interest some of our readers, if we add that Baroda is the capital of a small feudal dependency of that name, having an area of some 12,000 square miles, and is situated 240 miles N. by E. from Bombay.

The *Kashgar* brings only one day later papers from Hongkong, and the single item of news we can find is a report of an application by the Mess. Mar. to have the award in the case of the *Ava-Rona* collision, reconsidered. The objections urged were, first, that all the items were too high; second, that some were decided on a wrong principle; third, that others were charged twice over; and fourth, that some were allowed on insufficient evidence.

The *China Mail* says a light-house is to be erected on the South Coast of Formosa. The place selected is South-west Point.—Mr. Brown will shortly take up the post of Commissioner of Customs at this port.

The Nagasaki *Express* reports a heavy gale on the night of the 4th inst.—During the whole week the weather was wet and chilly, and snow showers fell frequently. On Thursday night, the wind increased to almost a gale, and steam was got up on board the steamers in harbour. More cable and extra anchors were let go from the sailing vessels, yet they dragged their anchors a considerable distance.—The same paper apprehends that small-pox, which has been very prevalent in Yeddo, is extending westwards.

The Hiogo *News* mentions a heavy gale at Osaka, which did some damage. It is feared that, as is usually the case with these Westerly gales, a good deal of damage was done to native craft and some lives lost. One big junk was seen to founder. The s.s. *Shooeyleen* dragged her anchors, and her commander had to slip both chains to keep her from driving on to shallows. The s.s. *Kathleen*, having been given a foul berth by another steamer, had to slip a chain also, and it was only by dint of great exertions on the part of her officers and crew that they managed to get the other anchor up. Both the *Kathleen* and the *Shooeyleen* put to sea and made the best of their way to Kobe harbour.—Our readers will not have forgotten the pig and rabbit mania which prevailed some time ago in Japan. The latest rage is reported from Niigata to be one for breeding a kind of gold fish called "*Koi*," whereof the body is white and the head only a light red. A fish one foot long will fetch 35 yen. The reason for this extraordinary fancy is that the rumour has been started that gold can be extracted from the scales—and some people have turned their fields into fish ponds and hope to get as much as ten thousand yen from this source.

The *Mail* says the small-pox epidemic is apparently on the decrease in Yeddo, but it has unfortunately gained in virulence in Yokohama. Even in Yeddo, the disease is still carrying off numbers of the native infant population. It will be remembered that the duration of the last visitation did not exceed six weeks, and there is fair room to hope that the improved sanitary arrangements in, and the better drainage of, the Settlement may limit the present epidemic to a like period.—The departure of the *Adventure* troopship, though fixed for the 15th proximo, will be contingent upon the preparations of the French troops. Should these not be sufficiently advanced to permit of their leaving on that day, the sailing of the *Adventure* will be delayed.—A heavy snow fall occurred on the 24th Jan.—The amount of costs in the case W. G. Howell *v.* the Proprietor of the *Japan Gazette* has been settled in Chambers, at $25; "the Judge being of opinion that under the tariff and in view of the damages given" he could not allow more.

Editorial Selections.

EASTERN TURKESTAN.

MR. NEY ELIAS, in his account of his adventurous journey through Western Mongolia, gives us some details of the irruption of the Mahommedan rebels, which may enable us to form a better idea of the state of affairs in the North-west. In alluding, in November last, to a probable explanation of the reported success of the son of the Ameer of Kashgar, Kuli Beg, we suggested that the victory alluded to was over the Tunganees, and not over the Chinese troops, whose furthest advance was but little beyond Hami. The account of the raid of the former into Western Mongolia, which Mr. Elias narrowly escaped, bears us completely out in our view of the situation, and moreover enables us to form some idea of the character of the insurgents who have been carrying war, or rather a series of depredations, against both Chinese and the districts annexed by the Ameer. In the interests of order alone, and quite independent of any political bias towards China or Kashgar, the successes of Kuli Beg must be a matter of congratulation to all interested in Central Asia. Mr. Elias arrival at Uliassutai on the 20th of November, 1872. A few days prior to his arrival he had heard reports of an irruption of the Mohammedans from the south, but was scarcely prepared for what he afterwards saw. In October, 1870, a similar irruption had occurred, and all the inhabitants who survived, as well as all those connected with Uliassutai by commercial or other relations, preserved a lively recollection of the occurrence, when a small body of Mohammedans from Urumtsi and Kutchen attacked the place and took it in a few hours. Mr. Elias found as civil governor a Manchew Che-kun, one of the joint Ambassadors who accompained the Burlingame Mission, and found that his conduct towards him was everything that could be wished. At Uliassutai the Chinese officials were able to muster about 2,000 troops, of whom about 1,400 were Amoor Tartar cavalry and the remainder Chinese infantry. They were about to start in pursuit of the insurgents, but led by false reports from the Mongols, whose terror of the Tunganees was so extreme that the first rumour of their presence was sufficient to send the entire tribe into the mountains, the troops proceeded to search for the insurgents in the opposite direction to that in which they had really gone. The important town of Kobdo, the seat of an Amban, and of a Chinese garrison, was thus left open, and the Tunganees took the opportunity of making a raid on it. Mr. Elias, who arrived a few days after the occurrence, had an opportunity of seeing the result. The garrison at the time consisted of about 750 Chinese soldiers, armed with matchlocks, of whom 250 had undergone a partial course of instruction in foreign drill, and about 900 Tartar cavalry. The insurgent forces consisted of, at the outside, 300 persons, and of that number a large proportion were women and children, or Mongols who had joined as guides on condition of having their lives spared; no very formidable force to attack a town with a garrison numbering some sixteen hundred troops. On the 18th of November they crossed the pass leading to Kobdo, driving before them about a thousand loose camels; they were for the most part mounted on camels, and with the exception of some twenty, had no better weapons than spears, or bows and arrows. The Chinese infantry were sent out to meet them, and commenced firing at random. They then suddenly broke and retired to a joss house, at the head of the town, round which a ditch had been dug the day before. The Tartar cavalry was then sent out to charge the advancing force, but retired with equal speed before coming into contact with them. The Chinese seemed to have made a short stand for a few minutes, when they became panic-stricken and rushed for the fortified city, which they gained after losing no less than 150 of their number, leaving the whole of the open town at the mercy of the insurgents. These latter devoted two days to the deliberate sacking of the town, and then next proceeded deliberately to burn it with the women and children left alive, riding about from house to house applying matches and firewood, the soldiers from the city walls looking on, but notwithstanding their numbers, afraid to move or apparently fire a shot. On the 20th of the month the Tunganees quietly retired by the same road they had entered, not having lost a single man killed, though possibly a few may have been wounded. The town naturally presented a miserable appearance on Mr. Elias' arrival. The Chinese dead had been buried, but as the Mongols never inter, the dead bodies of those of them who had been killed were lying about in all directions. Most of the houses were burned to the lower walls, and all had been looted; there was not a shop remaining or a single article of food to be bought. Enormous stocks of wood and grass, collected by the merchants from considerable distances for the use of their caravans, had been burned to cinders, and there was scarcely a camel left in the place for the collection of more. Such is the event given by an eye-witness. Mr. Elias, unfortunately, does not give us the name of the Amban, who was in a state of too great terror to see him, but upon whom he had to be dependant for food, the only remaining stores being those contained in the fortress. We have always held that the possession of those outlying dependencies was a source of weakness to China, and this account of the state of affairs in Western Mongolia goes to prove how useless are the garrisons kept up at great expense. Even looking at the affair from a Chinese point of view, we may see how Kuli Beg's victory may have been a desirable thing, as preserving Mongolia from such visits for the future. We may, however, learn more. The Chinese troops have for years been unable to cope on their own ground with the Tunganees, while the arms of the Ameer have been rapidly advancing. This situation certainly lends no hope that the Chinese will, in the long run, and when brought face to face with the comparatively well drilled troops of the Ameer, be successful Should any internal difficulty arise in China, the presence of the Ameer on the frontiers may lead to complications of a nature not easy to surmount.

REPORTS ON TRADE AT THE TREATY PORTS IN CHINA FOR THE YEAR 1873.

It is to be regretted that the arrangements of the Statistical Department of the Foreign Customs have not permitted the publication of these reports at an earlier date. The fault does not, we are well aware, lie with the Department in Shanghai, but in mistaken direction from Peking which overloaded it with a quantity of matter relating to the Vienna Exhibition—matter of interest no doubt, but which should not have been allowed to thrust aside reports having value almost directly proportionate to their early publication. As a body, the present volume of reports is scarcely up to the average, and the ports of Shanghai, Hankow and Canton, three of the principal in forming an estimate of the trade of the year, do not contribute to its pages. Of the reports published, that from Mr. Morehead, Assistant-in-charge at Swatow, is undoubtedly the fullest in its details, and at the same time displays most knowledge of the course of trade. On the whole, the reports indicate a depression in trade, and it is noteworthy that the heaviest reduction in the receipts occurs mainly in native articles. We have from Peking Gazettes and other sources given the true explanation of this, but we cannot but remark the strange abstention from discussion on this topic which as a general rule marks the reports. Mr. Taintor, in his last report, had so nearly exhausted the mercantile topics current at Newchwang, that but little was left for his successor to say. Mr. Man does, however, give us a curious description of the flow of emigration into Manchuria, from the northern provinces of China :—

In China proper, whatever is thought in reference to official maladministration, the respect for law and order which so generally prevails around the Treaty ports renders the course of trade, when once established, a relatively smooth and predeterminable affair of judgment. But in Manchuria it is as yet otherwise. A great portion of the vast region known by this name is still somewhat in a transition state, and the new occupants of the land, before whom the remnant of the original Tartar population is rapidly disappearing, have been left sadly in want of that strong leadership and firm control which is a safeguard of the exiled European. The human wave which, for two hundred years, has surged in this direction is, in practice, encountered by but few official barriers.

When passing, voluntarily, the Customs Station at Shanhai-kwan, emigrants are certainly catechised as to their destination, and their answers, stating the Division or Commandery they desire to settle in are, together with a few personal particulars concerning them, forwarded for the information of the ruling Boards. Laxity, however, exists in the carrying out of these regulations, and the state of wreck into which the Great Wall has fallen enables those who object to being questioned to altogether escape the ordeal and its accompanying squeeze by diverging a few hundred yards to one of the many gaps which cut the rampart.*

To this overland influx, which is composed in great part of people from Chihli moving eastward by families and carrying their old folk and children in their train, must be added the far more considerable number of single men who yearly enter the country by the sea route, chiefly from the ports along the southern shores of the Gulf. These people, although respectable enough in the aggregate, still include in their ranks many disaffected Mahomedans and, till quite recently, a proportion also of ex-Taipings and broken Nienfei. On arrival here at Taku-shan, or at the smaller sea-coast towns on the Liaotung promontory, they are subjected to not even the semblance of supervision before spoken of. The bad characters amongst them may wander abroad in search of congenial occupation or may skulk in the purlieus of the cities waiting for something to turn up. It is this element in our local polity which constitutes a chief drawback to quick advancement, and it is to the spread of those refining influences which have as yet knocked in vain at the door of the Chinese conservation, that we can look alone for bringing about a change. Iron roads,—nay, even metalled highways,—would be worth far more than all the legions which are at present periodically required to preserve the peace: the telegraph wire would work as a charm. Until, however, the time arrives for these things to come to pass, capital—that marrow of a new country—will be slow to find, in this noble dominion, an abiding haven, and lawlessness can hardly fail to remain, as now, a salient feature of China's greatest extra-mural possession.

Mr. Man then gives an account of the feeble measures taken to reduce to order the province of Shingking, measures so far successful that it is generally possible, by the payment of blackmail, for a merchant to get his goods laid down in the interior of the Province. Even to this rule there are exceptions, and at intervals the whole of the Province seems to revert to a state of utter lawlessness. Yet it is admirably situated, and under any properly constituted government would rapidly increase in prosperity. Mr. Man reiterates the prophecy of an early predecessor, and looks forward to the day as not far distant when opium should be one of the staple exports of Newchwang. We have before alluded, in reviewing the trade of the port, to the very interesting position it occupied with regard to the production of the drug. Judging from the statistics of the year, the consumption of foreign opium remains constant, but this by no means contradicts the assertion that the use of opium generally is increasing; and for a time it is not unlikely that, as in the case of Hankow, the import of foreign opium will go on simultaneously with the export of home-grown. In other respects the trade of Newchwang cannot be said to have been satisfactory. Foreign imports exhibit a notable decrease, and what is more to the point in judging of the future of the port, native imports and exports both show a marked falling off. The amount of sugar taken into consumption in the Northern ports of China, affords perhaps the best index as to the prosperity or the reverse of the people. The import at Newchwang exhibits a decline of more than one-half. At Tientsin the same tale has to be told. The trade year by year seems to fall off, by slight degrees indeed, but sufficient to indicate something wrong. If the China Merchants' Steam Navigation Company were a genuine concern, we should have anticipated some useful result from its formation. Tientsin, the chief terminus of its operations, does not respond in the smallest degree. The facilities for trade, so far as steamers were concerned, were already sufficient, and the increased tonnage has to be supported, not out of an increased carrying trade, but out of the finances of the empire. Chefoo follows Tientsin with a falling off in the import of cotton goods of 350,000 pieces. Opium and metals share in the depression. The value of the native trade likewise is on the wane, though the article of sugar shows a slight increase. The Acting Commissioner has only the following congratulatory remark to present to his readers:—

But if Chefoo has not the advantage of enabling its residents rapidly to acquire wealth, it confers on them the boon of a lovely and healthy climate, in a place surrounded by most charming scenery. Such already was the renown of the latter in ancient times that it attracted two Emperors to visit the Chefoo Bluff from there to watch the rising of the sun, or, as the detractors of the fame of these two worthies will have it, there to propitiate the spirits of the sea so as to grant to them an interview for bestowing on them the gift of immortality. It was in the year 219 B.C. that the Emperor Shih-hwang (始皇) of the Ts'in Dynasty (秦朝) was on the peninsula, where he is said to have caused a stone tablet to be raised on the highest hill. Shih-hwang re-visited Chefoo in the following year. In 94 B.C. the Emperor Wu-ti (武帝) is said to have visited the Chefoo peninsula (in both cases Chefoo proper is meant, not Yentai) to watch the sun rise. Two stones are still to be found there which are reported to have been intended by Wu-ti towards building a bridge to connect one of the Chefoo mountains with one of the nine heavens.

Proceeding to the reports from the river ports, we miss Hankow from the number. We know from other sources that the year was one of great depression all round; this decrease is by no means balanced by the slight rise shown at Kiukiang. The trade at the latter port has been so mismanaged, that any improved action on the part of the officials, native or foreign, was bound to be met by an increase in the local trade. Hankow, Chinkiang, Ningpo, and even Swatow, were the real suppliers of the districts, which would naturally have looked to Kiukiang as their mart. Artificial impediments alone have prevented the port from assuming a greater importance than it has hitherto done. One of the principal items of increase in the trade of the port, the export of green teas, has not, however, been conducive to the interests of the foreign purchasers. Mr. Novion's report on the trade at Chinkiang is of the same doleful nature as those of his predecessors in the present volume. Mr. Novion tries to throw a glow over the undoubted depression which has prevailed, but, judged by the experience gained from the other reports, we must say unsuccessfully. It is quite immature to suppose with Mr. Novion that the prosperity which should have been induced by the export, in 1872, of nearly two millions peculs of rice and other grain, in foreign bottoms, to say nothing of what left in native craft, probably nearly as much, could so soon have evaporated, as to show 1873 a year of decreasing instead of increasing prosperity. The true cause is deeper, and is to be found in the increased burdens on trade, which are gradually but surely, from one end of the empire to the other, pressing on its very existence.

II.

Leaving the northern ports, and reviewing the trade of those lying south of the Yangtsze, we may observe in the various reports of the Commissioners the same feeling of depression so evidently marked in North-China. Trade, in fact, during the year in question, was simply stagnating. No new developement has anywhere to be remarked, and lower prices went hand in hand with a diminished or stationary demand. It was not that the year was in any respect one of disaster. The crops generally were fair, and no external influence which could in any way have affected trade for the worse had been bought to bear. Internally, the affairs of the Empire were going on as usual; scarcely a ripple disturbed the calm face of political affairs. Yet trade was undeniably languishing, and apparently native trade even worse than foreign. At Ningpo, foreign imports show a slight increase in value, principally to be accounted for by an increase in the import of opium; this latter depending on local circumstances being caused by the lower scale of duties changed at Ningpo as compared with other ports, notably Foochow. Native imports and exports both exhibited a falling off. The import of sugar especially, a good mark of the prosperity of a district, having dwindled from 39,000 to 22,000 piculs. This was partially to be accounted for by a failure in the rice crop. The latter was made good by imports in native craft from Kiangsu, noteably Chinkiang. In exports, the chief falling off was in tea, but for this the Chinese dealers were themselves responsible. An increasing demand for Chehkiang teas for export had been meet by so great a deterioration in the quality that, warned by previous losses, foreigners at Shanghai had refused to purchase the wretched stuff offered in the market. It was a pity that, at Foochow, a similar complaint should have been made on the other side. The import of foreign piece goods, never very lively at that port, had diminished, and a portion of this decrease was attributed to the continually deteriorating quality of the goods placed on the

* Reports on Trade, 1867.

market. Notwithstanding the protests of Chambers of Commerce, there seems as yet to be no practical plan suggested of getting rid of this hindrance to our trade in China.

Trade at Foochow has had to bear so many burdens, and is hampered with so many restrictions, that the port has never had a fair chance of exhibiting its real capabilities. An instance is afforded in the case of opium, which would naturally make its way to the interior of the province through the port having the largest export trade. It is curious to find that, owing to the excessive local dues charged as compared with other ports, the import has for years back been steadily decreasing; Swatow, Amoy, Ningpo, and even Kiukiang, receiving most of the drug which would naturally enter by way of Foochow. The same may be said of native goods, which seem carefully to avoid so vexatious a port. Mr. Wright suggests that a part of the apparent diminution in native trade may be accounted for by the improvement in the class of native vessels trading with the port, and whose cargoes do not pass through the Foreign Inspectorate. It certainly seems difficult to account for the enormous value of the exports from Fuhkien as compared with its imports, without the intervention of a considerable native trade, but the topic is one which has never been fairly discussed. One sign of improvement is noticeable at Formosa, and that is the increase in the number and value of goods sent inland under transit pass. The principal ground for wonder is, however, that more do not avail themselves of this apparently ready means of avoiding vexatious imposts. Probably the fear of having the far more important export trade interfered with, prevents any firm stand being made. The report from Amoy gives a detailed description of the trade of the port, well worth study, but hardly bearing condensation. In some respects, the report is more satisfactory than those that have preceded it. The imports of foreign piece goods, as well as of raw cotton, have increased, as also have those of beancake and other native manures. This would seem to imply that more land is being devoted to the production of sugar, the article for the growth of which the southern portion of Fuhkien seems best adapted. That this import took place contemporaneously with a partial failure of the rice crop, proves that the country contains resources within itself for the development of trade which have, as yet, never been taken advantage of. Mr. Hughes makes the statement with regard to the production of sugar, that—"It is probable that China was one of the first countries to cultivate the sugar-cane, as there is no doubt that sugar-candy—which was, perhaps, the earliest form of sugar—was made by Chinese and exported to India in the remote past." Marco Polo, however, distinctly states that the refining of sugar was introduced under the Yuen dynasty, the Chinese prior to that time being only able to produce treacle. The sugar-cane possibly was indigenous to China, but as the Chinese name for sugar is not aboriginal, but Aryan, t'ang representing the Sanscrit *Sar*-kar-â, the Greek sacchar, we are justified in believing that its cultivation was introduced by some of the earlier Aryan colonists.

At Swatow, Mr. Moorhead, the assistant in charge, gives a particularly clear and concise description of the native regulations of the province with regard to the import of opium. Without these statistics it would be difficult to account for the very remarkable increase which has taken place in the import of opium at the port in question. In 1868, Swatow took 4,272 piculs of opium, and ranked sixth in the list of ports receiving the drug direct from foreign sources. In 1873 it took 9,063, and ranked third, being inferior only to Shanghai and Chinkiang. The report gives a table of inland stations and the rates of duty leviable at each, an example which we would like to see followed by other Commissioners, as thereby the cause of many apparent anomalies could be understood. The arrangement of the stations is such that Swatow is placed at an advantage as compared with Canton, Amoy or Foochow. The arrangements necessary for the conduct of the opium trade render the facilities for other import trade greater, and hence we may notice a general advance in the ordinary staples of foreign import. Against this, however, had to be placed the fact that the provinces of Kwangtung and Fuhkien had suffered severely from a scarcity in crops for the two years proceeding the date of the report; notwithstanding, the sugar trade showed a satisfactory increase, a matter of great moment here as at Amoy.—Mr. Moorhead's report is at once concise and perspicuous, and bears evidence of great care in its preparation.

REVIEW.

Confucian Cosmogony.—A Translation of Section forty-nine of the "Complete Works" of the Philosopher Choo-Foo-Tze, with Explanatory Notes. By the Rev. THOS. MCCLATCHIE, M.A.—Trübner, 1874.

As man gradually emerged into intelligence, the perception of something external to him which was not himself, enjoyed by him in common with less highly endowed animals, must at an early period have been supplemented by the perception of phenomena following one another in regular sequence, but with the production of which he had nothing to do. With each change of season there was a change in the features of the landscape, in the habits of the animals by which he was surrounded, and in his own sensations. Most remarkable of all, the sun rose, ran his daily course in the heavens, accompanied by the production of grateful warmth, by the carolling of birds, and the bursting of all visible nature into vigour and beauty, and sank out of sight bringing coolness and the shining host of stars. At longer intervals the moon appeared, and waxed and waned, and then disappeared, to renew after a while the same cycle of phases. At still longer intervals the seasons pursued their changes, while through a longer period yet the places of the sun's rising and setting oscillated between fixed points never perceptibly falling short of the assigned limit or overpassing it. Do what he might, if he ever tried to do anything, he could not alter these inexorable sequences, and thus by a line upon line process of unconscious education, continued probably through millenniums, the conception of a cause differing from the human will and independent of it, but operating upon the external world, became one of the conditions of thought, whatever impression the constant iteration of the observation had stamped upon the brains of successive generations having been hereditarily transmitted in ever increasing intensity. Ages before the first dawn of history, many of the "forms of thought" which we now call necessary must thus have gradually become fixed, although it is impossible to trace them except by theory. We may, however, confidently assume that the idea of a cause acting in external nature, however dimly conceived, was conceived at a very early stage in man's intellectual development. Obviously it must have preceded any form of worship. A time eventually came when to some one of mental power above the average the question suggested itself whether this cause was inherent in the bodies exhibiting phenomena of change either cyclical or discontinuous, just as a man's hair and nails grew without any exercise of his will or of anybody else's, or was seated outside them imparting change to them in the same manner as a man for his own purposes voluntarily altered the relations of bodies within his range. This in one form or another is the problem which we find exercising the minds of philosophers at the moment when we get our first glimpse of intellectual activity on our globe, and it is the problem which, as yet unsettled, divides the two great schools of thinkers at the present day. Thales (B.C. 639-542) and Pythagoras (B.C. 570—504), the founders of the Ionic and Italic Schools respectively, were deeply imbued with the ancient learning of the Egyptians, and from their teaching we may infer the doctrines formulised in the earliest philosophical schools of which we have even a faint record. To both the world was living, animated by a soul which was hardly if at all conceivable apart from the universe in which it had its being. Anaxagoras (B.C. 500-428) placed a "regulating intelligence" at the helm of the universe, and thus first obscurely shadowed forth a philosophy of Theism. The limits of space forbid us to follow in detail the teaching of the various early Greek sages. But it is instructive to notice that when first we light on a definite philosophical system, we find men explaining causation by themselves, applying their whole nature to the explanation of the phenomena which surround them, and seeking for the analogues of their will and even of their sensations in the external world. It was by a process of refinement that Anaximenes replaced by air as the ultimate element of the universe, and as the soul itself, the water which Thales assumed as his first principle. To the air of Anaximenes Diogenes imparted intellectual properties. Fire became the substance of the universe in the hands of Heraclitus (B.C. 503) while Anaximander (B.C. 573) taught that the beginning of things was an illimitable chaos. It was, as we have seen, reserved for Anaxagoras to teach the existence of a Nous, immaterial, infinite, independent, omniscient, unchangeable, and rigidly separate from the material universe. Here there was at last a definite cause of phenomena, altogether external to the phenomena themselves. Socrates, as we learn from Xenophon, further developed this conception, and taught the existence of a Supreme Being—the immaterial and infinite governor of all things, the intelligent artificer of the world, and the author and vindicator of all moral laws. Here our brief review of the progress of Greek philosophy in this direction may stop. We refrain from summarising the speculations of later philosophers, as we shall have incidentally to refer to certain of their opinions. We turn now to the solution of the problem of the universe arrived at by Chinese thinkers

Not only Chinese scholars, but all those who are interested in the progress of speculation, owe a debt of gratitude to

Canon McClatchie for the work which he has accomplished. We have here for the first time in an English dress an important portion of the writings of one who, according to native historians, was the only one who fully comprehended the true import of the learning of Confucius. Whether the value of Choo's investigations into the nature of things be real or artificial, there is at all events a value attaching to them, for, in the words of Dr. Medhurst, "the opinions of Choo-foo-tsze constitute the orthodoxy of China, and all who differ from them are considered heterodox." Choo was a native of Anhuei, and lived from A.D. 1130 to 1201. His childhood and youth were marked by extraordinary precocity, and after graduating he assumed office. Having passed through the ranks of assistant magistrate, magistrate and prefect, he was appointed Imperial essayist and reader to the Emperor Ning-tsung. If we are to believe his biographer, his administration was scrupulously pure and patriotic, his character above suspicion, and his manners characterised by that formality which to us appears tedious and trivial, but to the Chinese symbolises a mind well regulated and well stored. At an early period of his life he diligently studied the classics, and also the Buddhist and Taoist systems, but these latter he soon laid aside to devote himself exclusively to the works of the ancient sages, and to the search after true principles. How far he succeeded in that search it will be for the students of Mr. McClatchie's translation to determine.

That all knowledge is relative is a proposition formulised in comparatively recent times. But the impossibility of eliminating the consciousness of a reality lying beyond phenomena, which is implied in that proposition, must, as we have shewn above, have been felt from a very early period. The mystery of the universe's existence is the one problem which all systems of religion and philosophy from the grossest to the most cultivated have been framed to solve. Yet at the present day, the result of ages of bitter argument is stated alike by philosophers and theologians to be simply this—that "the Power which the Universe manifests to us is utterly inscrutable." This conclusion may limit fruitless speculation in the future, but even where its truth was felt it had no effect in the past. Let us follow the Chinese philosopher through the maze of hypothesis and reasoning into which he plunges when he attempts to interpret the great enigma.

We start with the general proposition that "In the whole universe there is no such thing as Air without Fate, or Fate without Air." Fate and Air are totally distinct, yet are co-existent, co-eternal and equally necessary. A certain priority in rank is accorded to Fate, which is impersonal, formless, unalterable, perfectly pure and superlatively good, yet is only manifested through the Air. Without it, the universe would be chaos, yet its action is blind, for "the Air has the power of condensing and forming things, but Fate neither devises nor plans, nor makes anything." Nature, which is spontaneously benevolent and upright, is the inherence of Fate in Air, and man is man only in so far as he contains a portion of this same fate within the "shell" of his body which is filled with and surrounded by the "light and dark Air of Heaven and Earth." Along with Fate and Air, infinite space is assumed, though tacitly, for limits and number are conceived as necessary upon the interaction of the two great principles. Air (accidentally) produces Form by its accumulation, and Fate uniting with it and "spiritualising the Air," thus produces Mind. Anything which changes its form ceases to exist as such, and cannot resume its original state. There is no Heavenly Ruler. That matters occur so or so is altogether due to Fate. "Fate is incorporeal Reason, the origin of life, the Air is the corporeal vessel, the receptacle of Life." Yet while denying the intelligence of Fate and the existence of a Supreme Ruler, we are by a curious confusion taught that the "Fate (idea) of a thing exists before the thing itself has any existence." Even Plato when conceiving the eternal reality of ideas independent of the apprehending mind, did not attempt to get rid of a Divine mind in which they were eternally and perfectly conceived. Finally, there is a sentiment of justice (left unaccounted for) which is constantly being outraged by the course of human events. To explain this obvious imperfection in nature the philosopher suggests that the "original air was vitiated;" "intrinsically, we cannot predicate perfection or imperfection, freedom or obstruction of Fate. But since the air bestowed on things is diverse, then the air when imperfect obtains fate imperfectly," just as "in the reception of light there is the distinction of much or little, dulness or brilliancy, and yet we do not receive two lights."

This though a brief is a fair summary of Part I. There is a remarkable analogy between the explanation of imperfection given by the Chinese philosopher, and the Platonic teaching that in every phenomenon we have absolute perfection hampered by the surrounding conditions, and therefore only partially developed. We will refer to Mr. McClatchie's voluminous and learned notes in the sequel. Meanwhile it is interesting to notice the accordance between Choo-foo-tsze's assumptions and the results of our modern philosophy. Let the reader replace the terms *Fate* and *Air* by the terms *Force* and *Matter*, and he might easily imagine that he was studying the latest developments of science. Neither is manifested without the other. Either is inconceivable without the other. Both are eternal and necessary. Nature is the inherence of Force in Matter, and what is commonly called man's soul is measured by the interchange of relations between the molecules of his brain substance. Form is the outcome of incalculable external conditions which, in the absence of positive knowledge, may be described as producing a fortuitous result. Mind itself is an abstraction from the phenomena of thinking. The doctrine of evolution involves the doctrine of dissolution and teaches with all the certainty which the relativity of our knowledge admits, that a form once reached and abandoned can never be re-attained. And finally, when the Chinese writer of the 12th century tells us that there is no Heavenly Ruler, but that Fate is Incorporeal Reason, we seem to hear in anticipation Dean Mansel in the 19th century telling us that "the fundamental conceptions of Rational Theology are self-destructive ..... how for example can Infinite Power be able to do all things, and yet Infinite Goodness be unable to do evil? How can Infinite Justice exact the utmost penalty for every sin, and yet Infinite Mercy pardon the sinner? How can infinite Wisdom know all that is to come, and yet Infinite Freedom be at liberty to do, or to forbear? How is the existence of evil compatible with that of an infinitely perfect Being; for if he wills it he is not infinitely good; and if he wills it not, his will is thwarted and his sphere of action limited?"

We pass now to Part II., which is entitled *The Great Extreme*. This to start with is defined as "just the same as Fate," but in order to make it intelligible we must assume that it really includes both Fate and Air, that it is in fact co-extensive with the "Nature" of Part I. "The Great Extreme is just the Fate inherent in all things ..... it is just one Air which divided obliquely and became two Airs; the part which has motion is the Light, and that which has rest is the Darkness. It all divided and became five Airs; scattered, and became all things, ... it is Fate and nothing else," and so through a series of propositions in appearance mutually contradictory, but which taken together amount to a definition of Great Extreme as the Kosmos eventuating produced by the interaction of Force and Matter. Fate, as fate, was described as being in operation, but "when manifested form (as the Great Extreme) it is natural disposition; for example 'Moved and generates the light,' this statement shews natural disposition." Here then we have at length a "soul of the world" adumbrated. The Great Extreme is "Reason inherent in Heaven, Earth and all things, and mind in man acting as the lord of the whole body. ..... It is most high, most beautiful, most subtle, most divine, surpassing everything." The essential point, however, is that "soul" is merely a development of nature. The Great Extreme is alternately in motion and at rest. "Before motion there is rest ..... before rest there is motion." It "is not confined to place, has no bodily form, and no single place can contain it ..... Before manifestation ..... within it were Pleasure, Anger, Grief and Joy ..... the infinite Great Extreme never ceases altogether, but only when the fruit is perfected it ceases to generate for a while (when all things are about to return to Chaos.)" Again at page 55, "The whole shall return to Chaos, and men and things shall all cease to exist, and then the world shall begin again;" and so in many passages in Part III. "Non-manifestation is the Rest of the Great Extreme, and manifestation is the motion of the Great Extreme." So far all is intelligible. It is hard to believe that Choo-foo-tze intentionally wrote nonsense, yet it is equally hard even with the aid of the notes to make anything but nonsense out of the discussion on page 3 as to the distinction between "Nature" and the "Great Extreme." We pass this by therefore, and in closing this resume of Part II would again trace the analogies which appear to exist between Choo's doctrines and those of ancient and modern thinkers. Thus, we get a hint of the everlasting succession of redistributions of matter and motion which reduced our system from its primary nebulous condition and which will certainly redistribute it again by the absorption of motion and concomitant diffusion of matter. This was anticipated by Plato in his theory of secular recurrence. And yet again, Tyndall's now famous "fiery cloud" containing the potentialities of all actions and emotions, seems anticipated by the Great Extreme within which, before manifestation, were Pleasure, Anger Grief and Joy.

Parts III. and IV. deal more strictly with cosmongony. "In the beginning, "Heaven and Earth were just the light "and dark air." A movement of revolution being somehow (unexplained) imparted to this mass, the Earth was formed by the subsidence of sediment, while the subtle portions became heaven and the heavenly bodies, surrounding the Earth on all sides, and both above and below. There was a transition period when Fire and Water as the proximate principles of Heaven and Earth, existed, the former eventually producing wind, thunder, lightning, sun and stars, and the latter by its sediment producing the Earth. But the Earth is undergoing ceaseless change. "We frequently see on lofty mountains, the shells of the sea-snail and pearl-oyster, as it were generated in the middle of stones; these stones were part of the soil of the former world. The sea-snail and pearl-oyster belong to the water; so that which was below changed and became high." In the light of this prophetic view of modern geological science it is at once ludicrous and lamentable to find some few still existent divines pointing to the testaceous shells found

on mountain summits as irrefragable proofs of the reality of "the universal deluge."

It is not until we get far into the book that we find any allusion to the existence of a universal law. Nor indeed is the term used or the notion more than hinted at. Yet that the writer was on the brink of a great discovery, and missed it only through an unlucky chance, is evident from his argument that Heaven and Earth must exercise Mind, else "assuredly oxen would produce horses, and peach trees would send forth plum blossoms." But this implied law is spontaneously determined at the initial stage of each cycle of evolution. Evidently it is that of "fitness," and its test is human reason, for "Man is the same as Heaven," and Mind which is the ruling power of Heaven and Earth is 'the same as the supreme Emperor, and penetrates all things,' and is further defined as Benevolence. "To say that Heaven has a person up there who judges good and evil, we must not assert this. To say that there is nothing whatever which rules it, we also must not assert." This is the modern position of expectant scepticism. But the desire for something more tangible even in the philosopher's mind betrays itself a few pages further on:—"There certainly is a governing power. Heaven is a most hard and *yang* thing, spontaneously revolving without ceasing. There must be a governing power which causes this motion. People must inquire into this matter for themselves; it cannot be fully decided by merely discoursing about it. ... It is just this one thing which pervades the midst of matters and things;...so that nothing can be without this one thing. Hence it is said that it "is in both places, and is therefore incom- "prehensible." The fourth part closes with applications of the theory to the good and evil in man's nature, and to the development of moral qualities and of the physical elements—Metal, Wood, Water, Fire and Earth. Into these we will not enter. We have sufficiently indicated the scope of the work, and we have endeavoured to shew that it possesses an interest and importance which its title hardly implies. Our sketch has necessarily been imperfect, but our short-comings can easily be remedied by a perusal of the book itself. Its one great fault, as it seems to us, lies in the various senses in which terms such as Mind, Nature, Fate etc. are employed. But we must recollect that few of our own philosophical works are free from ambiguity in the use of, for example, the term Idea.

A few words now regarding the notes with which Mr. McClatchie has enriched his translation. Without an accurate knowledge, which we do not possess, of the entire system whereof Choo is rather the expositor than the inventor, much of the argument in the text is only with difficulty intelligible. But armed with this knowledge Mr. McClatchie is able to identify Fate (*Shen*) with God, Reason, the "Unity" and "Goodness" and the "Adorner" of Plato, and the "Space" of Philo. So also the eternal, primordial Air is equivalent to Chaos, to the first man, to the "Jupiter" of Anaximenes, and is the *Shang-te* of the Confucianists. "Nature" again he identifies with the "Nature" of the Stoics. Summarised, the creed of the Confucianists as expounded by Choo-fo-tze, contains the following articles—the eternity of a first God, inherent in eternal Matter but not conceived as apart from Matter; the Unity and universal distribution of the first God; the animation of the Kosmos, and the identity of man with it; the union in the Kosmos and man of body and mind, the latter being partly rational and partly sentient; and lastly the distinction between the Divine Reason or first God (*Shen*), and the Demiurgic mind or second God (*Shang-te*). Although there is no trace of a controversial spirit throughout these notes, Mr McClatchie has tacitly heaped together a formidable array of arguments against the missionary scholars who insist upon representing the God of the Christians as identical with the *Shangte* of the Confucianists. To reproduce these arguments would almost be to reproduce the notes. We therefore take almost at random the following passages:—"The first God, who is above mind or the Demiurgos, is the only real Ens in the Kosmos, and compared to him the Kosmos itself or animated *Shangte* is non-ens. . . *Shangte* is the Demiurge or second God who owes his existence and all his powers to the eternal fate or Incorporeal Reason." Yet it is to be admitted that while the Confucianists plainly acknowledge the one "Fate" as in reality Father of all things, they wholly neglect it, and offer to the Second God or *Shangte* all the Worship due to the first.

Here we must take leave of Mr. McClatchie's book. The labour expended upon it can but faintly be conceived from its size. It is a most important contribution to the history of thought, while the author's reputation is a sufficient guarantee for its importance as a contribution to our knowledge of Chinese literature. The volume as regards externals is well printed on good paper and is neatly and strongly bound. There are but few errata, and most of these are noted in a short table at the end. Somewhat more care might, however, have been advantageously expended upon the printing of the few Greek words used.

R. A. JAMIESON.

Outports.

NEWCHWANG.

The usual rumours about banditti reach us—the last to the effect that some 200 cavalry soldiers attacked a large number of robbers (about 300 strong), and were defeated, with great slaughter on both sides. It is nothing now for the Imperial troops to suffer defeat, the outlaws being better armed, and as a rule much more plucky. The latter expect no mercy, and of course never receive any when they are caught alive, so they fight like mad whenever they are put to it.

For the first time since the port was opened, a foreigner has been robbed on the highway. This was a Belgian Catholic Missionary, who was bound here from Mongolia, for medical advice. When some forty miles to the North East of Yingtzŭ, Mynheer Metman was surrounded by what he and his servants mistook for Imperial soldiers, but who unfortunately turned out to be brigands, for they took the missionary's saddle pony with all gear, his gun, pistol, and all portable articles, even his clothing and that of his domestics. From feelings of pity they returned to him a skin coat, and his snuff box, one of the sympathising follows of Dick Turpin remarking that a man could no more do without his snuff than without opium. The coat was very necessary also, as the Thr. has been ten to twelve degrees below zero, forty-two to forty-four degrees of frost. The travelling cart was left behind, for want of a pony which the freebooters took a fancy to, and the poor sick foreigner had to walk forty miles.

Is it not too bad that the roads so near a port should be so unsafe, when there are actually five hundred foreign armed and drilled soldiers on the spot, doing nothing but gambling and quarreling with the townspeople night and day? Perhaps it is not so much to be wondered at, for *on dit* the magistrate has lately been dismissed on account of his being concerned with the brigands—who, it appears, receive due notice when any attempt is to be made against them. In fact, the Ma-tsu (mounted robbers) are in the pay of the mandarins—or these are paid by them—it amounts to the same thing, and they feel quite secure. The chief of the band who robbed Mr. Metman—a young fellow of about 18 years, told his victim if he wanted to reclaim some of his effects, to apply to the nearest mandarin, who knew him—that his (the chief's name) was Wang (something) and that he lived at such a village. There were about 14 fellows under his orders, all well mounted and well dressed, the commander especially being quite a swell. The matter is in the hands of our worthy Consul, Mr. Adkins, who is now acting for all nations, as the U. S. Consul is always absent from his post during the winter. We have every reason to believe, therefore, that there will be such a stir made as will induce the mandarins to advise their protégés in future not to meddle with the Barbarian. It is fortunate perhaps that the missionary was surrounded and robbed before he could make use of his firearms, for if he had shot one or two, he would certainly have been killed. This may happen to any one who would naturally object to give up his coat and trowsers at such a cold season, and it would be poor consolation to feel that the Chinese Government is responsible for the consequences.

We have had considerable difficulty in supplying the larder with the Christmas and New-year delicacies, which can only be obtained at Moukden, some 120 miles off. Messengers have been stopped and robbed on the way there; but what is worse, some on the return voyage, with partridges, pheasants, venison, wild boar, bear's paws and such like seasonable commodities, have been deprived of what we may almost call our necessaries; for a dinner now without boar's paws is almost an insult to one's guests. All look for the dish as much as for the roast beef and plum-pudding.

On 28th, nearly all the community were present at the funeral of the late Abbé Simon. The ceremony in the Roman Catholic chapel, designed and built by the deceased, was most imposing. The service was conducted by the Pro-vicaire Boyer, assisted by six Foreign priests, Monseigneur Ridel, Bishop of Corea, being present also. Poor Simon! He little thought that the first important service in the chapel he worked so hard for, would be his own funeral. Like many of his brethren who devote their lives to the mission—this gentleman was well off in a pecuniary point of view, and spent his patrimony entirely for the support of natives and works of his profession, living himself in as homely a manner as the poorest Chinaman. Deeds, not words, are what such men are justly celebrated for.

30th December, 1874.

I notice that your correspondents allude to the Lesser Bustard, and I fancy we can boast of being visited by the big one here. Last week one of our sportsmen bagged a bird weighing 25 lbs., which proved to be a real "Otis tarda" male, the female is much smaller. The neck and head are ash colored, and under the beak there was a quantity of fluff like a beard. This is the only Bustard bagged this season. It is very difficult to get near these birds, and they require an S.S.G. wire cartridge to bring them down. The flesh is magnificent, and even one bird at a time, you may imagine, pays one for the trouble of riding twenty miles and walking ten miles after them.

13th January, 1875.

TIENTSIN.

During the afternoon of the 14th instant, news of a startling and sad nature reached us from foreigners resident in the metropolis, to the effect that at about five o'clock in the afternoon of the 12th instant the Emperor of China had breathed his last. For some days previous to the 14th

instant, through rumors here and in Peking, and latterly from the Peking Gazettes, we had first learnt that the Emperor was ill of small-pox. But latterly, we had been led to believe that His Majesty had got over his illness, and that he was going on favorably. On suddenly learning then of his death on the afternoon of the 14th instant, our surprise and sorrow were great; for we regarded his demise as a serious calamity to his country. On the 14th instant we likewise heard, through the same sources, that a son, said to be only four years of age of the Prince of Chun (so pronounced in Peking, and not *Shun*, as pronounced in the South of China—the seventh son of the former Emperor Taou-kwang)—had been fixed upon by his late Majesty, Tung Che, as his successor, setting aside the sons of the fifth and sixth sons of Taou-kwang, namely, the Prince of Tun and the Prince of Kung. During the afternoon of the 16th instant the Peking Gazette of the 13th instant came to hand. , and from it we were made acquainted with an Edict of that date, promulgated by the Empresses Dowager in the name of the new sovereign, announcing the death of the Emperor, Tung Che, and that His Majesty had by will selected for his successor a son of the Prince of Chun, named Tsae-teen.

The edict further stated that his Majesty confirmed in their position a number of high officials (enumerated). The names of Prince Kung and Wânseang do not appear amongst the officials of the Privy Council. In the Gazette of the 31st ultimo, there was an announcement that Wân-seang had applied for, and had been granted, three months leave of absence; but whether this be or be not the reason for his name not appearing, I am unable to state.

There is no mention in the Edict of the 13th instant of any changes having been made amongst the high officers of the provinces. These latter, however, have been commanded to remain at their posts, and not to repair to the capital to present themselves for audiences. Previous to the death of the late Emperor, it was promulgated in the Gazette of the 9th instant that Li Hung-chang, the Governor-General of the province of Chihli, had been promoted to the highest post given to a Chinese official, namely, to that of minister of state (Ta-heo-sze) of the Wăn-hwa-teen. The same Gazette announced that Wănseang had been promoted to the position of Minister of State of the Woo-ying-teen; and that Paou-keun had been promoted to that of assistant minister of state (Heĕ-pan-ta-heo-sze) of the Te-jin-ko. These appear to be offices connected with the appointments of Ministers of State.

The ministry, as hitherto so called by foreigners, is at the commencement of the new reign composed of Li Hung-chang, (as minister, styled Li Chung-tang), first minister of state; of Wănseang, (styled Wău Chung-tang), second minister of state; of Paoukeun, assistant minister of state; and of Tso Tsung-tang, assistant minister of state. Li Hung-chang, as Governor-General of the province of Chihli, resides at Tientsin, eighty miles from Peking; Tso Tsung-tang, as Governor-General of the provinces of Shense and Kansuh, resides at Sin-gan-foo, eight hundred and fifty-five miles from Peking. Their distance, consequently, precludes all possibility of their acting as advisers to the Throne for the carrying on of daily public business, in the light in which advisers of the Throne are considered when ministers of state in Europe. The official positions, then, of Ta-heo-sze and Tsé-pan-ta-heo-sze, hitherto translated ministers of state and assistant ministers of state, must not be regarded by us as official advisers of the Emperor in the discharging of his public duties. Should these officials be permanently residing at Peking, and in the Privy Council, they would, of course, act in that capacity. So far as we know here at present, and gather from the Edict of the 13th instant, the advisers of the Throne as members of the Privy Council (Keun-ke-choo) are Paou-keun, Shin Kwei-fun, and Li Hung-tsaou. In the reign of the late Emperor Tung-che, the Prince of Kung and Wan-seang formed members of the Keun-ke-choo or Privy Council; but whether they still continue to do so under the new régime, I am at present unable to say. The Chinese people here and at Peking have likewise remarked the absence of the names of Prince Kung and Wanseang in the list of the members of the Privy Council, and they have further remarked the absence in the list of the Edict of 13th instant of three officials belonging to the party of Prince Kung, namely Chung-shih, president of the Board of Punishments; Chung-how (formerly of Tientsin) Vice-President of the Board of War; and Ching-lin (formerly Taoutai at Newchwang) chief of the Colonial office; all of whom, Chung-shih, brother of Chunghow excepted, have been, as members of the Tsung-le Yamen, for years constantly engaged in transacting business with the foreign officials at the capital. Chung-shih, I may add, although not in the Tsung-le Yamun, was socially connected with foreigners. I am so very particular in mentioning all these circumstances at this conjuncture in political affairs, as it was notorious last winter amongst the Chinese people in Peking, that the feelings of the Prince of Chun were anti-foreign; and that these five high officials were viewed as favorably disposed towards foreigners.

Up to the death of the late Emperor Tung-che, the members of the Tsung-le Yamun, or Foreign office, were composed of the Prince of Kung, Wân-seang, Paou-keun, Maou Chang-he, Shin Kwei-fun, Tung-keun, Chung-lun, Chung-how, and Ching-lin; but whether they all still continue to be members of the Tsung-le Yamun I am unable at present to state, as no mention is made of the Tsung-le Yamun in the Edict in question. I allude to this department as it is the one with which alone the Foreign Ministers at Peking transact their international business.

In the Gazette of the 13th instant the Prince of Chun obtains ten days leave of absence. Why he asked for leave just as his son Tsae-teen had succeeded to the Throne, cannot be learnt from the Gazette in question; and it would be only waste of paper to write down the various surmises of people here on the subject. Last winter I always heard him spoken of as a man fond of military affairs, and of his being the chief of the foreign-trained and armed Manchew army, raised at the capital during several years past. I never heard it said that any of the foreign officials had come into relations with him, either on business or socially. There is no doubt of the Prince of Chun having got the superior force of the military of the capital at his back; and consequently he is in a position to maintain the new Emperor on the Throne.

The people of Tientsin appear at this time to be content with the new order of things. From what we can see and hear, all they appear to care about is complete tranquillity, so that they may quietly make a living and money for themselves and their families; and they are apparently quite indifferent as to what member of the Manchow imperial family has succeeded to the Throne and become their sovereign. They feel, in fact, quite as indifferent as I do here in Tientsin—since we must have a king to give us stability—whether the Prince of Wales or the Duke of Edinburgh becomes King of England, neither my welfare nor my pecuniary interests being affected by whatever member of the German family becomes the head of the country. In what way, however, the Princes of Tun and Kung, the elder brothers of the Prince of Chung, may view the new order of public affairs, is quite a different matter; in a short time I have no doubt we shall see whether the change affects them injuriously or not.

All foreigners having relations with China must deplore the death of the late Emperor Tung-che. He had only just, we may say, become the sovereign of his country; he had admitted, since he assumed power, the foreign ministers to audiences, one step on his part in the right direction for the benefit of China; he had gone amongst his subjects on several occasions during the last eighteen months in a wise way, which his immediate predecessors had never done; and he was apparently moving on in a progressive policy as fast as could be reasonably expected, considering his only having been a real sovereign for a few months and his being a youth of 19 years old.

The new sovereign of China, the son of the Prince of Chun, the adopted child of the Empresses Dowager, is only four years of age; and he will not for fifteen years to come assume the personal control of the Empire. During all this time, then, the Empresses Dowager will, as during the twelve years minority of Tung-che, act as regents; and being females they will as heretofore not grant audiences to the foreign ministers. The death of Tung-che has, consequently, again opened a gulf between the Envoys of foreign governments and the Court of Pekings; fifteen years will be required before it will be possible for the foreign Ministers to again pass the threshold of the palace to have audiences of the Ruler of China. This period at the same time unfortunately likewise tends to keep asunder the people of China from foreign nations. That the Chinese population may be speedily made to comprehend by ocular demonstation that their sovereign stands on no higher ground than the sovereigns of foreign nations, and thus be made throughly sensible of their ignorance in regard to their own actual condition and to the civilization of foreign nations, I cannot help coming to the conclusion that Foreign Governments will demand, and that at an early day, that the court barriers of Peking be levelled as in European nations. I can hardly fancy that another fifteen years will be allowed to pass ere this work shall be done.

The rumors current in Tientsin during the last four days regarding Chinese political affairs here and in Peking, would if written down make a volume of respectable size. One was that Li Hung-chang was on his way here in all haste. Another that he was marching on Peking at the wish of a high personage there. Another that the mandarins of Tientsin were preparing to lay infernal machines of destruction off Taku to prevent foreign vessels coming up the river in spring. Another that the young Empress had died on the 14th instant from drinking of a cup of liquid which was not alone composed of tea. Another that the most frightful anarchy was existing in Peking amongst the high officials and their followers, &c., &c., &c. The stories about Li Hung-chang and the mandarins arose in the fertile brains of the population, and had no foundation of truth. In regard to the Peking rumors, your correspondent in that place will no doubt advise you by this courier.

Since the departure of the last courier, the Chinese have been gathering in their ice crops from the river, whose ice is now eleven inches in thickness. Every night, all along the river off the Settlement, one could see numerous lighted lanterns, and hear the voices of the crowds of Chinese laborers engaged in cutting the ice and in carrying it on shore to the ice houses. Up to yesterday at 1 P.M. we had for a long time back very mild pleasant weather. At that hour a northerly gale

set in which is continuing at present. This morning the thermometer stood at 16° Fahr., and it is hourly falling. The ice will consequently be thicker to-morrow morning.

PURITAN.

18th Jan., 1875.

FOOCHOW.

By the steamer *Dragon*, we have Foochow advices to the 1st February. The *Herald* says the work of laying the line of telegraph to Amoy has been again interrupted. A mob of Chinese, led on by Yamên runners and armed with knives, sickles, and spears, attacked the native workmen engaged, on the 22nd ultimo, near Kwang Taou, inflicted a severe beating upon several, plundered their clothing and tools, and dispersed the entire party. The foreigners present were not interfered with, and as they had orders not to use their weapons unless personally assailed, they appear to have been passive. A few Penang lawyers would, in that case, have been more useful than revolvers. The "lawyer" is a very handy weapon, and can hardly be called lethal; it won't go off in hitting a man over the head, so that both the striker and people behind are perfectly safe, while the man in front is apt to be incommoded. However, to continue the *Herald's* narrative, "Captain Hoskicer, accompanied by his foreign staff, called upon the Elder of Kwang Taou on the following day and demanded an explanation regarding the attack. The Elder disclaimed all responsibility, stating that he had only heard of the disturbance that morning, that his people were not concerned, and that the whole disturbance had been the work of outside villagers; he further asserted that his people were not opposed to the telegraph, but, on the contrary, were prepared to render every assistance to the Company's workmen. This was the position of affairs on the morning of the 23rd ultimo. It was plain enough that the whole attack had been planned by the authorities; it was equally plain that unless the Company's staff were prepared to fight their way through Kwang Taou, it would be quite impossible to continue the work of construction. Under these circumstances, Captain Hoskicer determined—wisely, we think—to return to Foochow. This was accordingly done, the entire party reaching the Settlement on Sunday last. The Company have since, we understand, communicated particulars of the attack and robbery to the authorities, with a view to obtaining satisfaction."

Another Arsenal, under foreign superintendence, is about to be opened in the City. A Mr. Betts has arrived from England to take charge of the Torpedo department, and other foreigners are expected to join very shortly.—The thermometer was as low as 33° on the night of the 22nd ult. On the following morning the hill sides were partially covered with snow, which remained on the ground during the entire day. The phenomenon is somewhat unusual in this part of the world, and is regarded by many of the Natives as a happy omen for the New Year.

The *Market Report* of the 29th Jan. says business in Tea during the week had been limited to few transactions in Oolongs and Scented Teas. The unsold stock of Congou remained at 2,500 chests.—Sales have been 1500 pieces of 7 lbs. T-Cloths at $1.75 piece. Lead is quoted at $8.50 per picul, but holders are asking $8.75, with no buyers.—The O. S. S. Co's steamer *Priam*, from Shanghai *en route* to London, was expected. The ship *Golden State* was expected shortly from Shanghai to load for New York, and is said to be engaged full at £3 per 40 cubic feet. The barque *William Turner* is expected to load for Melbourne.

HIOGO.

The *Hiogo News* records a painful incident in the death of Mr. A. von Knoblock, Acting Consul for North-Germany. "Shortly after one o'clock, the clerk of the Court, having occasion to go to the office of the deceased, found him stretched out on a sofa, his head leaning over the side, and a pistol with one barrel discharged lying in a pool of blood by the side of the couch. Dr. Thornicraft was quickly in attendance, but death must have been almost instantaneous, as the bullet passed through the head of the unfortunate gentleman, entering above the right ear." During his short residence in Kobe, says the *News*, deceased had not only earned the respect of his own countrymen, but also of all with whom he was brought in contact, and his untimely end has deprived his country of an energetic and painstaking public servant. Mr. Kempermann, of the German Legation, arrived the next morning from Tokio, and has assunmed charge of the Consulate, pending the arrival from Europe of Dr. Focke.

The *Daijokwan* have notified a penalty on the sale of adulterated or damaged drugs.—The first fall of snow of the season, in quantity worth noticing, took place on the 29th.—The occasion is taken of the reappearance of the *Minato Shimbun* in an enlarged form, to give copious translations which, however, though quaint, have not much interest as news.

A curious story of Japanese life is first related. A man of sixty has a wife of thirty and two children. The wife is made love to by a priest, to whom she gives money from her husband's savings. Finding this out, the husband separates from the wife, who takes the children with her. Later on, the priest turns jinriksha man and marries the woman. When the ex-husband hears this he goes to his late wife's house when the new husband is away, and is about to stab her with a knife, when the ex-priest arrives. Upon the latter demanding what the old man is doing with his wife, the intruder replies that he is angry with the woman because she has refused to let him see his children. The ward officers now intervene, and the old man takes charge of the children; the editor thinks he acts wisely.

Another writer laments that girls are not taught literature, spinning, weaving, and dressmaking, rather than music, singing and dancing; these latter accomplishments, he says, are costly and lead to drinking and still worse vices. He wants to see the teachers of these objectionable arts heavily taxed. We fancy we have seen a somewhat similar idea expressed in European papers, though the remedy is a novel one.—It seems, too, that the practice of taking a new name in connexion with a new inheritance is not confined to Europe. The Editor makes merry over a wight who, on coming into some property, changed his name from Yoshimura—a name which sounds as "flower village" or "good village"—to Ashiya, *i.e.*, "rush house" or "bad house," whichever you like. But becoming poor, he returned to his first cognomen, and thenceforth his fortunes improved. This reminds the Editor of another man who lived in Midosuji. He was named Heimon, which means "peaceable gate," but also sounds like the word which expresses "confined to one's house;" and, becoming bankrupt, he has had to close his doors. Had he borne the name of Kaimon, "opened gate," it is suggested that his fortunes might have been happier.

YOKOHAMA.

The files of Japan newspapers brought by the *Golden Age* yesterday, contain very little news of general interest. The *Hochi Shinbun* announces the birth of an Imperial princess on the 22nd ult., and that all officials of and above a certain rank were commanded to present themselves at the palace to make their congratulations.—The *Mail* says that a representation has been made to the Government deprecating the freedom with which the native newspapers canvas its acts. The Government, in reply, stated that the laws regulating the Press were quite sufficient to prevent any abuse of it, and "that men must learn to decide for themselves whether comments are good or bad." The Government thus appears desirous of encouraging the growth of political thought and discussion among the people, and to give perfect freedom to the Press, an example that might well be followed by some older nations westwards.—The *Mail* draws attention to the memorial of the President of the Formosan Commission to H. M. the Tenno, which it says sums up the labours of the Board in terms of congratulation, "not unbecoming, in the face of a confessed success."—The same paper speaks out boldly against General Grant's suggestion for the disposal of the American share of the Shimonoseki indemnity, which, it says, ought to constitute a splendid endowment either for the education of young Japanese in America, or for the furtherance of educational purposes in this country.—Small-pox is still prevalent at Yedo and Yokohama, and the recurrence of a case in the British Camp has caused the Royal Marine battalion to be confined to barracks. A large village on the road to Adawara has suffered so severely from the disease, that it is difficult to find among the healthy inhabitants a sufficient number able and willing to nurse the sick; all who can are escaping to the hills.—The *Gazette* reports an accident to a seaman of H.M.S. *Thalia*, named McCull, who fell from the foretop into the water, striking his head against the ratlines in the fall, and inflicting a severe wound. One of his shipmates dived from the ship and rescued him, and he seems likely to recover.—The Return Foot Ball Match, between the Settlement and the Services, on the 21st ult., resulted in favour of the latter, they having obtained two goals to their opponent's one. The funeral of the late Dr. J. J. R. Dalliston took place on the 22nd and was one of the largest ever witnessed in Yokohama. The deceased was a universal favourite.—Japanese thieves seem to be as brisk as ever. In one day, at Tokio, three robberies from the person were committed. A match factory is about to be established at Hiranuma, Yokohama, for which machinery has arrived from America.

The annual meeting of the Race Club was held on the 27th ultimo. Three of the retiring committee, Messrs. Strachan, Fraser, and Sandwith, were re-elected, and Messrs. Russell Robertson aad Cruickshank were appointed to fill the vacancies. The sum granted by Government for defraying the expenses connected with the Japanese Department of the Centennial Exhibition to be given in America, next year, says a native paper, is 200,000 *yen*; of which 100,000 *yen* is for travelling expenses and lodging, 20,000 for the conveyance of material, and the remaining 80,000 for the purchase of curiosities.

HONGKONG.

The report of the Hongkong Fire Insurance Co. shows a net profit on 1873 of $207,000. This will have to be divided as follows: 30 per cent. ($62,000) to reserve, 20 per cent. ($41,400) to contributing shareholders, and 50 per cent. ($103,500) dividend to shareholders. This will enable a dividend of $51.75 per share. The working account of 1874 shews a balance at credit of $233,784.—The opposition which has been going on lately on the Canton river, ceased on the 31st ult. That was accordingly the last day on which cheap

fares to Canton were charged; and this fact becoming known, the Hongkong, Canton and Macao steamers both to and from Canton were crowded to excess. The number of passengers to Canton so much exceeded the accommodation of the *Kiukiang* that a large number had to be turned back, even half an hour before the time of starting. The incoming steamer was so thronged that there was hardly standing room.—There was to be a yacht race on the 4th instant.—The Registrar-General's returns show that, after deducting the deaths which were caused by the disastrous typhoon of September last, the rate of mortality for every thousand persons among the British and foreign community for the year 1874 was 29.39, and among the Chinese 23.19, while in 1873 the rate for the former was 27.72, and for the latter 22.29. The greatest increase, nearly 2 in the thousand, is observable in the mortality among the British and foreign residents.

The Report of the Hongkong Hotel Company shows a profit on the half year of $6521. The Directors propose dividing 2.50 per share, carrying $4.000 to reserve and carrying forward $74. A meeting of the Medical Missionary Society was held on the 21st ulto. The report shows a successful year's working.—The *Gazette* of Saturday contains a notification to the effect that his Excellency the Governor has been pleased to appoint Henry Lowcock, Esq., to be a member of the Legislative Council, *vice* Richard Rowett, Esq., resigned.—The *Daily Press* reports the arrival from the Mariana Isles of twenty Spaniards and natives of Manila who had been transported there by the Philippine Government in 1872, for taking part in the revolution. Most of them are very rich, and they have all obtained a pardon.—The arrival of H. M. S. *Vigilant* at Singapore from England, is chronicled.

Among the passengers in the last French mail, were the Chevalier Schaeffer, Austrian Minister, bound for Saigon, and Conte Litta Biumi, Italian Chargé d'affaires, for Marseilles.—Application has been made in the Supreme Court on behalf of Messrs. W. F. B. Sams and William McGregor Smith, lately trading in co-partnership with Mr. Victor Kresser, in the Sugar Refinery, to have them adjudicated bankrupts. His Lordship granted the application.—Attempts made on the 25th and 26th to float the *Albay* at high tide, were unsuccessful.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

Jan. 10th.—(1) A Decree, referring again to the want of snow in the neighbourhood of Peking. In addition to the propitiatory offerings commanded by decree on the 1st instant, it is now further ordained that incense be again offered on the 13th inst., by five of the Imperial Princes at different temples.

(2)—The Governor-General, Li Hung-chang, memorializes denouncing the officials answerable for the escape of a prisoner while under convoy. It has been reported to him by the District Magistrate of Sha-ho that on the 6th September a prisoner was received at that district from another magistracy, to be forwarded on, and on the following morning, after examination of the fetters, a guard of police and soldiers was detailed to escort the man on to the next stage. Some of the soldiers and police lagged behind on account of illness. At a certain point on the journey, the prisoner was allowed to get out of the cart for a purpose, and just at that moment a gale of wind came on which startled the mules and caused them to run away. While the guard were running after the cart, the prisoner managed to break his fetters and escape. He has not been recaptured. The offence of which he was guilty was that of causing the death of a married woman, whom he threw down and kicked, for which he had been sentenced to strangulation. The Magistrate's investigation had elicited no proof of guilty connivance at his escape on the part of the soldiers and police. The Governor-General pronounces it as his opinion that decided negligence has been shown, and begs that the two district magistrates concerned be adjudged a penalty by the proper Board.

Jan 11th.—(Court Circular)—The Prince of Kung returns thanks for the gift of a sable-skin robe.

(1)—A Decree replying to a memorial from the Governor-General Tso Tsung-t'ang, who, in reporting the death of the late ex-Salt Comptroller of Kwangtung, Chung K'ien-kün, dwells upon the liberality and public spirit with which he contributed from his official income to the relief of the distressed (as reported a few months ago). Sanction is given to the Governor-General's application that materials for the biography of the deceased be supplied by the authorities of Hupeh and Kwangtung to the Office of the National Historians, to be duly enrolled among the lives of distinguished public servants, as an encouragement to others.

(2).—The Governor of Honan reports the rehearing of an appeal case referred back from Peking. The accusation of murder to which it relates grew out of incidents in the Nien-fei disorders of 1860-1862, and the accused person is pronounced innocent of the charge.

Jan. 12th. (1)—A Decree. Li Tsung-hi memorializes declaring that his complaint grows daily more severe, and beseeching permission to resign his office. Let Li Tsung-hi vacate his office, and attend in tranquillity to the care of his health. Let Liu Kw'ên-yih act temporarily as Governor-General of the Two Kiang, and let Liu Ping-chang 劉秉璋 act temporarily as Governor of Kiangsi.

(2).—Li Tsung-hi memorializes on passing in review the qualifications of Tautais now in office, and requests a decree degrading a functionary from his rank and appointing him elsewhere. The Tautai charged with the supervision of the Salt department of Kiangnan, Têng Yü-Kung 鄧裕功, is reported somewhat addicted to the vice [of opium-smoking], and shews no capacity for rousing himself into activity. Let him be degraded to the rank and office of sub-prefect, and await selection for an appointment by the Board, in furtherance of the stringency of the rules of office.

(3)—The Governor of Honan memorializes representing the exhaustion of the resources of the provincial exchequer, and praying that a portion of the demands upon the revenue of the province may be remitted. He explains that since the two army corps which for some years were employed in Honan passed beyond the frontier, the utter depletion of the treasury had compelled him to solicit in a previous Memorial that payment of the different subsidies which Honan was called upon to furnish might be suspended for a time; but in reply he received a despatch from the Board of Revenue urging continuous payment, which could not be pretermitted without giving an excuse to other provinces to bring forward like requests. The Governor now returns to his entreaty, pointing out that, owing to the entirely inland situation of Honan, with no command over the great highways of commerce and navigation such as furnishes a Customs' revenue to other provinces, his own jurisdiction is exceptionally poor. The two army corps already mentioned, during their six years of campaigning in Honan and the provinces to the west, absorbed the entire fatness of the land. The only source of income consists in the land revenue and miscellaneous duties, yielding a revenue of some Tls. 2,150,000. The outgoings for the support of the two army corps and of the regular and irregular forces of the province, together with the supply of arms and munitions, amount to upwards of Tls. 1,400,000, to which, when an intercalary month occurs, an additional sum of Tls. 100,000 and odd must be reckoned. The original sum prescribed for expenditure on the Yellow River works was Tls. 200,000 per annum, but the additional expenditure of late years for extraordinary repairs has mounted up until more than double the above sum is now reached. These two sources of outlay make together the amount of upwards of Tls. 2,000,000. When to this are added the Taels 250,000 required as the annual subsidy to Peking, the expenditure is already in excess of income. The absolutely indispensable outlay for the pay of the garrison troops and the salaries of the official establishment amounts to Tls. 700,000 per annum, so that the Treasury is absolutely drained dry, and no amount of financial expedients will suffice to establish an equilibrium. The total amount of subsidies with which the province has been assessed for the current year, on behalf of official salaries in the three Manchurian provinces, the garrisons in Turkestan, etc. etc., is Tls. 2,023,000, of which amount there remain unpaid no less than Tls. 1,955,600. The Governor is compelled, accordingly to submit once more his prayer for a revision of the demands upon his exchequer.

Jan. 13th.—[The Decrees and Manifestoes relating to the decease of the Emperor on the 12th inst., which occupy the greater portion of this day's *Gazette*, were published on the 3rd inst.]

(—)—King-show, Consort of the Imperial Prince, and director of the Imperial Equipage Department, with his colleagues, memorializes representing that in former times funds were invested by this department of the Court in the acquisition of lands by purchase or mortgage in different parts of the Province of Chihli, yielding an annual rental of Taels 20,755.0.1.7, which, according to regulation confirmed by Decree, should be remitted at the end of each year from the provincial treasury. The amount in question served to defray the salaries and allowances of the officers employed under the department, as well as the expenses of all kinds entailed in the service. Up to last year, however, payments on this account from the treasury of Chihli were in arrear to the amount of four hundred and eighty-nine thousand Taels, and upwards. Repeated demands for the sum of Taels 8,700, due on account of the revenue of last year, have been addressed without result to the Governor-General of Chihli, and it is now besought that he may be commanded to cause immediate payment of the sum in question to be made, and steps to be taken for the gradual collection and payment of the arrears.

Jan. 14th (1)—A Decree of their Majesties the Empress Dowager and the Empress Mother:—We have received a memorial from the Prince of Tun and his colleagues, requesting that the act of grace heretofore bestowed be now revoked. This application is inspired by feelings most honourable. Let, therefore, as is requested, the honours conferred by the Decree of the 23rd December on the princes and ministers be revoked and annulled, and let the two steps of honorary rank conferred by the same Decree on officials, high and low, throughout the empire, be at the same time revoked and cancelled. Let the proper departments take note.

(2)—A Decree of their Majesties the Empress Dowager and the Empress Mother:—We have received this day a memorial from the Prince of Ch'un, stating that the complaint under which he formerly laboured has broken out afresh, and

entreating that special grace be shewn him in the granting of permission to strive for the preservation of his existence. On perusal of the Prince's memorial, expressed in terms of earnest supplication, which are inspired by the most honourable feeling, We ordain that the Princes, Nobles, Grand Secretaries, the Six Boards and Nine Superior Courts, do consult with careful deliberation upon the proper course to be pursued, in fulfilment of every requirement of what is right and proper under the circumstances.

[*N.B.*—The Prince of Ch'un, whose application for leave to resign his offices is indicated above, is the father of the child who has become Emperor of China. According to public report, the Prince was in reality overcome by the shock of the announcement; but in any case His Highness would be obliged to withdraw from his functions as a Minister of the Presence, and his other State employments, since he could not render acts of homage to his own son.]

Jan. 15th.—(1) [Decree announcing that the Empresses consent to undertake the conduct of a Regency, published in *Daily News* of Feb. 3rd.]

(2)—The benign Mandate of their Majesties the two Empresses has been received as follows: Let all the works undertaken at the buildings on the Three Lakes, whether actually in progress or not yet begun, be forthwith discontinued. [N.B.—The works in question were ordered to be undertaken in September last, in the neighbourhood of the Imperial Palace, for the accommodation of the two Empresses Dowager, on the abandonment of the works at Yüan-ming Yüan being decided on].

(3)—A Decree commanding the selection of a posthumous canonical title for his late Majesty, whose virtues are extolled in the name of his successor. For thirteen years, it is recounted, His Majesty ruled beneath Heaven, in devout fear and unbending reverence. In toilsome devotion to duty, and awe-stricken assiduity, he spent no single day in which his thoughts were not devoted, in veneration of Heaven and application of the Ancestral precepts, to industry in the cause of government and love toward his people. His performances of worship at the temples of the State were reverent and sincere. He was indefatigable at the proper epochs in his pilgrimages to the mausolea of the departed sovereigns. He cherished in the sublimity of filial piety their two Majesties the Empresses. From the highest antiquity his equal has not lived, as is known indeed to all his subjects. When he first acceded to the Throne, he laboured diligently, day and night, under the direction of the benign maternal counsels, to accomplish his studies, under the tutelage of learned ministers. In the course of a few years, the rebels of the South and the roving banditti of the North were wholly subdued, and the provinces of the South and West once more enjoyed tranquillity. His tender regard for the welfare of his people was shown in his compassion for those in bondage under the law, and in the indulgence he displayed in times of disaster from flood and drought. The great assemblage of Princes and ministers will accordingly deliberate upon the title that it is proper to enrol in the sacred canon.

(4)—A Decree naming the princes, nobles and ministers who are to wear mourning for one hundred days. With the exception of those named, all other officials will wear mourning for twenty-seven days only.

(5)—A Decree of the two Empresses, in reply to a memorial by the Censor Yü Shang-hwa, with reference to the two physicians who attended his late Majesty. It is commanded that they be stripped of their rank, and continue under this penal sentence to discharge their official duty. (For previous chastisement see *Gazette* of 13th inst.)

(5)—The Grand Secretary Wên-siang memorializes (on or about the 28th Dec., 1874), renewing his entreaty for leave to retire from his office. On the 30th September last he memorialized to this effect, stating that his health did not permit him to attend to all his duties, and begging to be relieved of his office, in order that he might devote himself solely to the management of Foreign affairs. In reply, his Majesty deigned to grant him a further congé of three months. In gratitude for such favours he hastened to occupy himself with restorative treatment, trusting that after the settlement of the Formosan affair, he might, perhaps, be able to resume the discharge of his functions. The Formosan affair, however, is but just concluded, and his health is worse than ever. He is consequently obliged to reiterate his entreaty for leave to resign, not feeling himself capable even, as before, of undertaking to devote himself solely to Foreign affairs. If favoured under the circumstances of his grievous illness with his Majesty's leave to retire for the purpose of attending to the care of his health, he will not fail, should the blessings diffused by his Majesty contribute to his recovery, to prostrate himself in the dust before the palace gate, and solicit re-employment. (For rescript granting three months' additional congé, see *Gazette* of Dec. 29, 1874.)

(6.) The Governor-General of the Two Kiang reports the total quantity of common and superior rice transmitted to Peking from the province of Kiangsu during the season 1874. He adverts to the condition of the provinces, as yet but partially recovered from the devastation caused by the rebellion, much land still remaining untilled, whilst that which has been brought under cultivation again, from its being overgrown with dense vegetation and having remained long unploughed, requires a great outlay on the part of the husbandman, with comparatively small results. The province was also visited with severe tempests toward the end of last summer, just as the cotton and rice crops were flowering, whereby much damage was done; and when fine weather returned about harvest time, epidemic sickness prevailed very extensively among the agricultural population. All these causes have produced distress, which it has been necessary to take into consideration. After making all allowances and granting exemption in sundry cases, the quantity of rice collected and shipped was 696,100 piculs, beside 18,700 piculs by way of waste and transhipment allowance, and a further proportion of 13,905 piculs as additional surplus. The quantity further provided as excess or wastage allowance for the junks was 57,100 piculs.

Public Meetings.

MUNICIPAL COUNCIL FOR SETTLEMENTS NORTH OF THE YANG-KING-PANG.

Council meeting of 18th January, 1875.

Present:—Messrs. John G. Purdon (Chairman), Geo. J. W. Cowie, F. E. Heyden, W. Kidner, F. W. Lemarchand, R. Mackenzie, E. Seligmann, S. D. Webb, and the Secretary.

The cash state for the week ending 16th inst. was laid on the table for inspection.

Staff—On the recommendation of the Finance Committee it was decided to engage Mr. E. A. Fabris in the room of Mr. J. M. Fabris, on a probationary term of three months, at the end of which time the question of a permanent engagement will be considered.

Burial of Persons in Cemeteries without Death Certificates.—In accordance with the recommendation of the Watch Committee, it was resolved that no permit for burial in the Municipal Cemetery be granted until Certificate of the cause or probable cause of death from some competent authority be granted to the Sexton for the satisfaction of the Council. Any case in which it was not forthcoming being immediately reported to the Secretary.

Land Office.—Transfers of land in H.B.M's Consular Registers. Duplicate plans for Municipal archives.—Letter read from H.B.M's. Consul stating that the arrangement as to forwarding duplicate plans to the Council has not been strictly carried out, owing to the difficulty in inducing applicants to hand in plans at the time of registry, but in cases where the requisition is complied with, the Council might depend on his furthering their views so far as lies in his power.

Police—Cases of assault upon the person having become frequent during the past six months, and there appearing to exist an unusual amount of crime in the Settlement, it was decided to call on Mr. Stripling, the Acting Superintendent of Police, for a report as to what may in his opinion be the cause, and more especially whether the strength of the Police Force at the present time is sufficient for the requirements of the place.

REPORT OF THE FINANCE, RATE, AND APPEAL COMMITTEE FOR DECEMBER AND JANUARY.

Books.—The Books have been examined, and the Cash Balances shown in the Municipal Ledger compared and agreed with the Bankers' Pass Book and certificate.

Statements showing the expenditure of the Works' and Watch Departments up to end of December ultimo, as compared with the Budget have been investigated.

The Committee are glad to state that as far as practicable so far the expenditure has been kept within the Budget figures.

Weekly Returns from the Local Post Office have been examined.

The Returns called for by Mr. J. P. Bisset (vide Resolution No. VI.) at the Ratepayers meeting held on 8th June, 1874, have been made up, and forwarded to that gentleman, in order that the Committee might be satisfied that they contain the information required before proceeding to publish them.

Assessments. — Several applications have been made on the part of Householders, for reduction in the assessments of their respective premises.

The Council having no authority whatever to make any alterations in the assessment of 1873, on which they have been instructed by the Ratepayers to collect the Municipal rates, the applications have not been granted.

At the same time, without expressing any opinion as to the assessed valuation of property in the Settlement as at present existing, the means of adjusting the assessment of property for purpose of taxation are unsatisfactory, and the Committee would recommend that at the forthcoming Meeting of Ratepayers, the Finance Committee shall be empowered to deal with special cases—their decision being considered as final and binding.

Staff.—Mr. S. Reynell has been placed in charge of the Dues office.

P. C. Kemball has been allowed Tls. 5 a month in addition to his pay as Constable, whilst performing the duties of Clerk at the Dues office.

Interest to 31st December last on Municipal Loan of June, 1873, has been paid.

The Cash Balance on evening of 31st January, was:—

In Compradore's hands	Tls.	1,971.65

REPORT OF THE WATCH COMMITTEE FOR JANUARY, 1875.

Jinrickshas.—The Committee having conferred with the Acting Superintendent of Police, with regard to the petition from the Proprietors of Jinrickshas, that the Municipal Regulations with regard to carrying of lights and loitering in the streets should be applied to Wheelbarrows, have come to the conclusion that it would be quite impracticable to enforce them, without an increase in the strength of the Police Force, owing to the great number of wheelbarrows now in the Settlement.

That there are too many of both classes of vehicles is evident, and a motion to reduce the number the Committee would recommend

being brought forward at the next meeting of Ratepayers.

The argument put forward by the petitioners that they are placed at a disadvantage in plying for hire so long as wheelbarrows loiter in the streets, does not appear to hold good.

The experience of the past twelve months shows that the regulations drawn up for the control of Jinricksha traffic are so persistently disregarded, that it requires constant vigilance and extra exertions on the part of the Police to prevent the throughfares being obstructed, and the necessity of some improvement in this respect has been brought before the petitioners.

Shanghai Fire Department—The various offices represented in Shanghai having been requested to grant a formal authority to the offices of the Fire Brigade to act at all fires in which they may be interested, to the best of their knowledge, skill, and ability, replies have been received as under :—

Lancashire Fire Ins. Co. Commercial Union Ins. Co. Royal Insurance Co. Norwich Union Fire Ins. Co. Sun Fire Office. Imperial Fire Insurance Co. Northern Assurance Co.	Any authority necessary can, in their opinion, only be given by the Municipal authorities.
Guardian Assurance Co.	Agent will write to Head office.
Phoenix Fire Office	Do not recognize necessity of giving the formal authority asked for
Hamburg Bremen Fire Ins. Company.	Assent, on condition that no expenses will arise to the Company in consequence
Liverpool and London and Globe Insurance Company	Assent, reserving power to act when present and to cancel authority given at a moment's notice.
London Ass. Corporation Manchester Fire Insce. Co. North-German Fire Insce. Co. Transatlantic Fire Insce. Co. of Hamburg Queen Insce. Co. of Liverpool China Fire Insurance Co.	Assent unconditional.
Alliance Fire Insurance Co. Hongkong Fire Insurance Co. Victoria Fire Insurance Co.	Agents assent so far as in their power.
Hanseatic Fire Insurance Co.	Agents will write to Head office.

Assistance of Police at Fires—Guided by the opinion of the Chief Engineer of the S. F. D., and the acting Superintendent of Police—the following reply bearing on the nature of assistance to be afforded by the Municipal police at fires, has been addressed to the Signatories of the letter referred to in the Minutes of Council Meeting, 27th December, last, (published in *North-China Daily News*, 21st December) :—

16th January, 1875.

Gentlemen,—Your letter of 10th December last complaining of the want of organized and efficient assistance by the Municipal Police at Fires, has been considered, and in reply I have been directed to state as follows;—

That the Police have attended every Fire that has occurred within the limits of the Settlements, and cheerfully afforded assistance wherever it has been required.

That no complaint or application for assistance from any Member of the Fire Brigade has reached the Superintendent of Police or other acting in his place, without being attended to, and there is no record of any instance when the movements or action of the Brigade have been impeded by the Public. Individual cases of obstruction or interference doubtless will occur, but they are extremely rare, and are easily dealt with.

The Council apprehend no difficulty in preventing bystanders from crowding too closely on the Brigade while at work.

An attempt to enforce such a measure as the one suggested, would probably create a vast amount of ill-feeling, and might possibly lead to complications, the result of which it is difficult to forsee

Since the introduction of Extincteurs, the Police have often succeeded in extinguishing or arresting the progress of fires, and if their duties had been confined to keeping the ground clear of the public, several fires that have occurred on Foreign property would have proved most disastrous before the Brigade could have rendered any assistance.

The action of Police at fires must be guided by circumstances, and the Council conceive that no better arrangement can be come to, than to leave the matter in the hands of the Chief Engineer of the Fire Department and the officer in charge of the Police at fires.

I am, Gentlemen,
Your obedient servant,
Edward B. Souper,
Secretary.

To Messrs. E. W. Rice.
John H. Vail.

Refuge for Destitute Native Orphans.—The following correspondence has passed with the Chinese authorities through the usual channel.

United States Consulate General.
Shanghai, 4th January, 1875.

John G. Purdon, Esq.
Chairman, Municipal Council,
Shanghai.

Sir,—I have the honor as Senior Consul to hand to you the inclosed letter received by me from the Mixed Court Magistrate, and to ask for your views thereupon for the information of my Colleagues.

(Sd.) George F. Seward,
Consul-General.

Mixed Court Magistrate to Mr. Seward,
United States Consul-General

26th day, 11th Moon. January 3rd, 1875.

Tong-Ting-Tsu, a Councillor of a benevolent Institution, and three other Councillors, have petitioned me saying. At Shanghai, both within and without the city there are many orphan children who have no means of living. Truly their situation is to be pitied. After consultation it is proposed to provide the means and procure a place where they may be provided for, and where some can devote their attention to studying books, and others to learning trades, etc. The amount available is not sufficient, and as an institution of this kind anticipates a long term of years, the necessary funds will have to be provided, little by little. In order to accomplish this desirable end, it is proposed that in all the Tea shops, within and without the city, for each cup of tea ordered, *one cash* extra shall be paid into the Treasury of this fund. In this way a sufficient fund to keep up this institution from year to year can be secured.

From their petition I infer that these parties have petitioned Your Excellency and the Municipal Council on the subject. They now wish me to issue a proclamation before they inaugurate this measure. As Your Excellency has long had the interest of the people at heart, I think you will approve this laudable measure. I do not know what the Municipal Council will think of it, therefore I have not yet issued the desired proclamation. I desire that you will consult with the Municipal Council, and use your best efforts to have them approve the measure And when you know their views in regard to the matter, favor me with an answer. This is a good thing, and if the scheme can be carried into operation so that the unprotected can be provided for, the credit will all be due to Your Excellency's good offices.

I have, etc.,

7th January, 1875.

Sir,—I have the honor to acknowledge receipt of your letter of the 4th instant, covering despatch from the Mixed Court Magistrate pointing out the need of establishing a Refuge for Orphan Children in destitute circumstances, and suggesting in order to raise a fund for the purpose, to levy a contribution of one cash on each cup of tea sold at the tea shops in the Foreign Settlements and in the City.

In reply, the Council while sympathizing with all projects having for their object charity to the poor, are of opinion that an enforced tax for that purpose is objectionable, and they further would wish to discourage all attempts on the part of the Chinese authorities to collect direct taxes from the natives residing within the limits of the Municipality, as such attempts would be sure to lead to trouble from unauthorized parties making them pretences to levy contributions.

The Council, therefore, trust that the Consuls will use their influence to prevent the scheme, as set forth in the letter of the Mixed Court Magistrate, from being carried out.

(Sd.) John G. Purdon,
Chairman.

Bayley's Hydrostatic Watering Vans.—The idea of introducing these in Shanghai has been abandoned. The Committee find that the vans cannot be built light enough to be drawn by an ordinary sized pony or mule.

Certificate of Cause of Death.—A difficulty is experienced in obtaining in every instance certificate of cause of death from a competent authority before granting permit for burial in the Municipal Cemeteries.

The Committee consider it absolutely necessary, for the protection of the community and the floating population, that such a certificate should be forthcoming, and recommend the question to the immediate attention of the Council.

Protection of Pontoons.—The regrettable instances of drowning by persons walking over pontoons into the river, have led the Committee to consider whether any means can be devised for protecting the pontoons, but they regret that at present they see none.

To put fixed railings would interfere with the shipping and landing of cargo, and if to obviate this difficulty they were made moveable, the Committee are of opinion that accidents would be more frequent than at present, owing to the danger of the chains being replaced carelessly, or possibly not put up at all after being used.

In large ports—London, Liverpool and Hull, he pontoons have no better means of protecon than those in Shanghai.

Report of Defence Committee for the Months of December and January.

Gatling Guns.—The subjoined Report has been received relative to the substitution of Gatlings for the present heavy Ordnance.

Shanghai, Nov. 16th, 1874.

The Secretary of the
Municipal Council.

Dear Sir,—In compliance with the wishes expressed in your letter dated 26th ultimo, relating to Gatling Gun Ordnance, I beg to inform you, that having formed a Committee for the purpose of inspecting and witnessing the practice of one of these guns, kindly lent from U. S. S. *Saco*, they are of opinion that this gun would greatly strengthen the Corps, but as a larger calibre would likewise be required, say for battering purpose, they proposed the purchase of 2 small steel guns as per Memo. attached, and one Gatling, carrrying the same cartridge as now used for the Rifle, so that no confusion would arise from having different ammunition. As president of the Committee I agreed with their opinion.

(Sd.) T. Brewer,
Capt. & Adjt. General,
S. V. C.

Memo of 7 lbs: Per Ordnance—
Steel-Rifled Muzzle-Loading.

	Dimensions. ft. in.	Weight. lbs. oz.	Cost. £ s. d.

Carriage with check ropes ..		110. 8	
Elevating Screw		6. 6	22. 4. —
Wheels each diameter	2. 6	39. —	
Limber with wheels.....		130. —	10. — —
Implements, say		20. —	2. 4. —
Total cost.....			67. — —

Ammunition.

Shell—common per 100	£17.14.8
,, double ,, ...	28.11.3
,, Shrapnel ,, ...	26. 4.3
Shot—case ,, ...	6.15.0

There can be only one opinion as to the desirability of the change, and the Secretary has been instructed to ascertain what prices can be obtained for the Howitzers.

Steel Guns.—The recommendation by the Committee of Officers, that two small steel guns for battering purposes should be added to the armament, the Committee do not endorse, being of opinion that they are not necessary.

The Officer commanding H.B.M. Forces in Hongkong has replied that there will be no difficulty in temporarily detailing a Non-Commissioned Officer to drill the Volunteer Corps.

12-Pounder Guns.—The Committee have accepted three 12-pounder guns kindly presented by Mr. Oliver, executor of the late Mr. J. M. Lloyd.

Report of the Public Works' Committee for December and January.

Drainpipes ordered from England in August last have been shipped by "*Sir Lancelot*" and "*Deerhound.*"

Bridges.—Yang King Pang, No. 1—Plans and Estimates have been received from various manufacturers in Europe.

Bund Line.—Yang King Pang.—Bridges.—Yang King Pang.—It has been arranged that delegates from the French Council shall meet the Committee to discuss these important matters.

Bunding.—North side Soochow Creek.—It has been proposed to the owners of property between the Free Ferry and the site of "Will's" Bridge, that in view of the great improvement to their property they should bear the difference in cost between constructing a full instead of a dwarf bunding at that part of the Creek.

Footbridge.—Keangse Road.—Mr. Thorndike having added two additional spans, in accordance with the Council's recommendation, the Committee recommend Tls. 200 being voted towards the additional expense that will be incurred in consequence.

Contracts with Chinese.—For the protection of the Municipality it has been determined to insert a clause in contracts with Chinese, that in case of dispute the English shall be taken as the true version.

Interference with Municipal Contractors by Chinese petty officials.—The following proclamation has been issued by the Chehsien :—

Proclamation by Hsien regarding interference with Municipal Contractors.

Whereas the Tipao Wang Mien-chang some time ago complained to me that one Chang-ta-yung was pulling down a wooden bridge over a creek near Sinza, and building a narrow culvert so as to obstruct the flow of the water and interfere with the agricultural operations of the people, and whereas a number of the heads of the villagers shortly after presented a petition to the same effect, I caused Chang-ta-yung to be summoned and examined, when he stated that he was not the Contractor for this work, but that one Kwo-chin-Chiang was, and gave security to produce him. I also made a personal examination of the place, and find that if a new stone bridge is to be built, the opening should not be less than five or six feet wide, so as to permit of a free flow of water sufficient for the wants of the country people

Whereas also the English Consul has written, complaining on behalf of the Municipal Council of interference with their Contractors by underlings of this Yamên, to which I am replying in this particular case, requesting him to direct Mr. Fabris to have the proposed bridge, whether of wood or stone, enlarged to not less than five or six feet in width for the convenience of the agriculturalists. It is therefore necessary to issue a Proclamation, in this matter.

Now therefore let the said Tipao and all country people take notice, that foreigners may rebuild bridges for their convenience, and provided there is room enough underneath for the flow of water, the work must be allowed to proceed without hindrance or interference on frivolous pretexts. If hereafter any, falsely calling themselves official messengers, molest or interfere with the Contractors they shall be arrested and severely punished. Let all tremble and obey.

Nov. 14th, 1874.

Translated by G. JAMIESON.

Roads. — Widening of. — The Committee have addressed the proprietors interested, with regard to surrender of portion of their lots required for the widening of the following Roads :—

Canton Road—between Keangse and Szechuen Roads—North side.

Foochow Road—between Quangse Road and Defence Creek.

Surrender of land for public uses.—The following form is submitted, and if approved will be used in future on all occasions of obtaining land for Municipal purposes :—

TO ALL TO WHOM These Presents shall come send greeting. WHEREAS——desirous of surrendering to the public use a certain portion of land now belonging to——. Now therefore——the said————————in consideration of the sum of Taels————paid to——(and the receipt whereof——do hereby acknowledge), do hereby grant and assign unto the Municipal Council for the Foreign Community of Shanghai, North of the Yang-king-pang, all that piece or parcel of land measuring——mow,——li,——fun and——haou, being a portion of Lot No.——and comprised in the Title Deed numbered——, and registered in the———Consulate at Shanghai, and which said piece is colored red in the plan hereto annexed. TO HAVE AND TO HOLD the same unto the said Municipal Council and their successors in perpetuity upon trust for such public uses as the said Municipal Council may think fit.

IN TESTIMONY WHEREOF——have hereunto subscribed ——name and affixed——seal this——day of———187—.

Signed, Sealed and Delivered in the presence of

New Road, West side, Hongkew Creek.—Messrs. Jardine, Matheson & Co. have agreed to remove the "Pacific House" for the widening of the road, receiving Tls. 750 compensation.

Chaou Foong Road.—Pond is being filled in by the Council.

Upper Yuen-Ming-Yuen Road—Gnaomen Road.—Some misapprehension appearing to exist as to the name of the thoroughfare leading from the Pekin Road to the Free Ferry, the Committee would point out that the name of the road is the Upper Yuen-Ming-Yuen Road, as shown on the plan of the Settlement made in 1864-66. The Gnaomen Road was the name anterior to that date.

Markham Road.—Widening of in front of Trefancha.—The following letter addressed to Mr. F. H. Bell closes the correspondence published in the last report on this matter, and shows the action taken by the Committee :—

8th December, 1874.

SIR,—Your letter of 21st ulto. having been laid before the Council, they instruct me to state that the surrender of the portion of your property to widen the Markham Road having been a voluntary concession on your part, they have no desire to press any claim to the ground, and you are therefore at liberty to resume possession of it, should you see fit to do so.

(Sd.) EDWARD B. SOUPER,
Secretary.

F. H. BELL, Esq.

Widening of roads.—The following proposition from Mr. E. M. Smith for the improvement of certain roads, has been agreed to.

MEMORANDA OF LAND TO BE SURRENDERED TO THE MUNICIPAL COUNCIL.

1.—That four feet shall be added to the width of the upper Quangse Road from Nanking Road to road marked A on plan attached to agreement dated 8th March, 1872.

2.—That eight feet shall be added to the width of Foochow Road from the Defence Creek Bund to the lower Quangse Road.

3.—That eight feet shall be added to the width of the lower Quangse Road from the Foochow Road to near its junction with the Hankow Road as far as my property extends.

4.—That Mr. Hogg shall receive the same number of square feet taken by the Council from his lot for the continuation of the North Chekiang Road to the Hankow Road, which area shall be added to the East half of his lot as agreed.

5.—That an equivalent area shall be given to Mr. Godfrey for the ground required to make a thirty feet road from Road A on plan referred to above to Stone Bridge road, as agreed.

6.—That the ground to be surrendered to the Council as hereinbefore set forth shall be noted on the Title Deeds at the Land-office of the British Consulate.

(Sd.) E. M. SMITH.

Slaughter House.—The subjoined letter from the Senior Consul, giving cover to H. E. the Tautai's reply to the Council's application to erect a Slaughter-house at Sinza, in the neighbourhood of the Gas Works, has been received.

UNITED STATES CONSULATE-GENERAL,
Shanghai, 8th December, 1874.

EDWARD B. SOUPER, Esq.,
Secretary Municipal Council, Shanghai.

SIR,—I inclose to you herewith a copy of a dispatch from the Tautai in regard to the slaughter-house matter.

As the conclusions taken by him are unsatisfactory, I yesterday saw the Mixed Court magistrate and arranged a basis for a further examination of the matter.

I have no doubt at all that the consent of the authorities to the proposed site can be secured, and I will see that it be done at an early moment. Meanwhile I think you may move to ascertain whether the land can be bought.

(Sd.) GEORGE F. SEWARD,
Consul-General.

Tautai to Mr. Seward, U. S. Consul-General, 25th 10th Moon.

December 3rd, 1874.

On the 17th 9th Moon, I received Y. E.'s letters informing me that the Municipal Council proposed to build a slaughter-house somewhere near the Gas Works.

I directed the Shanghai and Mixed Court Magistrates to inspect the locality and report.

They have now reported, saying that although there is vacant ground near the Gas Works, they think that the people in that vicinity having never been annoyed by the bad smells arising from a slaughter-house, will be sure to complain.

Moreover, as the North wind will bring the bad smell into the Concession, there will be danger of sickness therefrom. Without the West gate, at a place known as Pah-sen-djaw, there have for some time been slaughter-houses. Therefore it does not seem desirable to build them elsewhere. In regard to the locality near the Gas Works, if the people should not acquiesce, then the scheme would not be admissible. If the Municipal Council insist on building another slaughter-house, let them find a place somewhere near the Pah-sen-djaw. In regard to the slaughter of beeves there are two kinds, the kind used by foreigners for beef and the kind used for plowing the fields. The latter kind should not be slaughtered. We request that you will inform Mr. Seward, the Consul-General.

I accordingly send herewith their report and have to request that you will inform the Municipal Council.

Dec. 4th, 1874.

M. T. YATES, *Interpreter.*

Mr. Seward's suggestion has been acted upon, and steps have been taken to ascertain what the land at Sinza can be bought for.

Wards.—A scheme for administrating the Settlements by Wards is being prepared.

Drainage.—The Committee's attention having been called of late to the apparent bad condition of the drains, they have enquired into the matter, and on refering to the Engineer they find that the drains are examined every week and deposit where it exists removed.

Ventilators.—Opinions having been expressed in favor of fixing ventilators in some of the drains, the Committee, regarding the sewage as not of a dangerous nature, do not see the necessity of ventilators at present.

Public Garden.—A plan of an Iron Pavilion by Messrs. MacFarlane & Co., of Glasgow, has been submitted to the Committee, and it will be laid before the Ratepayers at the next Meeting to decide as to ordering the Pavilion or not. The cost is estimated at Tls. 1,000.

Hongkew Creek—Iron Bridge.—An offer has been made by a responsible firm to lower the Iron Bridge, Broadway, for Tls. 300; but the work the Committee regret to say is being delayed for reasons which will be gathered from the following correspondence which has passed between the chairman of the Consular Body and the Committee. In the meantime, the Committee are taking steps to ascertain the class and number of boats passing up and out of the creek :—

UNITED STATES CONSULATE-GENERAL,
Shanghai, 7th January, 1875.

JOHN G. PURDON, Esq.,
Chairman Municipal Council, Shanghai.

SIR,—I beg leave to inform you that a man named Wong, head Councillor of the Paoshan-hien, resident at Kung Wan, a very intelligent and well-disposed person, has been to this office and spoken about the proposed lowering of the Broadway Bridge over the Hongkew creek. He thinks that if it be lowered it will interfere with boat traffic. I promised him that I would lay the subject before the Council. It would seem desirable to carefully examine the point raised before proceeding with the work. Would it be possible to dispense with the trestle work under the bridge? This would admit of lowering the bridge three feet, without obstructing the passage of boats more than at present. It is particularly desirable to deal carefully with this question in view of the railroad operations, and the fact that the same people are affected by both matters.

(Sd.) GEORGE F. SEWARD,
Consul-General.

Shanghai, 8th January, 1875.

SIR,—I have the honor to acknowledge receipt of your letter of 7th inst., No. 7971, regarding the contemplated lowering of the bridge over the Hongkew Creek at the Broadway, and in reply beg to state that the question has been carefully considered by the Board, and finding it impossible to do away with the trestle work they have determined to lower the whole bridge.

When lowered it will be fully as high above the water as the bridges crossing the Yang-king-pang Creek, and the Board are of opinion will allow sufficient headway for all practical purposes.

(Sd.) JOHN J. PURDON,
Chairman.

GEORGE F. SEWARD, Esq.
U. S. Consul-General,
Chairman, Consular Body Shanghai.

UNITED STATES CONSULATE-GENERAL,
Shanghai, 13th January, 1875.

JOHN G. PURDON, Esq.,
Chairman, Municipal Council, Shanghai.

SIR,—I have to hand you herewith a letter from the Tautai in regard to the Hongkew Creek Bridge. I should strongly deprecate the lowering of the bridge until a satisfactory understanding has been arrived at with the authorities. I shall be glad to lay any information which you may posses before the Tautai.

(Sd.) GEORGE F. SEWARD,
Consul-General.

TAUTAI TO MR. SEWARD, U. S. CONSUL-GENERAL.

4th 12th Moon. 11th January, 1875.

The Paoshan Hien has written me stating that Wong, one of his Councillors, had informed him, that there was a rumour to the effect that the Hongkew bridge was to be lowered three feet, which, if true, would be a source of very great inconvenience to the people of Kung Wan and other large villages in his district, the trade of which, by boats, all passes under that bridge, and urging me to protest against the lowering of this bridge. I write to request Y. E. to direct that if it is necessary to repair or make any alterations in the bridge, that the same space, between the water and the bridge, be allowed, as has hitherto been available. Favor me with an answer, in order that I may be able to reply to the Paoshan Hien.

I have, &c.

January 13th, 1875.

Upper Yuen-ming-yuen Road Encroachment.—The Committee think it advisable to put on record the arrangement under which H.B.M. Government has been permitted to bring out the gate of the British Post Office on to this thoroughfare :—

H. M. OFFICE OF WORKS.

Shanghai, 11th January, 1875.

SIR,—A few days ago it was pointed out to me that the piers of a small gate forming the private entrance to the New Post Office on the Upper Yuen-ming-yuen road, projected 2½ inches beyond the line of Government property. I beg to assure you that it was quite without my knowledge that the wall was built so as to necessitate the projection. The encroachment is small, nevertheless its rectification at present would cause considerable inconvenience and trouble, and considering that I have given vastly more than the space encroached upon to the public, I would pray that you would be so good as to allow the said piers to remain as they are.

I therefore trust that my request will be allowed.

Sd. R. H. BOYCE,
Govt.-Surveyor.

To the Secretary,
Municipal Council, Shanghai.

18th January, 1875.

SIR,—I have the honour to acknowledge receipt of your letter of 11th instant, and in reply have been instructed by the Works' Committee to say that in view of the inconvenience which you represent would arise in consequence, the Committee do not call upon you at present to move back the piers of the small gate forming the entrance in the Yuen-ming-yuen Road to the British Post Office.

But in order to reserve the rights of the Public to the land on which they stand, it is understood that you will rectify the encroachment whenever called upon to do so.

(Sd.) EDWARD B. SOUPER,
Secretary.

R. H. BOYCE, Esq.,
H. B. M.'s Govt. Surveyor, Shanghai.

H. M. OFFICE OF WORKS.

No. 47. Shanghai, 19th Jan., 1875.

SIR,—I have the honour to acknowledge the receipt of your letter, (Works No. 46) of yesterday's date, informing me that under the circumstances mentioned by me in my letter of the 11th instant, the Council would not call upon me to set back the gate piers in question.

In reply, I beg to thank the Council, and to assure them that I will be ready to rectify the encroachment whenever called upon by them to do so.

(Sd.) R. H. BOYCE,
Govt.-Surveyor.

EDWARD B. SOUPER, Esq.,
Secretary, Municipal Council.

Reports from Engineer for December 1874, and January 1875, are appended.

ENGINEER'S REPORTS.

Shanghai, 8th Jan., 1875.

TO THE WORKS COMMITTEE.

GENTLEMEN—I beg to hand you my monthly report of the proceedings of this department.

Bridges.—The bridge crossing the Soochow creek at the end of the Honan road, and the foot bridge at the Keangse road, are nearly completed.

Tenders have been invited for the lowering of Hongkew Creek Iron bridge. It is proposed to make the headway under this structure the same as that under the bridge crossing the Yang-king-pang creek at the Bund.

Buildings.—A small house is being erected in the Chip Yard near the Gas works, for the protection of the Steam Stone Crusher.

Bundings.—The bunding of the west bank of the Hongkew creek, between the Iron bridge and the Whangpoo, has been completed.

The bunding of the north bank of the Soochow Creek (between the New Honan road bridge and the site of the old Wills' bridge) is still in hand.

Cemeteries, &c.—The Cemeteries and Church compound are in good order.

During the past three months the burials at the New Cemetery, as compared with former years, are as follows :—

Date.	Men.	Women.	Children under 12 years, Male.	Female.	Total for 3 months.	Total for 12 months.
Oct., Nov., Dec.,						
1870..	5	2	0	1	8	30
1871..	8	2	0	2	12	34
1872..	5	1	0	1	7	31
1873..	7	2	2	0	11	39
1874..	10	0	3	1	14	56

Drainage.—A drain has been built in the Tiendong road connecting with the sewer in the Chapoo road, and drain pipes have been laid across the Woosung road near to the Rifle Range, in place of a rotten wooden box drain.

A main drain is being laid in the Boone road Hongkew. The Honan and Keangse sewer are being extended across the foreshore Soochow Creek.

Firewells.—The Firewells have been examined and are in good order.

Landing Accommodation.—The stone jetty on the Soochow Creek, at the end of the Kiangse road, has been removed, as it occupied the site of the new foot bridge.

Public Garden.—The eastern slope bunding of the Public Garden is being strengthened. A design for a cast iron band pavilion has been received from Europe.

Roads.—The following roads have been metalled :—The Hankow road, from the Kiangse to the Honan road ; the Shantung road from the Hankow to the Kiukiang road ; the Canton road from the Szechuen to the Kiangse road ; and the new Hongkew road.

The Yu-sing-ka alleyway has been drained, raised, and paved.

A number of the native alleyways have been paved with Granite chips.

The Canton road, between the Yangtsze and Szechuen roads is being metalled.

The Fuhkien road between the Foochow and Sungkiang roads is being paved with Granite chips.

A road is being formed by mud filling between the Whangpoo and the Canton Garden, on the west side of the Hongkew Creek.

Curbs and Side-channels.—Curbs, etc., have been laid in portions of the Hankow and Canton roads, and are now being laid in the Shanse road.

Outside Roads.—The outside roads have been kept in good order. Trees are being planted to replace the dead ones, one third of the contract price for last year's trees having been retained for this purpose.

(Signed) E. H. Oliver,
Engineer.

Shanghai, 2nd Feb., 1875.

Gentlemen,—I beg to hand you report of the proceedings of this department during the past month.

Bridges.—The bridges crossing the Soochow Creek at the ends of the Honan and Keangse roads have been completed.

Buildings.—A shed has been erected for the protection of the steam stone crusher in the chip yard near to the Gas works.

Bundings.—The bunding of the north bank of the Soochow Creek is still being proceeded with.

Cemeteries, &c.—The Cemeteries and Church compound have been kept in good order.

Drainage.—The Honan and Szechuen road sewers have been extended across the foreshore of the Soochow Creek.

A main drain is being laid in the Boone road between the Seward and Miller roads, the old box drain having become rotten and useless.

Firewells.—The various firewells are in good order.

Public Garden.—The eastern slope bunding of the Public Garden has been reformed, and strengthened with granite slabs. The paths, &c., have been kept in good order.

Roads.—The Canton road from the Yangtsze to the Szechuen road, and the Hoopeh from the Nankin to the Hankow road have been metalled. The approach to the Keangse road bridge has been formed and metalled.

Granite chip pavement has been laid in the Fuhkien road between the Sungkiang and Foochow roads.

A new road has been formed by mud filling between the Iron bridge and the Whangpoo river, on the west side of the Hongkew Creek.

The Hoopeh road between the Hankow and Foochow roads, and the approaches to the Honan road bridge, at the junction of the Soochow and Honan roads, are being metalled.

The pond at the north end of the Chaoufoong road is being filled in, to enable that road to be extended to the new Seward road.

Curbs, &c.—Curbs and side-channels have been laid in the Shanse road from the Pekin to the Nankin roads and are now being laid in portions of Kiukiang, Hoopeh, Hankow and Hongkew roads.

Outside Roads.—The outside roads are in good order. 354 trees have been planted to replace the dead ones.

(Signed) E. H. Oliver,
Engineer.

ADMINISTRATION MUNICIPALE DE LA CONCESSION FRANCAISE.

Résumé des délibérations du Conseil.

Séance du 12 Janvier, 1875, sous la présidence de M. A. Voisin. Conseillers présents : M.M. A. Hennequin, L. Ewald, F. D. Hitch, W. Lang, H. Maignan, E. Millot. H. Sayn, Secrétaire.

Communication d'une lettre de M. le Consul-Général de France par laquelle il répond favorablement aux objections présentées par le Conseil relativement à la nomination du sieur Joachim Gégo comme agent de la Garde Municipale, et annonce la révocation de cet homme pour cause de santé.

Dépot devant le Conseil du Compte-rendu imprimé sur l'affaire des rues de Ningpo et de Saigon. Le Conseil décide que ce Compte rendu, destiné à expliquer aux Electeurs la disparition d'une partie de la propriété commune confiée à sa gestion et à les mettre au courant des efforts faits pour en obtenir la restitution, leur sera remis à la fin du présent exercice.

Le Conseil décide de faire appel, avant l'expiration de son mandat, à la Légation de France et de lui demander son appui pour la revendication des droits de propriété de la communauté sur les rues de Ningpo et de Saigon.

Examen d'un plan de pont en fer pour remplacer le pont No. 1, soumis par le Municipal Council. Le Conseil indépendamment de la largeur de 40 pieds (y compris les trottoirs) qui ne parait pas suffisante pour les besoins du traffic, n'approuve pas la hauteur donnée au tablier, le poids total du pont, et enfin le système de pont avec solives de suspension placées audessus du tablier.

Le Secrétaire est chargé de transmettre au Municipal Council, le plan d'un pont que le Counseil trouve préférable sous tous les rapports, en le priant de bien vouloir prendre des renseignements en Angleterre tant sur la possibilité d'éxécution que sur la dépense qu' entrainerait la construction d'un pont d'aprés ce plan.

L'entreprise des charrois de l' Administration est donnée á M. Charrier, à raison de $19 per mois et par téte de cheval. Dans ces conditions M. Charrier devra fournir à ses risques et périls á l'Administration le travail journalier de 14 chevaux et 14 mafous. Le Secrètaire est chargé de passer un contrat avec M. Charrier et de lui céder les 14 chevaux de l'Administration, dont 7 ont besoin d'etre réformés, au prix moyen de Taëls 15 chaque.

Le Garde Thomasi est nommé aux fonctions d'Inspecteur du service de salubrité. Dans les attributions de cet Inspecteur sera aussi comprise la surveillance du cimetiére.

Examen d'une plainte contre le gardien du cimetiére. Le Secrétaire est chargé d'informer le plaignant que des mesures sont prises pour prévenir le retour de toute plainte contre la conduite de ce gardien.

La question de remplacement des poteaux télégraphiques en bois par des poteaux en fer, est renvoyée à l'examen du Comité des Travaux.

Approbation de l'état financier de la Caisse des Retraites au 31 Decembre 1874, dont le solde créditeur, à cette date, s'éléve à Tls. 3,557.42.

Le Secrétaire est chargé de réclamer le concours de la police placée sous les ordres du Municipal Council, pour prévenir le stationnement des mendiants sur les ponts du Yang-king-pang.

Examen des rapports des chefs de service.

Examen du rapport de l'Inspecteur des marchés.

Séance du 19 Janvier 1875, sous la présidence de M. A. Voisin. Conseillers présents, M.M. W. Lang, E. Millot, H. Sayn, Secrétaire.

Adjudication des travaux de reconstruction des murs d'entourage de l'Hotel Municipal à l'entrepreneur Wong Soun-quié, et de confection de grille et portes en fer á l'entrepreneur Euchang.

Adjudication des travaux de construction de drains dans les rues Touranne, de l'Administration et du Consulat, á l'entrepreneur Lin-fo-qui.

Le Conseil tient à la disposition de l'expéditeur, un envoi de verres pour lanternes à gaz qui ne sont pas conformes aux dimensions prescrites.

Décision prescrivant la reconstruction de la muraille du quai du Yang-king-pang, et l'établissement d'un garde-fou en fer et de trottoirs dans la mème partie de ce quai.

Recommandation de pratiquer une ouverture d'une trappe dans la toiture du poste de l'Est pour faciliter le travail des pompiers en cas d'incendie.

Communication d'une lettre de M. le Ministre de Belgique en Chine, par laquelle il informe le Conseil qu'il s'empressera d'appuyer prés le Ministre des affaires Etrangères à Bruxelles les démarches dejà faites pour amener la rentreé aux archives des documents déposés au Consulat de Belgique lors de la poursuite exercée contre le sieur Godaert.

Communication d'une lettre de M. le Consul Général de France informant le Conseil que le nommé Louis Gego a été nommé agent dans la Garde Municipale en remplacement du nommé Joachim Gégo congédié pour cause de santé.

Le Secrétaire est chargé de transmettre au Capitaine du Port copie de la lettre par laquelle le Chief Engineer exprime son opinion sur le code de signaux d'alarme en cas d'incendie en rade, et de l'informer que le Conseil est disposé à approuver les signaux qui seront adoptés par le Fire Department et la Direction du port.

Accordé une gratification de 2 mois de solde au Sergent Caré, obligé de quitter son service pour cause de santé après 5 années de bons services.

Le Secrétaire est chargé d'effectuer le paiement des 100 Taëls mis à la disposition de l'Hopital Chinois, pour l'année 1874-75.

Examen des rapports des Chefs de service.

Law Reports.

H. B. M. SUPREME COURT.

Shanghai, Feb. 2nd.

Before Sir Edmund Hornby, *Chief Judge.*

Reg. *v.* Saliman Morbrook.

Wounding with a Knife.

The prisoner, an Arab, or native of Muscat, was indicted on three counts,—1st, for wounding with a knife, on the 2nd November, 1874, causing grievous bodily harm ; 2nd, for an assault, causing actual bodily harm ; and 3rd, for a common assault.

The prosecutor was a Chinaman, named Hsü Zin-sheng. The case was fixed for trial on the 15th January, but was then obliged to be postponed for want of an interpreter of the Hindostanee language.

Mr. Brougham Miller, who appeared to defend the prisoner, said before the Jury were called he would like to make a statement, which the Court would act upon as it thought fit. Since the prisoner was brought here on the last occasion, he had been taken out of the custody of the Sheriff— out of gaol—and privately cross-examined by an interpreter at Pootung. It was at the same time perfectly well-known that he was represented by Counsel, and he (Mr. Miller) would like to know after that, whether his Lordship would think of trying the case at all ?

His Lordship—What cross-examination was he subjected to ?

Mr. Acting-Superintendent Stripling replied that he not aware there had been any

cross-examination of the prisoner. Nothing of the kind had been communicated to him. The prisoner was taken from gaol under an order, and then to Pootung to see whether a man employed there could understand his language, so as to be able to act as interpreter in Court on the trial. The sergeant who took the prisoner over to Pootung told him (Mr. Stripling) that he was simply asked a question or two with that view.

Mr. MILLER said it was a singular thing that the interpreter was not taken to the prisoner in gaol.

His LORDSHIP suggested that the man could not be made to leave his work at Pootung to go to the gaol.

Mr. MILLER still thought it was something strange that a prisoner in gaol should be taken out of the custody of the Sheriff, and cross-examined by an interpreter. That might be strong language, but it seemed to him to have been the case.

His LORDSHIP said it was strong language. It had been stated that the man was taken to answer a few simple questions, to ascertain the interpreter's knowledge of his language.

Mr. MILLER—And I say he was cross-examined.

Mr. STRIPLING—Prove it,—I repeat he was not cross-examined.

Mr. MILLER—Your books will prove it—they will show where the sergeant was, on that day. It is a strange proceeding to take a man out of the custody of the Sheriff, and afterwards try him.

His LORDSHIP—Call the Jury.

The Interpreter, a man of colour, from the Pootung signal-station, as was understood, was first sworn; Heding, the Consular interpreter, acting for the prosecutor and witnesses, who were all Chinese.

The following were then sworn of the Jury:—Messrs. F. Fabris, F. Gillman, J. McGregor, J. Sharp, and W. H. Short.

The prisoner, on being arraigned pleaded not guilty.

Prosecutor, examined by Mr. Stripling, deposed—I am a carpenter, and live in Hongkew. I remember the evening of the 22nd of November last, I was coming down from Shanghai in a wheelbarrow, and had got to the Garden bridge. I was in the act of paying the wheelbarrowman. It was on the north side of the bridge. While in the act of paying the wheelbarrowman, the prisoner stabbed me between the shoulders. I was in the act of turning round, and saw two coloured men, one was tall and the other short. The prisoner was the short man.

By his LORDSHIP—There was no quarrel going on between me and the prisoner. I do not know if there was between any other persons.

Examination resumed—After I was stabbed, I was placed on a wheelbarrow, and taken to the Police station. I had cried out for help, and the prisoner ran away towards the bridge. I was afterwards taken to the hospital, where I remained thirty-five days. The wound bled a good deal. (Two of three coats worn by the prosecutor on the occasion were produced, the third was said to have been left in hospital.) When I was stabbed, I fell down, and only saw the prisoner for an instant. The tall man was about fifteen feet distant at the time, and there was nobody else near except the wheelbarrowman. The wound is healed, but when the weather changes I feel pain, and also when I am at heavy work.

Cross-examined by Mr. MILLER—It was on a Sunday, and dark in the evening. I did not see two other darker men than the prisoner pass by. The prisoner was just behind me on the right hand side. He made the cut, standing on my right hand side. I only saw the two men I have named. No doctor came to me at the police station.

Mr. MILLER pointed out that, in the prosecutor's deposition before the Magistrate, he swore that a doctor did come, and questioned him upon it.

Cross-examination resumed—I did not say that a doctor came to the police station. I was taken immediately to the hospital.

His LORDSHIP—It does not say so here. It merely says, "I was put in a jinricksha and taken to the station. A doctor came. I was taken to the hospital."

Cross examination resumed—When I was stabbed, I fell down and did not know anything for the pain. I remember what took place at the station. I did not hear the prisoner and the other man making a noise. They were standing upright. I saw a flash as I was stabbed. It was like a knife—I received a blow, fell down, and saw the flash. It was a knife, but I cannot say if it was long or short. It reached the bone, and caused great pain. I do not remember a policeman coming up at the time. When I fell down, I put my hand on the wound, and some one came up, said I was wounded, and called for the police. I did not carry on a conversation with a native policeman.

A Sampanman next deposed—On the night previous to the 22nd November, I was engaged by two men. The prisoner was one of them. They did not pay me. I saw them next day in Hongkew, and asked for payment. They did not then pay me. I insisted on their paying, and the prisoner drew out a knife, stabbed another man and then ran away.

By His LORDSHIP—When I saw the prisoner with the knife, I ran away. It was at the foot of the bridge.

Examination resumed—When I first met the men it was in Bamboo Town. I followed behind them to the bridge. I was still asking for payment. Prisoner drew the knife, came towards me, and I ran away. A man was getting off a wheelbarow and was paying the coolie, and the prisoner stabbed him. I was then standing by, and saw the man struck and fall down. It was moonlight and about half past seven. I saw a knife in the prisoner's hand. I pursued the prisoner, and a native policeman also joined in the pursuit.

By his LORDSHIP— The two men were men of colour, and were a little intoxicated.

Examination resumed—When I saw the prosecutor fall down, I saw blood on his back. The prisoner was the shortest man of the two—the other man was a little distance off, and when the cry was raised, he also ran away.

Cross-examined—The prisoner and the other man had a bottle of wine with them. It might have been water, I live in Hongkew, and had fastened my sampan to the jetty. On the night before, I took the prisoner and the other man to the P. & O. steamer. I am not regularly employed for those ships. When I asked them for payment, they beat me, and pushed me overboard. I fell in the water, and was picked up by another sampan, which had also taken off some seamen. They beat me with their fists. On that night, there was no one on board to whom I could complain about it. I was landed at the jetty. Next day I saw the men in Bamboo Town. The knife used was a claspknife. Prisoner took it out from under his clothes. It was a small clasp-knife, (pointing to about five or six inches in length.) The blow was intended for me. I saw the prisoner coming with the knife, and drew back. I was 20 feet off, when I saw the other man struck. There was only one blow. I did not see two other dark men on the night the prosecutor was stabbed. On the night before, there were two other dark men with them.

A Chinese assistant in the hospital at Hongkew was next called. He dressed the wound, which he described as on the upper part of the back, between the shoulder blades. It was about half an inch deep, and was bleeding. If the wound had been half an inch deeper, it would have penetrated the lungs. The man remained in the hospital a little over five weeks.

Cross-examined—It was inflicted either with a knife or glass. If it was done with a knife, it must have been a blunt one, as it was not a clean cut. The wound bled a great deal. From the appearance of the edges of the wound, I believe it was a blunt instrument. It did not touch the bone.

The Native Constable who took the prisoner to the police station, was questioned by Mr. Miller, and said he searched the prisoner. He was given into custody on a charge of stabbing. The sampan man made the charge. Did not see if the prisoner's hand was stained with blood, nor whether there were any blood marks on prisoner's clothing. Do not know if the prisoner was examined for those things. He arrested two men who were pointed out by the sampan man. Saw nothing of the knife.

This closed the case for the prosecution, and

Mr. MILLER briefly addressed the Jury on behalf of the prisoner. He said the line of defence he should adopt, was that the prisoner knew nothing at all about the matter. It had never been clearly traced that there was a knife in his possession, neither was there any evidence tendered that he had ever been in the habit of carrying a knife. He was a fireman and not a seaman. There was no doubt the prosecutor was stabbed, but there was no proof that the prisoner carried a knife. He was a man not likely to carry a knife, being a fireman employed down in the stoke-hole of a ship. He (Mr. Miller) did not think he could say much more than the jury had already heard. The prisoner was found close to the scene of action, he was arrested not far away, and the sampan man said he saw the blow struck. All the witnesses, it must remembered were unsworn—and that was in their favour. If the Jury or himself were in the witness box, they would have to be sworn, but Chinese witnesses had the advantage of not being sworn. He did not think the evidence had brought the case home to the prisoner, and would remind the Court that the prisoner had been a long time in gaol already, which he hoped would be borne in mind.

His LORDSHIP—Do you want the evidence interpreted to the prisoner?

Mr. MILLER—No, I do not.

His LORDSHIP then summed up the case to the jury very shortly, giving an outline of the principal facts as he proceeded. The prisoner owed the sampan man some money. The sampan man met him, and then followed him, importuning him for payment. The prisoner did not like this, and resented it by drawing his knife, with which he made a blow at the sampan man. He avoided it, and the blow came down upon a third party who happened to be within its range, and was just getting off a barrow at the time. His Lordship had no reason to suppose anybody was telling a story in the matter, it was just such a wound that would be given in that way. The sampan man saw the knife and drew back, the other man receiving the blow instead. The question was, did the prisoner do it? He was met by the sampan man, who asked him for the money, and then the blow was struck. That was very strong evidence that he was there. It was true the knife was not found, but the prisoner ran away; and if he had not done something there would have been no need for him to run away. In a very short time he was captured. The sum of it was that the sampan man asked him for money, he drew out his knife to frighten him, and wounded another man. There was no other theory of the prisoner's innocence. It was very likely the prisoner was a little drunk, and did not like to be importuned for money. That was what the evidence indicated, unless the prisoner was able to explain it in some other way, which had not been done. He simply denied it, and said he knew nothing about it. If the Jury were of opinion that the prisoner was the man who struck the Chinaman, and inflicted the wound, they must find him guilty; and if they thought he was not the man who struck the Chinaman, they would find him not guilty.

The Jury, after some minutes' deliberation, asked whether the prisoner was running away when he was arrested?

His LORDSHIP—The sampan man says so.

The Jury almost immediately returned a verdict of "guilty."

His LORDSHIP—You could come to no other verdict.

The Interpreter, by direction of the Court, asked the prisoner if he had anything to say why he should not receive sentence?

The prisoner said he was not guilty, and knew nothing of it.

His LORDSHIP, taking into consideration the fact that the prisoner had already been in prison for ten weeks, sentenced him to a further imprisonment of six weeks only.

His LORDSHIP directed that $10 should be given to the prosecutor, as some compensation for his injury and consequent loss of work for more than five weeks.

The Court then rose.

February 10th.

Motion.

In the matter of a suit heard in H.B.M.'s Consulate at Foochow, before a Mixed Court, composed of H.M.'s Consul, CHARLES A. SINCLAIR, Esq., *in conjunction with* PAN TAUTAI.

Mr. WAINEWRIGHT to move.

The suit arose in consequence of a collision at sea between the steamship *Kwangtung* and the Chinese junk *Kui-tsai-fah*, whereby

the junk and her cargo were lost, the crew being saved by the steamer. The captain and owner of the junk, Kwo-fuh-tih, sued the captain of the steamer, George D. Pitman, as agent for the owners, Messrs. Douglas Lapraik and others, to recover the value of his vessel and cargo, and obtained a judgment.

Mr. Wainewright said he had to move, in the terms of the motion paper which he had filed, on behalf of Mr. John S. Lapraik and others, the owners of the steamer *Kwang-tung*, that this Court would make an order declaring the judgment of the above-mentioned Mixed Court, and the order made thereon, dated the 1st day of December, 1874, to be null and void, and either directing H.B.M.'s Consul at Foochow to rehear the said suit, sitting with Assessors, as a Provincial Court, in accordance with the provisions of the China and Japan Order in Council (1865), or directing that the said suit be removed for hearing into this Court. With regard to the title of the cause, he had of course nothing to do. The suit was stated by the Consul to have been heard in a Mixed Court, and it would be part of his (Mr. Wainewright's) case to show that that was a misnomer in point of fact. The Consul could not create a Mixed Court in a case of this kind, and whatever he might choose to call the Court, he was sitting in a Provincial Court, although not in accordance with the Order in Council. The facts were that the collision between the junk and the steamer occurred on the 26th July, 1874, and on the 1st of August a petition was submitted by the master and owner of the junk. Captain Pitman went down to Hongkong, and there put in a general protest against being made a defendant in the case, on the grounds, amongst others, that the owners were not within the jurisdiction of the Court, and that the suit could not be heard without Assessors. That formal protest was handed to the Consul.

His Lordship—The whole of the protest was directed against his action as a Provincial Court. There was no question, then, as to its being tried in a Mixed Court?

Mr. Wainewright—The 5th and 6th grounds of the protest are against its being heard before a Mixed Court. The 5th says, "That there is no provision under the Order in Council for Chinese acting in Provincial Consular Courts as Assessors;" and the 6th, "That the case cannot be heard without Assessors, and that the Court would not be properly constituted with less than two Assessors, if *then*." The protest produced no result, and the Consul delivered a formal decision upon it, holding that the captain was bound to come in.

His Lordship—Did he give a decision on the protest?

Mr. Wainewright—Yes.

His Lordship—How did he manage that?

Mr. Wainewright—In this way, that in his opinion, the captain had failed to show sufficient cause why he should not accept service of the petition of Kwo-fŭh-tih, as agent for the owners of the steamer; and that by Article No. 17 of the Treaty of Tientsin, between Great Britain and China, H.M. Consul has the power to request the assistance of the Chinese authorities, and to hold a Court in conjunction with them, for the purpose of enquiring into, and adjudicating on matters of dispute which may arise between Chinese and British subjects. His Lordship would of course see that the Consul, for the purposes of the suit, constituted an agent for the owners. The captain of a ship was beyond doubt agent for his owners for a great number of purposes, but not for defending a civil suit. It was more than doubtful that people at a distance could be sued through an agent in an ordinary civil suit, and the proper course for the plaintiff would have been to go to Hongkong and sue the owners there.

His Lordship—But in case of a ship getting into debt, the owner is supposed to reside wherever the ship is.

Mr. Wainewright—This was not a case of debt,—it was an action of tort.

His Lordship—It was to recover damages for collision.

Mr. Wainewright—It was an action of tort, and to drag the captain in as agent for the owners was irregular. The action was brought against the captain as agent for Messrs. Lapraik & Co., and it seemed to him that the plaintiff had no more right to select the captain as agent, than he would have had to select him (Mr. Wainewright) as being their legal adviser. But he thought it was too late now to raise such a point as that, and from the suit having gone the length it had, he could not rely upon it. He was now simply going to rely upon the Order in Council, and the regulations for the action of for Consuls in China under that Order. A decision was given that the plaintiff's petition should be delivered to the captain; the Court was composed of the Tautai and the Consul, the captain of a ship also sitting with them, but in what capacity he (Mr. Wainewright) did not know,—whether as an assessor or as *amicus curiæ* was uncertain; a judgment was delivered on the 20th November, finding the steamer to blame, and awarding $1,871 as damages; an order was made on the 1st December for payment of the money, signed by the Consul alone, and the money was paid by the captain, under protest, on the 4th of December. The Consul was enabled by the Customs' authorities to put the screw on and get the money out of the captain, and there the matter remained until this motion was made. It was not for him to trouble the Court with any remark upon the Acts of Parliament upon which the Order in Council was based, and it was only to certain sections of the Order itself that he wished to call the attention of the Court. Section 4 of the Order provided that "All her Majesty's jurisdiction exerciseable in China or in Japan for the judicial hearing and determination of matters in difference between British subjects, or between foreigners and British subjects,—or for the administration or control of the property or persons of British subjects,—or for the repression or punishment of crimes or offences committed by British subjects,—or for the maintenance of order among British subjects, shall be exercised under and according to the provisions of this Order, and not otherwise." Next came Section 5, which read, "Subject to the other provisions of this Order, the civil and criminal jurisdiction aforesaid shall as far as circumstances admit, be exercised upon the principles of and in conformity with the Common Law, the Rules of Equity, the Statute Law, and other Law for the time being in force in and for England and with the powers vested in and according to the course of procedure and practice observed by and before Courts of Justice and Justices of the Peace in England, according to their respective jurisdictions and authorities." The next he would call attention to was Section 7, which constituted the Supreme Court of China and Japan; and Section 9, under which the Judge was appointed. It was necessary also for him to direct attention to Section 25, which provided for the holding of Provincial Courts, "Each of Her Majesty's Consuls-General, Consuls, and Vice-Consuls (holding a commission as such from Her Majesty) resident in China or in Japan (with the exception of Her Majesty's Consuls at Shanghai, and with other exceptions as one of Her Majesty's Principal Secretaries of State at any time thinks fit to make), * * * * —shall for and in his own Consular district, hold and form a Court styled Her Britannic Majesty's Court at [*Canton, or as the case may be*],—hereafter in this Order called a Provincial Court. * * * *" The Consul, his Lordship would observe, was to form and hold a Court in his own district; and bearing upon the holding of Provincial Courts, he would next read Section 36, which ran, "All her Majesty's jurisdiction, civil and criminal, exerciseable in China, beyond the district of the Consulate of Shanghai and not under this Order vested exclusively in the Supreme Court,—And all Her Majesty's jurisdiction, civil and criminal, exerciseable in Japan and not under this Order vested exclusively in the Supreme Court,—shall, to the extent and in the manner provided by this Order, be vested in the Provincial Courts, each for and within its own district." Next came Section 117, as follows, "Where a foreigner desires to institute or take any suit or proceeding of a civil nature against a British subject, the Supreme or other Court, according to its jurisdiction, may entertain the same, and where any such suit or proceeding is entertained shall hear and determine it according to the provisions of this Order, and of the Rules made under it applicable in the case." By Section 3, the provisions of the Order in Council relating to foreigners, were made to apply to subjects of the Emperor of China and of the Taicoon of Japan respectively, and subjects or citizens of any state other than China or Japan (not being enemies of her Majesty.) Therefore, under the term "foreigners" were to be included natives of China. He would next refer to Section 63, relating to trial by Assessors, "Where a suit instituted in a Provincial Court relates to money, goods, or other property of a less amount or value than 1,500 dollars,—or does not relate to or involve, directly or indirectly, a question respecting any matter at issue of the amount or value of 1,500 dollars or upwards,—or is brought for recovery of damages of a less amount than 1,500 dollars,—the Court may hear and determine the case without Asessors. In all other cases the Court (subject to the provisions of this Order respecting inability to obtain an Assessor) shall hear and determine the case with Assessors." Section 33 provided who those Assessors were to be, their number, qualification and functions. The Section goes on to provide for cases where the Court is able to obtain the presence of one Assessor only, or where it is unable to obtain an Assessor at all, and directs that in every such case, the Court shall record in the minutes of proceedings, its reasons for sitting with one Assessor only, or without an Assessor. With regard to those sections, he was unable to find anything that either contradicted or qualified them. Therefore, the Consul, by hearing the cause in the way he had, without the assistance of a proper number of British Assessors, and sitting judicially with Chinese Authorities on the spot, was clearly violating the Order in Council. His proceedings were bad in point of law from beginning to end. The Consul had referred to Article 17 of the Treaty of Tientsin, the part to which he referred being, "If a Chinese have reason to complain of a British subject, the Consul shall listen to his complaint, and endeavour to settle it in a friendly manner. If disputes take place of such a nature that the Consul cannot arrange them amicably, then he shall request the assistance of the Chinese Authorities that they may together examine into the merits of the case, and decide it equitably." Now, what he (Mr. Wainewright) had to argue, was, that this Article of the Treaty of Tientsin had been interpreted hitherto, so far as he could find out, in a particular way. In cases where Chinese had complaints against foreigners, action had been taken as though they were British subjects, the Court sitting in the ordinary way. That had been the course of procedure for years past. Now, an attempt had been made to change that course of procedure. That what he had stated had been the interpretation put upon the 17th Article of the Treaty of Tientsin, he thought he might quote his Lordship's own opinion to show, as published some years ago in a manual for the guidance of Consuls. He (Mr. Wainewright) did not find anything from beginning to end in that book—there was no hint given—that Consuls were to exercise jurisdiction in any other way but that provided for by the Order in Council and the Rules.

His Lordship—I think you will find nothing in it with regard to Naval Courts.

Mr. Wainewright replied that what he had to argue with reference to the Treaty of Tientsin, was that the Order in Council took away from Consuls in China and Japan every particle of power they had had in judicial matters, and re-conferred it subject to certain regulations. The Order in Council might be bad, but the Judge of the Supreme Court and the Consuls at the outports were simply creatures of the Order, and it was impossible for them to go behind the order and say it was bad or *ultra vires*. It did not lie upon either of those officials, working under the instruction of Parliament and that Order, to say "you have done something in giving us this Order, that we, taking into consideration a certain Treaty that existed before the Order was made, think is inconsistent." If such a question was to be raised, it ought to be raised diplomatically, not by an official who was sitting and acting under the very power he was criticising. The Consul, he submitted, had no choice whatever to deal with this case, except in the mode provided by the Order in Council. The Sections he had referred to, he thought, clearly showed what a Consul's duty was. His powers were those expressed by provisions of the Order in Council. The Queen created a Supreme Court for China and Japan,

and appointed a Judge for that Court. She then provided Consular Courts, which should administer justice in accordance with the provisions of the Order in Council. A Consul was by that Order bound to hear a case with two Assessors, who should be British subjects, the term "foreigner" to include natives of China. It seemed clear that the Consul, in determining this suit in the way he had, was doing something he had no right to do—he was setting himself up as Judge, where he had no power to do so. He (Mr. Wainewright) therefore contended that his action was bad from beginning to end, and that the whole proceedings were null and void. A Court of the kind which the Consul had attempted to set up had really no power to enforce its own decisions, and as showing the difficulty under which it worked, it seemed that all the decisions were made by the Consul himself, and that the Tautai did not sign a single document. If that Court was illegal, as he contended it was, it could not enforce its own decisions, and would be soon found to be impracticable, because it could not enforce them. That was the ground upon which he rested his argument—upon the construction of the Order in Council. With regard to the power of this Court to review the proceedings, it could not be doubted. It might be argued that there was no appeal from a Court unknown to the law; but he submitted that the Consul could not create such a Court, whatever name he might call it by. All his power was derived from the Order in Council, and he could not create for himself a Mixed Court. He (Mr. Wainewright) therefore contended that the judgment he had given was a judgment of a Provincial Court, if it was a judgment at all. It came within the province of this Court to make an order upon it, namely that her Majesty's jurisdiction should be exercised by the Consuls under the provisions of the Order in Council, and subject to that Order. With reference to the case in point, he asked that the Court would direct the suit to be brought before it, or that it should be reheard by the Consul, or to grant a rule calling upon the other side to show cause why such an order should not be made.

His LORDSHIP.—The other side being Chinese.

Mr. WAINEWRIGHT—The other side being Chinese. That is a difficulty, but it has nothing to do with us.

His LORDSHIP—Before you sit down, I should like to know how you distinguish this from the case of a Naval Court? You say that a Consul has no right to exercise any authority whatever, except under the Order in Council. If this Order in Council has taken away all other jurisdiction, it follows that a Consul cannot form a Naval Court.

Mr. WAINEWRIGHT—I apprehend they act as Naval Courts under some special order.

His LORDSHIP—No; they act under the Merchant Shipping Act.

Mr. WAINEWRIGHT—My acquaintance with Naval Courts is too slight to enable me to deal with the question at the present moment. I am not prepared to defend the action of Consuls with regard to Naval Courts. It seems to me that this case comes within the Order in Council, and that it has nothing to do with Naval Courts.

His LORDSHIP—I should like to ask your opinion upon another point, with reference to the Order in Council as it stands with the Article in the Treaty of Tientsin. No act of domestic legislation can overrule a clause in a Treaty, which is an act between nations.

Mr. WAINEWRIGHT—I submit that the officials who were created by the Order in Council, cannot go behind the Order and say the Order ought not to have been made. The Consul seems to have expressed his private judgment on the terms of the Treaty, and thereupon formed a Court. I submit that was not a proper form on which he should have gone. He had no right to take that Article of the Treaty, and act upon it without respect to the Queen and Privy Council—without respect to the very Order under which he exists;—to say "I will make an Order in Council myself, more in accordance with the provisions of the Treaty." I repeat that Consuls are bound to go by the Order in Council without regard to their own private opinion.

His LORDSHIP—I must refuse this rule. I do not entertain, and never have entertained, the slightest doubt on the subject of the right of Chinese litigants to invoke the 17th clause of the Treaty of Tientsin, and insist on any matters of difference between them and British subjects being decided in accordance with such clause. It is true that Chinese are often—for reasons best known to themselves—willing to abide by the decision of this Court. They come into it voluntarily, but I have often seen them and explained to them that they can go and lay their case before the Consul, who will call on the Tautai to decide it under the Treaty. As I have said, they have often refused, and expressed themselves contented to abide by the decision of this Court; and when, as has generally been the case, they have done so, I have then put them on the footing of other Foreigners under the 3rd Sect. of the Order. But I look on this section as permissive only. If Chinese choose to come into this Court, they may avail themselves of all the advantages of other Foreigners, or by submitting to its jurisdiction rise to the privileges of British subjects. But there I stop. I do not in any way consider that that clause puts them in the same position as Foreigners whether they will or not, simply because the Queen has no power and no authority to put them in that position. It is the Treaty which she has made with China that regulates their position, and in cases of differences arising between them and British subjects it is to the Treaty that they and Consuls must look, and by no act of domestic law can Her Majesty alter or modify an act of public law, which a Treaty undoubtedly is as between the parties to it. She has by the Treaty in question agreed with the Sovereign of China that all questions or matters in difference shall be settled by the Consul and the Chinese authorities. The Treaty has in fact, created a Court or tribunal (although neither appellation is used), by which such differences are to be settled; and if, as is contended by Mr. Wainewright, Her Majesty has by her Order in Council changed this, the Emperor of China being no party to such change, she has exceeded her power—the clause in the Order in Council is *ultra vires* and is simply nugatory. But I do not think Her Majesty has done this. I think the Order in Council does not contemplate any change in the Treaty stipulations. You say that Chinese are to be considered as Foreigners, but that only means, that when they come voluntarily into an English Court the provisions of the Order in Council applicable to Foreigners are to be made applicable to them. In the present case, I think the Consul at Foochow has complied with the Treaty, and therefore his action is right. A Chinaman had a complaint against a British subject; the Consul failed in settling it, and invoked the assistance of the local authorities. That assistance was rendered, and after an examination was made into the merits of the case by the Consul and the Tautai, a decision was come to against the British subject. I hope that decision was an equitable one. I have no reason to doubt it. I cannot review that decision, it was not given under the Order in Council, but under the Treaty, and from the clause in the Treaty there is no appeal to this or any other Court. I conceive I am bound to give an interpretation to the Order in Council which will not conflict with or render nugatory the provisions, quoad the Chinese, of the more authoritative document—namely, the Treaty. To do so would be to deny justice to the Chinese. If I was to look at the defendant's protest, or attach any weight to it, the result would be to send the Chinaman whose junk had been run down, as he reports, in the China Seas, to a British Colony—to a place, the law of which he is ignorant of, and of the language of which he is also ignorant. The accident took place on the coast of China, and he is entitled to go before the British Consul, file his claim, and finally insist upon an adjudication of it under the terms of Treaty. The Consul, it appears to me, is bound to give effect to the Treaty—bound to carry out, so far as he can, its provisions, and in this case he appears to have done so—and having done so, there is no ground or pretence for my interference. The rule must be refused.

CIVIL SUMMARY COURT.

Shanghai, Feb. 9th.

Before R. A. MOWAT, Esq.

J. F. PEARSON *v.* R. JOHNSON.

The plaintiff, an American-Chinese, speaking English with great purity, and claiming to be a British subject, sued the defendant to obtain possession of a receipt for $50, for which he alleged he had received no value from the defendant.

Plaintiff, sworn, stated—About two years ago, I was living at Ganking with my mother. Defendant came to the house, and I asked him for the loan of $50. He said he would lend the money. Two or three days afterwards, on the occasion of my mother going away from Ganking, I wrote to defendant, asking him to let her have the $50, at the steamer's landing place. My mother sent me word that he had only given her $25. I at once sent a letter to defendant, asking him to return the receipt for $50, which I had previously given him. I gave him the receipt when I first asked him for the money. He never answered my letter, and, as far as I know, he still has the receipt.

By defendant.—I never received the $50 from you. I did not send the receipt by an old man. I gave it you myself in my own house, when I first asked you for the money. You did not bring $50 to my house, and give half to me and half to my mother. You did not come to my house five or six days afterwards, and abuse me for not giving you a receipt.

Defendant was then sworn, and deposed—I was first engineer of a steamer, and became acquainted with the defendant over two years ago, when the steamer was lying at Ganking. He came on board while our mandarin was away. He had known the captain before. He stated to me that he was sent from Shanghai to join the ship as mandarin. He stopped on board two or three days. He borrowed money of me on several occasions, but I cannot recover those sums because I hold no acknowledgment from him. Plaintiff and his mother were about to set up an opium hong, but were short of money, and I lent them some at different times, without acknowledgment, "because I suppose I was rather soft at the time." The $50 for which I hold the receipt were had from me.

Plaintiff repeated that the only money advanced was $25, for which the defendant also held a receipt. He had not paid the defendant the $25, because he would not give up the receipt for the $50.

Defendant handed a packet of papers to the Court, including the receipts for $50 and $25, and also notes which showed that the plaintiff had borrowed money of him. Defendant further stated that the plaintiff had obtained a case of revolvers from him on pretence of showing them to the Futai, but had never returned or paid for them; and that altogether plaintiff had got from him about $135. An action between the parties, with respect to these matters, is pending in another Court, but has nothing to do with the present case.

His HONOUR said there was a direct conflict of evidence, and as there was nothing to show that the plaintiff's evidence was more reliable than the defendant's, he could not succeed.

POLICE COURT.

Shanghai, February 3rd.

Before R. A. MOWAT, Esq.

Reg. (master of str. *Appin*) *v.* JOHN DIXON.

Defendant is second engineer of the *Appin*, and was summoned for being absent without leave. It appeared that he obtained permission from the chief officer to go ashore on the evening of the 28th, and did not return till the evening of the 29th., whereas he should have returned at latest on the morning of that day.

Defendant said he understood he had got permission for a day's leave.

Ordered to pay the cost of summons.

February 4th.

Reg. v. DYAN.

The nature of this case was not mentioned.

Mr. MYBURGH, who appeared for the defence, asked for a postponement, on the ground that the short time that had elapsed since the service of the summons, had rendered it impossible for him to prepare the defence.

The Usher said he was unable to serve the summons at an earlier date, in consequence of the complainants not giving him the defendant's correct address.

The complainants are Chinese, are three in number, and are believed to be *likin* runners, the

case arising out of an alleged illegal seizure of opium a few nights ago.

His Worship adjourned the hearing until Tuesday next.

——

Feb. 9th.

Reg. *v.* Joseph Dyan.

The defendant was summoned on the joint complaint of three *likin* runners, named Le Sien Fang, Ku-qua-kue, and Yeh Teah-kuien, for assault and robbery, on the evening of the 28th January.

Mr. Myburgh, for the defendant, who is a native of Aden, and does not understand much English, said that before going into the case, he must take an objection to the summons. There were three distinct offences charged in one summons,—assault, larceny, and robbery, which he submitted was quite irregular. In the second place, there were three prosecutors named in one summons, and that he submitted was also irregular, and asked that his objection might be recorded.

His Worship said as to the first that the charge amounted only to one, robbery—robbery being larceny with violence.

Mr. Myburgh said the fact of there being three prosecutors named in the summons was his chief objection. He thought three different summonses should have been taken out in a case like this, because each of the three men appeared to have a cause of action against the defendant.

His Worship said there was no objection to a defendant being charged with robbing several persons, if it was all one transaction. Moreover, he did not think the defendant would be prejudiced by it. Further, it was by far the more convenient course, for if three summonses had been issued, the testimony of each witness would have had to be taken three times over, whereas the whole case could now be gone into once for all.

Mr. Myburgh then said he would not press the matter.

The Court then proceeded to hear evidence, Heding acting as Chinese interpreter. The first complainant called was.

Yeh Teuh-quien, who deposed—I am a runner in the employ of the Opium Guild. On the 21st day of the 12th moon, (the 28th ultimo), about seven o'clock in the evening, a Chinese was carrying opium in a bag into the Mo-ta-kee opium hong, in the Canton road. I and two other runners seized ten balls of opium from him, and had carried them some distance towards the Police Station, when three foreigners came up, and began to assault us. They took away from us six balls of the opium. One of the runners had a quantity of hair torn from his head, and another was injured on the finger. We then went on to the Police Station with the other four balls, and one of the foreigners accompanied us. The defendant came in afterwards. The Inspector sent a constable with us and the opium to the Mixed Court. The defendant is one of the three foreigners who assaulted us. He had a stick in his hand, which the police saw. We were waiting outside a tea-shop, watching the hong, which was some six houses distant, as we had heard a hint that opium was to be taken there. The man had the bag under his arm. Mo-ta-kee hong was in the habit of taking in opium. A coolie who had been dismissed from the Mo-ta-kee hong, was with us, and told us it was opium that was in the bag. When we saw the man with the bag enter the passage of the Mo-ta-kee hong, we went and seized him. He resisted and cried out that we were robbing him. We said we would go with him to the Police Station. We took the bag from him, and looked into it. There were ten balls of opium in it. We told him we were runners. I took possession of the bag, with the opium in it. The two other runners were bringing the coolie along. No other persons had come up at this time,—nobody from the hong. We had got only three or four Chinese houses distant, when three foreigners came running after us. They did not come from the Mo-ta-kee hong. They did not say anything, but commenced to beat and kick us. In the assault, the bag fell and burst. I picked up three of the balls, another of the runners one. I do not know what became of the other balls. There were many people round. The three foreigners kept the people back, and were picking up the balls. The defendant was taking an active part in this, and was using a stick, beating us with it. Two of the foreigners went away, the third took hold of one of the runners by the hair, and went to the police station.

Cross-examined—We did not go direct to the police station because there are so many dealers in smuggled opium in that locality. I do not know where the opium came from; but the coolie who was carrying it, came from the Yung-tah hong. (A coolie was here called into Court, and witness said he was not the man who was carrying the opium.) The defendant was the man who assaulted me. He kicked me on the back, while I was stooping down to pick up the opium. The others did not assault me. I turned round, and saw the defendant kick me. All three foreigners were together, and there was a crowd of people. When the bag broke, the opium balls rolled about the ground. The defendant picked up two balls. A tall man also picked up some. I did not see any Chinese pick up any. We have a card from the *likin* Guild to show our authority. We all showed them to the foreigners. Our cards are given up at the end of the year. We have not received new ones yet. We could not seize opium without the cards to show our authority. I charged the defendant, because he has assaulted us twice. Did not charge the other man who went to the station, because I did not know his name. The police told us to come here and lay a complaint. I complained to the police of the robbery. The defendant also struck Le Sien Fang's finger. We had not taken the opium to the guild before the foreigners came up. It remained in our possession until it was taken to the Mixed Court.

His Worship asked what the defendants' case was going to be?

Mr. Myburgh—I shall contend that there is not a tittle of evidence to show that the opium is the property of the Guild, and in support of my contention shall cite the case of "Reg. *v.* Rudick"—(Archbold's Criminal Pleadings, page 279)—in which it is decided that where property has not reached the hands of the master it shall be held to be the property of the servant who has it in charge. Then there is the question of intent. I can prove that the opium is the property of the defendant, and that he, seeing his property was being seized by these people, merely went to its protection.

His Worship—But evidence of his ownership cannot come from him. It must come through you.

Mr. Myburgh—Yes, the defendant's mouth is shut; but I can prove that he paid duty upon this opium, and that it was in the possession of one of his coolies at the time it was seized. That will be my defence. I cannot identify the opium in any way, because balls of Patna opium are all of the same appearance; but I can prove he had paid duty on opium.

His Worship said he would consider the last point raised, and if he should be of opinion that it was correct, he would direct a fresh summons to be issued, or amend the present one in that particular, after which the defence must go on to satisfy the Court that the defendant was retaking his own property.

The case was then adjourned.

——

Feb. 10th.

Reg. (Master of the *Star of Jamaica*) *v.* Estelle, Westburg, Adams and Carroll.

Refusal of duty.

Defendants, who are seamen of the barque *Star of Jamaica*, were charged by A. W. Stack, the master, with having refused duty on the 8th inst.

In answer to his Worship,

Estelle said: I refused to work because I wanted to see the Consul. The Captain would not give me permission, saying that the Consulate was not open. I came on shore on Monday.

His Worship—That is an offence in itself. The Captain told you quite correct when he said that the Consular office was not open. It was not open yesterday even.

Carroll—The Captain called the hands aft and asked why we refused duty. I said that I was not satisfied with the vessel, and did not get enough to eat; I asked for my discharge. It was refused; I then wanted to see the Consul. The Captain said that the office was closed. I then refused to work until such time as I did see the Consul.

Adams—I asked the Captain on Saturday evening for my discharge; he said that he could not give it to me then, but that I might get it on Monday. When the mate turned us to on Monday morning I refused to work, upon the strength of the Captain's promise to give me my discharge.

Westburg made a similar statement, to which his Worship replied: You have committed the same mistake as the others. The Captain of a vessel is bound under a heavy penalty to allow the men to come and state their grievances to the Consul, but it is for him to appoint a time, and give you permission to leave the ship. I will not go into any other complaint until after this case is decided. It is not as if the Captain had gone or attempted to go to sea without allowing you an opportunity of seeing the Consul.

Captain Stack—The men shipped in Hamburg, and made the voyage to Port Elizabeth, Cape Colony, Mauritius, Freemantle, to this Port, we have been three weeks in port, but the first application to see the Consul was made on Monday. I have five A.B.'s and one ordinary seaman on board.

In answer to his Worship.—I do not wish to press the case against them; I would rather have them on board if they will go to work.

His Worship, to defendants — You have been in the ship since May last, and hitherto made no complaints, although you have been three weeks in this port. Now I will hear what your complaint is about your food. You have a scale of provisions on the articles, and I suppose you get all that you signed for.

Defendants—No, Sir.

His Worship—What is it you don't get?

Westbury—Our meat. At sea the scale was 2 lbs. out, and on one occasion, the 10th of January, the pork only weighed 8 lbs. instead of 10 lbs.

His Worship—But this was at sea. I don't suppose you intend to refuse to go to sea now in the ship because on one occasion you had 2 lbs. of meat short between the lot of you. I do not consider that you have any cause of complaint; therefore as the Captain does not press the charge, I shall send you back to your work. You must pay the cost of the summonses.

U. S. CONSULATE-GENERAL.

——

Shanghai, Feb. 5th, 1875.

Before G. F. Seward, Esq., *Consul-General.*

Charge of Desertion.

William Thomas, quartermaster of the P. M. S. S. *Nevada*, was reported by Capt. Williams on the 18th January as a deserter. He was traced to the U. S. S. *Kearsarge*, on which vessel he had shipped on an honorable discharge from the *Lackawanna*, which allowed him to receive three months' extra wages if he shipped on a U. S. naval vessel within ninety days from the date of such discharge. It appeared that this three months had nearly expired at the date of desertion. On the 5th instant, Thomas was sent to the Consulate-General to be tried on the charge of desertion. He said he had signed articles in Japan for service on the *Nevada*, and that he left that ship here without leave. He had sent his clothes on board the *Kearsarge*, and after the *Nevada* had left port, he went on board the *Kearsarge* and shipped. Captain Williams had stated that Thomas deserted while on duty, and in charge of his watch.

The Consul-General found Thomas guilty of desertion, and sentenced him to thirty days' imprisonment, or a fine of $20.

Clipping.

At a meeting of the Zion R. A. Chapter held on Friday evening, the following officers were elected:—

T. W. Kingsmill	M. E. Z.
W. A. Turnbull	H.
T. W. Eckfeldt	J.
E. Tobin	E.
H. Watson	N.
— Anderson	Treasurer.
J. F. Goodfellow	P. S.
T. Hore	Janitor.

EXPORT OF TEAS FROM SHANGHAI AND RIVER PORTS,—SEASON 1874-5.

TO GREAT BRITAIN.

COMMERCIAL INTELLIGENCE.

SHANGHAI, FEBRUARY 11th, 1875.

There has been no business doing in Piece Goods, so we do not pretend to give our usual report. The Chinese dealers have been intent on their New Year Holidays and New Year Settlements, to the complete exclusion of current business.

FREIGHTS.—*Star of Jamaica*, British barque, 306 tons, Shanghai to New York, no lay days—private terms; *Montgomeryshire*, British steamer, 1,146 tons, Nagasaki to Shanghai, no lay days—private terms; *J. H. Jessen*, German barque, 276 tons, Nagasaki and back, 12 lay days—$2.65 per ton coal; *Vesta*, American barque, 300 tons, Nagasaki and back, 15 lay days—$2.70 per coal.

OPIUM.—Stocks on 10th February are reported as :—

Stock on 27th January	Malwa,	3,664½	Chests.	Patna,	1,726	Chests.
Receipts since	,,	1,103½	,,	,,	545	,,
Total	,,	4,767½	,,	Total	2,271	,,
Deliveries from 27th January	,,	923½	,,	,,	271	,,
Present Stock	,,	3,844½	,,	,,	2,000	,,

Bargained Opium.....1,700 Chests.

Prices, since last English mail, have ranged as follows :—

	Highest.	*Lowest.*	*Closing Price.*
Malwa—New,...	Tls. 420	416	Not open.
Old,	Tls. ...	...	...
Patna—New,...	Tls. 438	435	435
Old,	Tls. ...	...	...

EXPORTS.

TEA.—The export to date, as compared with that of last season, is :—

To Great Britain—Black	Excess	6,363,122 lbs.
,, ,, —Green	Excess	1,228,030 ,,
To United States—Black	Excess	819,715 ,,
,, —Green	Deficiency	4,253,757 ,,

Shipments to date have gone forward as under :—

To Great Britain (per Steamer)	51,098,087 lbs.
,, ,, (per Sailing Vessel)	24,152,588 ,,
To America (per Steamer)	11,109,143 ,,
,, (per Sailing Vessel)	5,862,476 ,,

Black.—Only one small transaction in Common Hohow at Tls. 17½=11¾ per lb., can be noted during the fortnight. Settlements, 82 chests. Stock (against *none* last year), 360 chests.

Green.—During the early part of the fortnight a fair demand existed, and for the best of the Country Teas an advance of Tl. 1 per picul was obtained; the approach of the Native Holidays, however, caused some holders to show more desire to meet buyers, and the market closed quiet with a downward tendency. Business has not yet been resumed, but Teamen hope to see higher rates when buying re-commences, while Foreigners look for a decline.

		Stock,	Against 1874.
Settlements—Fychows, Teenkais and Moyunes	10,470 ½-chests.	52,000 ½-chests.	5,171 ½chests.
,, Pingsueys	1,430 ,,	7,000 ,,	1,710 ,,

Shanghai packed	....	=	= ..... ,,

Export to Great Britain is as under—(Exclusive of lost cargoes.)

	1874-75.	1873-74.	1872-73.
Black	65,002,138 lbs.	58,639,016 lbs.	62,338,471 lbs.
Green	10,248,537 ,,	9,020,507 ,,	10,485,067 ,,
	75,250,675 lbs.	67,659,523 lbs.	72,823,538 lbs.

Export to United States and Canada—

Black	1,612,500 lbs.	792,785 lbs.	1,277,164 lbs.
Green	15,359,119 ,,	19,612,876 ,,	22,192,671 ,,
	16,971,619 lbs.	20,405,661 lbs.	23,469,835 lbs.

Total Export to Great Britain from all China is as follows :—

	1874-75.	1873-74.	1872-73.
From Shanghai to date	75,250,675 lbs.	67,659,523 lbs.	72,823,538 lbs.
,, Foochow to 23rd Jan.	61,128,010 ,,	54,857,063 ,,	52,231,792 ,,
,, Canton to 1st Feb.	19,638,802 ,,	14,796,041 ,,	19,162,274 ,,
	156,017,487 lbs.	137,312,627 lbs.	144,217,604 lbs.

SILK.—Public telegrams from home report the silk market firm, but less active;—Red Peacocks, 15s. 3d.;—Fair, No. 5 Tsatlees, 13s.; deliveries of Chinas to the 9th inst. 1,100 bales. The French mail which left on the 5th inst. took 787 bales, of which 681 were for the Continent, 41 for London, and 65 for Singapore. The following were some of the prices said to have been paid :—

	Per picul.	Per lb.	Per kilo.
Gold Lion, Nos. 1, 2, 3, & 4	Tls. 390, 370, 350, 330	19/3, 18/4, 17/4, 16/4	Frs. 53.9 .51.20,48.50,45.75
Cat and Bee, Nos. 2 and 3	Tls. 352½ & 332½	17/6 & 16/6	Frs. 48.90 & 46.10
Beauti ul Woman, No. 2	Tls. 330	16/4	Frs. 4 -.75
Yellow Elephant	Tls. 312½	15/6	Frs. 43.40
Market 4 Tsatlee	Tls. 330 *a* 350	16/4 *a* 17/4	Frs. 45 75 *a* 48.50
Common do.	Tls. 260 *a* 280	12/11 *a* 13/11	Frs. 36.40 *a* 39.00
Hangch w Tsatlees	Tls. 260 *a* 300	12/11 *a* 14/11	Fr-. 36.30 *a* 41.70
Marke. Kahings	Tls. 250 *a* 290	12/5 *a* 14/5	Frs. 34.90 *a* 40.40
Coarse Taysaams	Tls. 245 *a* 260	12/3 *a* 12/11	Frs. 34.24 *a* 31.30
Market Skeins	Tls. 235 *a* 250	11/9 *a* 12/5	Frs. 32.88 *a* 34.90

Owing to the intervention of the China New Year holidays, no business has been reported during the past week, excepting the settlement of a parcel of Han-quong-shing's Throwns @ Tls. 350 per picul. But very little silk has arrived from the interior and river ports, and the unsold stock is estimated at 4,800 bales. The steady increase in the importation of raw silk to the Continent is further proof of the preference shown for *direct supplies*, over those received from London after they have undergone the pernicious "working" at the warehouses; and it remains to be seen whether this damaging custom is to be done away with, or English Importers be willing to see London become a second rate market! Another season is drawing to a close, and the experience confirms the previously mentioned advantage of the Lyons over the London market—better prices realized for the silk, better weights, and also no "cuts" for damage, which so often appear in account sales from the latter city.

COMMERCIAL POSTSCRIPT.

FEBRUARY 11, 1875.

ARRIVALS.—February 6th, British barque *Lady Belmore*, from Sydney; 8th, British steamer *State of Virginia*, from London; 11th, British schooner *Empress of China*, from Swan River.

DEPARTURE.—February 5th, British steamer *Priam*, for London.

The English mail steamer *Hydaspes* takes about 95 bales of SILK.

EXCHANGE.—On London, Bank Bills, 6 months' sight, 5s. 8¾d. *a* 5s. 9d. First-class Credits to Bank, 5s. 9⅛d. First-class to Private buyers, 5s. 9⅛d. Private and Documentary, 5s. 9⅜d. *a* 5s. 9½d. On Paris, Bank, Frs. 7.35. Private, Frs. 7.32½. On India—Bombay Bank, demand, Rs. 303. Calcutta Bank, Rs. 303½. On Hongkong, Bank Bills, demand, 26¼ per cent. discount. Private, 15 days' sight, 26⅝ *a* 26. Gold Bars, Tls. 173.00. Bar Silver, Sh. Tls. 111.20 Mexican dollars, Sh. Tls. 73.90 per 100. Carolus dollars, Sh. Tls. 80.50 per 100. Copper cash, 1,530 per tael.

SHARES.—Messrs. J. P. Bisset & Co. report:—

Banks.—A small business was done up to yesterday at 7 *a* 10 per cent. discount, and a good business since last night at 12 *a* 13 per cent. discount. The market closes with sellers at latter rate.

S. S. N.'s—Small sales only are reported at Tls. 76, at which shares are obtainable.

Marine Insurance.—Sales reported are *China & Japans* at Tls. 83, *Yangtszes* Tls. 585, and *North Chinas* at Tls. 650; stocks are firm.

Fire Insurance.—*Hongkongs* have advanced to $537½, with buyers. *Chinas* and *Victorias* are firm, with buyers at $129 and $122, respectively.

Hongkew Wharf Co.—Cash holders are firm, but shares are obtainable at corresponding rates for time.

WEATHER.—The long spell of fine weather we had been enjoying broke up on Sunday night; and the last three days have been cold and wet. To-day, the rain has ceased, but it is still cloudy and threatening. The range of the thermometer has not sensibly altered, varying from min. 33 by night to max. 50 by day.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, FEB. 18, 1875.

RETROSPECT OF 1874.

Piece Goods. Another year has been numbered with the past, and although in its results to the importers it has been less unsatisfactory than some of its predecessors, it has left behind it traces neither few nor insignificant of the old complaint. It is by no means a pleasant thing for us to have to reiterate the same story year after year; and in the interests of our fellow countrymen engaged in the *Piece Goods* trade with China, we heartily wish that fortune would smile on their endeavours to disseminate the blessings of our Western Civilization throughout this Empire, notwithstanding that those blessings do occasionally contain the germ of mildew and other equally undesirable substances. But, while the causes remain, we fear that the "good time" for our merchants is still remote. However, our duty in the present paper is with the past, not to speculate on the future, although we cannot refrain from stating that so long as the supply exceeds the requirements, and while so much official opposition to the introduction of our wares into the interior is experienced, the results to our trade cannot differ greatly from those obtained in recent times.

Now, in regard to the first of these causes, the stocks of manufactures on hand on 31st December last, as shewn by the Returns published by our Chamber of Commerce, compare favorably with those of 31st December, 1873; which argues either a diminution in the importation as compared with the consumption, or an increase in the quantity taken off by the country at large; and we believe it will be found when the figures are compiled, that there has been an actual increase in the deliveries of many articles during the past year. At the same time, the receipts, in most instances, have been fully equal to the demand, and only in a very few have stocks decreased through a modification in the home shipments. Thus, "short stocks" have been the exception, and it has frequently been provided for long before, in the ordinary course, it could have affected business. Moreover, the natives have taken good care that they should not suffer grievously in this respect. They knew too well in advance what things were likely to be wanted, and when. Besides, as a rule, they are fully aware whether there is a sufficiency in store for them to choose from, and if there appear the slightest probability of

a scarcity, they create a fictitious activity, buy sparingly, and *bull* prices until the bait has been swallowed and their interests thoroughly served, by that desire to be rich which prompts nearly every foreign importer simultaneously to telegraph for the particular article in question, and hence a plethora is always secured. And in reference to the second cause—official obstructiveness. It is now more rampant and defiantly paraded than ever. The *Transit Pass* in many districts has become food for the historian. True, around the Treaty Ports the *Pass* has still some influence, but in the far-distant interior it is useless, and worse than useless, for the authorities ignore it, and some of its possessors have been ruined by their obstinacy in claiming the rights supposed to be covered by it. The Mandarins, and notably those of Chungking and Kwei-foo, on the Upper Yangtsze, either cannot, or they flatly refuse to realise the fact, that foreign manufactures do *not* change their character with a change of ownership, even although they be accompanied by corroborative proof in the shape of a Transit certificate, and in those districts foreign-owned foreign merchandise does not always enjoy immunity from the exactions of the *Likin* farmers. Even now there is some foreign owned cargo detained at one or other of those barriers, and a British firm at Hankow is at the present moment prosecuting a claim at Peking for a sum of about Tls. 18,000, loss by detention, extra freightage, deterioration, and damage, sustained last Spring by and through the action of those in charge of the barriers on the borders of Kwei-chow and Szechuen. Be it remarked that this claim for actual loss occurred on goods costing little more than double that figure, so that the owner suffers to the extent of nearly fifty per cent. on cost price. In all this we have the verification—and far earlier than we looked for—of the utterings in our Retrospect for 1873. We then said: "The native is afraid to "adopt it, and although respect is still "paid to the foreigner's pass the time is "not far distant when that too will be "ignored by the Barrier authorities." It is true that latterly the goods belonging to the firm alluded to have been permitted to pass the barriers, on production of the certificate of ownership, but this permission has, as it were, been wrenched from the collectors of Likin, and only after repeated remonstrances to Peking against the injustice perpetrated, But the evil does not rest here. Foiled in their attempt to detain and squeeze *bona fide* foreign-owned cloths, the mandarins, or their myrmidons, throw every obstacle in the way of the carriers, and ultimately they have adopted a system of espionage that surely demands examining into. Discrediting the terms of the *Transit Pass*, and in order to find out the real owners of the merchandise covered by it, they have stopped mails, overhauled the letters, and where their suspicions have been confirmed, dire have been the consequences to their unfortunate countrymen.

Such is the purport of the news that has from time to time reached us from Hankow; and the state of trade in the Upper Yangtsze districts for many months past has been such as to induce a belief in the truth of our information.

Now all this shows plainly the absurdity of any arrangement for the unmolested transit of our manufactures through the inland provinces of China, to which the district authorities are enforced strangers. They will not be bound by any such. A certain annual tribute is demanded of them by the Central Government. They receive and accept their appointments calculating on an income from foreign trade to enable them, in part, to fulfil their agreements with Peking, and we humbly submit they are not altogether to be condemned if they so jealously, and seemingly too jealously, guard their incomes, more especially since they have seen that the foreign representative can be made to take action in favor of his countrymen only when in a measure he is forced to do so. And in support of the immediate foregoing, we point to the altered state of affairs in this province wherein we dwell. Here the mandarins have taken the management of the transit under their own wings. The *Pass* is no longer required. A more favorable arrangement has been introduced. By the Pass system a bale of *Grey Shirtings* pays Tls. 2 Hae-kwan, or half the import duty to be franked to Soochow. By the new arrangement, whereby a sum of Tls. 20,000 is accepted annually by the local powers from the Guilds, in lieu of all inland squeezes on foreign merchandize passing from hence to Soochow—a bale of *Shirtings* costs not a tithe of that sum—and it finds its way to the cities beyond—Hangchow, Hoochow, &c.,—on a total payment of Tls. 1.20 Shanghai Sycee. Of course there are the Municipal dues of the terminal city still to be paid, but those are legally leviable, Pass or no Pass, and in no way affect the question at issue. Unless, therefore, our own authorities are prepared with a better system than that adopted by the natives, we should advise a passive acquiescence therein, as the dealers have found it the cheapest and most convenient; and under it our district trade has made wonderful strides during the bye-gone twelve months. In all this, let it not be imagined for a moment that we approve of the meddling of the mandarins; but we insist upon it, that until they are consulted, or until they receive their own proper share of the transit dues, they will continue to thwart or obstruct the smooth working of any transit scheme—however good—that may be adopted by the Central Government and the foreigner.

Then the standard of some Cotton fabrics has been lowered, whether intentionally by the manufacturer we are unable to say, but circumstantial evidence points towards wilful adulteration. Undoubtedly low classed and heavily sized goods have paid the importer better, or have lost him less, than genuine cloths have done; and without doubt also, the natives, attracted by the wide differences in the prices of the spurious and honest material, have dealt more liberally in the former. But we do not undertake to determine how far the end is justified by the means, and the future must be left to decide whether the warning thrown out by the Chairman of the Shanghai General Chamber of Commerce at the annual meeting of members held on 5th ultimo, has any foundation in fact. He characterized "the deteriorating quality "of much of the goods now sent to China "from Manchester as being specially a "further source of loss to the importer, "and one which might react in a very "unfavorable way upon the industry of "Lancashire," and he hinted at the probability of the establishment in Shanghai of spinning and weaving machinery after the example of similar institutions in India, the working whereof had been eminently successful. Thus Lancashire had better look to her laurels. In the earlier half of 1873, adulterated Cottons sold for nearly as much as the more comparatively pure articles, but towards the close of that year it was prognosticated that such a state of things was fast approaching a climax, and, taking an 8¼-lb. *Grey Shirting* as the subject of our illustration, it is not too much to say that the past year has witnessed the complete fulfilment of the prophecy. For sometime two mace per piece was considered a great difference in the quoted rates for lowest to best chops, but as the year progressed, and while Dewhurst's *Eagles* and Mendel's best chops were maintaining a value of Tls. 1.87 *a* 1.92 and Tls. 1.95 *a* 2.00 per piece respectively, the lowest grades and shops fell to Tls. 1.60 *a* 1.62, or a drop of 2m. 6c. *a* 2m. 8c. per piece as against one mace to 3 *a* 5c. on the opening rates in January; and mildews of the inferior classes have occasionally been sold at an allowance of one mace to one mace and a half upon these figures. The concerned in such low productions know best whether the trade has been a lucrative one. To the outsider it seems that a prime cost of 7s. 6d. *a* 7s. 9d. per piece requires rather more than Tls. 1.60 (six months sight sterling being only 5s. 9d. per tael) to yield a profit. But perhaps we are mistaken. Enlightenment on this point is courted, and meanwhile here are the figures on which our ideas are based.

Invoice of 50 *Bales* 8¼-*lbs. Grey Shirtings. Manchester to Shanghai.*

2,501 pieces *a* 7*s.* 7½*d.* per piece			£	953 10 2
Nett in 3 months.

Landing, Postages and petties, say				4.38
Fire Insurance and Rent	*Nil.*			
				232.18
			Tls.	4,040.00

or nearly Tls. 1.62 per piece.

In the above calculation it will be seen that no account is taken of commissions, and that the charges are confined as closely as possible to actual outlay. Moreover, if whilst *en route*, the goods suffer though sea damage or mildew, the loss thereby sustained fails to be added to the cost. It may be said that

our rate of Exchange is an exceptionally low one, and this to some extent we allow. At the same time it must be borne in mind, that the higher sterling occasionally ruling last summer was more than counterbalanced by the higher original cost in Manchester, and once or twice when remittances had to be made at 5s. 8½d., the results were all the more unsatisfactory. Goods similar to those which form the subject for our calculation cost in May last 8s. 4½d. per piece, and when put on the market here in July they realised only Tls. 1.62 per piece, Exchange at the time being quoted 5/8½ *a* 5/8¾ per Tael for 6 months' sight Bank Bills. This is one example only of the trade in PLAIN COTTONS during 1874, and although we do not say that it should be taken as a representative one, there has been sufficient misfortune attendant on its prosecution to create unbounded delight in the hearts of many importers when they closed their warehouse doors on the last of the "nameless trash."

Furthermore, nature has continued to favor the Chinaman. The Cotton Crop of 1873 was a very abundant one, and that of the past autumn was still larger. Hence, to enable the home manufacture to compete with the native cloth, prices had to be reduced, and the losses on long held cargo, *T-Cloths* more especially, have simply been ruinous.

And, finally, there is a spirit of jealousy rampant amongst foreigners that keeps them aloof from one another in business matters, to their own detriment, and to the Chinaman's well-being. They seem to be under the impression that any information they may interchange means only so much more enlightenment to the native, whose position, as regards knowledge, they consider already too powerful. It was this spirit—at least we cannot imagine any other reason—which prevented the issue of the usual half-yearly Returns of Stocks by the Chamber of Commerce in June last, and this same spirit lays the seller at the mercy of the buyers, for while the former is often acting in utter ignorance of what his neighbours have, and are doing, the Chinaman—in possession of the most accurate details, and possessed also of a lively sense of the use as well as of the abuse of truth, to say nothing of that subservience to his guild which compels him to make an account of his daily doings—generally manages to gain the advantage in any transaction on which he fixes his attention.

Summary of News.

The M. M. str. *Ava*, with the mail of the 1st January, arrived yesterday.

A mail left for America by the P. M. str. *Nevada*, on the 15th.

A mail leaves to-morrow for Europe by the M. M. str. *Amazone*.

The following telegrams only have been received from Reuter during the week :—

The Committee of Ways and Means of the American Congress has agreed to a draft of the Tariff, taxing Cotton and Woollen manufactures, Iron, Steel, and Sugar, but leaving Tea and Coffee untaxed.

Alfonso has ordered a levy of 70,000 men.

Sir Andrew Clarke has been appointed Director of Public Works in India.

An outbreak has occurred amongst the Chinese prisoners at the criminal gaol at Singapore. Superintendent Dent was killed, and sixteen Warders wounded. Fifteen of the prisoners were killed, and thirty-five wounded. Order has been restored.

The French Ministry tendered resignation. MacMahon consulted the Duc de Broglie, but a new Ministry is impossible until after the final vote on the Constitutional Laws.

The minutes of the meeting of the Museum Committee, held on Tuesday last, promise well, at least for the ornithological section. No less than 59 gentlemen have contributed under this head during the past two months.

We learn from the Minutes of the French Municipal Council, that an iron bridge is ready for erection over the Yang-king-pang, at the end of Honan road.—In regard to the question of encroachment on that creek, the Council adheres to the position it took up in 1872.—Before drawing up its budget for 1875-6, the the Council wishes to ascertain from the Council on the North Yang-king-pang, whether it adheres to its decision to discontinue the equal partition of the revenue from wheelbarrows.

At a meeting of the Municipal Council held on the 2nd February, permission was given to the China Merchants S. N. Co. to erect a line of telegraph between their Office in Hankow Road and their godowns in Hongkew. If the Chinese can appreciate a line of telegraph in the Settlement, why do they object to one elsewhere? We are glad to find that a drill-sergeant for the Volunteers is to be procured from Hongkong.—The Harbour Master suggests certain new Fire Signals in case of fire amongst ships in harbour. The Council fear this would unnecessarily complicate signals, as the Municipal Fire Department is not in a position to render assistance to ships in the stream.—All Municipal officers are to be allowed nine months' leave, after five years' service.

The accounts of the Shanghai Race Club for the year 1874 show a balance in hand of Tls. 2,643, besides some Tls. 230 of dependency.

A fire broke out shortly before 9 p.m. on Saturday, in Messrs. Lane, Crawford & Co.'s auction rooms, in Kiangsi Road. These and their contents were completely destroyed. Full particulars of the disaster are given in a detailed account on another page.

An enquiry was held on Friday, into the circumstances of the late riot near Kung-wang, and the affair was satisfactorily settled. The proceedings were quite informal, the object being rather to prevent further annoyance than to give official prominence to what has passed. This object seems to have been attained; the names of the offenders are registered, and they will be held responsible in case of any further disturbance—responsible not only for the past or any future misdeeds of their own, but for the possible misdeeds of others—which they are bound over to prevent. The old lady especially, as the worst culprit—she having got up the disturbance—is held security for the peace of the neigborhood.

A case was tried on the same day before Sir E. Hornby, in which a Chinese named Fan Tsiang-chi sought to recover $3,000 damages for an alleged libel against him published in the *Wui-pao*. The paragraph alleged that the plaintiff had been smoking opium in a certain shop with a friend, and had no money to pay for it; that he offered his trousers in pledge, but the shopman refused to take them, and a row ensued. The paragraph added that Fan had formerly been in the employ of the C. M. S. N. Co., but had been dismissed; and went on to point a moral about the vicious and degrading tendency of opium generally.—His Lordship held that the paragraph was libellous, but that no specific damages had been proved. He gave judgment for $50, to carry costs.

Captain Sack, of the British ship *Star of Jamaica*, has been tried on the unusual charge of concealing and employing two able seamen of H.M. ship [illegible] knowing them to be deserters. The prosecution was [illegible] seaman of the *Star of Jamaica*, named Carroll, who had been summoned by Captain Sack for refusal of duty, for which he was sentenced to imprisonment. The witnesses called had also been summoned and punished for a similar offence. The case was dismissed, because it could not be legally proved that the two men (who were landed at Freemantle) were borne on the books of any ship in the Royal Navy, or were deserters therefrom.

We publish, elsewhere, a letter which Mr. T. T. Cooper has lately written to the Shanghai Chamber of Commerce, about the trade of Western China. He contends that the natural course of this trade is down the Yangtsze; and that the energy, therefore, which is being expended on opening up a trade route between Burmah and Western China would be better employed in opening up the towns on the Upper Yangtsze to intercourse with Shanghai. The endeavour to open up a trade across Burmah is all right so far as it goes; but more might be done from the opposite direction; and if Home Chambers of Commerce can devote so much energy, and the Indian Government so much money and enterprise, towards opening up this new trade for Rangoon, surely some energy and some money might be made available towards extending the far more capable trade through Shanghai. He urges, therefore, that the Shanghai Chamber should try to persuade the Home Chambers to this effect.—Mr. Cooper also calls attention to the fact that trade in salt is permitted between Burmah and Yunnan, whereas the import of salt is forbidden into Eastern China.

We have received No. 7 of the Valuable Medical Reports which are now issued periodically from the Customs' Press, under the editorship of Dr. Jamieson. The reports are for irregular periods—that is to say, some relate to 1873 and some to 1874. Publication of the earlier ones has no doubt been delayed by the same causes which occasioned delay in the case of the Trade Reports for 1873—namely pressure, on the Statistical Department, of catalogues relating to the Vienna Exhibition. Early publication, however, is not of the same importance in the case of Medical Reports as of Trade Statistics; so the delay is less regrettable.

The N.-China and Japan Desk Hong List appears rather late this year; but only those who have had practical experience of getting up a directory, can appreciate the labour involved, and the difficulty of reconciling accuracy with early publication. Mistakes too will occur, despite all precaution; and so frequent are the changes in Shanghai, that one or two have already occurred since the sheets were in the Press. If errors there are however, they appear to us, on glancing through the book, to be trifling; and we turn with pleasure to the more satisfactory work of praise. The book is carefully compiled, and well-printed, and contains several useful additions to last year's number. Some nine pages, for instance, are filled with a local Navy List; that is to say, a list of the various foreign men-of-war and their officers stationed in Chinese and Japanese waters. The Silk Tables published some time ago in separate form by Mr. A. H. Maeter—— incorporated, and will form a useful addition. An exchange table showing the relative values of Gold and Silver coins in different countries will be useful to people who intend taking the Continent quietly, on their way home via Brindisi, and a table of weights and measures on the following page will also come in for occasional reference. These are the leading alterations, and add to the value of the little volume which the Publishers are making, every year, more complete and useful.

The Pacific Mail and the Mitzu Bishi Steamship Companies seem about to enter on a very profitable career of opposition. The P. M. S. Co. have advertised a considerably reduced schedule of charges to Japan, both for passengers and cargo; and the Japanese Company followed next morning with a scale varying from 20 to 50 per cent below their rivals. If the chief object of steamship companies is to deplete each other's pockets for the benefit of the public, the P. M. S. and the Mitzu Bishi promise to succeed.

The depressed view which we have several times lately expressed, of Chinese finance, is confirmed by the memorial of Censor Hü Ting-Kwei, in the *Gazette* of the 18th Jan. The Censor points out that the ordinary revenue showed a large surplus over expenditure in the reigns of Kienlung and Kiaking, and even left a considerable margin, notwithstanding extraordinary expenses, during the reign of Tao-kwang; whereas the finances are embarrassed now, although the revenue has been largely augmented by extraordinary taxation. The disbandment of the irregular soldiery is pointed to as a remedy, and a roving commission for this purpose is advocated. There can be no doubt these irregular troops are a great drain, less probably in actual cost than in the peculation to which they give rise. There is, however, another side of the question, still more serious; the Government exactions choke trade in its efforts to recover from the effects of the rebellions that these irregular levies have been raised to repress, and kill the revenue which they are intended to augment.

The Peking *Gazette* of the 20th January contains a memorial from the Governor of KIANGSI, curiously illustrating the blind folly with which the Peking Government insists on its rice tribute. The practice has obtained for some time in Kiangsi, of commuting a great part of the tribute into money. The Peking people, however, are dissatisfied apparently with the rate of commutation, and insist that they will have the tribute in kind. The experiment of shipping rice by the C. M. S. N. Co. from Shanghai has been successful, and their steamers can as well take rice from Kiukiang. The Governor says he cannot levy the tribute in kind, and if the Government insists on having rice, all he can do is to raise the commuted tax in money, and buy rice. Can a more wasteful process of raising revenue be conceived? Is it not virtually incurring the loss of a double transmutation, in order to create freight for the C. M. S. N. Co.?

The Peking Gazette of the 18th January contains the remarkable suggestion that the Governor of Fuhkien should be required to reside in FORMOSA for the future. The idea seems so impracticable that we are surprised it should emanate from a man of Shen-pao-chen's position. However valuable a possession Formosa may be, the great province of which it is a dependency must deserve the more immediate presence and attention of the Governor. A more practical idea would be to separate Formosa from Fuhkien, and make it an independent Government; but that would be the signal for exactions which would crush its trade. The proposal is at any rate notable, as showing the attention which has been directed to Formosa by recent events.

Our latest date from PEKING is the 3rd February. All was then quiet, and the 25th February had been appointed for the enthronement of the young Emperor. We print, elsewhere, a further series of edicts relating to the late Emperor's decease and the new succession; but have no other news of interest. Li Hung-chang arrived from the provincial Capital on the 28th January, and was to leave again on the 3rd February (the date of our letter) after having paid his devoirs before the coffin of the deceased Emperor, and had his audience of the Empresses. Of the young Emperor himself, a correspondent writes:—The Chinese say he cries from morn to eve for his mother, from whom he has been separated for ever. He is living amongst entire strangers; not even his former nurse is allowed to accompany him to his palace; the object being that he shall grow up a stranger to his original home, and only regard the Empresses Dowager as his mothers.—It does not appear clearly yet who are likely to be the leading men at the Capital under the new régime. All the old officials appear to retain their posts, the only notable change, so far, being the substitution of Prince Pih (a son of San-ko-lin-sin) for Prince Chun, as commandant of the Peking Manchu garrison. Our correspondent points out what our readers will no doubt remember, that Prince Chun (the father of the new Emperor) is the man with whom Count Rochechouart had a *fracas* some years ago, through a collision betwe their retainers in the streets. Prin Chun apologised, but is believed to ha retained a lively dislike of the Frenc ever since.

It is worth remarking that even i TIENTSIN, so close to the Capital, rumour have been current about the state of affair in Peking, nearly as wild as those we ha noted from time to time in Shanghai. I was reported at Peking when he was quie in his provincial capital of Paouting; an when he did go to the Capital, all sorts o ideas were started as to the motive culminating in the suggestion that h would probably remain near the Throne and be succeeded by either Chung-how or by Tseng Kwo-chuen (a brother of the lat Tseng Kwo-fan), in the Vice-royalty o Chihli. Private letters of the 25th in dicate strong apprehensions that there would be disturbance at Peking. It wa thought Prince Kung could not like the new order of things, and that although matters seemed to be going on smoothly, a storm was very likely brewing under the surface.—Letters of the 1st, however, both from Peking and Tientsin, show that all was still quiet, and we only remark the curious fact that very similar rumours and uncertainty were afloat there and in Shanghai.

We hear that there was a considerable fall of snow on the hills round NINGPO, on Friday.

The *Ava* brings HONGKONG papers to the 13th inst., but they contain little news of interest. H.M.S. *Audacious*, the flagship of Admiral Ryder, who is to assume command of H.M.S. China squadron, anchored in the roads at Singapore on the 1st inst. The *Audacious* is a sister ship of the *Iron Duke*. Admiral Shadwell will, at Singapore, resign the command to Admiral Ryder. —Mr. Lister has been appointed Assistant Colonial Secretary.—The str. *Kiukiang* had been chartered to convey a large number of passengers to Macao to witness a religious procession at that place on Sunday.—The Portuguese Amateurs gave a successful performance at the Lusitano Theatre on Thursday.

A Reuter's telegram informs us that the Straits Settlements are to lose their present Governor, who has been appointed Director of Public Works in India. Sir Andrew Clarke has shown himself an able and energetic Administrator, since he took up office at SINGAPORE, and will undoubtedly be much missed. That he will have ample scope for all his talent and energy in India, no one who has read the constant complaints of mismanagement of the Public Works there, can doubt. Sir Andrew Clarke first came into notice in Australia, where he resigned his appointment as Captain in the Royal Engineers, to take office as Surveyor-General. He subsequently held a special post in the Admiralty under Mr. Childers, and gained credit for some economical reforms in Woolwich dockyard. His previous career, therefore, marks him out as well fitted for the new appointment. In the Straits he has done exactly what the residents were fruitlessly asking before his arrival—taken vigorous measures to suppress piracy and extend English influence and trade on the mainland.

Editorial Selections.

THE RICE TRIBUTE AND THE C. M. S. N. CO.

JOMS remarks we lately made with regard to the Rice tribute and its effects on the finances of the Empire, have failed to meet general acceptance; but this want of acceptance is rather to be attributed to a superficial view of the subject, than to any innate improbability in our statements. We have been taken to task because we incidentally spoke of the abuses of the Rice tribute and, coupled with it, of the enterprise which, under the misnomer of the "China Merchants Steam Navigation Co.," is really dissipating Government money in running an opposition to foreign shipowners. Now we have very good authority as to what this Rice tribute really is, and for this purpose we will quote two documents, both of which are above suspicion. The first is an extract from Mr. Dick's Report on the trade of Tientsin during the year 1867, and dated in April 1868; the second a memorial from Chen Hung-yi, published in the Peking *Gazette* of November 11th, 1872, pointing out from a native point of view the disadvantages of the system. It will be seen that both, without hesitation, condemn the entire system as being useless, cumbrous and extravagant. Mr. Dick's position as Commissioner of Customs at Tientsin afforded him special means of making himself acquainted with the circumstances of the case; and his deliberate opinion, therefore, that the grain transport is "simply a trade in rice carried on by officials at a great cost to the country," is one which it will require much evidence of a contrary description to that adduced, to disprove. Mr. Dick, as will be noticed, divides the abuses into three heads. The first, the transport; the second, the arrangements for reception at Tientsin and conveyance to the Capital; the third, the eventual distribution. The Chinese memorialist, having a further acquantance with the oppressiveness of the system, goes back a step further, and points out the abuses concerning its collection. Both are at one so far as their descriptions coinside; and the Chinese memorial, explaining as it does that the levying of the tax in money would save the heavy outlay now incurred for transport, official salaries, &c., &c. is especially to the point

Again, the *Gazette* of the 31st October, 1872, contained a doleful report from Kien Ting-ming, Footai of Honan which, compared with that from the Footai of the same province, published in the *Gazette* of 12th January, 1875, is curiously instructive. The taxation in Honan has been contiuuously oppressive. No notice has been taken of the numerous complaints which have been sent to the throne, and the evil now seems to have reached a culminating point. Kien Ting-ming reported, "The Spring crops this year were only middling, and the autumn crops were very much injured by wet weather, the country in many places being flooded. It will be impossible therefore to pay the land-tax in kind. The export of 100,000 piculs would raise that article to a ruinous price, and leave people and army without supplies; the tax must therefore be paid in sycee, at the same rate as last year." Now, if we look at the economic position of the matter, we shall be still more surprised. This rice, collected with so much oppression, carried at so great expense, and distributed with so much extravagant waste, is in reality not needed at Peking. It is not the usual food of those for whom it is intended, who in fact will only eat rice when forced to do so. Peking is not dependent on the southern provinces for its supply of food, the northern districts of China supplying in abundance more wholesome and suitable provender. In every respect the levy is to be deprecated. In prosperous years it leans too lightly in proportion on the provinces; in disastrous ones, it becomes an unbearable exaction. It interferes with the course of trade between North and South, as was exemplified during the recent famine in Chihli, where private enterprise was checked by the presence of the Government monopoly. Canton and the South were abundantly supplied with food from Kiangsu, by the operation of a comparatively unfettered trade, (though the Government was not ashamed to levy duties on the carriage of the rice needed); while in Chihli, in face of the exertions made by the Government, the people over large districts were left without food, no one venturing to import from the Yangtsze ports, where rice was actually rotting on the ground for want of a market.

Not content with the wasteful extravagance inherent in the tribute in kind itself, the Government of late years has gone further. When Mr. Dick and Chen Hung-yi made their reports, the new Steam Packet Company, which we were told was to be the regeneration of China, was not yet in existence. We can form for ourselves, now, some idea of how it is likely to mend matters. It has been formed for the expressed purpose of monopolising, against the natural course of trade, the conveyance of the rice of the Southern provinces to Peking. Foreign steamers had run off the coast the native junks which used to convey the tribute rice; so the Chinese concluded they would run steamers themselves, and reserve for them the freight on the tribute cargo, as a subsidy. So far the programme may have a justification. But that justification can only hold good, when the "Company" has proved itself capable of performing that service at as small cost as the Government could otherwise get the service efficiently performed. But it is notorious that the rates paid for the conveyance of rice are far in excess of what it would be conveyed for in private steamers, native or foreign. Were the service put up to public competition, even with the proviso that the contract should be carried out under the national flag, there are scores of merchants who could find means to do it as efficiently as at present, at far less rates. Chinese merchants own steamers in Siam and Singapore, and work them on their own account; and there is no good reason, save and except the jealousy and misconduct of the Government, why they should not do the same in China. The advent of a real native merchant service would not be viewed with ill-will by foreigners, who would willingly hail the development of trade that such a measure would induce. But instead of this, a service too intimately associated with mandarins to gain the confidence of native merchants, is kept going by paying out of the finances of the Empire an extravagant rate of freight. Not only is this the case, but this rate is made the opportunity, professedly in the interest of the Chinese trader, of running a ruinous opposition on the river Yangtsze. We do not know by what principles of economy such a contest, supported by the power of a government, can be fortified. The cheap rates of freight are indirectly kept up, not by legitimate trade, but by means of exactions on every description of traffic. To gain the advantages of low freights, the native merchant has to submit to heavy taxation of the very articles he wishes to ship, in order to support a useless traffic to the North and its concomitant army of officials for collecting, shipping, managing steamers and distributing. In other words, the relief which would come to him naturally in the course of trade, if freights rose above a fairly remunerative rate, has now to be applied through all the wasteful extravagance of the rice tribute and its new ally, the "China Merchants' Steam Navigation Co." As we have said above, the tribute rice, not being required in the North, is only an interference with the course of trade. Well supplied with all the necessities of life, the North yet eagerly seeks to purchase other things from the South of China. Sugar, cotton, cotton goods, and we may add opium, are the products which the North really demands, but for which it has itself little in the way of corresponding commodities to offer in exchange. Still, the presence of the seat of Government at Peking; an internal native trade capable, to judge from experience at Chinkiang, of much development, and perhaps other sources, supply considerable quantities of bullion to be exchanged for these goods. Now the effect of the forced import of rice, as Mr. Dick tells us, is that that article becomes a drug on the market. So much of it as has not been wasted or destroyed *en route* by the various processes described in his report, is put on the market and sold at a merely nominal rate. Not only therefore is the soldier, for whom the rice was intended, deprived of a large portion of the purchasing power which he would have gained had his contribution been handed

to him in money, but a rival to the natural productions of the land is introduced into the market. The agriculturist of Chihli suffers by as much as the difference between the currency which the soldier would have gained, had the contribution from the provinces arrived in the least extravagant manner, and the sum actually received for the modicum of damaged rice sold by him stealthily to the rice dealer. Economically considered, then, no interest can derive benefit from the present system, but all suffer together; a portion of the taxes so hardly wrung go to support an expensive enterprise; the incidence of the grain tribute collected in kind is most oppressive where it ought to be lightest; and when, on the contrary, the people are most prosperous, its effect is equally unfair in the opposite direction.

CHINESE FINANCE.

In a previous article we have shown by what means the Rice tribute and its new ally, the C. M. S. N. Co., are drawing on the resources of the Empire. Lately we have had occasion to refer to more than one memorial in the Peking *Gazette*, to prove into what a serious dilemma the finances of China were gradually, but surely, falling. On the 12th and 18th of last month appeared two memorials, bearing directly on the present condition of affairs, and giving a deplorable but, as we must infer from the general agreement of evidence, a true description of the present position of matters. The first, from the Governor of Honan, showed how Imperial demands had utterly exhausted the resources of that province. The ordinary revenue of Honan is about Taels 2,150,000, but the requisitions made on it amount to so much more, that at the time of writing the memorial the province was actually in arrears Taels 1,955,600. The necessary funds for maintaining the ordinary Civil Government of the province amount to about Taels 700,000; the expense of keeping up the Military to about Taels 1,400,000. In addition, the repairs to the Yellow river on an average absorbed some Taels 200,000 per annum, so that the province was already taxed to the amount of its revenue. In addition, although it had borne the brunt of the Nienfei rebellion, it was called on to contribute heavily towards the expenses of the now useless war against the forces of the Ameer of Turkestan, as well as to subscribe towards garrisons in the Manchurian and Mongolian provinces, from which it derived no benefit directly or indirectly. We alluded, in our article, to the unfair incidence in Honan of the Rice tribute. In an inland province, deprived of the ready means of locomotion afforded by the sea to the maritime districts of China, the incidence of a tribute in kind must needs in the first place be very unequal, and in the second most extravagant and wasteful. The small collection of duties points out the present extremely isolated condition of the province. We said above that the supplies have been demanded for the now useless war in the North-west. So long as it was carried on against bands of Mahommedan rebels, who were devastating the provinces of China and introducing anarchy into her Western dependencies, the war in the North-west was a necessity, if China wished to hold together as an Empire. At the present moment, the state of affairs has assumed a different complexion. Turkestan is no natural dependency of China. Its people have no sympathy in race or religion with those of the Empire, from whom moreover they are separated by a wide arm of the desert of Gobi. The conquest of Turkestan was adventitious, being induced by the disorganized condition of those countries, when one party to gain its own ends called in the assistance of its then powerful neighbour. The occupation by the Chinese has never been quietly acquiesced in, and Turkestan has ever been the hotbed of intrigue and disaffection. The money expended in keeping up garrisons has never been repaid, and little if any incidental advantage accrued to China from the connection. At present, Turkestan is governed by an able ruler, who has turned his attention to developing the resources of the country. In no country in Asia is life or property more secure than in that ruled over by Yakoob Beg; and his military success keeps pace with his home government. He has now apparently, by the conquest of Urumtsi, removed all apprehension of such inroads into Mongolia as we lately chronicled. He has never expressed any desire to interfere with his neighbours North and East, so that his presence affords a fair promise of good order and security to the West of the Empire. Against such a State, and at such a time, it is certainly the height of folly for China to contend.

But we would wish to bring forward the second memorial referred to. If Honan be overtaxed to maintain an extravagant and useless war, it is only on a par with the rest of the Empire. The Censor Hu Ting-kwei gives a description of the general finances of the Empire, in equally deplorable terms. The military establishments of the provinces are conducted on an extravagant system, without regularity or proper supervision; in addition, money is expended on matters of no pressing importance, and in keeping up numbers of useless tax stations. The Censor owns, as have all those Chinese officials who have had the boldness to state their views, that the method of levy is most wasteful and oppressive. The *Likin*, he observes, is an oppressive institution, only continued in force owing to the necessity of providing resources to meet the army expenditure in the North west, and we may add largely drawn on to support a grain trade along the coast. Its evil effects are most conspicuous in the two Kiang, the two Hu, the two Kwang, the Min-Cheh, and Szechuen provinces, in fact, where trade would naturally flourish were it left to itself. The suggestions made are of a practical nature—the removal of useless stations, the incorporation of others, their abolition where possible. Above all, he recommends the introduction of a system of audit. At present there is no check on the vagaries of an officer. He levies what he can get, and often so much that he puts a stop to traffic. Were the officer placed in communication, and regular accounts kept and audited, the worst features of the case would certainly be removed. But what official in China could be trusted to audit? The military operations in the North-west are acknowledged to be the great drag on the resources of the Empire, and to afford the excuse for the continuance of the *Likin*. They are useless, inglorious and unprofitable. It would be far better to make peace with the Ameer, and balance the debit and credit of the exchequer.

CUSTOMS TRADE REPORTS, 1873.

III.

If, leaving the mainland, we examine into the trade of Formosa for the year under review, we shall find but little more cause for congratulation than we have done hitherto. The hopes which were held out of an increment in the trade of this fertile island have certainly as yet borne but little fruit. The Commissioners of Customs at the various ports do not as a general rule care to enquire into native malpractices with regard to the trade of their ports, yet now and then the very necessity of the case demands some allusion. Of the two ports in Formosa, the more northern, Tamsui, with its dependent, Kelung, have the most satisfactory report to offer; the other, Taiwan, and its dependency Takow, showing a marked retrogression. With regard to the former, Governmental exactions on coal and tea seriously fetter trade, and the more so, that they seem to be imposed in the most arbitrary manner. Thus, taxes on tea were raised to such a degree as to seriously interfere with the export. Likin taxes as usual, though low in proportion to the outrageous duty leviable under the tariff, were thus sufficiently high to check the production of an article on which a duty amounting to 50% on the cost was clearly chargeable. To meet the useless expense of building city walls at Banku, the lekin on opium was raised $12 per chest, "while the wealthy of the district were being called on to disgorge large sums towards the same object." These are some of the causes which keep back trade in China, and result in the exchequer being in a virtual state of bankruptcy. The principal export from Tamsui after coal, is tea. Of it 15,600 piculs were exported by foreign vessels during the year. The memorandum included in Mr. Hobson's report does not lead us to form a high opinion of the ability of the foreign buyers at the port. First crop tea was going literally begging at the early part of the season; producers, after paying a likin of $1.50 per picul for the dried leaf, being actually willing to sell at $10 to $15 per picul. So little use was made of this opportunity that it did not pay the producers to cure their tea on to pick the second crops, and the tea would have been left to rot, but that the native speculators at Foochow brought up the decaying leaves, scented them and sold them at Foochow at Tls. 14 to 18 a picul. Stimulated by this action on the part of the natives, the foreign buyers went in in the autumn with a zest, and bought inferior teas at prices ranging for $33 to 45. The report does not say what the natives thought of this strange method of conducting business, admirably adapted

to raise the tea market at Tamsui for the future. The export in foreign cottons dwindled from 19,500 piculs in the previous year to 15,600 in that under review. This latter was, however, supplemented by an export in junks to Foochow of some 3,500 piculs. Much of the crop was, however, lost. The export of coals showed a considerable increase, and the usual talk was current of the Government desiring to import machinery. When will the Chinese Government see that the encouragement of private enterprise is in these matters the best policy? The reduction of the monstrous duties, and the satisfactory settlement of the amounts to be paid as royalty, together with some sort of guarantee that it shall not be in the power of every petty mandarin to exact squeezes at his pleasure, would very soon result in the importation and use of foreign machinery, without the fear that its use is only to be made another engine of governmental oppression. An appendix giving statistics of the number of junks trading with the ports of Tamsui and Keelung, and their respective cargoes and destinations, is of use to us in forming some idea of the native trade. 518 junks entered, and 491 cleared at Keelung; 486 entered and 500 cleared at Tamsui. Salt, cotton, samshu, nankeens, salt fish, and wheat formed the bulk of the inward cargoes; coal, hemp and a little sugar of the upward.

The Report on the trade of Taiwan is preceded by an interesting description of the island by Mr. James H. Hart. It gives a short historical account of the conquest, and proceeds to describe the native tribes now being rapidly dispossessed by the Chinese. A description of the ports of Anp'ing and Takow follows. Th trade of Taiwan may be said to mainly depend on the export of sugar, scarcely any other article appearing in the list of exports. Exporting, as it does on an average, upwards of half a million piculs, we have here the foundation of a prosperous trade. In point of fact, it has been shown that Taiwan can compete successfully in the markets of Japan, California and the Australian ports. It is, therefore, a matter of regret to find that with so favourable an opening the export has actually fallen off. The greater part of this loss was to be attributed to bad weather in 1872, but considering that the trade is a new one, and the island practically undeveloped, it might be expected that energy and enterprise would have led to a more satisfactory result. Energy and enterprise are, however, steadily repressed in China, and Taiwan will probably find itself so unequally weighted in the contest that it will have to retire before less advantageously situated, but better administered, ports. The import trade at Taiwan is not of a very important description. Opium is the principal staple, 2,015 piculs having been imported. The trade in piece goods is unimportant, and that in native goods finds it cheaper to make use of native craft, the foreign customs apparently proving no protection from native squeezes. The lack of enterprise with regard to sugar is as apparent as in the matter of coal mining. The rude methods made use of for centuries, and which result in the loss of a large percentage of the saccharine matter, are still in full swing. To compete successfully in a foreign market, sugar ought to be prepared in foreign manner. It is difficult, from the experience of Hongkong, to decide who are in this matter the more obstructive, the Chinese Government or the Chinese sugar dealers. A rich field in a new country is here open for enterprise, but all those most to be benefitted resolutely set themselves to repress it.

REVIEW.

The *China Review*, or Notes and Queries of the Far East—November and December, 1874.

The number before us opens with a very interesting paper by Mr. Lister, on "Chinese proverbs and their lessons,"—interesting both from the pithiness of the sayings themselves, and from the remarkable coincidence of many with proverbs familiar to us in the West. As, for instance, we say in England that "necessity is the mother of invention," so the Chinese say that "need breeds device." Where we say "like master like man," they say "like mistress like maid;" and as we have discovered that "every dog has his day," they affirm that "every potsherd has a chance of being turned over." More interesting, however, than those instances of similarity, are perhaps the sayings that apply more distinctly to Chinese life. Mr. Lister quotes these by the dozen, and none more pithy than those referring to the administration of justice. At first sight these seem hopelessly and irreconcileably conflicting, but further research shows there are two well-defined classes—those that picture public business as it is supposed to be, and those that treat of it as it is. And these two sets of sayings exactly express the contradiction which is always puzzling us, between Chinese theory and practice. Judged by one, "China is such a Utopia of philanthropic Government and spotless administration as this world has not seen." Judged by the other, it is a sink of official corruption.

Says the Literate, for instance: "The sword of justice is swift, but will not wound the innocent." Say the people, on the other hand, "Thirty blows right or wrong;" and: "Pull in your head or stick it out, off it must come."—Says the Literate: "When Princes walk purely the people are happy;" or, "Before you are your children—the people; above is all-seeing God."—Say the people: "The magistrate is not so dreadful as his man." "The people are a flock of sheep delivered over to the wolf and the tiger." "Perhaps," observes Mr. Lister, somewhat incisively, "something not altogether alien to these two classes of proverbs may be found in our own country. The compliments often passed from the Bench to the Bar, and from the Bar to the Bench may stand for the Utopian maxims on things as they ought to be; the suppressed growls of the public, and the deep curses of suitors, for comments on things as they are. If lawyers, instead of merely hearing what they say "on their scrannel pipes of wretched straw" of each other, as to how society in general and justice in particular cannot get along without them, were to study (without fee or reward) what society in general and litigants in particular say about them—not about individuals of course, but about the system of shameful delays, and shameless costs, of mere sacrificing of justice to the tithing of legal mint, anise, and cummin—we might (if costs were once and forever abolished) have such a Reform of Law as we are not likely to have whilst Law is so paying an iniquity as it is."

Mr. Lister goes on to quote several proverbs exhibiting a belief in an over-ruling Deity, more clearly defined than the Chinese are usually believed to entertain, and a number of others taking a general outlook upon life and manners. But we have already dwelt too long on his interesting essay, and must go on to notice the other contributions.—A deservedly flattering review of Dr. Williams' Syllabic Dictionary follows, and is succeeded by further translations from the Liao Chai Chih-yi, which will be read with the curious interest that tales of magic and wonderland always have, for the most sceptical as for the most credulous. The adventures of the novice who went to learn magic in the Lao mountain, are on a par with the narratives in the Arabian nights. The tale of the "An Family" is flat; it is admitted indeed, in a foot note, that its only point is to illustrate to home readers the profound regard paid to parents by Chinese. A man marries an amiable and hardworking wife, and lets his mother scold her out of the house. Bye-and-bye his brother marries a tartar, who turns the tables on the old lady. The latter then relents, falls ill, invites her first daughter-in-law back, and all is well. What we are to admire, is the filial obedience which sacrifices a good wife to an ill-tempered mother.

"Notes from the Red Book," give a sketch of the kind of information to be found in the Chinese Civil Service list. This is virtually a sort of official Gazetteer. A concise description is supposed to be given, of the geographical position of each department, "its distance from Peking, number of districts, quantity of grain contributable to Government, salaries attached to office, customs of the people and products of the prefecture." The writer takes as an instance the province of Kiangsi, and gives some translations from the official record. But he points out that the information is often very antiquated, and that the people are painted in colours altogether too favourable for belief. For instance:—

"In the southernmost department of Managan *the disposition of the people is honest like those of old, their customs plain and simple.* But our Kiukiang friends speak of them as if they were little better than the untutored Indian, whom they seem to resemble in their spirit of lawlessness and independence. It is said that they generally go about armed, are very revengeful, and frequently kill one another to satisfy their honor. The offenders are rarely punished, as few care to bring them to justice."

"Meng-Cheng's journey to the Great Wall," continued from the last number, concludes a pathetic tale of oppression under Tsin Chi Hwang-ti. The hero is dragged off to aid in building the Wall; escapes; marries; is rediscovered on the very day of the event, dragged off again, and dies on reaching the scene of his labour. The heroine, Meng-Cheng, follows her husband on foot; curses the emperor

aloud when she reaches the spot where he is buried; is arrested for the sacrilege; taken before the emperor, who falls in love with her beauty; and accomplishes a revenge which we leave our readers to gather from pages of the Review.

Mr. Giles concludes the second book of the "Instructions to Coroners," which he has been lately translating. The Instructions are undeniably dry reading, but their very quaintness gives them an interest which will induce many to wade through them. Here and there, too, a pithy anecdote relieves the dullness. We quote one:—

"One shrewd coroner, who had identified the wounds on a murdered man as inflicted by a sickle, and had found out that a certain man had quarrelled with deceased about a loan of money, went to the village where the suspected man lived, and caused every man to produce his sickle, laying them on the ground before him. In a little while he turned to the suspected man and accused him of the murder. He denied his guilt with many protestations, but the coroner pointed to the *flies* which had singled out his sickle among seventy others, *attracted by the smell of blood*. The murderer confessed."

Mr. Herbert Allen translates a Chinese notice of the Shiogoon Taikosama, which has interest with reference to the late Formosan affair. The paper in question was written in support of a warlike policy, about the year 1594, and displays much the same bombast which characterises references to barbarians in the present day, though mixed up with some good advice. The cost of invading Japan, it is argued, would be less than that of prolonged preparation for invasion—the prospect of which was then weighing on the Chinese mind.

Mr. Steere adds another to the many interesting sketches we have lately had, of the aborigines of Formosa. He found among the more civilised of these, some old manuscripts in Roman letters, showing better than any other evidence how great was the impression made by the Dutch during their occupation of the island. The documents are in the ancient Pepo-whan language spelled out in Roman letters. They are apparently deeds and contracts, and the earliest of them was dated 80 years after the Dutch were driven out. One of them is dated 70 years later; showing that, for at least 150 years, the natives kept enough of the knowledge gained from the Dutch, to write their own language in foreign characters. It is fair to infer that much other teaching must have also retained a lingering hold, far into the eighteenth century.

The research displayed in the Chinese Readers' Manual, and the value of the boon Mr. Mayers has confered on all Students of Chinese, are fittingly acknowledged by Dr. Eitel in an able review. —Short notices of one or two other books, and a few Notes and Queries conclude an interesting volume.

Outports.

NEWCHWANG.

I have no news to send you from hence. The Port is quiet and peaceful. The Customs' Corps, numbering 50 men and officers, have daily drill, the big gun sent up by the British Admiral having been handed over to Capt. Man. It is a great pleasure to witness the evolutions of this miniature army, the training of which reflects the greatest credit on the General and his Captains. The Chinese, judging from the wonderfully quick manner in which they acquire the duties of a soldier, have no doubt a natural aptitude which is not met with in Europe; for it must be remembered that the commands are in English, and they have to learn the meanning of the words without the knowledge of the language. The community have reason to be grateful for the liberality of the Customs in keeping up a body of efficient men who are certainly a protection to the Port, and we are very fortunate in having the wishes of the Inspector-General so well carried out by Capt. Man, Lieut. de St. Croix and other officers. In a case of emergency we feel that, led as they would be, by foreigners of undoubted courage, our Tartar soldiers would prove that they are as good as they look.

15th January.

TIENTSIN.

On the 10th instant we received at Tientsin the *Peking Gazette* of the 16th January, from which we learnt that the Chief Ministers of the Privy Council (Keu-ke-ta-chin) had received an Imperial Decree, informing them that the two characters 光緒 (Kwang-seu) had been fixed upon for the name of the New Emperor's reign. In the Gazette of the 17th January, there is a memorial requesting the promotion of Le Yuë-kwei, a native of Tientsin, and a subordinate official in the Keun-ke-choo, or Privy Council, from E-siu (the name of Prince Kung), Wăn-seang, Paou-keun, Shin Kwei-fun, and Le Hung-tsaou, all of whom during the reign of Tung-che formed the Cabinet of the Privy Council. From this memorial we know, then, that Prince Kung belongs to the Cabinet under the new régime; a matter of interest to the foreign world, as he is considered friendly disposed to foreign nations. With the exception of Le Hung-tsaou, teacher to the late Emperor, the other four members of the Cabinet are all chiefs of the Tsungle Yamun.

In the Gazette of the 18th January, mention is made of Tsung Kwo-tseuen, a brother of the celebrated statesman Tsung Kwo-fan, and formerly Governor of Hoopih province, having arrived at the Capital and presented his respects to the Throne. In the same Gazette, we read an Edict respecting a memorial from Shin Paou-chin, lately Commissioner to Formosa, in regard to the Japanese occupation, advising that hereafter the Governor of Fukhien shall reside at Formosa instead of at Foochow, and be held responsible for matters in the island. The Regents—the Empresses Dowager—command the Boards to deliberate on the proposition, and report later to the Throne on its practicability and advisability. I think there cannot be a doubt of its being a very sensible scheme; and one which, if carried out, will greatly contribute to bringing the island into closer connection with the mainland. As the Governor-General of the provinces of Fuhkien and Chékiang resides at Fuhchow, there is one high provincial authority always on the spot at that important port, to preserve order, and command the military in doing so should disturbances arise.

In the Gazette of the 19th January, there is a decree appointing Lew Kwăn-yih 劉坤一 acting Governor-General of the Two Kiang (provinces of Kiangsoo, Kiangse and Anhwuy) and acting superintendent of the Foreign affairs of the Southern Department of China.

On the 23rd instant his Excellency Sun-sze-ta, the acting Customs' Taoutai, acquainted the Consuls that he had received a dispatch from the Governor-General, at Paouting-foo, informing him officially of the death of his late Majesty Tung-che; and directing him to commence mourning on the 24th instant and continue to do so for twenty-seven days (till the 20th February). The Taoutai further intimated that the transaction of business personally would, till the expiration of that period, be postponed; but should any affairs arise requiring immediate attention, then it could be transacted either by despatches or by notes. His Excellency, his subordinate officials, and all his official and private servants, went accordingly into mourning on the date fixed. Proclamations were also, during the afternoon of the 23rd instant, posted up in different public places by Jin-urh-hway, the district magistrate, making known officially to the Chinese population the death of the late Emperor, commanding them to go into mourning for 100 days from the 24th instant, prohibiting them during that period from shaving their heads, play actors from performing, the people from marrying, &c., &c., as is customary on the death of the Sovereigns of China. On the 24th instant the Consular flags at Tientsin were hoisted half-mast high, and I understand that they will continue to be so during ten days. The Legation flags at Peking, we have just learnt, were likewise hoisted half-mast high for ten days, from the 15th instant, as a mark of respect to the memory of the Emperor. The Chinese despatches and other official communications have been put into mourning by the seals being changed from red to blue. The red official cards have been exchanged for cards of a yellow ochre or saffron color. At the approaching Chinese new year's day there will be no personal intercourse between the Consular officials and the Chinese authorities, owing to the latter being in mourning and having their yamuns in mourning; the only courtesies will be an exchange of mourning cards on the occasion.

At daylight on the 24th instant, all the Chinese officials and military officers of Tientsin repaired to the Lung-ting Temple, to wail for the demise of the Emperor.

The population of Tientsin appear quite reconciled to the new order of political affairs. Food and fuel are cheap, and the lower classes, having had full employment during the past year, are at present in comfortable circumstances, and consequently contented. We are at Tientsin enjoying complete tranquillity. His Excellency Li Hung-chang continues to reside at the capital of the province, Paoutingfoo; and will no doubt do so till this river is open for navigation, when he will return here. There have been as usual a great many rumours afloat regarding political affairs; but I know them to be void of foundation. People have actually come here from Peking, and letters have come from Peking, saying Li was at the metropolis; but we here know him to be at Paouting-foo. One rumor was to the effect that he had been called to the capital (Peking) to remain near the Emperor; and that the regents had appointed another official as Governor-General, but we know here that no such appointment has, at least yet, been made.

During the afternoon of the 23rd instant a paper hunt came off. I was unavoidably absent, but I later learnt that there was a large field—over twenty horsemen being present at the meet; and the weather being fine the affair was heartily enjoyed. Mr. Too, a Hibernian cross-country rider, got the brush.

Ice continues to be harvested every night, so we shall have plenty of it and cheap, next summer. The river ice this forenoon was 12⅔ inches thick. The thermometer at daylight to-day stood at 14° Fahrenheit. During the past week we

have had remarkably fine weather. Snow fell yesterday morning for half an hour, but in a couple of hours it had disappeared.

PURITAN.

January 25th, 1875.

FOOCHOW.

The Foochow market report of the 5th February says, 400 chests of Congou have been bought at Tls. 8 *a* Tls. 12½, reducing the unsold stock to 2,100 chests. The stock of Oolongs has been cleared at Tls. 13 to Tls. 17. The following is the comparative export to Europe, to date :—

	Total.
Season 1874-75	61,980,995
1873-74	54,864,663
1872-72	52,638,892

The O. S. S. Co.'s steamer *Priam* is expected to call about the 7th, and has freight engaged at £3 per 40 cubic feet. The ship *Golden State* arrived on the 30th ultimo, and is full for New York at £3 per 40 cubic feet. The *Northampton* and the *Tamesa*, both loading for New York, the former in Shanghai and the latter in Hongkong, are taking teas hence at a through rate of £3 per 40 cubic feet. The barque *William Turner* has completed her lading for Melbourne.—No sales of piece goods reported.

HONGKONG.

By the str. *Hector* we have Hongkong papers to the 9th February. They contain very little news. The *Ava-Rona* case had come again before the Court, but had been adjourned at the suggestion of the Judge, to allow some attempt at settlement to be made outside the Court. His Lordship suggested that the parties should consult on the terms on which the case should be referred back to the Registrar and merchants.—New-year's day seems to have been much more noisily observed in Hongkong than it was in Shanghai; and Chinamen appear to have been brought up by scores on the following day, and fined $1 each for letting off crackers out of hours.—A slashing yacht race for a "Jinkee Cup" has been won by the *Naiad*.—Another race, for a cup presented by Mr. W. H. Forbes, is to be run for this week.—The French Cathedral at Canton requires but little now to complete it; had it not been for the Chinese New-year holidays, it might have been ready for occupation within a few days.—H.M.S. *Iron Duke*, Capt. Arthur, the flagship of Vice-Admiral Shadwell, anchored in the Singapore roads, January 24th, and was saluted by H.M. ships in harbour.—The *Albay*, about which we have lately heard so much, has been at last raised. The *China Mail* says she was floated on Friday evening sufficiently to be towed up the harbour, and beached in the same position which was lately occupied by the *Leonor*. A junk loaded with stone was discovered to have been sunk with her during the typhoon, and lay just at her stern off the Praya, impeding a little the first attempts to tow her out of the position she had so long occupied.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

Jan. 16th.—The Court Circular records the presentation of a memorial from the Board of Astromony, naming the day fixed upon for the issue of the manifesto announcing to the people the decease of the late Emperor.

The Grand Council received a Decree in the Vermilion pencil, selecting from among the characters submitted, the designation Kwang Sü 光緒 as the style to be adopted from the first of the coming year as the style of the reign.

Jan. 17th.—A Decree, in reply to a memorial from the princes and nobles, urging that the announced determination of His Majesty to observe three years of mourning for his deceased predecessor may be revoked. The grief which His Majesty feels is so profound, and the gratitude he owes so immense, that life-long mourning would itself be insufficient to discharge his obligation. He cannot bring himself to abate any portion of the three years of mourning which are, indeed, imposed by the ancient Ritual. The official body and the people will observe the regulations heretofore in force; but his Majesty will continue to wear the mourning garb for three years. (N.B.—The declaration repeated above is but a part of the routine observed on all occasions of the kind. After two further entreaties on the part of his ministers, the sovereign will declare that he yields to their persuasion, and will reduce the term of mourning to twenty-seven days, in lieu of the like number of months, which constitute the nominal three years of mourning).

Jan. 18th—(1)—A Decree. Shên Paochêng and his colleagues memorialize requesting that the Governor of Fuhkien be removed to reside in Foochow, for the more effectual discharge of his duty.—Let the proper Departments consider and report hereupon.

(2)—The Censor Hü T'ing-kwei 許庭桂 memorializes requesting that in view of the deficiencies in the funds supplied to the Imperial treasury, a Decree be issued appointing a commission of high officials to visit the Provinces, for the purpose of examining stringently the accounts of income and expenditure, so that wasteful outlay may be checked and provision be made for financial requirements. He begs leave to observe,—premising that established rules are in existence regulating the proper amount of the national revenue and of expenditure in all departments of the State, an annual surplus being in fact provided for after meeting the requirements of each year out of the revenue collected, — that during the reigns K'ien-Lung and Kia K'ing (A.D. 1736—1820), the treasury was abundantly supplied; and that notwithstanding the drain entailed in the reign Tao Kwang by the wars successively carried on in Turkestan and on the coast, which necessitated an expenditure of several tens of millions of taels, beside a still heavier expenditure on the annual requirements of the grain transport and the Yellow River works, there remained nevertheless, on a scrutiny being held in 1846 of the contents of the treasury of the Board of Revenue, a balance of the reserve fund amounting to twelve or fifteen millions of taels. During the reign Hien Fêng, excuse might be alleged on account of the prevalence of rebellion; but by the third year of T'ung Che (1864) the most productive regions of the South-east had been reduced to tranquillity, and all taxes and dues were collected as usual, whilst the revenue from sales of office, *li-kin*, and foreign Customs' duties, &c., well nigh doubled in amount the total derived from the regular sources of revenue (*i.e.*, land, rice, and salt tax). Whilst, however, the regular army had become, to all appearance a mere useless institution, irregular forces seemed to have been adopted as part of the established system, so that the maintenance of these levies has had to be provided for over and above the pay of the regular troops, which, alone, the Imperial taxation is designed to furnish. Insolvency is the inevitable consequence of this state of affairs. In the Censor's humble opinion, the finances can never be brought into order until the irregular levies are disbanded; but, if the provincial Governments are left to take this action as seems fit to themselves, the consequence will be that, as it appears, after repeated Decrees, the provinces will simply continue in their old routine, and treat the orders they receive as an empty form. With a view to provide a remedy, therefore, the Censor would, if permitted, suggest that a commission be selected by His Majesty from among high officers of ability and experience, who should severally visit the different Provinces, and take action in concert with the high authorities, in the same way as in the conduct of military inspections, to examine into the organization of the irregular levies and proceed to reduce their numbers with a vigorous hand. This should be done in such a manner as to bring the provincial forces, by disbandment or incorporation, down to the numbers allotted by regulation for the army of each province. This would be one of the means the Censor would suggest toward restoring financial efficiency.—The second branch of his subject, relating to revenue, is introduced by the remark that, as regards income from "contributions" (*i.e.*, purchase of office), the accounts can be checked by the certificates issued, but that as regards the war-tax on merchandize, or *li-kin*, no proper accounts are rendered, and the Board of Revenue has no means of exercising a supervision or audit over it. Taking, however, as a basis of comparison, the *li-kin* on salt, in appears that in the Liang Hwai (or North China) division of the gabelle, the quantity of salt which by regulation should be passed into consumption annually is 500,000 and odd *yin* 引 (364 catties each), upon which a tax is levied of Tls. 8.4. odd per *yin*, making several millions of taels from this source. Beside the Liang Hwai, there are the administrative divisions of Chehkiang, Fuhkien, Kwangtung, and Szech'wan, affording a total collection, under the head of this extraordinary impost, of several tens of millions of taels. When to this is added the war tax, the amount is more than doubled. The reason why, out of so vast a revenue, the amounts remitted to the Peking treasury are so insignificant, is, in great measure, the outlay allotted to the pay of the troops, but also, in no slight degree, the unnecessary expenditure on objects of no pressing consequence and on useless tax-stations. The Censor begs to observe that the *likin* is in its nature an oppressive institution, only continued in force owing to the necessity of providing resources to meet the army expenditure in the north-west. In order that revenue may be adequate, however, to the requirements it is intended to meet, useless expense must be done away with; and the Censor would therefore urge that the commissioners whose appointment he recommends should, in visiting the Two Kiang, the Two Hu, the Two Kwang, Fuhkien, Chêkiang and Szech'wan, the provinces where the *likin* taxation is heaviest, take action with the provincial governments in investigating the accounts of revenue and expenditure; and having established an average based on the accounts of three successive years, should draw up regulations thereupon to be submitted for Imperial sanction. Steps should at once be taken, with reference to all manufacturing enterprises of no pressing consequence, and useless and oppressive tax-stations, to effect reductions either by incorporation, or, where feasible, by abolition. (For rescript, referring this Memorial for consideration, see *Gazette* of 3rd inst.)

Jan. 19th.—(1)—A Decree, based upon a memorial by Kin-shun, commanding the army of Kansuh beyond the Wall, who has requested that rewards be bestowed upon the provincial authorities of Shensi, for their activity in maintaining the continual despatch of funds and military supplies.

The Board is directed to decide upon the proper mark of approbation to be bestowed upon the Governor of Shensi, and his subordinates are awarded additional steps of rank.

(2)—Decrees substituting appointments of certain princes for others made before the decease of his late Majesty, for the performance of the sacrifices at the State temples at the close of the year.

(3)—A Decree. Let the acting Governor-General of the Two Kiang, Liu Kwên-yih, act likewise as Superintendent of Foreign Trade.

(4)—Liu Kwên-yih, Governor of Kiangsi, memorializes with reference to the prayer of the Censor Têng K'ing-lin, who memorialized in 1873 proposing that the right of summary execution be withdrawn from the hands of local authorities. The Governor represents hereupon that, although many years have elapsed since the Province was the scene of warfare, crimes of violence are nevertheless frequently committed by disbanded braves, local budmashes, and the like; and he refers to the two plots for the levying of insurrection which were detected and crushed in the course of the last two years, as already narrated in the *Gazette*. For this reason, he urges that the time has not yet arrived when summary execution can be dispensed with in cases of brigandage.

(5) The same Governor memorializes requesting sanction to a congé of one month, on the ground of ill-health. During his campaigns in different Provinces he has suffered greatly from malarious influences, and he has been subject for years past to a troublesome and weakening chronic complaint, which has affected him seriously of late. Perfect rest for a time is enjoined upon him by the faculty.

Jan. 20th.—The Grand Secretariat (Nui Koh) handed in the Testamentary Edict. (The formal copy of the manifesto published on the 13th inst. in the name of the deceased Emperor. It will now be printed for issue throughout the Empire.)

The Princes and Ministers conducting the Imperial obsequies report that on the 28th inst., the coffin containing the remains of his late Majesty will be removed to the Kwan Têh Tien (a building at the northern extremity of the King Shan Park, behind the palace, devoted to the reception of Imperial remains.)

Jan. 20th.—The Governor of Kiangsi memorializes with reference to orders received from Peking, directing that for the winter collection of the rice-levy in that Province, endeavours be made to provide supplies for Peking in kind, or by purchase of rice for shipment out of the commutation-tax collected. The Board of Revenue had represented that the cost of rice per picul as purchased, freight included, is Tls. 2.3 to Tls. 2.6 per picul, and that as the *sêh* rice, which is the staple product of Kiangsi, is very inferior in quality to the *kêng* rice produced elsewhere, the price ought likewise to be lower; and further that as the experiment of shipping the Peking rice from Shanghai by the C. M. S. N. Co's steamers has proved successful, the same system might be pursued in Kiangsi, making Kiu-kiang the central point of delivery for shipment. The Governor represents, hereupon, that, commutation having been for so many years the rule in Kiangsi, it would be next to impossible to revert to the practice of collecting the tax in kind, or to collect part in kind and part in money. If rice must be had, however, the only course that seems open is to purchase grain out of the product of the tax levied under this head. At the same time, although the selling value of Kiangsi *sêh* rice is somewhat less than that of the *kêng* quality, yet the distance of 2,000 *li* which intervenes between the producing districts and the seaboard must be taken into consideration, as it involves additional expenditure for transhipment and freight. The difference, therefore, is not worth mentioning. It would also be impossible to commission the district Magistrates to buy up rice each in his several jurisdiction, since no granaries exist where the rice could be deposited, and it would be no easy matter, moreover, to obtain transport by hired boats to the central depôt. When rice was purchased and shipped last year by the Province of Chêhkiang, the transaction was effected at Shanghai by an official deputed for the purpose; and the provinces of Hunan and Hupeh have adopted the same plan, the C. M. S. N. Company contracting for the transportation to Tientsin and delivery at T'ung-chow. Kiangsi would now follow a like system; and as the expectant Taotai Shêng Süan-hwai, one of the managers of the Steamship Company, was passing through Kiangsi on his way back to Shanghai from Hupeh, the opportunity has been taken of consulting him. The limit prescribed by the Board of Revenue for the rice shipped from Kiangsu and Chêhkiang was that, for prime cost and freight combined, the maximum outlay should not exceed Tls. 2.7, treasury weight, per picul; but, under the new regulations imposed since last year for the rice-levy in Kiangsi, the amount of commutation is far from being adequate to this rate. The amount of levy sanctioned is 3,420 *cash* as the equivalent of one picul of rice; whilst in Kiangsu, which lies so much nearer the coast, 4,500 cash is the sum allowed to be levied; and in Honan, much nearer to Peking, the fixed equivalent is 3 taels. The total amount collected annually in Kiangsi for the supply of rice-money to the troops, and for the grain-tribute to Peking, should be Tls. 390,000 and odd; but the actual collection, owing to remissions and payments in arrear, has been no more than about Tls. 200,000 and odd. Of late years there has been due from this source an annual contingent of Tls. 240,000 to the troops in Kansuh, and Tls. 20,000 to the Ts'ing-chow and Hwai-ngan local governments, the requirements being thus in excess of the revenue accruing. If now 80,000 piculs of rice are to be purchased and shipped, the cost, at the rate mentioned above, will be Tls. 216,000; and it is proposed that, against this, the province be allowed to keep back the money contingent due for year 1874 to the amount of piculs 80,000, at the fixed equivalent of Tl. 1.3.0, equal to Tls. 104,000, beside Tls. 40,000 which would be payable for inland transport, at the fixed rate of 5 *mace* per picul. There would then still be a deficiency of Tls. 70,000 and odd to be made good from other sources. If the proposition he approved, the Governor will appoint officials to make the necessary purchases and superintend the shipment at Shanghai.—Rescript: Let the Board of Revenue take note.

Jan. 21st.—(1) A Decree of the Empresses, referring to the prayer presented by the Prince of Ch'un for permission to retire from all his offices. This having been referred for consideration on the part of the princes, nobles, and ministers, they have now reported that His Highness's request should be granted, and that he be allowed to resign his various duties, but that his name be still submitted by the Imperial Clan Court, in regular course, for the performance of annual sacrifices at the Eastern and Western mausolea. He should likewise take it in turn to attend the religious ceremonials at the various ancestral temples, &c., but should be excused from taking his place in the ranks of attendance to offer homage on His Majesty's enthronement and on the Imperial birthday. In reward for his manifold and distinguished past services, it is recommended that he be raised to the rank of an Imperial prince of the first order, with perpetual hereditary succession in the same degree; and it is further suggested that, in view of the great magnitude of the works now in progress at P'u-t'o Yü 菩陀峪 (the site selected for the construction of mausolea for the two Empresses), His Highness be commanded to continue his superintendence in that quarter. The Empresses confirm the recommendations herein proposed, and, having by a separate Decree bestowed the command of the Imperial Musketeers, lately held by the Prince, on Prince Peh-yen-na-mo-hu and the Duke King-show, they enjoin upon His Highness, whose long and successful tenure of his command they warmly appreciate, that for the future he should advise in all things with his successors in the command.

(2) Their Majesties the two Empresses decree that a gratuity of two Taels of silver each be bestowed from the Household treasury upon the guards of the Equipage department, who reverently escorted His Majesty to the palace on the 12th inst., on his succession.

(3) A Degree appointing Peh-yen-na-mo-hu and King-show to the command of the Imperial Musketeers.

(4) A decree, based on a renewed memorial from the princes and ministers, urging His Majesty to reconsider the determination of observing three years of mourning for his deceased predecessor. It appears that on the decease of the Emperors Kia K'ing, Tao Kwang, and Hien Fêng, the entreaty of the ministers of the day prevailed over similar resolutions on the part of the successors to the Throne, and His Majesty, profound as is the grief he feels, does not feel justified in disregarding the ancestral precedent. He will, therefore, wear the full mourning garb of white for one hundred days, and plain robes for 27 months. Let not the princes and ministers obtrude further solicitations on this subject.

(5).—A succession of decrees, conferring a number of court and military appointments or transfers.

(6).—The Governor-General of Shensi and Kansuh memorializes on the decease of the ex-comptroller of the Salt Revenue of Kwangtung, Chun K'ien-kün, whose virtues and unselfish patriotism he warmly eulogizes. In the course of last year, as reported at the time, he contributed Tls. 40,000, the accumulations of his salary, to the relief of the distressed poor in Kansuh and Chihli; and having now departed this life, at an advanced age, it is requested that his biography be included in the State chronicles, and that materials be supplied for this purpose by the Governments of the provinces in which he has served.

Jan. 22nd.—(1)—A Decree. The Board of Ceremonies has memorialized Us respecting the day for Our enthronement and the ceremonial attending the announcement of Our accession. On perusal of this, Our grief has been revived anew with added poignancy; but, considering how His Majesty now departed hath given over to Our keeping the glorious ancestral heritage, We have been moved to consent to the request. Let the coming year be the first of the reign Kwang Sü, and let the great ceremonial of the enthronement and proclamation be proceeded with at 5 a.m. on the 20th day of the 1st Moon (25th February), the auspicious day selected by the Astronomical Board. Let all preparations be reverently made in conformity with former usage by the proper departments.

(2) A Decree, renewing the privilege granted in 1861, on the accession of the late Emperor, to His Majesty's uncles the Princes of Tun, Kung, and Fu, of exemption from doing homage by the act of kneeling and knocking the head on the ground on ordinary occasions.

(3) A Decree of the two Empresses appointing a commission of high dignitaries, presided over by the Prince of Kung, to select a fitting spot at either the Eastern

or the Western Hills for the mausoleum of His late Majesty. The Prince of Kung is exempted from the duty of inspecting the site in person. The remainder of the commission, headed by the Prince of Ch'un, are to inspect the locality and prepare drawings.

(4) A Decree of the two Empresses insisting upon the retention by the Prince of Ch'un of the patent of Imperial Prince of the first order, with perpetual succession in the same degree, which His Highness has begged permission to decline. An additional month's congè is granted him for the care of his health.

(5)—Memorial (presented on the 13th instant) by the Princes, Nobles, and Ministers, headed by the Prince of Li, the senior of the hereditary Princes of the Empire, in which the two Empresses are besought to assume the functions of a Regency. See Gazette of 15th instant.

(6)—A memorial by the Grand Council with reference to the guards to be appointed to do duty in attendance on the coffin of His late Majesty, in conformity with former precedent.

(7)—A memorial by the Prince of Ch'un (presented on the 13th inst.), in which, after expatiating on the devoted loyalty which inspired him toward His late Majesty, he proceeds to state that on gazing upon the Imperial features after decease, his vitals were rent with the agony of grief, and his strength failed him utterly. He nevertheless strove to bear up for the more effectual discharge of his duty, when he was suddenly overwhelmed by the news that their Majesties, by their benign mandate, had chosen his son to be successor to the Throne. Stupefied by this intelligence, he became entirely helpless, and when carried to his home he remained trembling and agitated as though bereft of reason or as one in a dream. The complaints under which he has heretofore laboured have been revived in consequence, and he is compelled to throw himself on the merciful consideration of Their Majesties the Empresses, whom he entreats to grant him the indulgence which can alone permit him to prolong his days, and allow him, wasted and useless in his rank though be be, to continue in existence on the face of the earth. He entreats at the same time that his double allowance as an Imperial Prince may be withdrawn. (For rescript see *Gazette* of Jan. 14th.)

(8)—The Prince of Tun and his colleagues memorialize requesting the abrogation of the honours conferred in celebration of His late Majesty's apparent convalescence.

Official Papers.

MR. T. T. COOPER ON TRADE WITH WESTERN CHINA.

To the CHAIRMAN OF THE CHAMBER OF COMMERCE, *Shanghai*

SIR,—As one not altogether a stranger to your Chamber, especially in connexion with the trade and trade routes of China, I feel that I need no excuse to enable me to enter upon the discussion of several important facts bearing especially upon the extension of the already established trade of China.

While this trade is of paramount importance to the commercial community of Shanghai, and those European Manufacturers who supply the goods for your market, so little is generally known in Europe by the commercial and manufacturing body at large, of the economical principles on which the trade now and for the future must exist, that it is not to be wondered at if grave mistakes are made in the advocacy which has been used to induce Her Majesty's Government to interfere in one of its departments, for the extension of our commercial relations with China.

I allude directly to the misdirection of the pressure brought to bear on Her Majesty's Indian Government by the Chambers of Commerce of England, for the purpose of opening up the so-called Western China trade, a project which, though it appears calculated to increase our commerce, is, I beg leave to observe, highly prejudicial to the legitimate extension of our trade with China.

In order that this may be made clear, it is necessary that I should go somewhat into the details of the Western China trade, premising, however, that your Chamber is as well informed on that subject as myself.

It is a well known fact that the supply of Piece Goods which now go to Western China *viâ* the Yang-tsze River, is purchased out of the proceeds of the Exports from the Western provinces, which Exports are chiefly for native consumption in the Central, Eastern and Northern Provinces, and do not, except perhaps in the minutest degree, influence the export of produce shipped from the China ports to Europe.

Seeing that the bulk of Western produce finds a natural and easily accessible market in the Eastern provinces, and that this produce is not suited to the European market, this fact should not be lost sight of by those interested in the China trade.

So far from this fact being taken into consideration by the home Chambers, when pressing the question of Government aid in extending our commercial intercourse with China, it is entirely lost sight of, and the most strenuous efforts are made to draw this so-called Western China trade to the port of Rangoon, in Burmah.

I would, with the most profound respect for that commercial body to which your Chamber belongs, submit that, in thus striving to divert the natural course of the Western China trade, the united Chambers of England have placed themselves in the position of the dog in the fable; having dropped the substance, they are striving to lay hold of the shadow, and so long as they strive for an impossibility in the West of China, so long will their powerful influence be diverted from the important question of the extension of our already established China trade.

Your Chamber is not perhaps aware of the arguments put forth by ill-informed enthusiasts, in favor of diverting the Western China trade to the seaport of Rangoon, and in order that your Chamber may be better able to take steps to re-direct the influence of the various European Chambers to the important object of extending the trade of the seaports of China, I will state concisely the arguments which have gained for his visionary project an unfounded and dangerous importance.

First, it is said that if by a railway the produce of Western China could be brought to Rangoon, the difference in the rate of freight and time between the ports of Europe and the ports of Rangoon and Shanghai would be greatly in favor of Rangoon.

The answer to this statement is not a difficult one; it is a law in the practical economy of Commerce that the rate of freights to and from those ports which have the greatest Export and Import are, on an average, lower than to and from those which have a lesser Export and Import, while the enormous preponderance of trade which your ports would have over Rangoon (even in spite of the division of the Western China trade) disposes of the question of freight. The difference in time is of no consequence on the face of those economic conditions which draw the produce of the western provinces to the North and East of the Empire.

Second, it is urged that Western China could produce much that is suitable for European markets, and this Export would go to form a large trade in European Piece Goods.

In answer to this arrangement, I have only to recall to the recollection of your Chamber the fact that a twenty-four years' constant internecine warfare has only just been brought to a close in Yunnan; and then to ask, is there a population whose wants are to form this large trade? especially in a province which is amongst those less densely populated, in a very great degree, than those of the East of China.

In disposing of the allegations in favor of diverting the Western China trade, I would submit that the keen observation which the European commercial body undoubtedly possesses, would, were it rightly directed, shew that it is not so easy to divert the course of a long established and flourishing trade; and in the case under consideration I am fully persuaded that it would be an easier task to divert the course of the great river Yang-tsze.

I now turn from considering the misdirection of the influence of our home Chambers, to the consideration of those events which may be termed its active and prejudicial results on the already established trade.

In the year 1868-69 the Indian Government, influenced by the laudable desire to increase the commercial prosperity of its dominions, and acting immediately under pressure brought to bear upon it by the Chambers of Commerce of England, started an expedition from Burmah to Yunnan. Fortunately, the Indian Government was better informed of the condition of things in China than the Chambers, otherwise that expedition might have been the cause of as great a political blunder as it was a great commercial farce.

The greater portion of Western China was in the hands of Rebels to the Imperial Government, and but for the care taken not to let the Expedition enter into any negotiations of a political nature with the then Rebel Government, complications might have arisen which would have seriously affected our friendly relations with China and the trade already existing there.

Surely this misdirection of the commercial influence, based on the Chambers' want of knowledge of the state of affairs in China, is greatly to be regretted, and the more so when we consider that this influence has from that time been solely interested and active in pressing the the question of further Government interference in the same direction.

At this present moment, the Indian Government, acting under the same pressure, has despatched another expedition to Western China, the interest in which entirely shuts out of the mind of the home Chambers the important question of the extension of our trade in Eastern China—a fact which cannot be too much regretted, seeing that if the same steps were taken by the home Government to extend that trade, an incalculable benefit, both politically and commercially, would follow.

The only thing that the home Chambers can congratulate themselves on is the fact that the present Expedition will bring back with it reliable information, and will, if successful, add to our friendly intercourse with the Mandarins of Yunnan.

Viewing the liberal and energetic conduct of the Indian Government in its proper light, I cannot understand why, if that Government can take active measures for the opening up of the Western provinces to our trade through Burmah, the home Government cannot take some steps to open up the towns of the upper Yang-tsze; for clearly no more complications can arise out of the action of the one department of our Government than the other.

As an instance of the complete indifference existing in the minds of the home Chambers with reference to the already established trade, I would bring to your notice the fact that a statement in the trade report of Burmah for last year, to the effect that a trade in European salt between that country and Western China

was growing up, was made the subject of congratulatory notices in the papers of some of our manufacturing towns, while the fact that you in Eastern China are not allowed to trade in salt is viewed with complete indifference.

With such facts under contemplation, may we not ask why the Chinese Government, which prohibits the importation of salt through the Eastern ports, permits the import of that article from Burmah into Western China.

A fair answer to such enquiry would be found in the statement that official and commercial energy and influence is solely directed towards an impossible achievement in the West, while the already established trade in the East of China is left to take care of itself, and is totally void of interest to those who should leave no stone unturned to increase it.

Finally, Sir, I would not wish to be understood as opposed in any way to efforts being made to increase the commercial relations between Burmah and Western China; on the contrary, I watch with interest all progress in that direction, feeling sure that in years to come both countries will be benefited by it. But I would urge upon your Chamber the necessity of taking such steps as shall rescue your trade from a neglect which it at present suffers from. As an enlightened and well-informed body on the spot, it should by dint of constant communication with the principal Chambers of Europe, so remove the indifference and ill-founded ideas prevalent among those bodies as would in a short time re-direct their attention and powerful influence to the more rational object of increasing the trade already established.

By these means only will China trade receive proper attention, and be increased to such proportions as shall make it not only a greater source of wealth to all the countries participating in it, but a powerful agency in the regeneration of the giant Empire of China.

I am, Sir,
Your obedient servant,
T. T. Cooper.

London, 18th October, 1874.

Public Meetings.

SHANGHAI MUSEUM.

Minutes of Meeting No. 3 of the Museum Committee, held at the Asiatic Society's Rooms, 9th February, 1875.

Present—Messrs. Cordier and Stronach, and Pryer, Hon. Secy.

Minutes of the last meeting were read.

The Secretary stated that, as requested, he had communicated with Mr. Quekitt who had kindly consented to join the committee, and with Dr. Burge, who declined.

The Secretary then read a list of contributions, principally ornithological, from the following gentlemen:—Messrs. H. Miller, W. L. Clarke, W. J. Herdman, J Bonabeau, H. F. Ramsay, W. W. Russell, J. P. Bisset, Dr. Carmichael, A. J. Little, A. W. Maitland. A. Broom, P. C. Boysen, G. G. Hopkins, J. F. Seaman, W. M. Bradley, G. Bovet A. Thurburn, J. B. Manson, F. Reid, R. J. Forrest, A. S. Triggs, Rev. J. Thomas, W. Hamilton, E. Starkey, J. Dent, J. Bois, J. H. Vail, E. Tobin, E. Ward, F. A. Groom, E. J. Smith, M. Hawtrey, W. Bean, B. Dallas, J. M. Taylor, C. G. Frith, Capt. Barton, E W. Rice, J. Swinhoe, P. Dumaresq, J. Vaughan, J. F. Rodewald, Rev. Churchill, D. Encarnacao, H. B. Endicott, H. E. Amoore, J. Crofts, A. A. Campbell, W. St. Croix, H. Reynell, Capt. Deslandes, W. F. Lay, A. Davenport, H. Pryer, J. J. Cann, E. P. Hague, J. J. Tucker, F. Wheeler, and S. Campbell

All since the 2nd Dec.; many of these gentlemen have contributed several times.

Attention was drawn to the present mode of lighting the Museum; the windows are so placed that any large case standing in the middle of the room would obstruct the light from those behind it. It was suggested that a large skylight would remedy this defect. Left over for future discussion.

Mr. Cordier handed in a list of books on Natural History of Mr. Holdsworth's, which would be suitable for the Museum Library. The Committee admitted their value, but some of them being very expensive works, and the funds at their disposal being limited, it was decided to offer for part of them only.

Mr. Voelkel having very kindly offered to make a collection of plants for the Museum, the Secretary was instructed to convey the thanks of the Committee to him.

MINUTES OF MUNICIPAL COUNCIL MEETING ON 2ND FEBRUARY, 1875.

Present:—Messrs. F. W. Lemarchand (in the chair), G. J. W. Cowie, W. Kidner, R. Mackenzie, S. D. Webb, and the Secretary.

The *Summons* calling the meeting was taken as read.

The Minutes of the last meeting were confirmed and signed.

Volunteers—Drill Sergeant—Read letter from the Military Secretary at Hongkong, stating "that there will be no objection to a non-commissioned officer being temporarily detached for the instruction of the Volunteers at Shanghai in the Martini-Henri Exercise."

Referred to the Defence Committee.

Shanghai Mounted Rangers.—The election of Mr. H. Savage as Captain of the Shanghai Mounted Rangers was confirmed.

The Cash State for the week ending 30th January was laid on the table for inspection.

"Tunsin" Property—The agreement for the sale and purchase of the property being now ready for execution, a formal resolution was passed authorizing the Secretary to sign it on behalf of the Council.

Telegraph.—Application by the Chinese Merchants S. N. Co. for permission to erect a line of telegraph from their office in Hankow road to their godowns in Hongkew, was considered and granted.

Bridges.—Yang-king pang No. 1.—The following letter from the French Municipal Council was read, and referred to Works Committee:—

Shanghaï, 23 Janvier, 1875.

Monsieur,—Répondant à votre lettre du 19 Décembre dernier j'ai l'honneur de vous informer que le Conseil n'approuve pas le plan du pont en fer que la Fairbairn Engineering Company de Londres vous propose d'exécuter pour remplacer le pont No. 1.

Indépendamment de la largeur de 40 pieds qui ne parait pas suffisante pour les besoins du trafic, le Conseil trouve que la hauteur de 29 pouces donnée au tablier et le poids total du pont de 65 tonneaux, ne sont pas nécessaires et peuvent étre modifiées de manière à donner plus de hauteur au passage des bateaux et à procurer une économie très sensible dans le prix de revient en donnant moins de poids au pont.

Le système de suspension par des solives massives au dessus du tablier n'a pas rencontré l'approbation du Conseil. Ces solives, ainsi placées, ont non seulement l'inconvénient d'augmenter le poids, mais encore celui d'être d'un aspect disgracieux.

Un système de pont que le Conseil trouve en tous points préférable, et qu'il serait d'avis d'adopter, est représenté par un plan que lui a soumis l'Agent Voyer. Dans ce plan, la hauteur du tablier étant réduite à 24 pouces, et le poids total du pont à 40 tonneaux; il résulterait de son adoption, les avantages d'une plus grande hauteur pour le passage des bateaux et d'une diminution dans le prix de revient produite par l'économie de 25 tonneaux de matiére.

Pour vous édifier d'avantage, le Conseil m'a chargé de vous transmettre une copie de ce plan, et de vous prier de bien vouloir prendre des renseignments en Angleterre, tant sur la possibilité d'exécution que sur la dépense qu'entrainerait la construction d'un pont de ce genre.

Par la même occasion le Conseil me charge de vous aire remarquer qu'en vous proposant l'adoption du plan qui lui parait le meilleur, l'Administration Française ne devant participer que pour un tiers dans la dépense, ne prétend en aucune façon s'ingérer dans l'exécution des travaux à effectuer pour le pont No. 1.

Elle s'en tiendra, comme contrôle des intérêts qu'elle représente, à envoyer le plan en question en France, afin de se rendre compte des meilleures conditions d'exécution.

Je vous retourne d'autre part le plan de la Fairbairn Engineering Company.

Veuillez agréer, Monsieur, l'assurance de ma considération la plus distinguée,

Le Secrétaire,
H. Sayn.

Monsieur E. B. Souper,
Secretary Municipal Council.

Translation.

Shanghai, the 23rd January, 1875.

Sir,—In reply to your letter of 19th December last, I have the honor to inform you that the Council do not approve the Fairbairn Engineering Company's plan of an iron bridge which you propose to replace bridge No. 1.

Independently of the width of 40 feet appearing to be insufficient for the requirements of traffic, the Council consider that the height of 29 inches given to the roadway, and the total weight of the bridge—65 tons—are not necessary and might be modified, so as to allow a greater height for the passage of boats, and to effect a very considerable reduction in the cost by giving less weight to the bridge.

The plan of suspension by massive girders above the roadway does not meet with the approval of the Council.

These girders in such a position not only add inconveniently to the weight, but they would be unsightly.

A style of bridge that the Council consider in all respects preferable, and which it will be advisable to adopt, is represented in a plan which has been submitted to them by the Surveyor.

In this plan the height of the roadway is reduced to 24 inches, and the total weight of the bridge to 40 tons.

The advantages resulting from its adoption would be a greater headway for the passage of boats and a saving in the cost by using 25 tons less material.

For your information, the Council direct me to forward a copy of this plan, and to beg you to be good enough to obtain opinions in England as to the feasibility of its execution, and the expense which would be entailed in the construction of a bridge of this kind. At the same time, the Council direct me to remark that in proposing the adoption of the plan which to them appears the best, the French administration bearing only one-third of the expense, they do not claim to interfere in any way with the execution of the work for bridge No 1.

They feel called upon, however, in the interests they represent, to send the plan to France for the purpose of ascertaining the most favorable terms on which it can be manufactured.

I return the plan of the Fairbairn Engineering Company.

&c., &c.

Before proceding any further in the matter, the Council wished it understood that the cost of whatever style of bridge may be ultimately decided upon, shall be borne equally by the two Municipalities.

Fire Signals, on occasion of fire amongst the Shipping in Harbour.—The following letter from the Harbour Master, and Report from the Chief Engineer of the Shanghai Fire Department, with reference to Mr. Viguier's suggestions, considered.

Harbour Master's Office,
Shanghai, 10th Dec., 1874.

Sir,—The late fires on board shipping in the Harbour having proved the necessity of giving the earliest possible notice to the Fire Department, I propose, in case of fire in the Harbour, to make the following signals at the Pootung Signal Station, should they meet with the approval of the Municipal authorities and Fire Department.

Day Time.

Fire in Lower Reach—One gun will be fired, and 1st pendant over green flag with yellow cross, will be hoisted at the mast head.

Ditto Upper Reach—One gun; 2nd pendant over same flag.

Ditto Junks—One gun; 3rd pendant over same flag.

Night Time.

Fire in Lower Reach—One gun; white and red lamp.

Fire in Upper Reach—One gun; white and green lamps.

Ditto Junks—One gun; white, green and red lamps.

I am, Sir, your obedient servant,
S. A. Viguier,
Divisional Inspector and Harbour Master.

To the Chairman of the
Anglo-American Municipal Council.

Shanghai, 22nd Dec., 1874.

Sir,—With reference to the Special Fire Alarm proposed by the Harbour Master in case of a fire amongst the Shipping in Harbour, I think it would be well, whilst thanking Mr. Viguier for his suggestions—which the management of the Fire Department are always glad to receive and consider—to point out to him that the department is not in a position to render assistance in case of fire on board a ship lying out in the stream. It therefore appears to me unnecessary that any extra signals should be adopted.

In my opinion, it is advisable to keep the Fire Signals as simple as possible, in order to avoid all possibility of confusion.

The present system of alarm has undoubtedly worked very satisfactorily hitherto, and the only additions that I think can be made effectively to those at present in use, are:—

For a fire on board ship lying *alongside a wharf.*

In the Lower Reach.—5 strokes of the Bell with 10 seconds interval; and in the Upper Reach, 6 strokes.

But even then it is a question whether the present signals would not serve the purpose equally well.

However, if Mr. Viguier thinks this suggestion would be an improvement, it can be adopted.

I would point out that the only Fire Engine at present in Shanghai that can render assistance in case of fire amongst the shipping *in the stream*, is the floating Engine belonging to the S. S. N. Co.

This Engine is not connected with the Fire Department, although it is always courteously placed at the disposal of the Chief Engineer S. F. D., when its services can be of use.

It might be suggested to Mr. Viguier that a similar Engine connected with the Harbour Master's Department would doubtless prove very effective in checking fires occurring amongst the shipping.

I am, Sir,
Your obedient servant,
Robt. Mackenzie,
Chief Engineer S.F.D.

Edward B. Souper, Esq.,
Secretary, Shanghai Municipal Council.

The Council coincided with the views put forward by Mr. Mackenzie.

Firing of salutes in Harbour.—Read letter from the Russian Vice-Consul stating "that in compliance with the wish of the public of Shanghai, Admiral Brummer, chief of the Russian Naval Force in the Pacific, acting in accord with the Naval Authorities of other nations, has issued orders to the vessels of his squadron not to fire salutes while stationed off this port."

Staff.—Periodical leave to Officers.—Draft clause to be inserted in all officers' agreements entitling them to nine months leave after each term of five years service in Shanghai, was considered and approved.

Holidays—China New Year.—It was decided to close the Municipal offices on Friday, Saturday, and Monday, the 5th, 6th, and 8th instant.

Reports from various Committees for Dec., 1874, and January, 1875.—Approved and passed for publication.

Reports from Heads of Departments read and considered.

Minutes of previous Meeting approved and passed for publication.

CONSEIL D'ADMINISTRATION MUNICIPALE DE LA CONCESSION FRANCAISE.

Séance du 22 Janvier, 1874, sous la présidence de M. A. Voisin. Conseillers présents: M.M. A. Hennequin, L. Ewald, F. D. Hitch, W. Lang, H. Maiguan, E. Millot. H. Sayn, Secrétaire.

Communication d'une lettre de M. le Consul-Général, demandant la copie du rôle de la contribution Foncière pour le 2ème semestre de 1874. Des instructions sont données au Secrétaire pour que la dite copie soit remise à M. le Consul-Général.

Prescription au Chef de la Garde relativement à l'obligation de ne procéder qu'après autorisation à la vente des objets saisis ou autres.

Le Conseil avisera aux mesures à prendre pour l'organisation d'une fourrière publique.

Approbation des instructions réglant le service de l'Inspecteur de la Salubrité.

Pour compléter sur tous les points la rectification d'alignement des murs d'entourage de l'Hotel municipal, le Conseil prescrit de transporter le hangar sous lequel sont remises les tombereaux à l'ex-cimetière de la marine; dépense estimée à Taëls 31.00 pour la reconstruction du mur, et à Taëls 25.00 pour le déplacement du hangar.

Le Conseil ordonne la mise en place du pont en fer No. 4 Yang-king-pang, et prescrit au Secrétaire de prier l'Administration au Nord du Yang-king-pang de lui faire remettre un chèque pour la moitié des débours résultant de la commande de ce pont, faite pour le compte des deux Administrations.

Quant à la question du soi-disant empiètement sur le Yang-king-pang, le Conseil déclare s'en tenir à la position que l'Administration Française a prise en 1872, vis-à-vis de la réclamation faite à cette époque.

Avant la formation du nouveau budget pour l'Exercice 1875-76, le Conseil charge le Secrétaire de demander à l'Administration voisine si elle est disposée à maintenir la décision qu'elle a prise de discontinuer le partage égal de la taxe sur les brouettes.

Examen des rapports des chefs de Service.

Amusement.

SATURDAY'S PAPER HUNT.

The day being fine and the meet at Trefancha a favourite one, drew a number of both hunters and spectators to the start, which was over the big ditch at the back of the farm. Here the honorary members got a good deal of their subscription's worth in the grief which they witnessed (evidently with intense relish) on the part of some of the riders. At last, every one got over or round the obstacle, and dashed off on the trail. The paper led, with several checks—much wanted owing to the extreme heaviness of the ground after the late rain—over several well-known jumps to the Jessfield road, and across it to the finish, which was a little off the Sicawei road, just beyond the Bubbling Well. The Hunt was a well selected one, and appeared to give universal satisfaction. Mr. E. H. Gore-Booth was, we believe, the winner among the light weights, and Mr. Nickels among the heavies. The attendance at the finish was very large, including a goodly number of ladies on foot and horseback.

Correspondence.

THE MITZU BISHI S. N. CO.

To the Editor of the
NORTH-CHINA HERALD.

DEAR SIR,—Will you kindly give place in your paper to a few facts as to the Mitzu Bishi Steamship Company of Japan, so that the public may be apprised as to why the steamers were placed upon the route between Yokohama, Hiogo, Shimonaseki, Nagasaki and Shanghai, and the object in running them weekly between the above named ports

The Government of Japan is anxious that the friendly feeling at present existing between their people and the Chinese should be fostered, and at the instigation of the Japanese Authorities this weekly line of steamers has been established to ply between the two countries—in the hope that thereby the trade of both may be developed, and the interests of Chinese and Japanese merchants be promoted by the mutual exchange of their products: and that Europeans and others trading in both countries, should also participate in the advantages of the line.

The purpose, therefore, is not purely mercantile; the Company, having started the line, will continue to run their steamers regularly and promptly, and do not intend to be intimidated by the losses likely to accrue while getting it into active operation.

I remain, my dear sir,
Yours Respectfully,
R. S. CORNING,
for *Agent*,
Mitzu Bishi Steamship Co.

Shanghai, 13th Feb., 1875.

Miscellaneous.

DESTRUCTION BY FIRE OF MESSRS. LANE CRAWFORD AND CO.'S AUCTION ROOMS.

At about twenty minutes to nine o'clock on Saturday night, an alarm of fire rang through the Settlement, and in almost as little time as it takes to write it, great clouds of smoke, sheets of flame, and a perfect rain of burning cinders shot up into the sky, plainly indicating that the calamity was one of more than ordinary magnitude. It was soon known that the scene of the disaster was Messrs. Lane Crawford Co.'s Auction Rooms and Godowns in Kiangse Road, and this knowledge added much to the excitement, the premises being stored with large quantities of valuable property of nearly all kinds. It being just about the dinner hour, very few foreigners were in the streets, and the first alarm was raised by some Chinamen, who ran along the Tientsin, Kiangse, and Ningpo Roads, shouting "T'a-hsing Foh! T'a-hsing Foh!" Captain Tough, who was sitting with some friends in a room of his hong, facing the now burning building, hastened on to the verandah, and saw the flames just bursting through the roof at the north-west corner, the interior of that portion of the building being even then lit up with an intense glare, showing that the fire had obtained firm hold and was raging furiously. Crash after crash followed in alarmingly quick succession, and before a score of foreigners had arrived, a large portion of the roof had fallen in, and, as above described, flame and smoke, with myriads of glowing cinders, in a moment filled the sky, casting a lurid light all around. Somebody, with praiseworthy forethought, ran to the bell in Trinity Church compound, and rang out its note loud and long. This was soon followed by the alarms at the different fire-stations, and the streets were speedily alive with members of the various Volunteer Fire Brigades in uniform, hurrying to their respective rendezvous. Many spectators were also now assembling, and presently was heard the rapid approach of engines and hose-reels. The quickness with which these arrived and got to work was beyond all praise, showing as it did the excellent management of the Department, and the zeal of the members. The Hook and Ladder Company and the Mih-ho-loongs were also conspicuously in force, and as will be seen below, did good service with their destructive but useful appliances.

But during this time, which seemed long, though in reality only a few minutes, the flames were licking their way from room to room, from basement to roof, with fearful rapidity, accompanied by that strange, saddening sound peculiar to large bodies of fire when little or no wind is stirring, as was fortunately the case on Saturday night. It was at once apparent that no efforts could save either the building or its contents, except so much of the latter as were stored in the spaces fronting the Kiangse Road; but so rapidly did the fire make its way from rear to front, that but little of these even were saved. The efforts of the firemen were consequently directed to the preservation of the surrounding buildings; Messrs. Camajee's hong at the opposite corner of the Kiangse road, and Mr. Hopkins' establishment, exactly behind the fire, and in dangerous proximity to it, requiring constant attention. So fierce was the heat, that despite large quantities of water thrown upon them, the walls of Messrs. Camajee's hong became greatly heated, and threw off clouds of steam. Fortunately the efforts of the firemen were successful in preventing the spread of the fire. The first engine to get water was the "Victoria," followed by the "No. 2," both these being stationed at the large well in the Ningpo road, and alternately directing their attention to the north godown, in which it was reported that large quantities of oils, tar, and some gunpowder are stored. The "Deluge" was also stationed in the same road, but higher up, while the French engine, "No. 5," was posted in the Kiangse Road, and did good service in preserving Mr. Camajee's hong and adjoining buildings. But, unluckily, the water in the large well was soon exhausted, and the Chief Engineer directed the hose of the "Victoria" and "No. 2" to be laid to the Church compound pond, which again proved a useful reservoir. By half-past ten the whole building was gutted, but the large quantities of oil, and other inflammable material which had been stored therein, continued to burn with great fury, lighting up the shell with peculiarly grand effect.

Detachments from the different men-of-war in harbour, and also from the Messageries Maritimes steamer, with their hand-engines and hose, were landed, together with parties from the merchant vessels, and all worked with a zeal and energy praiseworthy in the extreme. Some of the men, indeed, exposed themselves to danger somewhat recklessly, but Jack's divinity, the "sweet little cherub," seemed to attend them, and they came off scatheless.

The flames having destroyed the building, continued to work gradually through the *débris*, until they reached the coolies' quarters. These, a low range of shed-like buildings, lay between Mr. Hopkins' *boucherie* and the fire, and formed its sole protection. They had already caught fire in several places, when Mr. Rice, doubtless seeing that unless the fire could be stopped in this direction, another calamity, and probably more, would have been added to the one in progress, gave the order to put in practice the famous motto

hands, but the practice is one which is unfortunately an unavoidable concomitant of the necessary evil of Chinese collectors; and as it cannot be altogether done away with, although some risks attending it may be reduced by first sending out unreceipted bills for approval, the creditor might reasonably expect some assistance from the debtor in endeavouring to avert the frauds to which he is exposed. The remedy seems to us to lie in paying by compradore order or bank cheque to the order of the creditor; and though the practice of simply endorsing bills probably occupies a little less time, the saving is scarcely appreciable, and is certainly not to be balanced against the loss both of time and money which it may ultimately involve. The creditor is reluctant to seem to press the debtor, and therefore goes on regarding the bill as unpaid until the lapse of time has become so unreasonable that, in self-defence, he makes a personal enquiry, only to find that he has wronged his constituent by his surmises, and that a servant who, as in this case, has been with him for a long period, has been carrying on a system of fraud it may take him much valuable time to unravel, and which may even have already done serious and permanent injury to his business interests. There are some other points about the collecting system the discussion of which might be productive of useful results, but at present we can only refer to them very briefly. Cases occur in which the shroff goes day after day, and week after week, until months age and even years elapse, only to have his applications rudely rebuffed; and though this of course cannot palliate the retention of his employer's money, it suggests to him the excuse which, in the absence of any direct and immediate check, has to be accepted. He has, besides, the plea that not unfrequently the receipted bill is retained on the ground that reference is necessary, and thus he accounts for its absence when he is called on to produce the document itself or its proceeds. If people would establish regular pay days, and pay by bank cheques or similar orders, much annoyance would be saved and many frauds defeated. It is not unknown to us, however, that compradore orders are given when no compradore exists—when he is practically a lay character, so far as his ability to make payments is concerned; and in such cases, if the debtor has no effects and no understanding as to the honouring of his drafts, the granting of the order should be reprobated equally with the granting of a cheque on a bogus bank account. The time which is lost, the annoyance which is too often caused, the numerous frauds which are disclosed, and the still more numerous ones which remain unrevealed, make it quite clear that some change in the present system of collection is not only desirable, but very necessary. [Since the foregoing was written, we have learnt that the defaulting collector has pleaded guilty, and been sentenced to a year's imprisonment with hard labour.]

DEATH OF THE EMPEROR OF CHINA.

For some days, rumours had been in circulation that the illness from small-pox of His Imperial Majesty Tsai Chun, who reigned under the title Tung-che, had terminated fatally. The previous reports, however, which ascribed slight importance to the attack, and indicated that his Majesty was already convalescent, although the nature of the disease required that he should pass one hundred days in retirement, added to the reassuring tenor of the Imperial decrees lately published in the Peking Gazette, caused these rumours to be gravely doubted. On Saturday they were revived, and were supported by a statement that the seals on official despatches from the capital had been changed from red to blue, which is only done on the death of an Emperor. The confirmatory intelligence received on Monday shows that some of the Chinese officials, with that dispatch in the matter of important news from the capital which characterises their courier service to the provincial governments, had been made acquainted with the fatal termination of His Majesty's illness several days before it was known to the residents here. It should be said, however, that the Chinese generally were also extremely sceptical about the truth of the report.

The arrival of the Peking Mail of 13th January has now placed the melancholy fact beyond all doubt. After the attack which manifested itself on the 9th ult., his Majesty seems to have progressed favourably, and it was hoped that the disease had run its course. On the 5th instant, however, the Imperial patient suffered a relapse, and after lingering for a week in a hopeless condition, died on the evening of Tuesday the 12th instant, at four o'clock as one correspondent informs us. To adopt the Chinese phraseology on the death of his Majesty's predecessor: "He sped upward upon the Dragon, to be a guest on high."

The late Emperor was the eighth of his line, and was born on 27th April 1856, his age being thus eighteen years and nine months. The death of his father, which took place at Jehol on 17th August 1861, after his flight from Peking in the autumn of the previous year, when the allied forces menaced the capital, left the guardianship of the young heir apparent a prize to be disputed for by the powers at Court. The dispute which was naturally to be expected in an Oriental palace took place. The Princes Su-shun, Ts'ai-yuen and Twan-hwa, members of the Blood Royal, strongly opposed to the peace policy of which Prince Kung was the foremost representative, having proclaimed the Emperor, endeavoured to seize the reins of government and form a Regency in which their own party should have unlimited sway. The Empress-Dowager, ("Mother of the State,") and the Mother of the Sovereign, were admitted to the Council of Regency, nominally as guardians of the Boy-Emperor. Prince Kung was excluded; and the Empresses being dissatisfied with Su-shun's conduct and policy, arranged a *coup d'état* with the former Prince. The three conspiring Princes were arrested, tried, and condemned to be cut to pieces; but this sentence was commuted to self-strangulation in the case of two of them, and to decapitation in that of Su-shun. Minor punishments were meted out to other nobles and officials.

Nominally ascending the throne in the year 1862 (the year in which one Emperor dies is not counted as part of the reign of his successor), the child Emperor then had the affairs of his vast dominions administered for him by the Empresses-Dowager as regents, with his uncle Prince Kung for their chief adviser. On 15th October 1872, he was married; and on 23rd February following he assumed the reins of government, which he has so soon again had to surrender to the hands that guided the chariot of state during his minority, and which apparently had scarcely relaxed their hold. We have but meagre data at present upon which to form an estimate of the character and the capacity of the deceased Emperor, and must therefore postpone any remarks of this nature. In the last decree or testament of his father, Hien Fêng, by which the young Prince was appointed successor, he was said to be "humane" (a term which is probably used here in a wide sense) "dutiful, quick, and intelligent." These qualities were no doubt carefully cultivated by his tutors according to the best Chinese standard; and judging by certain of his public acts, there appears to be ground for believing that to them was added a will by no means weak. It was hoped the bent of that will would eventually declare itself in a direction which would rouse China from her lethargic and backward condition, and give *eclat* to his reign. Apart from the sympathy which will be felt for the youthful Potentate cut off at the threshold of his active career, the sad event which we record to-day will be regarded with no small regret by foreigners from another point of view. The death of his Majesty without issue, and without having personally nominated or adopted a successor, will most probably result in the re-establishing of a Regency, and form a plea for returning to the unsatisfactory position of diplomatic relations with foreign representatives which was maintained during its former period of power.

Our correspondent states that up to noon of the 13th, no announcement as to the succession had been made. The latest report was to the effect that a grandson of Prince Tun, (elder brother of Prince Kung and fifth son of the Empêror Tao-kwang), had been designated by the Empress. If this be correct—and Chinese ideas of inheritance and adoption give it every probability—the accession of the new Emperor, who is a child of six years of age, named Chih, will much resemble that of his predecessor, and will necessitate another long Regency. Prince Tun is said to have eight sons, the eldest of whom is the father of the child selected to sit on

the Dragon throne. Failing the recognition of this boy, there would be some possibility of the eldest son of the Prince of Kung, *beileh* Tsai-chêng, who it may be remembered recently shared his father's brief degradation, being named successor. An objection to his candidature is that he is about the same age as the late Emperor, whose companion he was in study and in sport; and it is usual for an adopted successor to be junior to the person, royal or subject, whose place he takes, on account of the high importance the Chinese attach to keeping up ancestral sacrifices. For this reason, and it may be assumed, for the further one that it would be desired to place the candidate under tutelage for his new position, one of the younger connections of the reigning family is more likely to be selected to stand in the relation of son and heir to the deceased Emperor. The *Beileh* Tsai-Chêng, we should notice, was married last year, and has a son two months old, whose chances are in some quarters believed to be equal if not superior to those of the Prince of Tun's grandson. Another article in these pages points out that Prince Tun, although senior to Prince Kung, being the fifth son of Taokwang, has by adoption been to some extent alienated from the family. Prince Kung, on the contrary, since the death of his brother, Hien Fêng, has been, and is likely to continue, the mainstay of the dynasty; and his pre-eminent services give his family a strong claim on the succession under such circumstances as the present. A possible candidate has also been mentioned in the person of the youthful son of Prince Ch'un, younger brother of Prince Kung, and who is a great favorite at Court; and before the late Emperor was born, his father, Hien Fêng, being then childless, adopted a son whose offspring might be supposed to have a collateral claim.

So far as our information goes, then, it seems improbable that the Emperor's death will create complications at Court; the Empresses-Dowager still holding practically the power which has hitherto enabled them, in conjunction with Prince Kung and other members of the Imperial family, to rule the country—while it is doubtful if any individual or faction is strong enough, or desirous, to alter the succession decided on, or bring about a change of dynasty. As we have suggested, however, it will be unfortunate if this return to the old order of government should result in the old state of foreign relations. A correspondent, referring recently to the arrival of the Danish Minister, observed that the Emperor's illness and the delegation of the state functions to the Empresses-Dowager, would prevent General Raasloff from having audience for several months to come. Is it to follow that the representative of Denmark, and with him those of other Powers, will have to wait, not a few months, but another ten years, before getting access to the Imperial Presence?

It is interesting to notice under existing circumstances that by a decree in the *Gazette* of 9th Jan., three days before the Emperor's death, the titles of three out of the four *Ta Hio Sze* or Grand Secretaries have been rearranged—Li Hung-chang, a Chinese, becoming senior, although the distinction is one that precedence has almost invariably assigned to a Manchu. The positions do not necessarily give any increase of influence or voice in the affairs of the Government, but the departure from precedent may not be the less intended to propitiate the powerful Viceroy of the Metropolitan Province.

THE CHINESE IMPERIAL FAMILY.

The following particulars respecting the Imperial family of China, in connection with the order of succession to the throne, may be found not without interest.

As is well known, the reigning Sovereign is eighth in direct line of descent from his ancestor the emperor She Tsu Chang Hwang Ti (Shun Che), who ascended the throne at the age of five in 1643, his reign being reckoned, however, according to the invariable Chinese usage, from the beginning of the following year, or Feb. 8th, 1644. The legendary progenitor of the Manchu chieftains who advanced, by successive steps, to the assumption of the imperial crown of China, bore, according to tradition, the surname Aisin Gioro, represented by the Chinese characters 愛新覺羅. The signification of the word *Aisin* is the same as that of the Chinese *Kin* 金, gold (or metal), and an identification is thus suggested with the dynastic title of the reputed ancestors of the Manchus, the Nü-chih Tartars, who reigned in northern China during the 12th and 13th centuries. The surname of their Imperial house was, however, Wan-yen 完顏. The word *Gioro* is said to be equivalent to the Chinese 氏 or family-stem. It is borne as a distinctive surname by every descendant of the founder of the present Imperial line, and it serves in particular as an appellation, prefixed to the personal name, for the more remote scions of the original stock. Actual descendants of Hien Tsu, the acknowledged founder of the family, (1583-1615), are designated *Tsung-shih* 宗室, in conformity with the usage adopted by earlier Chinese dynasties. In order to make the observations which are to follow, with reference to the various branches of the imperial lineage, more easily understood, it is necessary here to explain the further system of family nomenclature which has been adopted by the existing line. The foundations of this system were laid in the reign of the second emperor of the dynasty, Shêng Tsu Jên, (K'ang Hi), who gave to each of his twenty-four sons a personal name consisting of two characters, the first of which was Yin 胤—subsequently exchanged in writing, as a token of respect, for Yün 允—and the second compounded with the radical *she* 示 throughout, as 禔, 祺, and so on. His grandson, K'ien Lung, extended this practice into a system for perpetual application, ordaining that future generations deriving their descent from K'ang Hi should be successively designated by the following four characters, viz:

1. 永 Yung.
2. 綿 Mien.
3. 奕 Yih.
4. 載 Tsai.

Minute regulations were drawn up, and incorporated with the fundamental institutes of the dynasty, setting forth the manner in which both these characters and those employed for the second or individual half of each name, should be bestowed. In the 49th year of his reign (A.D. 1784), on the birth of a great-great-grandson, to whom the character Tsai consequently appertained, K'ien Lung decreed the addition of the character Fêng 奉 as the next in succession; but this character was dismissed from use by order of the emperor Tao Kwang. In the sixth year of the reign of this sovereign (1826), an addition to the number of characters appears to have been thought advisable (probably in order to avoid repetition as the list became exhausted), and ten characters were proposed for his Majesty's selection, out of which the following four were approved for future use, viz:—

5. 溥 P'u.
6. 毓 Yü.
7. 恒 Hêng.
8. 啟 K'i.

The Emperor Hien Fêng, again, saw fit to increase the list by the addition of four more characters. The *Peking Gazette* of the 9th June, 1857, contains a copy of a decree directing the chief [illegible] of Government to draw up a list of four characters, to be submitted, together with the six remaining on record since 1826, when they were put on one side after the four above enumerated were chosen, for approval by his Majesty. A short time afterwards a further decree announced the fact that the following additional characters had been adopted from the list drawn up:

9. 壽 Tao.
10. 闓 K'ai.
11. 增 Tsêng.
12. 祺 K'i.

So much for the first of the two characters forming the compound name. The complementary part of the system of nomenclature is well illustrated by Dr. S. W. Williams, in his "Middle Kingdom" (vol. I., p. 310), in the following terms: "The members [of the imperial family] most nearly allied in blood, as sons, nephews, etc., are still further distinguished by having the second syllables of their names written in compound Chinese characters, whose radicals are alike; thus Kia K'ing and his brothers wrote their names with Yung (the fourth syllable in the above list) and under the radical *gem*; Tau Kwang and his brothers and cousins with Mien, and under the radical *heart*. This peculiarity is easily represented in the Chinese characters, but a comparison can be made in English with the supposed names of a family of sons, as

Louis *Ed*ward, Louis *Ed*win, Louis *Ed*wy, Louis *Ed*gar, and so on."

The personal names, thus compounded, will be traced in the following list of the Sovereigns who have successively occupied the throne, whose historical or posthumous titles (廟號) and the titles of whose reigns (年號) are likewise given :--

Historical Title.	Title of Reign.	Period of Reign.	Personal Name.
1.—She Tsu Chang.	Shun Che.	1644-1661.	Fuh Lin.
世祖章	順治		福臨
2.—Shên Tsu Jên.	K'ang Hi.	1666-1722.	Hüan Yeh.
聖祖仁	康熙		玄燁
3.—She Tsung Hien.	Yung Chêng.	1723-1735.	Yin Chên.
世宗憲	雍正		胤禛
4.—Kao Tsung Ch'un.	K'ien Lung.	1736-1795.	Hung Li.
高宗純	乾隆		弘曆
5. Jên Tsung Jui.	Kia K'ing.	1796-1820.	Yung Yen.
仁宗睿	嘉慶		永琰
6. Süan Tsung Ch'êng.	Tao Kwang.	1821-1850.	Mien Ning.
宣宗成	道光		綿寧
7. Wên Tsung Hien.	Hien Fêng.	1851-1861.	Yih Chu.
文宗顯	咸豐		奕詝
8. (The reigning Emperor)	T'ung Che.	1862.	Tsai Ch'un.
	同治		載淳

The characters *Hwang Ti* 皇帝 (commonly rendered Emperor) follow, in practice, the three characters constituting the historical title, and a deceased sovereign, when not spoken of, colloquially though incorrectly, by the title of his reign, is designated by the *last* of the three characters in combination with the words *Hwang Ti*—*e.g.* Ch'êng Hwang Ti for the Emperor who reigned with the designation Tao Kwang.

Upon the period of the late Emperor (Hien Hwang Ti or Hien Fêng), no difficulty in regard to the succession presented itself in the Imperial line. Shun Che was the ninth son of his father, K'ang Hi the third of Shun Che ; Yung Chêng the fourth of K'ang Hi ; K'ien Lung the fourth of Yung Chêng ; Kia K'ing the fifteenth of K'ien Lung ; Tao Kwang the second of Kia K'ing ; and Hien Fêng the fourth of the nine sons who were, in all, born to the Emperor Tao Kwang. The Emperor Hien Fêng, however, was without male issue for some years after he succeeded to the throne ; and it was probably with a view to securing the dynastic succession that, about five years after his accession an adoptive heir was provided, in conformity with the national usage, to the eldest son of the emperor, a prince who had died at an early age many years before. On the 21st January 1855 it was decreed that Tsai Chung 載中, a *tsung-shih* or member of the imperial clan, be adopted (過繼) as son to the Prince above-mentioned, whose personal name was Yih Wei, and whose title was that of Prince of Yin Che (undeveloped wisdom.") The adopted heir was a son of the *tsung-shih* Yih Ki, a great grandson of the emperor K'ien Lung. By a subsequent decree, the second name of the youth thus adopted was changed from Chung to Che 治, bringing it into accord, as regards its radical (*water*) with that prescribed for the line which, by adoption, he had entered. As, however, the birth of a son (the present Emperor) to Hien Fêng, on the 27th April 1856, apparently assured the succession in the direct line, any prospects that may have been connected with Tsai Che were for the time being at an end. The heir apparent received, by decree dated the 13th June 1856, the name Tsai Ch'un 載淳 ; and by his father's decease on the 17th Aug. 1861, he became successor to the throne. His marriage on the 15th October 1872 and his assumption of the reins of government on the 23rd February 1873, are events fresh within the recollection of the public.

In view of the fact that, up to the present time, no issue has been vouchsafed to the young sovereign, attention has naturally been turned toward the condition of the imperial lineage ; and the state of affairs in this respect can best be made clear by means of a genealogical table such as the following, commencing with the Emperor Kia K'ing. (The table will be found on [illegible])

The point of first importance to be noted in the above Table is the fact that, in default of issue to the reigning sovereign, the direct line of Imperial devolution terminates with his person. His father, Hien Fêng, was one of nine brothers, however, of whom four are still living ; and to a mind accustomed to the European order of succession, it might seem natural that in the event of the nephew's decease without issue, the uncles would inherit in the order of their seniority. This is inadmissible according to Chinese ideas. The especial attribute of a son and heir being that of keeping up the ancestral sacrifices, the maintenance of which are essential to the well-being of the spirits of the departed (who repay the benefit by assuring temporal rewards in return for the assiduity of their descendants), it is held essential that the heir be of a generation posterior to that of the individual deceased. Hence, in the Imperial family, following the succession of the eight characters used in their nomenclature, a Mien should have a Yih as adoptive heir, whenever necessary, a Yih a Tsai, and so forth. This rule is exemplified in the adoption, already mentioned, of Tsai Che as heir to the deceased elder-born of the emperor Tao Kwang, the prince Yih Wei.

Adoption is, in fact, observed on an extensive scale among the members of the Imperial clan, whose family relationships are thus made not a little intricate. The fifth son of Tao Kwang, next brother to the emperor Hien Fêng, commonly known by his title of Prince of Tun, has been in this wise alienated from the closest to a collateral degree of kinship with the young emperor. He was given in adoption many years ago (in 1845) to his deceased uncle, the prince of Tun K'io, third son of Kia K'ing ; and one of his sons, again, the prince (*beileh*) Tsai I, has been made into his nephew through adoption as grandson to another of the sons of K'ia K'ing (see Table). The alienation of Tsai I from the paternal stock is alleged to have been decreed as a punishment meted out to the Prince of Tun for a violation of self-restraint, prescribed by the ritual of mourning, at a period antecedent to the entry of the young prince into the world.

As the Table shews, the offspring of Tsai Che, who was himself by the decree of 1855 indicated as a possible heir to Hien Fêng, should be now the most direct claimants to the privilege of furnishing an heir by adoption to the reigning and childless emperor. Four sons have been born to this prince, of whom it is believed that only one, an infant, still survives. It seems possible, however, that in the deliberations of the Imperial Clan Court, the fact of Tsai Che being himself an adoptive son may militate, the case arising, against the eligibility of his children, and under such circumstances (provided also that the alienation of the Prince of Tun should bar the claim of his descendants) it appears probable that the offspring of the two uncles of his Majesty, next in order of seniority, would be the most available candidates. In any case, it is alleged by those who are versed in the principles of Chinese genealogy, the adoption of an heir not junior in the line of descent to the reigning Emperor could only be feasible by his being made heir to one of the earlier sovereigns (Hien Fêng or Tao Kwang). The Prince of Tun has several sons (eight in all have been born to him), of whom the eldest is married, but the probability of their alienation from the direct line of inheritance is, as has been remarked above, at least matter for consideration. If this be the case, the possible candidate next in order would be the elder son of the Prince of Kung, the *beileh* Tsai Ch'êng. This young prince is of about the same age with the emperor, and was married in the course of last year. The "seventh Prince," younger brother of the Prince of Kung, has likewise a son, a mere lad. The favour with which the "seventh Prince" has been looked upon by the Emperor might cause the choice to be directed here. The degradation of the *beilêh* Tsai Ch'êng, together with his father, by the decrees of the 10th and 11th September last, have been matters of public notoriety.

It may be useful to note, in conclusion, that the titles conferred on members of the present imperial house are of twelve degrees. The sons of an emperor, before receiving a special title by patent, are known simply by the designation *Ako* (in Manchu *a-gê*), with the numeral indicating their seniority by birth prefixed. The twelve degrees of rank are as follows:

1.—和碩親王 *Ho-shêh Ts'in Wang*—Prince of the 1st order. 2.—多羅郡王 *To-lo Kün Wang*—Prince of the 2nd order. 3.—多羅貝勒 *To-lo Beileh*—Prince of the 3rd order. 4.—固山貝子 *Ku-shan Bei-tsze*—Prince of the 4th order. 5 to 8.—公 *Kung* (with distinctive qualifications). 9 to 12—將軍. *Tsiang Kün* (with distinctive qualifications).

Imperial princes usually receive patents of the first or second order on reaching the age of manhood, and their sons are invested with the title *beilêh*. A *beilêh's* son becomes a *beitsze*, and rank is thus transmitted in a *diminuendo* scale,

嘉慶永琰 — KIA K'ING. (Yung Yen). 1796-1820.

- I. Mien ?
- II. 道光綿寧 — TAO KWANG. (Mien Ning). 1821–1850.
  - 隱智郡王奕緯 — dead.
    - 貝勒載治 (改名載中)
      - I. P'u ? — dead.
      - II. P'u ? — dead.
      - III. P'u ? — dead.
      - IV. 溥倫 — P'u Lun, (born Nov. 1874.)
  - I. Yih Wei, Prince of Yin Che. — dead.
  - II. Yih ? — dead.
  - III. Yih ? 咸豐奕詝 — dead.
    - 同治載淳 — T'UNG CHE. (Tsai Ch'un). 1862—
  - IV. (a) 惇親王奕誴 — HIEN FÊNG. (Yih Chu). 1851–1861.
    - Tsai Che, son of Yih Ki, adopted by decree of Hien Fêng in 1854 as posthumous heir.
  - V. Yih Tsung. Prince of Tun, (adopted as heir to the 3rd son of Kia K'ing). — *Has issue. See under 3rd son of Kia K'ing.*
    - 貝勒載澂
  - VI. Yih Sin, Prince of Kung, 恭親王奕訢
    - I. Tsai Ch'êng (born about 1856).
    - II. Tsai Ying (adopted as heir to his deceased uncle, the Prince of Chung). (c)
  - VII. Yih Hwan, Prince of Ch'un. 醇親王奕譞
    - 載湉
    - Tsai Tien. (c)
  - VIII. Yih Ho, Prince of Chung. 鍾郡王奕詥 — dead.
    - 載澄
    - Tsai Ying, (son of the Prince of Kung).
  - IX. Yih Hwei, Prince f Fu. 孚郡王奕譓
    - 載濂 — Tsai Lien
- III. Mien K'ai, Prince of Tun K'io. 惇恪親王綿愷
  - (a) 惇親王奕誴
  - Yih Tsung, Prince of Tun, 5th son of Tao Kwang
    - 載瀾 — Tsai Lan
    - 載瀛 — Tsai Ying
    - 載猗 — Tsai I, (adopted as heir to the 4th son of Kia K'ing).
- IV. Mien Hien, Prince of Hwai. 懷親王綿忻
  - 瑞慤郡王奕誌
  - 貝勒載漪
  - Tsai I, (2nd son of the Prince of Tun). (b)
  - Yih Che, Prince of Jui Min. 奕詳

of the Hook and Ladder Company—"Say the word, and down comes your house." Hooks and ropes were speedily attached to the buildings in question, and large portions of them pulled down so as to form a barrier impassable to the flames, and there can be little doubt that by this piece of timely service, both Mr. Hopkins' and Captain Tough's premises were saved from destruction.

The alarm amongst the Chinese resident in the neighbourhood, especially those in the Ningpo Road, was very great. They at once set to work to clear out their goods and chattels from their houses and workshops, and in a little while the roadway presented all the appearance of a Welsh fair; while, gravely pacing to and fro through the crowd, as though keeping watch and ward, were a number of the employés of the "Tea Guild," each with the inevitable lantern carried aloft at the end of a long bamboo.

It was not to be expected that so destructive a fire would pass without accident to person, and by the sudden falling outwards of three of the lofty columns, dividing the arches of the building at the Tientsin road end, two persons were injured. One of them was a Chinese fireman, and he was completely buried under the mass of bricks and mortar. He was quickly dragged out by some of the bystanders, and conveyed to the Shantung Hospital, where it was found that, although no bones were broken, he was otherwise seriously injured. The other was Mr. Pemberton, of the Tug and Lighter Company, who was also knocked down by the falling mass and much bruised about the head and body. Other cases of injury occurred at the front of the building. Mr. Yeo, manager of the Gas Works, with Mr. Rogerson, one of the employés, entered the building to save the gas meter, when Mr. Rogerson received some severe bruises from falling bricks, his coat being also much torn. While inside, these gentlemen also managed to save a number of articles, as well as the books of the firm. Later in the evening, Mr. Yeo ventured in a second time, calling upon Mr. Kent, another employé, to follow him, when they were both struck down, Mr. Kent receiving a deep cut on the left temple, causing so great a loss of blood that he fainted, Mr. Yeo being also so much hurt that he was obliged to be taken home. Mr. Kent was attended by Dr. Hopkins, and was afterwards conveyed to the Temperance Hall and put to bed. Narrow escapes also were numerous. By 11.30 all cause of apprehension of the further spread of the fire was removed, but the flames continued to feed on the wreck in the basement, and it was not until four o'clock yesterday morning that the Fire Brigade was fully withdrawn. All day yesterday, the fire was aglow, and at intervals sent up flames and smoke. Large crowds of Chinese hung round the ruins, many intent on pilfering and some four or five of them are now in the Central Station, charged with this form of robbery.

As to the origin of the fire, it is, as the phrase goes, shrouded in mystery. We are informed that the building was an old one; that is, old for Shanghai, and that some time ago one of the floors in that part of it where the fire broke out, gave way. A number of Chinese carpenters were employed to repair it, and some twenty of these were at work on Saturday until five o'clock, when the building was closed, no one remaining in it. The gas had been cut off during the repairs, so there was no chance of damage from that source. Several of Messrs. Lane and Crawford's employés occupied rooms in the hong, and have of course lost all they possessed. A valuable retriever dog, belonging to Mr. Fairbairn, was burnt to death. Mr. Triggs' loss is especially severe, and includes some rare curios from the West Coast of Africa (the accumulations of a three years' residence there).

The total loss cannot yet be ascertained, but it is estimated to be considerably over the amount of insurance, and that will not prove to be less than from Tls. 50,000 to Tls. 60.000. The loss will, we believe, fall chiefly upon the Hongkong Fire Insurance Company. The building itself belonged to Messrs. Lane and Crawford, the old partners in Lane, Crawford & Co., and was insured for Tls. 6,500.

It would be an omission not to mention the excellent services rendered by the heads of the Fire Department, Messrs. Mackenzie, Ashley, Rice, Charrier, and Clarke; also the way in which Lieut. Pipon, of the *Modeste*, and Lieut. Wentworth Bayley, of the *Ringdove*, handled their men; while last, but not least, on such an occasion, the steps taken by Messrs. Stripling, Fowler, and Wilson, to keep order and prevent the crowd pressing on the firemen, were worthy of commendation, as was also the firm but respectful manner in which the constables carried out their orders.

Some complaints were heard respecting what was considered to be the short supply of water in the wells, and it was also asserted that they were in a foul and dirty condition, containing much mud. It is true that the water was speedily exhausted in some of them, and that the engines were at times standing idle for want of it; but we are assured that the wells were clean and in good order, and that the speedy exhaustion of the water resulted from so many more than the usual number of engines being brought into play together.

All day on Sunday the ruins gave out intense heat, and at intervals tongues of flame shot up from the *débris*, showing there was still a mass of fire beneath the surface. Towards 8 p.m. there was a considerable increase of these appearances, and it became necessary to send for an engine to play upon the ruins. The "Deluge" was accordingly sent there, and threw a large quantity of water over the area of the late building, until all chance of further danger was obviated. On Monday, a number of workmen were set to work to clear away the remaining walls and ruins.

TRIBUTE RICE.

Extract from Mr. Dick's Report on the Trade of Tientsin (1867).

Concerning the Tribute Rice, there is reason to think that the transport of it, as at present performed by junks, is a very expensive business. The loss by leakage and wreck on the sea voyage is considerable; and the junks, coming here early in the year, because they are dependent on the monsoons, all arrive at about the same time, crowding the river and causing collisions in which they are generally the sufferers. A portion of the freight is paid by allowing the junks to carry certain goods free of duty, so that it is impossible to ascertain exactly what the service costs. It seems, however, that the quantity of goods carried under the exemption referred to is not great, as Chinese merchants prefer the safety and speed of Foreign vessels, for the carriage of their property. The Government is beginning to take the same view in regard to the Rice, and about a tenth of this year's tribute is to be carried in Foreign vessels. As there are no granaries at Tientsin for the reception of the Rice, it has to be sent to Tung Chow as soon as it is taken from the junks, and the officials therefore press into the service all the lighters in the neighborhood, thus seriously interfering for a time with all other traffic. This evil might be mitigated if the transport were distributed throughout the year. It is not only however the expensiveness of the whole transport—by sea as well as by river—as at present conducted, which is open to criticism. The necessity of bringing such a large quantity of Rice for the Government is, in the first place, very doubtful. Most of it is intended ostensibly for the Peking garrison, and is issued to the officers and men, by orders on the granaries for so much Rice to each. A soldier never obtains the quantity named in his order. It is said that he does not get more than seven-tenths, and that what he gets has been damaged by the watering to which much of the Rice is subjected to make it appear up to the right quantity when placed in the granaries. The discount on the soldier's allowance represents the charge which the officials and lightermen engaged in carrying the Rice from Tientsin to Peking, and the officials who manage the granaries, think proper to extract from the business. The soldiers are in the habit (liable only to occasional check) of selling their orders on the granaries to Rice shops, the proceeds being more than sufficient to buy a quantity of the coarser grain equal to the Rice they have sold. The Peking Rice shops are almost entirely supplied in this way, as the soldier, provided he gets something more than the price of coarse grain, can exclude the mercantile importer by selling the Rice for less than has been expended on its purchase in the South and its transport to Peking. The tribute becomes thus to some extent simply a trade in Rice carried on by officials at a great cost to the country. It would be better for the Government to draw from the Central provinces only so much Rice as is really required for the Peking garrison, and, by commuting the remainder of the tribute into money, to obtain the benefit of the difference between the price of Rice and that of the coarser grains (produced abundantly in Manchuria) which might be issued instead of the Rice commuted. If the entrance to the port were deepened, and the tax on the coast carriage of grain—lately suspended—were entirely abolished, so that the services of Foreign vessels of all sizes could be brought freely into play, the Government might rely upon obtaining its supplies through Native merchants and Foreign carriers, at a smaller cost to the country than is incurred under the present system, and the food supply of the province generally would find itself on a better footing.

Memorial by Chen Hung-yi, translated from Peking Gazette 11th November, 1872.

Chen Hung-yi, memorializes the Throne complaining of the abuses connected with the system of levying the land-tax in kind rather than in money, and prays that the system may be changed in a portion at least of the Fungtien (Moukden) prefecture. The evils complained of may be briefly enumerated as follows:—

1.—The district magistrates collect only a part of the tax in kind and the rest in money, charging the people, however, double the value of the grain.

2.—The magistrates, instead of at once purchasing the grain required, and storing it in the granaries ready for transhipment to Tungchow at the proper time, wait till they can get it cheap and thereby delay the junks.

3.—Junks employed in the transport service, have to leave for Fengtien in the 4th Moon, and do not get away from there till the 10th Moon. The cost of such a long delay is enormous. The magistrates excuse themselves by saying that all the junks not having arrived, the loading cannot commence. Thus time is wasted, winter arrives, and the junks have sometimes to go away unloaded after all.

4.—The grain having arrived at Tientsin, it has to be transhipped &c., and during this process it is stolen right and left; this cannot well be prevented.

5.—In the granaries the grain is so adulterated with chaff and rubbish, that it is unfit, or nearly so, for human food. This was keenly felt last year by all the charities in the capital.

To this proposal, however, it will probably be objected that the price of grain being very low in Fengtien, the sum received by the Government would be a very paltry one. This may be true; but it must be remembered that the Government, by levying the tax in money, would save the heavy outlay now incurred for transport, official salaries, &c., &c., and this would go far to make up the difference between the price of grain in Fengtien and at Tungchow. In some of the provinces, as Shantung, this plan has been already adopted, and the memorialist hopes the Throne will be pleased to look favourably on the present proposal.

Law Reports.

H. B. M. SUPREME COURT.

Shanghai, Feb. 12.

Before SIR EDMUND HORNBY, *Chief Judge*.

FAN TSIANG CHI *v.* H. SCOTT GILL.

Action for Libel in the "Wui-pau," a native newspaper.

Mr. H. BROUGHAM MILLER for the plaintiff.
DEFENDANT conducted his own case.

Plaintiff sought to recover damages $3,000 for an alleged libel, contained in an article in the *Wui-pau*, on the 4th of January last, in accordance with the complaint set forth in his

Petition:—

"The petition of Fan-tsiang-chi of Shanghai, the above named plaintiff, shows as follows :—

1.—The plaintiff is a subject of the Emperor of China, and now residing at Shanghai, occupying the position of a Chinese gentleman, and, until the publication of the libel hereinafter set forth, of good repute amongst his fellow subjects and others. The plaintiff was formerly in the years 1868 to 1871 in the employ of the firm of Shaw Brothers, at Hankow, as Compradore, and was until recently in the service of the China Merchants' Steam Navigation Company, at Shanghai, where he was in the receipt of a salary of 90 dollars ($90) per month. The plaintiff left the said service owing to material changes in the management of the affairs of the said Company, and has since been endeavouring to obtain employment suitable to his rank and position.

2.—The plaintiff, while in Hankow as a Compradore as aforesaid, having great knowledge of mercantile affairs, was in the habit of transacting on his own account and for his own behalf, business amounting to Taels 800,000 or thereabouts per annum.

3.—The defendant, a resident in Shanghai, is the manager of a certain Chinese paper called the *Wui-pau* newspaper, issued daily, with the exception of Sundays. The defendant is thoroughly acquainted with the Chinese language, and the publication of the said newspaper is subject to his sole and entire control.

4.—In the said *Wui-pau* newspaper published and issued on Monday, the 4th day of January, 1875, there appeared an article of which the plaintiff complains as hereinafter appears. A newspaper of that date is attached to this petition, and a translation into English of the article.

5.—The plaintiff charges that the defendant falsely and maliciously printed and published in the said newspaper the words following: that is to say, translated into English, "We learn that this man (Fan) was formerly employed as a coolie in the China Merchants' Steam Navigation Company, and was dismissed for certain reasons by the manager." The defendant meaning thereby that the plaintiff is a low bad fellow, not of the position of a gentleman, and that the plaintiff had been guilty of improper conduct while in the employ of the China Merchants' Steam Navigation Company, and that he was sent away in disgrace; and that the defendant falsely and maliciously printed and published the following other words: that is to say, translated into English, "The vicious and demoralizing tendency of opium to mankind may be gathered from this example; and here we have a repetition of the horse Siang Heang (a noted horse) being sold for cup of wine," the defendant meaning thereby that the plaintiff was addicted to the excessive use of opium and had become a degraded character.

6.—The plaintiff further charges that the whole of the matter contained in such article was used in a defamatory sense, meaning that the plaintiff is connected with a gang of ruffians, and that they and he were in the habit of going into opium shops, smoking opium and refusing payment.

7.—That the plaintiff in consequence of such libel is unable to obtain suitable employment, and such as he has hitherto enjoyed, and by reason of the premisses the plaintiff has suffered loss and damage to a great extent, to wit to the sum of $3,000. The plaintiff therefore prays that the defendant may be decreed to pay to the plaintiff the sum of $3,000 or such other sum as the Court may think fit, together with the costs of this suit."

The Defendant filed the following

Answer:—

"1.—That on the date hereof, January the eighteenth, 1875, Henry Scott Gill received a copy of a petition *in re* a supposed libel case, in which he is asked to give answer as being defendant in this case.

That for reasons hereinafter set forward, he prays that the Chief Judge will rule that this case does not come within the jurisdiction of the British Supreme Court, but shall be referred back to the man Fan, on the ground that the said Henry Scott Gill is not the true defendant in the supposed libel case, and that a Chinaman named Yu is the true defendant, and that therefore the man Fan must apply to his own Magistrate.

The present defendant therefore prays that the Chief Judge will consider the following reasons :—

1—In May, 1874, a Chinaman named Kwong came to defendant and asked him to be the *Foreign* Editor of a Chinese newspaper afterwards to be established in Shanghai.

2.—The defendant asked that his duties should be distinctly enumerated. The duties required were that defendant should manage the foreign department of the paper, making translations of all foreign news of importance, and supplying articles on foreign matters of interest. Also keeping all foreign accounts, and receiving and translating foreign advertisements.

3.—The man Kwong said that he had engaged an Editor for the paper, a Chinaman named Kwan. This man would have the power of inserting or rejecting "copy."

4.—That the Chinese Editor, Kwan, did reject certain articles and also alter others written and translated by the foreign Editor. This proves that the Chinese Editor was the Editor in chief.

5.—The Chinese Eidtor "makes up" the paper, and reads the proof copy. He has therefore the power to insert or reject, and is most certainly the responsible party.

6.—When the man Kwan resigned, he inserted a notice in the *Shun-pau* that he was no longer responsible for what might appear in the *Wui-pau*.

7.—The Proprietors of the *Wui-pau* appointed "Yu" as the successor to Kwan, as responsible Editor of the *Wui-pau*.

8.—This man Yu is well known as the editor of the Chinese department of the *Wui-pau*.

9.—The said Yu inserted the whole of the articles, paragraphs, &c., in the paper of the 4th inst., without a single reference to the foreign Editor.

10.—The foreign Editor knew absolutely nothing of the supposed libel, until the receipt of a letter from G. Jamieson, Esq., of H. B. M. Consulate.

11.—That the statements made in the petition of the plaintiff Fan are false, particularly where he represents himself to be a "gentleman," to have been in receipt of a salary of $90 per month in the service of the C. M. S. N. Co., and where he states that he was "in good repute with his fellow countrymen" until the publication of the supposed libel, proof is offered in the following letter, which is a true copy of one written by Mr. Tong King-sing, the manager of the C. M. Co., in reply to one sent by the defendant. This shows clearly the position of the plaintiff Fan, and the estimation in which he was (and is) held by his fellow countrymen; and which the supposed libel had nothing to do with."

Mr. MILLER, in introducing the case, said it was one of libel, and he thought rather a bad one. The plaintiff was a Chinaman, as described in his petition, and defendant was manager, editor, and publisher of a certain Chinese newspaper called the *Wui-pau*. On the 4th of January, there was a libel published in that paper which was the cause of the petition. He had filed a paper of the date that contained the original article, and which had been translated for the benefit of the Court. Mr. Miller then read the petition as given above, calling the particular attention of the Court to the Chinese word, or character, used to describe the plaintiff, whom it represented to be a coolie.

His LORDSHIP—But it is not libellous to say a man is a coolie, in the employ of some one.

Mr. MILLER thought it was libellous when applied as in this case. The Chinese character by which it was expressed in the newspaper was one of great meaning, and it was of deep importance to the plaintiff, because amongst the Chinese it showed that he was in a much lower position in life than he really occupied.

Defendant said the true meaning of the character was "labourer."

Mr. MILLER went on to say that he would now come to the translation, and asked whether his Lordship would take the one that had been supplied to him, or would he hear another read?

Defendant said he had no objection to the translation already made, except as to the meaning attached to the word, "this man was engaged as coolie;" it ought to read, "this man was in the employ," or "was a labourer in the employ."

His LORDSHIP,—It is then a fair translation, with that exception? That is your only objection?

Defendant.—Yes, I have no other. I might say it was used as a Cantonese phrase.

Mr. MILLER asked Heding, the Consular Interpreter, the meaning of the character?

HEDING said it did not mention coolie at all; it meant "formerly working in the employ."

Mr. MILLER.—Does it say in what capacity?

HEDING.—No,—only in the employ.

His LORDSHIP—If they had wanted to use the word coolie, they would have used another expression altogether?

HEDING—Yes.

Mr. MILLER—The petition charges that the whole of the article is used in a defamatory sense.

His LORDSHIP—That is a question for the Court.

Mr. MILLER then read the translation, which was checked by Heding in the original. It contained allusions to the plaintiff's visiting opium houses, and not being able to pay his bill.

Mr. MILLER (reading)—He offered to pledge his outer trousers in payment of the bill. (Laughter.)

His LORDSHIP—That showed his honesty.

Mr. MILLER (continuing)—He caused a great uproar; lots of people were dragged into the shop to smoke opium, and did not leave till the day was ended.

His LORDSHIP—What does that mean?

Mr. MILLER—It means that a concourse of rowdies are dragged in to smoke opium at the expense of the shopkeeper who supplies it.

His LORDSHIP—What had the plaintiff to do with that?

Mr. MILLER—The article seeks to show that he was connected with those rowdies—that he was one of them. It was defamatory. He went on reading other portions of the document, which he contended were calculated to hold the plaintiff up to obloquy. One part referred to a celebrated horse, which had ultimately become so worthless as to be sold for a cup of wine, the meaning being that the plaintiff had been brought down to a low ebb, and was degraded by frequenting opium shops. He (Mr. Miller) would now put in a copy of the *North-China Daily News*, which contained an advertisement from the *Wui-pau* office.

His LORDSHIP—That is not evidence, you must call some one from the office to testify.

Mr. MILLER said he was prepared to do that. He then called.

Mr. D. WARES SMITH, who deposed—I am accountant, and have charge of the advertisement department of the *North-China Daily News*. Nearly all the advertisements pass through my hands. The advertisement produced did so, and I produce the original copy. (Copy handed to the Court.)

His LORDSHIP—Do you know whose handwriting it is in?

Witness—I do not know the handwriting.

His LORDSHIP (to Mr. Miller)—You must carry it a step further.

Mr. MILLER—In consequence of this copy being sent to the office, the advertisement was inserted?

Witness—Yes. I can produce other documents in the same handwriting, with Mr. Gill's signature.

Defendant—I'll admit it is our advertisement.

(The advertisement in question was published on the 31st August, and authorised the defendant to assume the entire mangement of the *Wui-pau*, from the 1st September last.)

Mr. MILLER next called—

The PLAINTIFF, who deposed—My name is Fan-tsiang-chi. I am doing nothing now. I

until the son of a titular *tsiang-kün* of the lowest degree would be no longer the inheritor of a title.

(*Note.*—An apparent departure from the symmetry of the rule of nomenclature may be observed in the case of the Prince Yih Wei, the eldest of the sons of Tao Kwang. His name of Wei is written 緯 with the radical 糸 *(Silk)*, whereas Hien Fêng and his brothers are distinguished by the radical 言 *(word)*. The discrepancy arose, it is explained, after Yih Wei's decease, when the Emperor Tao Kwang ordained the abandonment of the radical 糸 *silk* and chose 言 *word* as its substitute. It is unnecessary here to dilate upon the changes which, according to Chinese ideas of reverential duty, have been made in the form of the characters employed successively for the personal name of each emperor. An instance may, however, be given in that of the present sovereign, since whose accession the character Ch'un 淳 has been altered into the form 湻.

The titles given to the princes of imperial descent are largely compounded of Manchu words. Thus *ho shêh* (originally *banner*) signifies one of the four divisions of the army or State ; and *beileh* has the meaning of *commander* or *leader*. The military origin of the dynasty is commemorated in these appellations.

N. B.—The above was written before the death of his late Majesty, the Emperor T'ung Che, who died on the night of Jan. 12th, 1875.

Outports.

TIENTSIN.

An accident occurred on the 6th instant [illegible] the soldiers were practising; four men were killed and six others wounded. The cannon were of a lot said to have been made in China lately, after foreign models. The powder, made at the Tientsin works, is equal to the best manufactured English ; and owing to its great strength, it requires cannon to be well made, and of the best quality of metal, to withstand its explosive power.

During the evening of the 5th instant, a fire broke out in the cookhouse of the Lung-shun hong—a Russian house within the Settlement ; but by the prompt aid of the officers and seamen of the Russian gunboat, it was speedily got under, before it had done much damage. The men of the British gunboat reached the scene of the conflagration soon after the alarm had been given, but their aid was not required.

The Temperance men of H. M. gun-vessel *Midge* and the U. S. gun-vessel *Palos* give a tea and miscellaneous entertainment this evening, in the Union Church, to which the public have been invited. The other men of the gun-vessels give a theatrical entertainment at the Club on the evening of the 13th, and have also invited the public.—Mrs. Waeber gives a ball at the Russian Consulate-General on the evening of the 15th instant. It will be seen therefore that at present the foreign residents are having many amusements and are enjoying themselves. To-morrow is the first day of the Russian New-year, when it will be our duty to return the compliments of the season to our Russian friends.

During the past seven days our weather has been very pleasant, not having been extremely cold or windy. Within that period the thermometer, in the shade, has risen beyond freezing point ; and during the night it has ranged from 26° to 16°. This morning at daylight it shewed 22°. At noon to-day I had the river ice measured, when it shewed a thickness of ten inches, having increased two inches within the week. There is of course a considerable traffic on it.

Up to noon to-day, the Customs' courier with the French mail had not arrived, so we have no letters to reply to. The non-arrival of the courier is something unusual, as the mails hitherto have been extraordinarily regular in their appearance during the winter seasons. On the 7th, the heavy mail with our newspapers, &c., by the Chinese post-office, reached here. It is the second mail by this channel we have received this winter.

11th January, 1875.

HONGKONG.

The number of Bonds of the Chinese Imperial Government Loan to be allotted was 3,000, while the number applied for was 20,171.—Mr. Ad. André has taken Mr. Rowett's place as deputy chairman of the Hongkong and Shanghai Bank. Mr. F. D. Sassoon takes his brother's (Mr. S. D. Sassoon's) seat as director. —The *Daily Press* states that the American schooner *Scotland*, which cleared for Vladivostock, has left for the wreck of the *Japan*, taking on board with her Captains Robertson (? Roberts) and Lefavour, and 4 European and 10 Chinese divers, to attempt to recover the treasure. The *Scotland* will proceed to her destination should she be unsuccessful, leaving her passengers at one of the coast ports. The *Press* also reports that on the 8th instant, the top work of the forehouse of the *Japan* drifted down to near Reef Island, where it was picked up by a Chinese junk, taken on shore there and broken up. It took several small junks to carry away the wood. The wreck has been found, and measures have been taken to secure and recover the treasure and other valuables.—The Hongkong, Canton and Macao Steamboat Company declare a dividend of 6 per cent. on the working of the past half-year. The sum of $19,601.64 is carried to new account. The net loss on the *White Cloud* is estimated at $31,000.—The *China Mail* learns that Captain Roper has assumed temporary charge of the S. S. *Ly-ee-moon*, Captain Stevens having been taken ill and compelled to remain at Nagasaki.—The same paper records with much regret the death of Mr. Leonardo d'Almada e Castro, late chief clerk of the Councils. Mr. d'Almada e Castro was appointed chief clerk in 1843, and entered the public service in the office of the Chief Superintendent of British Trade in China in 1837.—The *Press* reports another "knocking down" case in the Colony. Some short time ago, the chief officer of one of the steamers in the harbour was returning to his vessel, about half-past two in the morning, when he received a heavy blow on the head, which knocked him down and rendered him insensible. A valuable watch was taken from him, and also some money, and before he regained consciousness the robbers had made off. He managed to get to his vessel, when it was discovered that he had received a very severe wound above the ear, and medical assistance had to be procured. He still remains in a very precarious condition. —A deputation of the former pupils of St. Paul's College has waited on the Right Rev. the Bishop of Victoria by invitation, to discuss with him a plan for the re-establishment of the college. His lordship stated that he wished to start with six theological students. The pupils offered to devote the surplus money from the Bishop Smith's Memorial Fund to the promotion of this design. It was hoped the college would be opened on 22nd February.—A man named Philip Davis, who ran a short but eventful career in Shanghai as a quack conjurer and general loafer, has been up at the Police Court, charged with breaking the conditional pardon of a former sentence by returning from deportation. On the 15th he was again brought up, to answer a charge of obtaining goods to the value of $62 from a Chinese tailor, and was committed for trial. He represented to a Chinawoman, one of whose sons by a foreign father lives in Shanghai, that he was her son, but though he puzzled the old lady by displaying some knowledge of family matters *à la* Orton-Tichborne, she was not to be deceived. The same representations, however, judiciously made, deceived the tailor.—The raised str. *Leonor*, having been partly pumped out, has been taken to Kowloon Dock.

At the Criminal Sessions, Kong Ling Woo, compradore at the *Daily Press*, pleaded guilty to the embezzlement of $695.70, and was sentenced to one year's imprisonment with hard labour. His employer, Mr. Bell, recommended him to the mercy of the Court on account of his long service and previous good character ; and to that recommendation, Justice Snowdon, in passing sentence, said great weight had been given. —Hongkong has been invited to contribute to an Intercolonial Exhibition to be held in Melbourne in August next, to prepare for the International Exhibition which it is proposed to hold in Philadelphia in 1876.—Mr. James Collins, late chief clerk at the Magistracy, has died at Calcutta.—The *China Mail* has reliable information from Siam via Singapore, which enables it to state that the difficulty at Bangkok is not of a serious nature. The second King had taken refuge at the British Consulate, on *suspecting* that the first King meant to do him mischief. But no blows had been struck, and there was nothing to show that the matter would not easily be settled.

H. M. S. *Iron Duke* left for home on the 12th inst. The *Hongkong Times* remarks on the occasion, that for some twenty minutes it seemed as if a naval engagement was taking place in the harbour. The *Princess Charlotte* first saluted, then the French, Russian, Austrian and German corvettes took up the firing, the *Duke* running up the various national flags and returning the compliment, the shore battery following suit. As the *Duke* slowly steamed out and turned, the Jacks manned the yards, two intrepid tars mounting the fore and main trucks waving a flag. As the other men-of-war were passed, cheer after cheer was given and reciprocated. The band of the *Duke* played the "National Authem," "Auld Lang Syne," "Home, Home, Sweet Home," &c., the other vessels rousing to the occasion, and also giving nationalairs. In the midst we noticed signals from the French corvette "Wish you a pleasant voyage," to which the *Duke* responded "Thank you." —The *Mail* states that a gentleman who represents the Calcutta Opera Troupe has come to Hongkong to see if arrangements could be made for a series of performances in this Colony. As, however, he wants a *guarantee of* $19,000, and the secretary of the City Hall expressed serious doubts of his obtaining it—while the agent refused to consult any of the leading houses on the matter—he has given up the idea. It was supposed in Calcutta that 310 persons to guarantee $64 apiece could be found in Hongkong without difficulty. —The survivors of the *Japan* had passage given them in the *Alaska*, for Yokohama and San Francisco. Captain Warsaw replies as follows to the public address which was presented to him :—

"I cannot fully express to you the great consolation your cordial, friendly, and I must say, flattering address has proved to me. The terrible destruction of my vessel has been a trial of no ordinary kind, and the subsequent proceedings have, of course, been very painful

to me, recalling, as they did, and keeping perpetually before me, the scenes of that fearful night. I cannot, however, avoid feeling a kind of sorrowful pride when I find my fellow men coming forward with such an unqualified expression of their admiration of my conduct under the difficult circumstances in which I was placed on the occasion you allude to. But, gentlemen, I did nothing but my duty as a man, a Christian, and commander. I could not have left the doomed vessel while one soul remained to be rescued. I am satisfied all was done that could be to avert the disaster as soon as the fire was discovered. On behalf of the officers and crew of the *Japan*, I thank you most heartily for the just and kindly appreciation of their conduct you have been good enough to express. I will only say they fully deserve it. For my own part, gentlemen, I offer you my warmest thanks for this expression of your goodwill and esteem. I shall keep it all my life, and hand it down to my children. Once more I thank you, and hoping soon to return, bid you a regretful farewell."

CANTON.

The *Daily Press* hears that a school in connection with one of the American Missionary Society's Chapels at Canton has been burned down. The fire is supposed to have been the work of incendiaries.—The ceremony of transporting the remains of the late Viceroy, which took place on the 11th instant, appears to have been of a very imposing nature. The foreign consuls, and all the provincial officials, numbering several thousands, were present, while the spectators were innumerable, so that the throng was like a "big wall." The streets were lined with soldiers, and at the corners soldiers were specially deputed to keep the road clear.

NAGASAKI.

The *Rising Sun* reports the occurrence of a fire at the Government Arsenal early on the night of the 12th instant. The origin is unknown, but seamen from the different men-of war in harbour were quickly landed with appliances, and soon extinguished the flames. One house was totally destroyed, however, and others narrowly escaped. There are a number of fire-engines at the Arsenal, but not one fit for use.—At H. B. M.'s Consular Court on the 11th inst., before Marcus Flowers, Esq., W. L. Malcolmson was charged by Mr. J. C. Clark on the part of the Japanese Government, with having on the evening of the 4th of January, unlawfully and maliciously damaged certain letter boxes and other articles in the Japanese Post Office, the property of the Japanese Government. Defendant acknowledged the charge, but said he did not do it maliciously. It was further stated that he had written a letter of apology to Mr. Clark, and that gentleman on being examined, said he thought it was done through a lark, and not maliciously. The Consul in deciding the case, said such larks must not be permitted, and ordered defendant to pay a fine of $20 and costs; and also bound him over to keep the peace for twelve months, himself in $200 and one surety in a like amount.

HIOGO.

The *News* speaks in high terms of the mustering of the foreign and native Fire Brigades on the afternoon of the 12th instant upon the Bund.—The new postal arrangements at this place, as made by the Japanese authorities, do not appear to be working well as yet, but doubtless the novelty of the thing to them is wholly accountable for the lapses that occur. The *News* is, however, surprised at the number of missent letters, and mentions in addition that several times letters which have been addressed Per P.M.S.S. *Nevada* or *Golden Age*, as the case may be, have been sent overland between Yokohama and Kobe and Nagasaki, or *vice versa*. In other cases, letters fully addressed in English have been insufficiently re-addressed in Japanese at the Local Post-office, and were consequently delivered at the wrong houses. Steps are already being taken to remedy these deficiencies, and in future one of the foreign employés of the Post Office will accompany each foreign mail to Osaka, in order to superintend the distribution of the letters there.—Three slight shocks of earthquake were felt here on the 14th instant, doing no damage, however.—The annual general meeting of the Hiogo and Osaka Chamber of Commerce was held on the 16th instant. The Chamber does not appear to be flourishing, as a considerable falling off in the receipts was reported, and the question of the advisability of reducing the subscriptions was referred to the Committee. —In discussing the appointment of Trading Consuls, the *News* says it has always held such appointments to be a great mistake, and hopes the Japanese Government will, at the revision of the Treaties, protest against its continuance.—Mr. R. B. Lewis, the Consular representative of Hawaii, took his seat at the Municipal Council for the first time on the 8th instant; and concerning him the *News* says: we can only say that, judging by his lengthened connection with the Consulate of the United States at Shanghai, he promises to prove a useful acquisition to the Consular Board. —Acting under instruction from Sir Edmund Hornby, Mr. Acting-Consul Annesley has written to Messrs. Heimann and Valantine returning the fine and fees levied in the recent case of contempt of court brought against them, and apologizing for his mistaken views of the law in the case.

YOKOHAMA.

The *Mail* complains of lack of news, in consequence of the New Year's rejoicings not having fairly terminated.—A Japanese is about to start an English newspaper in Yedo.—Small-pox is still rife in Yedo and Yokohama. Mr. Johnson, one of the teachers in the School of Foreign Languages, has died from it; and twenty other cases among foreigners are reported, seven of which have proved fatal, Mr. Francis, an employé on board a steamer, being one of the number.—A review of about four thousand men has been held by the Mikado on the Parade before the Gaimusho, the manœuvres, which were of the simplest character, being directed by H.I.H. Prince Fushimi. His Majesty arrived in an open carriage which he continued to occupy throughout the spectacle. His suite occupied five other vehicles.—The *Herald* reports an entertainment given on the night of the 12th inst., in the lecture-room of the British Camp, by the Good Templars of Yokohama. The room was well filled by the men of the battalion of Royal Marines. The chair was occupied by Colonel F. J. Richards, commanding the battalion, who said he was glad to see so many of the men under his command there; that although he was not a member of the society himself, he heartily approved of the movement, and noticed that the men of the battalion who were members were seldom or never brought before him charged with offences against military discipline; he hoped many more would join. The Rev. Mr. Correll spoke on the objects and aims of Templarism, and a pleasant evening was spent.—The annual meeting of the Amateur Athletic Association of Yokohama was held on the 8th instant, when the report of the committee showed that a successful year, both financially and otherwise, had been passed. The following were elected on the new committee: Lieut. Hungerford, and Messrs. Reid, Tripp, Longford, and Hamilton.—The Yokohama Rifle Association held its annual meeting on the 7th, and a new committee, consisting of Captain Hill, R.M., and Messrs. Tripp, Benson, Townley and Dalliston, were elected to serve during the ensuing year. The Hon. Sec., Mr. A. Barnard, tendered his resignation consequent on his approaching departure from Yokohama. A warm vote of thanks to Mr. Barnard for his long and valuable services as Hon. Sec. was passed.—The *Gazette* says that three men were killed by an explosion of steam on board the *Funjin Maru* while leaving the harbour.—On the night of the 10th instant, several Japanese, armed with swords, entered a native dairy on the Race Course Road, seized, gagged, and bound the inmates, and decamped with all the moveable property on which they could lay hands.—The same paper says that a cuttle-fish of enormous size is on exhibition in the vicinity of Yokohama. It is from 10 to 12 feet in length, its arms or suckers being 6 feet long, and in some parts as thick as a man's thigh. Stories of the existence of such monsters are common enough amongst the Japanese, but as anything of the kind larger than a plate is seldom to be seen exposed in the market, the accounts which from time to time have been circulated respecting such leviathans of the deep have generally been treated as fabulous.

Peking Gazette.

ABSTRACT OF PEKING GAZETTES.

Dec. 24.—(5)—The acting Governor-General of Yunnan and Kweichow memorializes observing that, in consequence of the obstruction to intercourse with Burmah during the late rebellion, no tribute has been sent forward for years past; and six Imperial decrees addressed at various intervals to the King of Burmah have lain in the provincial treasury for some time awaiting transmission. Last year, after the overthrow of the Mahommedan rebels, a Burmese official found his way to Yunnan Fu, bringing a letter which, on being translated, was found to be to the effect that the King of Burmah, having heard of the restoration of order, had sent him to ask what arrangements should be made about tribute and other matters. The officer was hereupon instructed that action should be taken according to existing rules, and the Governor-General at the same time commissioned the Prefect of Yung-ch'ang Fu to send the six Imperial decrees to Burmah, which was done by the hand of Major Yang-Ting-jui and others with him. Yang Ting-jui has now returned, bringing with him four boxes containing despatches in Burmese [from the King], addressed respectively to the Prefect of Yung-ch'ang, the Financial Commissioner, the Governor, and the General. On being translated, it is found that the despatch is to the effect that the king has received the Imperial decrees with the utmost reverence; and it further states that he is preparing a road and selecting elephants, with a view to sending tribute without delay. He requested that a memorial be addressed to the Throne on his behalf communicating this intelligence. Upon this the Governor-General dilates upon the glorious influence exerted by the Sovereigns of the present dynasty, in securing the tributary allegiance of Burmah, after an interruption of two centuries; but he thinks it incumbent upon him to observe that, although the language used in the despatch received from Burmah is respectful and submissive in the fullest degree, without a word of self-assertion or arrogance, still, the King has not described himself by name and surname, and has made use of much that is improper in the enumeration of his titles. It is to be feared, consequently, that the rules of propriety might be transgressed in the address to the Throne, which is hereafter to be presented with the tribute

was compradore in the China Merchants' Steam Navigation Company's service. I received $90 per month, and $30 allowance. I had to pay the $30 away in wages. I was in the employ of the Company half-a-year, and left with the old manager. I left because of the change of managership. I came out by my own wish,—I was not dismissed. I was at Hankow as compradore for Shaw Brothers for four years and a half. I had Tls. 30 per month as salary, and commission besides, of 10 per cent. on all business in foreign goods, and 20 per cent. on sundry other goods. It was on foreign goods sold to Chinese, and sundry Chinese goods sold to foreigners. I got in one year Tls. 8,000; the average was Tls. 3,000. I left Shaw Brothers because it was suspected that I had taken some money.

Mr. Miller.—Did you take the money?

Heding said the plaintiff now corrected himself, and said it was because it was thought he would become indebted to the firm, and through insinuations from other people, especially the compradore at Shanghai, who was indebted to him Tls. 3,000.

Examination resumed—I was afterwards for half-a-year with Mr. Mackey, leaving him in June, 1874. Somebody was going to start a shipping business between this and Hankow, in which I was to have been engaged, but in consequence of what appeared in the *Wui-pau* it fell through. The whole income of the new hong was thought likely to be Tls. 3,000 per annum. and I think my share would have been Tls. 1,000. I know the *Wui-pau* office, and saw the paper of the 4th January. I bought a copy of it on the 29th of the 11th moon. Another person was with me. I produce a copy of the paper, which contains an advertisement that defendant has sole management and control of the *Wui-pau*.

By Defendant—I was at Shaw Brothers, and in one year made Tls. 8,000. My salary was Tls. 30 per month. I made a great deal by commissions. It was afterwards arranged that Shaw Brothers should not pay me Tls. 30 per month, but allow me to store goods in their godowns. I bought some property with some of the money, and lost the rest. The reason I left Shaw Brothers through my own countrymen's insinuation was because they saw I was doing a large business, and were jealous, and wanted my situation. I left the service of the C. M. S. N. Company voluntarily, because I did not want to serve with the Cantonese. After Mr. Tong-king-sing took the management, I never was at his office. He did not get me removed. When I was on board the *Aden*, I received extra salary for writing and doing other things for Chu, the manager. It is not on the books of the *Aden*. The Chehsien did not want me some time ago and could not find me. I am willing to go with Mr. Gill to the Chehsien and ask him. I never applied to Mr. Tong-king-sing for employment. Whether Chu sent Tong-king-sing any letter, I cannot say. I only saw Tong-king-sing once, about taking some passengers going to Tientsin. That was after I left the C. M. S. N. Company. I did not ask Tong-king-sing to take me in the Company's service again. If I had wanted to go into their service I could have done so. It is not true that I left the wrappers of my trousers in payment for opium. I have been to the opium shop, but do not owe them a *cash*. I was in the shop on the day I was said to have left my trousers. I was there only a short time and came out. Somebody from the *Wui-pau* office was there on that day, but I did not speak to him. Somebody told me he was from the *Wui-pau*.

By Mr. Miller—Tong-king-sing is a Cantonese, Chu is a Pootung man. Northern men employ both northerners and Cantonese; but Cantonese always employ Cantonese. I used to engage five men when on board the *Aden*, and paid them from the $30 allowed me. When I and the *Wui-pau* man were in the opium shop, I was sitting on the opium couch, smoking tobacco. The *Wui-pau* man was smoking opium. There was no uproar or noise. I left about four in the afternoon.

Hing Sung-kee, a godown keeper formerly in the employ of Shaw Brothers, was called by Mr. Miller to prove the plaintiff's position and character at Hankow.

His Lordship said it was no use calling a witness in the same position as the plaintiff to speak to those matters. If it was necessary to call anybody, his master should be called.

Mr. Miller said he thought Mr. King would have been here.

His Lordship—Well, go on.

Examination resumed—I remember the 2nd January. I went to an opium shop in Paoshan street on that day. I only went in to have a look round. Plaintiff came in about three o'clock, and left before five. I remember no disturbance there. We were all talking together. I paid for the opium we smoked. I saw no one from the *Wui-pau* there. I paid for all the opium that was smoked. There was no disturbance made about payment.

Defendant declined to cross-examine this witness.

Seh Yuen-sung, brother of Chu, the former manager of the C. M. S. N. Company, was next called, but his evidence was very brief, and carried the case no further than as to his knowledge of the connection of the plaintiff with his brother.

Mr. Ernest Major, editor of the *Shunpao*, was next called by Mr. Miller.

His Lordship—This is the secret of the whole thing; it is the case between the two papers, of the *Eatanswill Gazette* and the *Independent*, immortalised by the late Charles Dickens, over again.

Witness, examined by Mr. Miller, said he received the *Wui-pau* every morning. In the article in question there is used the word "Yoon-kung," which is never applied to a Chinese gentleman or even a shroff. It is used as meaning labour—bodily labour. That is the meaning which, from my knowledge of Chinese, would be applied by anybody to the word. It would bear a very strong inference against the man. There is a class among the Chinese who make a raid by fifteen or sixteen of their number going to a tea or opium shop and drinking or smoking without intending to pay. That is a Chinese custom, and the class who practice it are called "Lu-muens." The inference would be that the plaintiff was one of that class, which would tell very much against him. (The witness was questioned upon the inference that would be attached, in the Chinese mind, to the allusion to the horse, and other matters, and said that the inference would be that he was a degraded man.)

By defendant—The plaintiff was never in the employ of the *Shunpao*. My brother knew plaintiff in Hankow, and he has been at the *Shunpao* office. I have asked him to use his influence to obtain advertisements for the *Shunpao*, and it was understood that I was to make him a present, but he was never regularly employed in the office.

His Lordship—Well, we have got out of that happily.

Mr. Miller—That is all the evidence I shall call for the plaintiff, Mr. King is not here.

Defendant then, in the terms of his answer, questioned the jurisdiction of the Court in the case, and said he thought it ought to have been heard in a Chinese Court. He was proceeding to mention matters in connection with the management of the *Wui-pau* and a Chinaman named Kwong, who was absent, when

His Lordship said it did not matter whether Kwong was here or not here. The Court had nothing to do with the management of a newspaper. Anyone holding himself out as the editor was responsible, if an article was defamatory.

Defendant said there had been an action for libel brought against the City editor of the *Times*, and not against either of the other editors.

His Lordship—That might be, but it did not alter the law of the case.

Defendant—I am only one of the editors of the *Wui-pau*, and there are four or five others.

His Lordship called defendant's attention to the advertisement in the *North-China Daily News*, and said whoever assumed the management of a newspaper was liable for its contents.

Defendant said he would call witnesses to show that he could not help the article appearing. He knew nothing of it.

His Lordship—Your proving that will not help you.

Defendant—Oh, yes; it will perhaps influence the question of damages.

His Lordship—No, it will not; it has nothing to do with the case whatever—whether you knew of it or not, or whether you could or could not prevent its insertion, has nothing to do with your liability in a civil action of this kind.

Defendant—But if I had said they must not put it in, they would have put it in. I have no control over the Chinese editors. A few weeks ago, there was an article written against foreigners, and I said, "Do not put that in," but it was put in. I have nothing to do with the Chinese part of the paper. I am only editor of the foreign part, and to transact business matters with foreigners.

His Lordship.—Then do not call yourself *the* editor, or manager; say you do not know anything about Chinese articles. Let me suggest to you, that before you enter upon the position of editor of a newspaper, you should look a little more into the law of newspapers. The position of an editor is a very responsible one, and should not be undertaken lightly.

Defendant—I must ask for an adjournment, to enable me to call Tong-king-sing, who is now at Hangkow.

(A letter of Tong-king-sing's was appended to the defendant's answer, but it was not read in Court, and as the writer could not be called, any allusion to the letter could not be received as evidence. Considerable discussion followed the mention of Tong-king-sing's name, but for the reasons given, it cannot be reported.)

Mr. Miller said the case was aggravated by the fact that no notice was taken of a letter that was written by Mr. Jamieson on the subject.

Defendant repeated that he was editor for the foreign part of the paper only, and if the question of publishing this article had been left to him, he would not have published it. He wanted them to publish an apology, but they refused to do so—they said the article was true, that it belonged to the Chinese part of the paper, and he (defendant) had nothing to do with it.

His Lordship—That does not answer this complaint. Unless you clearly demonstrate upon the face of the paper that you are not responsible for whatever is inserted, you will be held responsible; and even if you were to put in such a notice, I do not know that it would help you, if you are a proprietor. If a proprietor will not exercise his authority to keep out defamatory articles, he must suffer the consequences. If Tong-king-sing was to come here and swear to everything that is in his letter, it would not alter the case one bit. The article ought not to have been put in.

Defendant—Decidedly not, and if it had related to a foreigner it would not have gone in. I do not defend the article in the slightest.

His Lordship—Of course not, but that is no answer to the man whose character has been defamed. There is no doubt the article is libellous.

Defendant—The Chinese editor who wrote it says he can prove the thing to be true, and that it was not inserted with a libellous or malicious intent. That is the defence of the Chinese editor, and now the thing is fathered upon me.

His Lordship—It is quite clear that you have no defence. If the article be in a certain sense true, yet to state a fact that is true in such a way as to twist the truth to work an injury, is actionable. You ought not to have printed it. If I had been picked up drunk in the streets, you would have been justified in publishing that, because such a thing would show that I was not fit for the position I hold. But there is no necessity for a newspaper editor to go out of his way to pry into the conduct of private individuals whose acts are of no interest to any one; and it is certainly not his business to publish what he may so learn to the world as an article of news. You had better make some change in your position with the paper, and let the world know it—make it perfectly clear that you are nothing more than a servant, and not a responsible editor. But then comes the question of proprietorship—you might be made liable all the same in that character.

Defendant.—The only defence that I can possibly make is that which the Chinese editor told me. The plaintiff has not lost anything by the libel, but I cannot defend the insertion of a thing that I have said is wrong from the beginning. It would be against my own judgment to do so—I most decidedly object to the insertion of such an article.

Mr. Miller—As to the amount of damages?

His Lordship—You have not proved any special damage of any kind.

Mr. Miller said he thought he could prove some special damage, and called attention to

the loss by plaintiff of one situation in connection with the starting of the shipping firm to Hankow. He lost that through this libel.

His LORDSHIP—That was only a statement of the plaintiff himself, and is not sufficient. You should have called some one to prove that they had read the article, and that, in consequence of it, they would not and did not employ the plaintiff.

Mr. MILLER.—The whole character of the article is libellous in a great degree. There was no noise in the opium shop while plaintiff was there. He would admit it was not a respectable place, but there was no uproar. The defence had not proved and could not show, that the plaintiff caused any disturbance, nor that lots of people were dragged in to smoke opium. Then, there was the assertion that this man was formerly employed as a coolie, and was dismissed for certain reasons by his master. No reasons were, however, given by defendant. They next had the evidence of Mr. Major, who said he would not have used that particular Chinese character towards the meanest shroff in his house. To say the man was dismisssd for certain reasons, and not to attempt to prove them, rendered the matter worse than it was before. Chu was a northern man—a Cantonese manager came in, and the northern men were dismissed, amongst them being the plaintiff. Then they had Mr. Major's further evidence, that he knew the plaintiff, that his brother in Hankow knew him well, and that while he was out of work, he was to receive something from the *Shunpao* for getting advertisements. Then with regard to the last paragraph in the article, if they held a man up to contempt in the way that last paragraph did, they must expect to be held liable. The meaning of the last paragraph was that the plaintiff had become addicted to the excessive use of opium, and was a degraded character. The plaintiff had held a respectable position, and the very fact of publishing such a thing in a newspaper about him, was likely to cut the ground from under his feet for the future. The Chinese were a reading people, and the fact of the libel going around was likely to do him very great injury. They did not pay attention to Mr. Jamieson's letter, but went on publishing, and that did not improve the matter. Mr. Miller quoted some cases bearing upon the points he had raised, in which it was laid down that loss of character through libel exceeded loss of property. In the present case the plaintiff stood a very good chance of losing his means of livelihood altogether, for the libel might stick to him through life. The damages asked for could not be considered a very excessive sum. The plaintiff's occupation was not a mean one, and that and the circumstances of the libel would justify his Lordship in giving sufficient damages to stamp it as a bad case of libel.

His LORDSHIP said it was clear the article was an improper one to write and publish, but he was not at all clear that the plaintiff had taken the proper step, if he was so anxious as he pretended, in coming to this Court. If he was anxious to clear his character in the face of his Chinese friends, he would have taken the Chinese editor into a Chinese Court; his position in Chinese society would not be materially mended by any verdict in this Court. The damages would be merely nominal, $50, to carry costs.

The Court then rose.

POLICE COURT.

Shanghai, Feb. 9th.

Before R. A. MOWAT, Esq.

REG. *v.* JOSEPH DYAN.

Summons for Assault, Larceny and Robbery.

This case was again proceeded with.

Mr. MYBURGH, who appeared for the defendant, asked whether his Worship had decided about amending the summons?

His WORSHIP—I understand that your first objection is that there are three offences on one summons.

Mr. MYBURGH—My principal objection is that there are three distinct offences charged on the same count, when they should be on three counts.

His WORSHIP—In an indictment for robbery an assault is always charged. With regard to the three prosecutors, if it was all one transaction I do not see how a man could not be charged in one charge with robbing three men. As to the property, the summons must be amended, and the property laid as the property of the first prosecutor.

Mr. MYBURGH—With regard to the question of property, I am quite agreeable to have the summons amended. But will the evidence adduced previously bear upon the case according to the amended summons? I consider that the Treaty allows foreigners to deal in opium in this port, and that the *onus probandi* was upon him to prove his right to the property. I can shew that my client had been in the habit of passing opium through the Customs, and I have also the evidence of two Europeans who were implicated.

His WORSHIP—How can I take their evidence?

Mr. MYBURGH—They are not charged.

His WORSHIP—I am afraid I cannot take their evidence. Only a short time ago a case occurred of a similar nature, where a Chinese charged two Englishmen with assault, and the defendants proposed to call a witness who proved to be an American, and who was implicated in the assault with the others; and upon my asking the complainant if he intended to proceed against him in his own Court, and his replying that he did, I held that I could not hear his evidence.

Mr. MYBURGH suggested that the prosecutors be asked if they intended proceeding against the other two Europeans.

His WORSHIP—I think I should ask them that when they are produced as witnesses.

Mr. MYBURGH—Then I certainly shall not produce them. He then called,

LING-YUEN-CHIO, cautioned, stated—I am defendant's servant. On the 28th January my master went to the Canton Road in a jin-rik-sha. I followed behind. In the jin-rik-sha there was a bag. The jin-rik-sha stopped at an eating house near there. We had started from the Yuen-tah Hong in Smith's Market. There was my master in the jin-rik-sha, a coolie in front and myself behind. The coolie had brought from the Hong a bag of opium which he put into the carriage. My master got out of the carriage and told the coolie to take the opium. I didn't hear where he said to. The coolie took the opium and went towards the west, my master following about 2 or 3 houses distance. I was following behind by my master's directions. I saw Chinese snatching opium from the coolie, and my master went up, but before he got up the bag was broken. A great number of people were about. I was about 2 houses behind my master. I ran away after the struggle commenced. I am quite sure it was my master's coolie that the men were taking the opium from, and that it was the opium that my master had had in the jin-rik-sha and given to the coolie. (The coolie has run away). My master came back to the Hong shortly afterwards with one ball of opium.

Mr. MYBURGH produced the Customs returns for the 28th Jan., wherein it was stated that his client, J. M. Dyan, had passed 1.20 piculs opium on that day (the day of the alleged assault.)

His WORSHIP said that after the evidence of that witness the charge of robbery must fall to the ground. The opium seemed to be the property of the defendant, and in turn dispossessing of it those who had just dispossessed his servant of it, he was only exercising a right that the English law allowed him. He (His Worship) wished to add that if this case had been put forward by the Opium Guild with the view of raising the question of the legality or otherwise of these seizures, it was to be regretted that they had not taken advice in the matter. He doubted if any one would have counselled a criminal prosecution under the circumstances; neither was it a convenient form of trying the broader question; that should be done, if at all, in a civil action.

Charge dismissed.

Shanghai, Feb. 15th.

R. (PATRICK CARROLL) *v.* A. W. A. SACK.

Charge of concealing and employing two able seamen, being deserters from H.B.M.'s Navy.

Mr. DRUMMOND for the prosecution.

Mr. HANNEN for the defence.

This case was peculiar and important. The defendant was Captain Sack, of the British ship *Star of Jamaica*, and he was charged by Patrick Carroll, a seaman on board that vessel, with the serious offence above-named, under circumstances fully detailed in the subjoined evidence.

Captain U. E. Singleton, of H.M.S. *Ringdove*, as being senior officer at Shanghai, was present in Court; and W. H. Medhurst, Esq., H.B.M.'s Consul, occupied a seat on the Bench. The Court was crowded with captains, mates, and seamen of merchant vessels.

Mr. DRUMMOND, in opening the case, said the defendant was charged with concealing and employing on board his ship, the *Star of Jamaica*, two able seamen, knowing them to be deserters from H.B.M.'s Navy, belonging to the *Shearwater*, that being an offence, under the 29th and 30th Vic., c. 109. He did not think it necessary to bring anything more to the notice of the Court now, and would at once proceed to call evidence.

At the request of the learned Counsel on each side, the witnesses to be called, or who it was thought likely would have to be called, were directed to leave the Court.

PATRICK FRANCIS CARROLL was the first witness called, and deposed.—I am an able seaman of the *Star of Jamaica*. The defendant is captain of that vessel. I shipped on board her at Hamburg, about nine months and a half ago. I was on board when the ship was lying at the Mauritius. We lay there about ten days, and sailed about the 18th of September. We had not got a full crew on board. We were shorthanded one ordinary seaman. We went aft to the captain, and told him that he had better fill up his complement before the anchor was got up, otherwise we would not get it up. I was present when that was said. We sailed about the middle of the day. I saw the captain come on board from the shore, about three-quarters of an hour before we sailed. I saw two men-of-war's men come on board just as we were about to sail. I was on the fore-topsail yard at the time. Most of the crew were engaged making sail. The men-of-war's men went up and spoke to the captain, as he was standing by the mainmast. They spoke to nobody before going to the captain. They were dressed in a jumper, blue cloth pants, blue cloth cap, with a white cover to it, and a knife lanyard round their neck. I recognised it as a Naval uniform. I did not hear what passed between the captain and the men. They stood together about five minutes. The pilot was standing alongside them. No one else was by. The men afterwards went into the forecastle. The ship sailed in about a quarter of an hour. I came down from aloft about ten minutes afterwards, and continued on deck till she sailed. The ship was not underweigh when the men came on board, the anchor was up, and the ship was hanging on to a slip rope. No one left the ship in a boat after she started. H.M.S. *Shearwater* was then lying in the harbour, about two miles and a half from where we were. She is a man-of-war and a surveying ship. In going out of the harbour we passed about a quarter of a mile from the *Shearwater*—within hailing distance. We could have passed without any difficulty close by her. The *Star of Jamaica* could have stopped close to her, and communicated with her without any difficulty by boat. No communication was made with her to my knowlege. I was on deck when we passed the *Shearwater*. I saw no boats pass. If a boat had been sent, or the *Shearwater* hailed, I should have seen and heard. I went into the forecastle in about half an hour after we were underweigh, and saw the two men-of-war's men there. They were still dressed in the same way. I did not notice the ribbon on their caps. They were wearing their caps. They came out of the forecastle in about three-quarters or an hour after we sailed. They lent a hand to fish the anchor. They remained on board during the voyage to Freemantle, and worked all the way. I saw some of their clothes more closely during the voyage. I saw a jumper with the name of "F. Bass" on it. There were also some white flannel singlets, braided withblue. I saw a ribbon also, with "H.M.S. *Shearwater*" on it. I have got some of these goods. They were left behind in the forecastle at Freemantle. I put them in my chest, thinking that if I brought this case on, I should have them for proof. I gave one of the men a shirt of mine about two weeks after we got to sea, as he complained of cold; and told him he might use it until he got to Freemantle. They received no pay on the passage, but took rations the same as the rest of the crew. We stopped in Freemantle five weeks.

The two men-of-war's men remained on board about a fortnight. They assisted in discharging cargo. I heard one of the two men ask the captain for money, saying he was not going to work for nothing, so that he might have some money to start him ashore. The captain asked one of the clerks what were the wages ashore. The clerk said 5s. or 6s. per day, I am not sure which, but the captain turned round to the men and said he would give them that. That was about a week, or a little over, after arriving at Freemantle. They remained a week or ten days afterwards. I did not see them paid. They went ashore with two other men, as a boat's crew, and the other two men returned by themselves. There were no men-of-war when we got to Freemantle, but H.M.S. *Barracouta* came in while we were lying there. I went on shore for about eight hours on duty at Freemantle. I was not on shore on leave at all. I produce the clothes I referred to just now, including the jumper, cap, ribbon, and two singlets, with a knife lanyard. They were all left behind. I do not remember the date we arrived at Shanghai from Freemantle. It is about four weeks ago. I reported this charge against the captain to the shipping master at the Consulate.

By Mr. Hannen—I belive it was last Wednesday I made that report. Freemantle was the first place we touched at after leaving Mauritius. I do not know what entry was made in the log-book about these men. I went into the forecastle by myself, after the men came on board. When the men came out of the forecastle, they had their jumpers off, but had their pants and singlets on. They looked like men-of-war's men then. We had a fair wind right abaft when we left Mauritius. It is usual to run about 20 miles before the wind when leaving that harbour, and then put the ship on the wind for her passage. I think we had got seven or eight miles when the men came out. The pilot saw the two men. I do not know if he was a Government pilot. I can swear that the men did not go over the side of the ship again, shortly after speaking to the captain. When we went aft and told the captain we would not get the anchor up until he filled up the crew, he said we had better get it up, as we should have fine weather all the way, and he would divide the missing man's money between us. This man was apprehended and brought on board the day we sailed, but he was drove off the ship again by the mate and second mate. I never reported to the captain that these men wore men-of-war's clothes or that they were men-of-war's men. I never heard any one else tell him. One of the men was called "Ned," and the other "Dick," or "Richard." It was not my intention to make the charge against the captain until the ship got home. I was going to be imprisoned here, and did not know whether I should see the captain or ship again, and thought it my duty to bring the charge forward. I did not intend to turn to work on board the ship again, and knew I should be sent to prison.

His Worship explained that the witness and three others of the crew of the *Star of Jamaica* had been brought before him on Wednesday, charged with refusal of duty. They were then ordered to pay the cost of the summonses, and return on board, being also told that, if they were still refused duty, they would be sent to prison. They were again brought up on Thursday, and sentenced to two days' imprisonment, the ship being intended to sail on Saturday. The charge appeared to have been made after the examination on Wednesday.

Cross-examination resumed—The *Barracouta* only lay three days at Freemantle, and the reason why I did not go to her was that the weather was rough, and would not permit anybody to go to her. I am sure it was the captain, and not the second mate, the men spoke to when they came on board.

Re-examined—When the *Barracouta* came into Freemantle, the two men had left the ship about a week. I did not intend to report the matter until I got home. I expected to be put in prison here, and thought this would be my last opportunity to report it.

By his Worship—My only reason for keeping it back until I got home, was that I should have then have had more time to look after it. I had no time to do it before, and did not know where to go to make the complaint at Freemantle. I enquired where to go here. It did not take me long to make the charge when I knew where to go.

Adam Taub, a Hungarian, deposed—I am an able seaman on board the *Star of Jamaica*. I was on board when she was at Mauritius. We left there on the 18th September. (The witness then gave similar evidence to the preceding witness, as to the arrival of the two men-of-war's men on board, and their dress.) I was on the topsail yard, loosing sails. I saw they had ribbons on their caps, with writing on. I cannot read English. The ribbon produced looks the same.

His Worship—Do you mean that you saw that from the topsail yard?

Witness—Yes.

Examination resumed.—I saw no one leave the ship except the pilot. The men came on board about five or ten minutes before the ship started, as near as I can remember. The *Shearwater* was lying in the harbour. We passed her within hailing distance on going out of harbour. I heard no hail, nor saw any boat leave the ship, on passing her. I think I should have both seen and heard if there had been either. The two men I saw come on board, remained and worked on board the ship all the way to Freemantle, and stayed on board ten or twelve days afterwards. I saw them come on deck, at the mouth of Mauritius harbour. They were wearing blue shirts, blue trousers, and caps without white covers, I did not see them go away at Freemantle. They had taken the ribbons off their caps when they came out of the forecastle.

By Mr. Hannen—When the men came on board they went and spoke to the captain, and not to the second mate. They were speaking to the captain for five minutes. They took their jumpers off after coming out of the forecastle. The pilot at the Mauritius is a Government pilot. He saw them. The men could not have left the ship without my seeing them go. When I was aloft loosing sails, I looked down on deck. I was ashore once at Freemantle, after six o'clock on a Saturday; and Carroll was once ashore also.

Re-examined—I think the pilot was a Government pilot because of his uniform and brass buttons. I heard the second pilot talking to the mate, and came to the conclusion he was a Government pilot.

The Court then adjourned, and resumed at three o'clock.

Charles Westerberg deposed—I am a Swede, and am an able seaman on board the *Star of Jamaica*. At the Mauritius, two men-of-war's men came on board in a native boat. I did not see it go away. I saw the men go up to the captain and speak to him. I am sure it was to the captain, and not to either of the mates. The captain then pointed with his hand, and the two men went forward. I did not see the men go into the forecastle. The ship sailed in an hour or an hour and a half afterwards. We were ready to start, and the anchor was up. The *Shearwater* was lying in the harbour. No boat or communication passed between the two vessels. The pilot left us at the light-vessel. I saw him go away. A man, who came on board with him, left with him. No one else went with him. (The remainder of the witness's evidence was simply corroborative of the preceding witnesses, with the addition that he was one of the two men who rowed the men-of-war's men ashore at Freemantle, and that while they were on board he saw them wearing the Naval clothing produced.)

Cross-examined—There were five men in the forecastle. There should have been six, but one had deserted. The two men-of-war's men were there besides. I cannot remember what time in the day it was when we left the Mauritius. I was one of the men who went aft to speak to the captain about shipping another hand. He said he could not ship another man then, as he was just leaving, but he would divide £3, the man's pay, if we would work the ship, amongst us. I think it was about 4 o'clock in the afternoon when we left Mauritius. I did not tell the captain either between Mauritius or Freemantle, or between Freemantle and Shanghai, that the two men were men-of-war's men. I am certain it was an hour or an hour and a half after the men came on board that the ship sailed. It was not so short a time as ten minutes. I do not know if the pilot at Mauritius is a Government pilot. One of my watchmates, Estelle, was at the wheel when we left the Mauritius.

Alex. Estelle, also an able seaman of the *Star of Jamaica*, gave precisely similar testimony. Witness gave the time the men remained on board the ship after her arrival at Freemantle as only about a week. He at first said he could not read English, but afterwards that he knew they belonged to the *Shearwater*, because that name was on their cap ribbon, and he could read that much.

Cross-examined—The pilot must have seen the men when they came on board. We sailed in the afternoon from Mauritius, not at twelve o'clock. The men did not wear all the men-of-war clothes after they first came on board. I did not tell the captain that I thought they were deserters.

This closed the case for the prosecution, and

Mr. Hannen said he would at once proceed to call witnesses, reminding the Court that the captain's mouth was closed, or he could explain the whole thing in a very few words. It therefore remained for him (Mr. Hannen) to explain the somewhat slight basis of truth there was in the case, but of which the whole gist had been supplied by the witnesses who had been examined.

His Worship said he would not, unless Mr. Drummond could remove the difficulty that he was about to mention, require the case for the defence to be gone into at all. That difficulty was this: The offence charged is one under the 25th section of the Act, and consists in any person concealing or employing "any person *subject to this Act*, who is a deserter." What persons are subject to the Act are stated, in the 87th section, to be "Every person in or belonging to Her Majesty's Navy, *and* borne on the books of any one of Her Majesty's Ships in Commission." Now what evidence had been given that the two men received on board the defendant's ship answered *that* description? Simply none.

Mr. Drummond said it was impossible to give such evidence in this case. He submitted that the evidence he had given was ample to prove that the men were deserters from their ship.

His Worship said not so, necessarily. A man might wear a ribbon with the name of a ship on it, and not belong to the Navy at all. Moreover, that was not what the Act said: it did not say that every person wearing such a ribbon should be subject to the Act.

Mr. Drummond said he still thought the evidence already given ample to show that fact. The men were wearing the Naval uniform and their ship was close by.

His Worship asked if, on the evidence given, the men, if here, could be convicted of desertion?

Mr. Drummond admitted that it would not be enough for that purpose.

His Worship—Then, as the foundation of the whole charge is the desertion of the men, if there is not sufficient evidence of that, it is clear that the captain can't be convicted of concealing "deserters."

Mr. Drummond observed that the Act pointed out that the case might be taken before any justice in Her Majesty's dominions; but if it was necessary to procure evidence that the men were deserters, it was impossible to sustain the case.

His Worship—That is the result of the man holding the case over so long.

Mr. Hannen said there was something more than a mere technical objection in what had been said. The men might have been discharged from their ship.

His Worship—To convict in this case, would be like convicting a man of receiving stolen property, without proof that there had been any property stolen at all.

Mr. Drummond said if the Court called for such evidence, it would be, as he had said, impossible to sustain the case. The effect of that would be to render nugatory the Act of Parliament. The fact that those men came on board the ship, the *Shearwater* lying close by, was, he considered, *prima facie* evidence upon which to ask that the defendant should be convicted for having them on board. If the men had not gone on board in Navy clothing, of course it would have had to be proved that they were Navy seamen.

His Worship—That is not the language of the Act of Parliament. You could not convict those men for desertion, unless you could prove they were borne on the books of one of H.M. ships. And you cannot convict the captain of concealing them without the same evidence. As to the Act being rendered nugatory, that I cannot help: the defendant is not on that account to be convicted on insufficient evidence.

Mr. DRUMMOND repeated that he thought there was ample evidence to prove the case, but if the Court thought it was a necessary ingredient that evidence that the men belonged to the *Shearwater* and were deserters from her, must be brought, of course it must fall to the ground for want of it. But it certainly rendered nugatory the Act of Parliament, and would deter officers from bringing such cases forward, because to do so would be useless. The officer bringing this case forward acted upon his own discretion, and believed the case to be well-supported; but if the Court thought what it had mentioned was a preliminary difficulty, of course there was an end to it. He must now leave the case in the hands of the Court.

Mr. HANNEN said there was a great deal more than that in the case. With regard to the Naval clothing produced, it had belonged to some man named "F. Bass," whereas it had been proved that the two men in question were named Richard and Edward. The defendant had been charged with an offence, and some explanation was due to him. It was a nice case, got up by four people who had arranged a very similar story between themselves, but who had nevertheless contradicted each other in some parts.

His WORSHIP said he had sufficiently intimated the reasons that he had for coming to the conclusion he had come to, and he would now content himself with simply dismissing the case.

Shanghai, Feb. 12th.

Reg. (JOHN WILLIAMS) *v.* ALFRED ROSE.

Assault, and using threatening language.

JOHN WILLIAMS stated:—I am cook and steward of the *Star of Jamaica*. On Monday evening, at 8.20, I was going to my bed; it was raining and my bed was wet. I took my pillow and went into the galley to sleep. The defendant knocked at the door and asked for the oil feeder. I said, "All right, I'll give it to you." He was very impatient, and said "Now, then, are you going to give it to me?" I said, "What are you in such a hurry for?" He then struck me with the oil feeder, and abused me in very violent language. On Tuesday he went on shore, and when he returned, I can't say at what time it was, he said that he would kill me, and took up a knife. The second mate told me to come aft. I did so. Defendant came after me, but the mate interfered. Shortly after this I was called to assist in pumping ship. The defendant then took hold of my throat, and choked me. The mate and second mate took him away.

By defendant—I did not say that you were not to come growling there, or I would put a knife into you. You said I had no business to sleep in the galley.

His WORSHIP—What business was that of yours?

Defendant—None, sir. I admit telling him I would break every bone in his body. But I had provocation. I did not strike him with the oil feeder. But he struck me; I have the marks to prove that.

His WORSHIP—Whereabouts were you struck?

Defendant—At the galley door, sir.

GEORGE HEPBURN, stated:—I am second officer of the *Star of Jamaica*. I know nothing of the occurrence on Monday. On Tuesday afternoon defendant came on board intoxicated. I told him to go forward. A few minutes afterwards the steward came to me and said that defendant was threatening to cut his heart out with a knife. I told the steward to go aft out of the way. Afterwards the steward was called to assist in pumping out the ship. Defendant then took him by throat, and both fell upon the deck. They were separated, and the steward went into the cabin, where defendant wanted to follow, but he was prevented by the mate.

Defendant—The steward struck me, and then ran aft for protection.

Witness continued—After defendant was persuaded to go forward, he went into the forecastle, and began to pull the boy Chipperton about, and took hold of him by the throat. The boy called to me for help, and I saw the boy strike the defendant in the face.

CHIPPERTON corroborated this statement, and said:—Defendant threatened to kill the cook with a knife. I went into the galley to get the tea ready. He came there and took hold of my comforter and nearly choked me. I struck him in the face in self defence.

Defendant denied that the boy had struck him, and insisted that it was the steward.

His WORSHIP—It is quite evident that you really don't know who struck you. It has been proved that the boy struck you, and you know nothing of it. Therefore, I don't believe a word you say, as you evidently were drunk at the time. Fined $5, or 14 days' imprisonment.

Defendant—I can't pay. I'll do the 14 days.

His WORSHIP—How long have you been in the ship?

Defendant—Two months.

His WORSHIP—Well, if the Captain likes to pay your fine, well and good; if not, you must go to prison.

Shanghai, Feb. 16th.

R. *v.* PATRICK CARROLL, ADAMS, A. ESTELLE, and WESTERBURY.

Continued Refusal of Duty.

The defendants are seamen of the *Star of Jamaica*, and were for the third time brought before the Court on the above charge. They had been put on board after a few days' imprisonment, but persisted in their refusal to do duty. The ship is otherwise ready for sea.

Captain SACK said he considered Carroll and Estelle were the ringleaders.

His WORSHIP sentenced those two to twelve weeks' hard labour each, and to pay the cost of their imprisonment. Westerbury and Adams to be put on board the ship in the afternoon, and all to pay the cost of the summonses.

HONGKONG SUPREME COURT.

Hongkong, Feb. 4th.

Before SIR JOHN SMALE.

Ava v. *Rona*.

This was a motion made by the owners of the *Ava*, the Messageries Maritimes Co., to the Court to reconsider the report in the second cause of this suit by the Registrar and merchants.

The Attorney-General, and Mr. T. C. Hayllar, Q.C., instructed by Messrs. Caldwell and Brereton, appeared for the M. M. Company.

Mr. Kingsmill, instructed by Messrs. Stephens and Holmes, appeared for the *Rona*.

Mr. Bramston contended that some of the items he objected to were too high, some had been charged twice over, and that in some items they were allowed on insufficient evidence, and others given on wrong principles. With reference to items 13 and 19, claims by officers and crews, he had no evidence to cut them down, therefore although they were too high, he could not object to them. It was, however, curious that there should be so many gold watches at 13 guineas each. He would also pass items 6, 8, 9 and 10. He would object to No. 7, being interest at 10 per cent. Other items for interest were likewise objected to. Neither would he object to item 3, that for freight. But he would question the amount charged for cargo. As regards the charge for the coal, he contended that should not have been charged, because if the coal were not used, they could not have earned the freight. Consequently they were charged twice over. The amount of $109,000 charged for the ship was too much, the principle being that in total losses, the market price of the vessel should have been charged only. The *Rona* cost £32,000, but the builder said after ten years she should be worth only about $65,000. It was the opinion of experts that a new vessel like the *Rona* could have been built for £35,000, while the new vessel would have carried 200 tons more cargo, and consumed only one-third the coal the *Rona* was consuming. From the affidavit of Mr. Groom, chairman of the Union Steam Navigation Co., to which the *Rona* belonged, the steamer was placed in the Company's books as worth 80,000 taels, but was worth only about 75,000 taels. In the newspaper report of the Company's meeting, the *Rona* was said to be working at a loss of $9,310. If a vessel was working at a loss her market price could not be valued by what she originally cost. Then again, Mr. Lang put the value of the *Rona* at 65,000 taels. The *Rona*, moreover, was only insured for 63,000 taels. Mr. Grant, senior partner in Messrs. Boyd & Co., a firm of ship engineers and builders, was also of opinion that the outside value of the *Rona* was 60,000 taels.

In the end the hearing was adjourned till the following Monday.—*China Mail.*

COMMERCIAL INTELLIGENCE.

SHANGHAI, FEBRUARY 17TH, 1875.

ARRIVALS from Europe since 3rd instant, the date of last Report, have been the mails of the 19th and 26th December, per M.M. str. *Amazone* and P. & O. str. *Kashgar*; the *Ava*, with mail of 1st ultimo, from London, arrived last night; the s.s. *State of Virginia* from London, and the s.s. *Hector* from Liverpool.

TELEGRAMS.—The latest from London, 12th inst., quotes *Mid. Orleans Cotton* 7⅞d.; *Grey Shirtings*, 8¼-lbs., 9/9; *Iron* £10.10s.; and W.B. *Lead*, £24.10s.

PIECE GOODS.—The natives kept holiday from 3rd to 10th instant, and the stoppage of trade consequent thereon accounts for the non-publication of the report last week.

"Settling time" here has passed over very quietly, only one *Piece Goods Hong*, so far as we have heard, having proved unable to meet its liabilities.

Business, stimulated by a demand from JAPAN, where the Western Calendar is now observed, commenced rather earlier this season than usual. The enquiry embraced 15-lb. *English Drills*, *Turkey Red Shirtings*, *Velvets*, *Chintzes*, *Plain black Lustres*, *black Lastings*, and Common 8¼-lb. *Grey Shirtings*, and transactions in each article, saving assorted *Chintzes*, have been entered into by the Japanese dealers, principally for the Nagasaki and Kobe markets. Buying has been confined to low priced qualities, such as *Drills*, Dragon chop, costing under Tls. 2.40 per piece, of which the stock appears to be very light; 2¼ a 2⅓ lb. *Turkey Reds* from Tls. 1.70 a 1.77 per piece; 22 in. black *Velvets* at Tls. 0.18 a 0.18½ per yard; Plain black *Lustres* at Tls. 3.90 per piece; Black *Lastings* at Tls. 10 a 10½ per piece; and 8¼ lb. *Grey Shirtings* at from Tls. 1.60 a 1.64 per piece.

For Chinese consumption, English *Jeans* have been bought to a very large extent at Tls. 1.84 *a* 1.86 per piece, and buyers are not yet satisfied. The unsold stock of *Jeans* is now much reduced, and the market wears a strengthening aspect. Heavy *Grey Shirtings* likewise have been fairly settled "to arrive" on the basis of Tls. 2.60 per piece for *Dewhurst's Eagle* and *Ta-wo Stag* chops; and 8-lb. *T-Cloths* have also been extensively taken. The *Jeans* are destined for TIENTSIN, and, in all probability, the bulk of them will be shipped in the first steamer clearing for the north—about the end of this month—as will also most of the *Drills* and common *Grey Shirtings* that were booked before China New Year. The *Heavy Shirtings* are bought in anticipation of the usual spring business in them, and the *T-Cloths* will be distributed party locally and partly throughout the districts of the upper Yangtsze.

Grey Shirtings.—8¼-lbs.—Beyond those taken for *Japan*, barely 6,000 pieces, and those principally *Dewhurst's Eagles* have been sold. It is satisfactory, however, to note that these goods still maintain their position, and command full rates, the prices lately realised being Tls. 1.90 *a* 1.92 per piece. Only one small sale of common 7-lbs. at Tls. 1.38 is reported, and about 4,000 pieces badly mildewed at Tls. 1.24 per piece is the sum of the business in 6-lbs.

T-Cloths.—For 6-lbs. Mexicans a good enquiry has prevailed, but there are scarcely any on hand. The prices named, however, are rather too low to induce further importations. Common 7-lbs., owing to their scarcity, show a stronger market, and a fairly clean 14×15 count now commands Tls. 1.20 per piece.

White Shirtings.—The interest in fine reeds continues, and best qualities and chops find ready buyers at full rates as they arrive. For 64 Reeds there have been frequent enquiries, but thus far little business in them has been reported. Some 2,000 pieces of *Ta-Wo Stag* No. 80—or 60 Reed—have changed hands at Tls. 1.65 per piece.

Drills.—In addition to the *Japanese* purchases, there have been nearly 7,000 pieces of 15-lbs. *Dragon* and other chops settled by the NEWCHWANG traders at Tls. 2.35 *a* 2.40 per piece.

Sheetings.—Enquiries for *English*, but scarcely any here.

Fancy Cottons.—Under this heading JAPAN has been the chief customer, but her wants as above stated have comprehended only:—*Chintzes* assorted, *Velvets* and *Turkey Reds*, and of the first there is none on the market to be had at the prices offered, viz., Tls. 1.25 *a* 1.30. In addition to these, a small business has been done in *Handkerchiefs*, *White* and *Gentian Brocades*, *White Spotted Shirtings*, *Gentian Shirtings* and *Blue Chintzes*. Particulars are given below.

Woollens.—*Scarlet* colors of *Camlets*, and of *Long Ells* more especially, have fully recovered their late decline; C.P.H. of the later fabric having been sold within the week at Tls. 7.30 per piece. *Gentian Spanish Stripes* have likewise been in better favor; H.H. and C.P.H. qualities having realised respectively Tls. 0.67 and 0.60 per yard. The only other transaction in Woollens has been a few *Black Lastings*, very good, at Tls. 11.70 per piece.

From TIENTSIN, advices dated 3rd instant have been received. Commercially and politically quietness prevailed. Business had closed for the holidays. At HANKOW, on 12th instant, trade had not been resumed, but a correspondent writing from KIUKIANG says:—"Our market is improving, and we expect a large trade during the week." The Japan news may be gathered from the business referred to above.

Estimated sales on this market from 3rd to 16th instant, both inclusive—

METALS.—*Nailrod Iron.*—Although two weeks have elapsed since last report there is little or no change to record. Business has been entirely suspended during the native holidays, and the Chinamen anticipate a further decline in ordinary and common iron, which is in large supply compared with "best cargo." *Lead.*—The return to £24 10s. per ton telegraphed from home has given speculation a fresh impetus, and settlements "on time" are again reported. About 150 Tons of L.B. have been settled at Tls. 6.05 *a* 6.10 per picul, according to the time allowed for clearance. The natives have lately been making enquiry for the article, but they expect to get it at Tls. 6.00, and under. At this, however, there is no holder willing to sell. The market for JAPAN *Copper* is firmer, and prices are slightly higher, but other Metals have not been wanted, and quotations are nominally the same as those current before the New Year.

COTTON.—Business, as yet, has not been fairly resumed, but prices for common staple, for which a better demand seems springing up, are likely to open higher. At present the hongs are demanding an advance of 2 mace per picul on the closing rates of last year. Tls. 7.80 per picul for the lowest quality of Shanghai cotton.

EXCHANGE.—Rates shew but little alteration. Banks quote 5s. 8⅞d. *a* 5s. 9d., but the enquiry is very limited. In private papers also there is next to nothing doing, the supply being very meagre. Credits can be placed at 5s. 9d. *a* 5s. 9¼d., and documents at 5s. 9⅜d. *a* 5s. 9½d. Rupee quotations are 303 on Bombay, and 304½ on Calcutta. On Hongkong the rate has declined to 26⅛.

CLOSING RATES OF EXCHANGE.

SILK.—The home market by last public telegrams is reported as steady, but not active. Ordinary No. 3 Kahing Taysaams 12s. 6d. By the P. & O. str. *Hydaspes*, which left on the 12th inst., there were only 95 Bales of silk shipped; 10 of which were for London, 23 for the Coast, and the balance for the Continent. Settlements for this week amount to barely 350 Bales, at prices showing little or no change. The following purchases are reported:—

	Per picul.	Per lb.	Per kilo.
Dragon Chop, No. 3 Tsatlee	Tls. 395	19/6	Frs. 54.60
Donkey ,, ,,	Tls. 395	19/6	Frs. 54.60
Pang-e-tai "Ting-how"	Tls. 337½	16/9	Fcs. 46.80
,, "Tay-how"	Tls. 317½	15/9	Frs. 44.10
Blue Elephant	Tls. 335	16/7	Frs. 46.60
Red Peacock	Tls. 320	15/10	Frs. 44.45
Common	Tls. 260	12/11	Frs. 36.28

Arrivals having been very small, the unsold stock is slightly reduced and can be estimated at 4,500. The outgoing mail steamer has 100 bales engaged.

Statement of Imports and Deliveries of Cottons and Woollen Piece Goods from 2nd to 15th Feb., 1875, compiled from the "Customs Daily Returns," Nos. 26 @ 33, both numbers inclusive.

The North-China Herald.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, FEB. 25, 1875.

RETROSPECT OF 1874.

Foreign Relations.

We pass naturally from discussion of the Peruvian Treaty, to remark on the extinction of the coolie trade of Macao. Early in January, the Viscount de San Januario ordered that the so-called emigration of Chinese from that island, should cease with the following March; and we had the greatest gratification, three months later, in recording that the order had been enforced. The trade ceased absolutely on the day fixed, and one of the greatest blots on foreign relations with China was then extinguished. The Hongkong Government had previously passed an ordinance forbidding even the fitting out of emigrant ships in colonial waters, so that the ships hitherto engaged in the trade had no refuge. It was greatly owing to the influence of Great Britain that this result was attained, and it supplies at least one credit entry in the record of our political intercourse with China.

The Peruvian Treaty was one of the first consequences of the changed situation; the old easy trade being interrupted, Peru sought to legalise an emigration on which her prosperity so much depends; and we repeat our hope that both contracting parties will endeavour loyally to improve the condition of the emigrant. Emigration goes on to the British West Indies without trouble or aspersion, and there is no reason why emigration to South America should not be placed on a similar footing.

In other respects, the year has been very uneventful. Several foreign Ministers have had audience of the Emperor, on their first arrival at Peking; but the privilege has gone no further; and the Ministers appear to have

acquiesced tacitly in the restriction. Even at the New Year, when, if ever, a ceremonial visit to a Sovereign should be paid, no such idea seems to have arisen. Visits were exchanged, as in former years, with the members of the Tsung Li-yamen, and the Emperor was left alone in his dignity.

Neither has this concession to the prejudices of the Court advanced our interests with the Government. Likin duties are exacted with an energy only known to Chinese officials when squeezing is in case. Transit passes are ignored with an indifference which the complaisance of our Ministers goes far to justify. In fact, there can be no doubt that, as pointed out by Mr. Seward in a recent able despatch to the Secretary of State at Washington, foreign prestige is suffering and foreign interests are languishing for want of vigour in our political relations. However little flattering may be the comment to our national pride, we cannot but endorse his verdict that "our representatives, failing to perceive how firmness may be mingled with moderation, and judgment with urgency, have drawn back from due responsibility, until the policy of England, for instance, has been emasculated to a pitiable degree." Hardly a voice in China fails to condemn the present conduct of this policy, and to yearn for a change from the deadly monotony by which it has been marked. And what has China done to justify this consideration? Let us again quote Mr. Seward's despatch:—

"I know of no highway in the empire "which is in tolerable order. I know of "few canals which are not utterly "abandoned for any purposes of con- "servation or improvement. I know "of no mines, of all those immensely "rich ones possessed by the empire, "that are worked to any appreciable "extent. I know of no manufacturing "establishments in which more than "the members of a family are engaged. "I see no disposition to introduce "railroads and telegraphs. I find no "adequate grappling with popular "superstitions, such as those that "precipitated the Tientsin massacre. "and from time to time threaten the "safety of foreigners at that and other "points. I find petty officials here and "there allowed to impose all kinds of "extortions upon trade. I find the "people debarred from opportunities "for legitimate enterprise, and actively "betaking themselves to opium as a "means of dissipating the tedium of "existence. I find the directions in "which only progress has been made, "for instance, the establishment of "arsenals and navy-yards, the employ- "ment of foreigners in the Customs, "and the education of a few youths in "western ways, subject to the criticism "that a lack of confidence in themselves "and a fear of foreign arms have been "the considerations which have led to "these steps."

The sketch is graphically true, and we cannot avoid the conclusion that we are throwing away our opportunities, and that the time has come when Foreigners should take up a more positive attitude in the Empire. If China were in political difficulties, if she showed any inclination to progress of her own accord, if her rulers showed a desire to compel observance of the treaties by their subordinates—they would be entitled to consideration, and there would be reason for forbearance. But the case is diametrically opposite; and our policy correspondingly mistaken.

Piece Goods. Having briefly alluded to some of the more prominent obstacles to the prosperity of the imports of British textiles, we now proceed to notice in detail their general effects upon the trade. We have already given a calculation of the laying down cost of an 8¼-lbs. *Grey Shirting* of low quality, and hinted at the comparatively higher rates obtaining for Dewhurst's and Mendel's productions. But we cannot see that the dealers in these classes even have had much cause for rejoicing, for, taking Dewhurst's own price of 9s. 9d. per piece delivered in London, with 6 per cent. for Freight, Insurance, and Shipping, and adding only 3 per cent. for Interest, together with the Shanghai Import Duty and a small nominal sum for landing charges, Rent, Fire Insurance, &c., but nothing for commissions on either side, the cost appears to be Tls. 1.92 per piece, sterling, exchange being taken at 5s. 10d. per Tael. Now the averages of Dewhurst's best chop throughout the year have been as follows:—

Cost f.o.b. in London.	Selling price in Shanghai.	6 m/s. Bank Bills.
Per piece 9s. 8½d.	Tls. 1.93¼	Per Tael 5s. 10d.

These averages are made up from the weekly circulars, and cover 50 quotations; and we think they fairly indicate the course of the trade, and fully prove that the results have not been favorable to the importers. The highest selling rate, Tls. 2.05 per piece, was touched in January, and the lowest, Tls. 1.88, in September. The highest home cost, 10s. 3d., was registered in May and June; and the lowest, 9s. 6d., in July, oscillating between that figure and 9s. 9d. right on to the end of Dec.; whilst the highest and lowest exchanges, 6s. 1d. and 5s. 8d., were quoted, the former in June, and the latter in January and October. Space does not admit of our noticing the countless other chops which come to this place, and which, on account of their low price or high quality, bespeak the attention of our dealers. Nor is it necessary that we should do so in the present paper, for although nearly every owner considers his own particular chop better than that of his neighbour, and although occasionally he may have made a better sale by reason of his chop's renown, or by sacrificing some other article to his hobby, scarcely one of them, if a constant and regular importer, can say that his 8¼-lb. *Shirtings* has contributed materially towards his sustenance since 31st December, 1873, or that the results have differed much from those of the two examples we have selected. The business in the lighter weights has been equally unprofitable. At the beginning of the year, 7-lbs. common to best were saleable, in small lots only, at a range of Tls. 1.50 *a* 1.68 per piece, and these rates, by the aid of an incipient speculation, in anticipation of the customary spring trade, were maintained for about six weeks or two months after the season opened. But the demand either would not or could not come. At all events, it never appeared; and hence the early settlements had to be filtered, as it were, out to the consumers, at a heavy loss to the speculators. Further, once fairly started, quotations rapidly fell until, on the 5th of June, we find the lower qualities selling for Japan "at very low prices," say Tls. 1.35 *a* 1.36 per piece. From that date onward there was little change, either in the current rates or in the amount of business going on. Fortunately, however, stocks were not very excessive at any period of the year, and when anything beyond the ordinary "hand to month" sort of enquiry prevailed, or when a "special" chop was wanted, the effects were at once perceptible in a stronger market and stiffer rates. Towards the close of the year, for instance, the Japanese sent over considerable indents for Dewhurst's *Red Peacocks*, the supply of which was speedily exhausted at the enhanced value of Tls. 1.45 *a* 1.46 per piece. Collie's *Spread Eagle* chop likewise received a fair share of attention from our Japanese friends, but the finest descriptions of 7-lbs.—Dewhurst's *Eagle*—have been in rather a woful plight all through the season, being barely quotable at Tls. 1.52 per piece at its close. Some mildews of the last make were sold about the beginning of winter at Tls. 1.46½ per piece. In pleasing contrast to the foregoing, it has to be mentioned that *Heavy Shirtings* have done well for the importer. For the first quarter of the year there was nothing noticeable about them or their position, other than what is usual in spring. The supply was moderate, but the demand was freely met by holders, who did not anticipate the prolongation of business till over the summer and autumn. At the end of May, however, an enquiry suddenly sprung up, and all the available goods on the spot were eagerly settled by native speculators, on the basis of Tls. 2.48 *a* 2.50 per piece for Dewhurst's *Eagle* chop; and, before the end of June, these same speculators had the entire control of the market, being able eventually to resell their Dewhurst's *Tunsin* chop at Tls. 3.03 per piece. Later on, the arrivals of floating cargo, sold at the first burst of the enquiry, and of additional unsold parcels, telegraphed for at the same time, began to influence the position, and the price in the Chinese quarters dropped to Tls. 2.85 per piece for best

cloth. Moreover, as the ruling rates to the foreigner, being a good mace per piece below the selling rates of the speculative settlements, still showed a very fair profit, expectants thrust their expectations upon the dealers, and so brought about a further decline of 1 *a* 1½ mace per piece, the reduced figure of Tls. 2.60 *a* 2.62 per piece for *Eagles* being the closing quotation of 1874. A good many of these *Heavy Shirtings* have been used by our local consumers, but their destinations *par excellence* have been the districts fed though Ningpo, Hankow and Kiukiang. A large portion also went to Newchwang, whence the most glowing accounts in regard to the Corean requirements, reached us on the 6th of July. Messrs. Knight & Co. at that time wrote that their "hopes of a border trade with Corea are to be realised," and other merchants predicted great things. Moreover, the reported sale of *Tunsin* chop, at Tls. 4.80 per piece, at the Corean fair held either late in October or in early November, looks confirmatory certainly of the high expectations formed, and is worth noting here in connection with this fabric and the Corean trade. The wants of Japan, which again have been very large—the exports hence to that country being ——— pieces, against 556,000 pieces in 1873—have been supplied out of 7 and 8¼-lbs. weights, chiefly the commoner qualities of the latter; and the trade in them has been carried on mostly by the Chinese, who, as a general rule, have been the gainers.

The following is a comparative statement of the *Grey Shirtings* passing through Shanghai during the past three seasons, and of the stocks remaining on hand at the close of each year:—

	Imports.	Deliveries Local and Re-export.	Stocks.*
1874...Pieces	5,750,000	5,147,000	1,195,910
1873...	4,420,000	5,145,000	540,170
1872...	4,425,000	5,345,000	1,284,580

* As per the Returns published by the Shanghai General Chamber of Commerce.—*White Shirtings.*

Summary of News.

The English mail of the 8th January arrived on Tuesday by the P. & O. str. *Sunda.*

A mail leaves to-morrow for Europe by the P. & O. str. *Kashgar.*

The following Reuter's telegrams have been received during the week:—

John Mitchell has been elected Member for Tipperary, without opposition. The Government moved for a certificate of felony, and the motion being adopted, a new writ will be applied for on Thursday.

Dr. Kenealy has been elected a member of Parliament for Stoke-on-Trent.

Mitchell landed at Queenstown to-day.

The refusal of England to attend a Conference, has produced an unpleasant impression in Russia.

Dr. Kenealy entered Parliament, and was introduced to the Speaker, who intimated that two Sponsors were required, to which Dr. Kenealy objected, and on a motion in the House of Commons, Mr. Disraeli waived the rule.

The motion declaring Mitchell disqualified to take his seat as Member for Tipperary, was adopted, and a new writ ordered.

In consequence of the tardiness of Spain to afford satisfaction in the "Gustav" affair, Germany is preparing a Naval Expedition to act against the Carlists

The Senate Bill has been voted by 422 to 261.

The Pope has issued a Bull to German Bishops, forbidding the acceptance of benefices from the State, under pain of excommunication.

The Prince Imperial has assumed the direction of the Imperialists.

Sir William Gervois will probably succeed Sir Andrew Clarke.

The minutes which we publish elsewhere, of a meeting of Treaty Consuls held on the 12th instant, cover a variety of subjects. The action which had been taken in regard to the interference of Tepaos with Municipal Contractors has already become known, though the Reports of the Council.—The misgivings of the Taotai at the proposed erection of a Slaughter House near Sinza, have been similarly made known.—A letter from certain members of the Pilotage service, asking that the number of pilots for the port be reduced to 25, was held over for discussion with the Harbour Master.—A letter from the Taotai representing that accidents had occurred to native boats through running against buoys and ship's booms, &c., in the dark, and suggesting that these should be lighted, was similarly referred.—Residents on the Bund will congratulate themselves that the several Admirals commanding on this station have agreed to discontinue firing salutes in the River.—The Taotai has thanked the Consuls and Commanders of vessels-of-war in Harbour, for half-masting their flags in respect to the memory of the late Emperor.—The Municipal Council having complained of the inadequacy of the system of punishments at the Mixed Court, and the lack of power of the Court, it was decided to ask Messrs. Yates, Haas, and Davenport to report on the question. We are told that the Mixed Court and Police Station jails between them will not hold more than 20 to 30 prisoners at one time; so that, when the Police one morning brought in a batch of 20 thieves charged with loitering to commit a felony, there was no means of imprisoning them, and they had to be beaten and let go. Would not the re-establishment of the chain-gang be advisable?

It would seem from the correspondence we publish elsewhere, that some danger of misunderstanding has arisen between the French and English Municipal Councils, on the subject of Yang-king-pang bridges. We must say that the tone of the French Council's letter of the 1st Feb. seems to us uncalled for by anything that is before us. It may be hoped, however, that Mr. Purdon's very temperate and conciliatory reply will remove any misapprehension, and revive the good feeling which has always prevailed between the two bodies.—The Council adhere to their decision not to halve the wheelbarrow licence fees with the French Council; so it appears likely that these vehicles will have to pay twice. — It is gratifying to learn that the project of defining the river boundaries has not been forgotten. We hope a line will be decided on before any new wharf is conceived.—A letter has been addressed to the Treaty Consuls about the increase of crime in the Settlement, and the re-establishment of the chain-gang is advocated. We were always in favour of that punishment, and strongly deprecated its abandonment. It is no doubt also very desirable, as pointed out by the Council, that the Mixed Court should be given fuller powers. The subject is an important one, and we shall look with interest for the Consuls' reply.—It is proposed to alter the financial year, making it end on the 31st December. This will be convenient, if only because the present arrangement always causes the Ratepayers' meeting to clash with the Races.

The fifth of the series of winter lectures under the arrangement of the Shanghai Temperance Society, was given last night by Dr. Macgowan, in the banquet room of the Masonic Hall. Under the title of "Recent researches in physical sciences and the arts," the lecturer discursively mentioned a variety of subjects, ranging from astronomy to the use of the spade in war, illustrating two of them with little experiments. There was but a limited audience.

The text of the Hongkong and Shanghai Bank report confirms the unfavourable rumours which had got abroad respecting it. The Reserve Fund has been reduced by $675,000, in addition to the $225,000 which the directors announced at the meeting in August, and stands now at $100,000 only. The amount of notes in circulation has increased by $800,000, and that of deposits by $2,800,000.—We hear by telegram that the Report was passed by the meeting of Shareholders after discussion, but that the Directors' fees were somewhat warmly objected to.—"Swallowing the coo and worrying on the tail," as a Shanghai shareholder was heard to observe when the news came up.

We hear that negociations are going on for transferring the Hongkew Wharf to Messrs. Jardine, Matheson & Co., on terms which commend themselves as advantageous for shareholders. The bases of negociation are said to be roughly as follow. Messrs. Jardine, Matheson are willing to take the Wharf premises on lease, guaranteeing 10 per cent on the paid up capital; a Reserve Fund to be formed out of any surplus profits of working, after this dividend has been paid and all charges and commissions have been met; a consulting committee to be formed on behalf of the shareholders, somewhat on the same principle as in the Hongkong Fire Insurance Company.—The majority of shareholders seem to view the arrangement favourably. There can be no doubt the Wharf property is very valuable; and the Company was, before the unfortunate rivalry arose between it and its neighbors, one of the best local investments. The proposed amalgamation would overcome this weakness and restore its earning power, so that there would be a good prospect of the anticipated Reserve fund accruing; while Messrs. Jardine, Matheson's guarantee cannot fail, in the meantime, to be satisfactory to shareholders.

The Paper Hunt Handicap with which the season is always wound up, is announced to be contested on the 6th prox.

We hear that there is some idea in the Paper Hunt Club of getting out a few couple of drag hounds, as likely to give a more exciting run than a paper trail.

The ruins of Messrs. Lane, Crawford and Co.'s auction room have been sketched for transmission to the *Graphic*. The sketch represents the last stage of the fire, and shows several firemen with hose in the foreground, a steam fire engine in the distance, and Chinese spectators restrained by a policeman. The sketch has we believe been photographed for local sale.

We notice that a Chinese Post Office, for the Yangtsze ports, has been opened in Tientsin Road. At least, so says a sign hung out in the neighborhood of the Chinese "Exchange" in that street.

The Mixed Court was closed on Saturday, Monday and Tuesday, consequent upon mourning ceremonials in connection with the late Emperor's demise. A large number of Mandarins were present at the City Temple on Monday and Tuesday. To-day, the Court will be again closed, this time in consequence of its being the day appointed for the ascension of the throne by the new Emperor. It is to be observed as a day of festivity among the native officials.

Monday, the 22nd February, was the anniversary of the birth of George Washington, and the American ships in harbour were gaily dressed with bunting in commemoration of it.

Captain Alexander Buller, R.N., appointed to succeed Captain Thomson in the command of H. M. S. *Modeste*, arrived by the *Sunda* on Tuesday, and at once assumed the command.

By the barque *Eaglet*, Captain Nicol, from Keelung, we learn that a gentleman named Tyzak had arrived at that port to inspect the coal mines in the vicinity, on behalf of the Chinese Government, with a view to the introduction of steam and machinery as used in foreign mines.

Captain J. J. Smith, of the brigantine *Empress of China*, reports that during the passage from Swan River to this port, while he was becalmed off the Island of Lord North, about thirty large sailing outrigger canoes, containing from eight to twelve men each, made towards the ship. A breeze sprang up, and Captain Smith deemed it advisable to run to leeward, in order to get clear of the boats, which chased him until dark. The nearest boat was within two miles of of the ship, and with a telescope it could be discerned that the occupants were armed with bows and arrows.

A serious accident occurred on Monday afternoon on board the steamer *Benledi*, while discharging cargo at Hunt's Wharf. A fireman named William Gemmel overbalanced himself, and fell head first into the main hold from the deck, striking his head upon the tunnel casing. When picked up he was insensible, and was at once placed upon a chair and conveyed to the Hospital.

A strange story as to an alleged illegal seizure of opium and assault by likin runners, has been told to the police by a foreigner residing in the neighbourhood of Smith's Market. He stated that on Monday night, about half-past ten o'clock, he was riding in a jin-rick-sha, having four balls of opium in a bag, upon which he had paid duty, and which he was conveying to the house of the Chinese purchaser. He had arrived at the Canton road, when he was stopped by several men who said they were *likin* runners. They demanded possession of the opium, and because he would not give it up, they dragged both him and it out of the vehicle, and, after beating him severely, ran off with the drug. They also took a volunteer's sword-bayonet he was wearing at the time. A number of people congregated at the spot, but did not render him any assistance. The foreigner added that he was so beaten as to be scarcely able to walk home. The opium was not taken to the police station, as is customary in these seizures; and yesterday, Mr. Stripling made enquiries at the offices of the Opium Guild and also of the Mandarin, and was informed that if such a seizure and assault had occurred, the lekin runners were not concerned, neither had any seized opium been taken to the Guild. We give the statement for what it is worth; up to the present time there is no corroboration of it.

A few days since, a Chinese thief made a clever attempt at robbery at the store of Messrs. Watson & Co., drapers, Nanking road. He was observed waiting about, with a chit-book in his hand, from which the end of a chit apparently protruded, and his presence therefore excited no suspicion. Being however, afterwards seen carrying a roll of flannel from the tailoring department, worth about $9, and to deposit it behind a screen on the premises, he was of course followed, and in the same place was found a roll of cloth, value $50, both being conveniently placed for removal either by himself or a confederate outside. He was taken to the Central Police Station, where on examination it was discovered that the chit-book was one which had been missing from a foreign hong for exactly twelve months, the last entry being dated Feb. 1874. How the thief became possessed of it is not known. The case was proved against him at the Mixed Court, on Friday, and a sentence of 200 blows and a month's cangue passed upon him.

A few days ago, a Chinese dealer in jade stone ornaments, rings, and bangles, went into a lodging-house at Soochow, for a night's rest. During the night his box was stolen, and inquiry led to the discovery that it had been placed on board a boat and sent down the creek to Shanghai. A native constable was detached on the look out, and succeeded in capturing the thief and recovering the box, which was worth $150. He was afterwards brought up at the Mixed Court, sentenced to 200 blows with the bamboo, and to be remitted to the Chehsien of Soochow for further punishment.

A great improvement on the building formerly used for the British Post Office, is the new one recently erected in the Peking Road by the Colonial Government of Hongkong. The new erection is at once convenient and a creditable ornament to the Peking Road. Below, is a large and convenient sorting room with a private office for the Postmaster; while above, the building is divided into two, for the accommodation of the Postmaster and his assistants. A wide and ample verandah facing the Peking Road, with boldly rusticated arches, affords considerable accommodation for the public, while the different windows are plainly labelled so as to save the time both of the public and of those engaged within. The upper story has also a deep verandah, divided by pilasters standing on a stone plinth, above which a bold cornice crowns the edifice. The work has been carried out from the designs and under the superintendence of Mr. Boyce of H.M. Office of Works.

The remains of Mr. J. W. Oliver, late store issuer at the Naval Yard, Pootung, were interred on the 16th inst., at the New Cemetery, with military honours. The corpse was conveyed from the General Hospital to the Cemetery on a gun-carriage, covered with the Union Jack, and drawn by seamen from H.M.S. *Modeste*, a strong party from H.M.S. *Ringdove* following, and a number of officers closing the rear. There was, however, no band. The funeral service was read by the Rev. J. Llewellyn, chaplain of the *Modeste*, and a firing party of marines from the same ship paid the final tribute of respect to the memory of the deceased, by firing three volleys over the grave.

We have the fourth and last report of the Director of the Japanese Mint. Major Kinder reports that 30,745,493 coins, of the total value of $1,402,879, were passed for issue during the half-year. There had been a decided falling off in gold coinage: and the coinage of silver had been almost entirely confined to the smaller subsidiary pieces, the quantity of yen turned out being very nominal. The latter coin has been declared a legal tender at Singapore, Canton, and Foochow, and now passes at those ports on a par with the Mexican dollar. Copper coins of all denominations have been produced in large quantities, the daily out-turn being now about two tons! In conclusion, Major Kinder takes the opportunity of thanking all who have been associated with him in the Mint, for their able and valuable assistance, and adds that every detail in the Mint is now in the most perfect order. He had received instructions, through the Oriental Bank, to transfer all matters connected with his office on or about the 31st January, and held himself prepared to do so.—We shall look, now, with interest to see whether the Japanese can run the Mint without foreign aid.

We have a letter from Captain George Bain, enclosing a verbatim copy of a speech delivered by him at the meeting of shareholders in the P. & O. Co. held last December. Captain Bain complains of the manner in which his statement was alluded to in the *L. & C. Express*, and wishes the full text published. We doubt, however, whether people are much interested out here, in questions affecting only the Company's management of its finances. They would be very much interested to know that the practice of

making passengers change three times between Brindisi and Shanghai was to be abandoned, or that the Company purposed sending steamers to Hankow every year at the commencement of the season. But we doubt whether many P. & O. shares are held in China; and non-shareholders hardly care whether the proper amount is or is not written off for depreciation, in the Company's accounts. Captain Bain says it is not. Those interested may like to turn up the *Times* of the 8th or the *Railway Times* of the 12th December, in both of which the more important portions of his speech are given.

We have received for review a book entitled "A systematic digest of the doctrines of Confucius, according to the Analects, &c., &c." Originally published in German by the Rev. Ernst Faber, it has been translated into its present form by M. von Moellendorff.

We have a prospectus of a Company which is being formed in San Francisco to buy a tract of 4,000 acres in Alameda county, and to create on it a town of Newark, distant 24 miles from San Francisco. There are to be 2,500 shares of $300 each, which are expected to increase greatly in value. We notice Mr. J. Barr Robertson's name on the list of Directors.

We have received a copy of the "Japan Gazette Desk Hong List and Directory" for 1875. It contains lists of hongs at the several open ports, together with alphabetical lists of residents, and a Ladies' Directory; the latter comprising some 300 names.

Two recent numbers of the *Gardener's Chronicle* contain woodcuts of Mr. T. Hanbury's seat and grounds, near Mentone. The writer says the Palazzo Orengo stands in a situation very similar in character to that of Monaco, and "that the garden is one of the most interesting, from the richness and variety of its contents, that can be seen in any country." The amount of dressed ground "in the garden is not large; the main entrance to the house even being left in a condition which would shock some of our more precise gardeners, but which is, nevertheless, quite in keeping with the general nature of the situation, and which, moreover, secures at every step a novel combination and a fresh source of interest. Instead of casting a glance and then hurrying on to the house to avoid the monotony and formalism that characterise many such approaches, as happens so often when the ordinary system is pursued, the visitor is here led on from point to point, the interest increasing as he goes, till at length he finds himself at the central point of attraction—the hospitable mansion. One piece of dressed ground there is on the marble terrace facing the sea, and on which are judiciously arranged beds of succulents, flowering Aloes and Agaves, which are marvellously 'at home' here, both in regard to climatal requirements and with reference to the architectural features with which they are in proximity. At one end of this terrace is a little summer house, or temple, of white marble, which, backed up as it is by Date Palms and looking over the clear blue sea, is at once effective and appropriate. In another direction is a 'pergola,' or as it is locally called 'topia'—an arcade, partly architectural but wholly embowered with climbing Roses and creepers, Mesembryanthemums, and Pelargoniums, and which furnishes a charming sheltered walk. Elsewhere is a glorious bank of succulents rooted in sand, and forming one of the most remarkable features of the garden. Here, too, is a 'cool grot,' hollowed out in a sand bank and lined by Ferns, among which the native Maidenhair, Adiantum Capillus-veneris, is by no means the least beautiful." The writer goes on to enumerate a great number of the plants "which impressed him most;" adding that a complete record of those to be found in the garden would alone fill a bulky catalogue; and leaving altogether an impression on the reader's mind, that Mr. Hanbury has a most charming residence, laid out and cared for with excellent taste.

In the Peking *Gazette* of the 27th January, the Governor of KIRIN reports the extirpation of a band of "gold-hunters," who had been troubling the region between Ninguta and Sansing. The district in question lies to the north-west of the Siao-peh mountains; Ninguta being situated in the hills at the head of the Houriha river, and Sansing in the plains near the junction of that river with the Soongari. Little or nothing can be gathered as to the merits of the case, from the present document. Reference is made to a previous (apparently unpublished) memorial, reporting the tranquilisation of Ninguta, which would perhaps have thrown some light on the matter. Gold-hunting seems hardly a very serious offence in itself; but the remarkable antipathy of Chinese officials to mining may extend even to gold washing. The real motive in either case would be the same—a dread of any gathering of men, from a sense of their own weakness to control them. Whether the gold-hunters of Kirin had committed a more serious offence than trying to collect the mineral wealth their streams bear down, we are left to guess. Whatever their doings, Brigadier Shêng-an's career of massacre seems to have effectually stopped them, by exterminating the doers.

We have TIENTSIN letters to the 8th instant, when everything was perfectly quiet.—The river was still hard frozen.—Li Hung-chang had gone back to his provincial capital.—A party of sportsmen have gone into Mongolia, and promise to bear in mind the Shanghai Museum.—Wild geese had been seeing flying north, but the thermometer still stood at 9 Fahrenheit. It would seem therefore that the C. M. S. N. steamer *Leehong* which left this for the North on Tuesday, is starting full early.—The account given in our correspondent's letter, of the sleigh traffic on the Peiho, is rather startling at first; but not at all incredible if we reflect on the wheelbarrow, jinricksha, and boat traffic at Shanghai. Of course, a great deal of the traffic is local, but a great deal also seems to consist in the conveyance of produce to and from the country; and the idea suggests itself:—if so much goes on with such very imperfect means, how great would be the convenience and how great must be the opportunity for railways. Could not Li be induced to make a line from Taku to Tientsin and Peking, as an experiment—to convey tribute rice?

A memorial in the Peking *Gazette* of the 29th January throws some more light on the TAICHOW outbreak. The memorialist is one of the licensed salt merchants who sometimes make fortunes, and are sometimes ruined, by farming the Monopoly in certain districts. In the present case, he seems to have come considerably to grief, and he attributes the whole affair to a conspiracy to oust him from his post. It is somewhat remarkable, in that case, that the conspirators should have thought it worth while, and have had sufficient influence, to excite a whole district for so small an end. What the petitioner's object may be in putting the case in this light, and abusing the whole body of officials, does not readily appear. The riot seems to have really been one of the uprisings that occur not infrequently in Chekeang, against the extravagant exactions of the salt monopoly. We have described more than one such in former years, and have pointed out more than once, in former articles, how extravagantly the price of salt is enhanced by these imposts on its passage inland. It is all right so long as the people will submit; but the mandarins are sufficiently aware of the real state of things not to care, probably, about pushing matters too hard if they rise. Some such explanation may account for the slowness in taking his part, which the memorialist complains of.

A NINGPO correspondent writes that this riot is still not settled. The people, it will be remembered, rose in protest againt the excessive taxation they were subjected to; and our correspondent says they are still encamped in large numbers on the hills, setting the authorities at defiance.

The HANKOW Chamber of Commerce report says the usual lull occurred at New Year time. For ten days, business was entirely suspended; it was resumed on the 15th, and there has since been some little enquiry for 8¼-lbs. Shirtings at previous prices. Of Raw Cotton, Messrs. Gordon Bros. write:—Local staple has slightly advanced in value, closing quotations being Tls. 9.20 *a* Tls. 10.10 per picul. Stock is estimated at about 30,000 piculs.

Full summaries of JAPAN and HONG-KONG news will be found on the usual page.

MANILA advices of the 22nd ultimo state that the Philippine Islands have been visited by strong typhoons, which have caused serious loss of life and damage to property. In Negros the half of this year's sugar has been lost; and in Iloilo about 200,000 piculs of the same article has undergone the same fate. In Cagayan the rivers have risen and flooded the tobacco fields. Many craft of the coasting trade have been lost. The loss of lives in Iloilo and Negros is said to be upwards of a thousand.

Indian papers, brought by the present mail, show that the Gaekwar of BARODA was arrested on suspicion that he was implicated in the attempt to poison Colonel Phayre, the late British Representative at his Court. The Gaekwar is enormously wealthy, and it was expected that he would engage a brilliant array of legal talent for his defence. As a commencement, he is said to have retained Sergeant Ballantine for 10,000 guineas.

Editorial Selections.

SALT.

For a long time, the question of importing foreign salt into China has dropped out of discussion. It was urged on Sir Rutherford Alcock while the revision of the treaty was under discussion, and he pressed it upon the attention of the Chinese; but they steadily declined the experiment. The direct revenue derived from the tax on Chinese salt was too great, and the process too congenial to the mandarin taste, to permit any innovation. Even the proposal for a limited import had no success. "I believe," wrote Sir Rutherford, in transmitting the text of the new treaty to Lord Clarendon, "that the objection might "not have proved so insurmountable had "the Yamên felt they had to deal "with Great Britain only; but to grant "to England a right to import one ship-"load every month, was to concede the "same right to every Treaty Power, and "twelve times twelve ships a year would "not have left much monopoly in the "hands of the Salt Commission." The Northwich Chamber of Commerce made an effort to enlist Mr. Burlingame's sympathy in favour of salt, during his European progress, but approached the subject from an extreme "blessing of civilisation" point of view, which was more likely to cause laughter than conviction. Salt had, in fact, according to the Northwich Chamber, been the great forerunner of civilisation and commerce throughout the world; and Salt would be the inevitable means of inaugurating a new era of commerce with China, if only permission to import it could be obtained from the Government of Peking. Ships bringing salt to China would "need a "return cargo, to furnish which the grass "of China, required in Europe for paper-"making and spinning, and the oil from "seeds grown and pressed in China, "would be purchased by the British to "an unlimited extent. In this way, both "a vast amount of employment would "be offered to the Chinese people, and "the salt which they need would be paid "for in grass and oil, for which they have "at present no sufficient market for want "of the means of cheap transport to "Europe. For instance, the British "merchant might bring a cargo of salt "which he could afford to sell at Shang-"hai at £3 per ton, and might take in "return a cargo of oil or seeds worth "from £20 to £30 per ton. Thus a "single ship-load of the average size "would furnish a gain equal to about "£40,000, available for the employ-"ment of Chinese labour." We can hardly blame Mr. Burlingame if he was not impressed by this effusive address. But, salt being a great necessary of life, it needs no rhetoric to establish the fact that China would be benefitted by the importation of cheap and good salt, as much as European merchants and ship-owners could be benefitted by its carriage and sale; and the argument hinted at by Mr. Cooper might well be availed of, to renew negociations for removing or modifying the existing prohibition.

That English salt should find its way across Burmah into the markets of Yunnan, is a curious feature of the new trade with Western China which the Indian Government is trying to foster. And that it does so, to a very considerable extent, the Reports on the administration of British Burmah clearly show. The trade seems only to have begun in 1871-72; at any rate it finds place then, for the first time, in the Customs Reports. The value of foreign salt exported in that year across the British Indian frontier into Upper Burmah, was £11,728; and the amount rose in 1872-73 to £27,769. Large quantities of this salt, says the Report, "were taken into Western China *viâ* Bhamo; and on the whole, the development of the salt trade between England and China by this route, is one of the most interesting features of the year's Report. The salt of Liverpool is fast displacing the salt of the salt-mines of Upper Burmah, and is being carried from Rangoon to Bhamo as fast as it can be conveyed. To show that the trade in salt during the year under review was not a mere spasmodic and uncertain movement, it may be mentioned that since the close of the year, viz., between the 1st April and the 1st Sept., the steamer companies have carried up-country no less than 7,050 tons, whilst two years ago there was no trade whatever in salt. The greater part of the salt finds its way into China and the Shan States from Bhamo. It is a trade which is of very great importance to Bhamo, as it gives some freight, though not a valuable one at present, to the ships coming to Rangoon for rice, which up till now have nearly all come in ballast. If, however, as there seems every reason to anticipate, the overthrow of the Panthays and the pacification of the country between Bhamo and Talifoo, leads to active trade by this route, the supply of salt to the neighbouring provinces of China will become a very important branch of trade." There was a falling off in 1873-4. The value of the salt which crossed the frontier in that year having fallen to £18,971, a decrease which the Administrative Report for that year attributes to the overstocking of the Bhamo market in the previous year. It would not be the first time such a contingency had happened to a budding trade, but we shall probably find a renewed improvement when the Report for 1874-5 comes in turn before us. What interests us, in the meantime, is the existence of a considerable salt trade across the Chinese frontier, and the figures we have quoted sufficiently establish that fact.

MANDARINS AND THEIR FOREIGN INSTRUCTORS.

If we were anxious to trumpet forth progress in China, we might find a better theme than even Mr. Burlingame or the *Pall Mall Gazette* have done, in the undoubted change which has taken place in public, or rather official, opinion, as regards the status of those engaged in mechanical arts. It is not many years since, when an arsenal was proposed to the Chinese Government, no civil mandarin or literary student could be found to condescend to connection with it, and the post of director had to be conferred on the despised class known as military mandarins. By degrees, this feeling of degradation seems to have given way; and now the position of mandarin-superintendent of an arsenal has become a high civil appointment, and in many cases a stepping stone to the highest and most lucrative posts in the empire. It is never held by an officer under the rank of Taotai, and it seems now to be looked upon as the precursor to the Taotaiship of one of the treaty ports. The present Taotai at Kiukiang owes his appointment to his having previously been mandarin-superintendent of the Tientsin Arsenal; a short time ago Wu Tajen was taken from the same establishment to be made Taotai at Tientsin; and but the other day Fêng was promoted from the Arsenal here to fill the position of Taotai of Shanghai, an appointment against which the most enterprising scholars of the Empire put a red mark, and which they keep constantly in view as an object to be aimed at, and, if possible, secured.

Though it is gratifying to see the Chinese recognising the importance, nay the necessity, of having men of culture and position in such situations, and sensible enough to break down the absurd prejudices which led them to depreciate the useful class of the artizan, it is to be regretted that they cannot find some means of rewarding mandarins who have distinguished themselves in charge of Arsenals, without removing them to other stations for which they may have no official aptitude. It is an easy task to find a mandarin capable of discharging the duties of Taotai at Shanghai. It is a difficult one, amongst the unpractical literati of China, to discover one with an aptitude for the post from which Fêng Tajen has just been removed. So many years in the life of an able and energetic man like Fêng, cannot have been passed without his accumulating a stock of experience valuable to the Government, in its endeavours to place the country in a state of defence sufficient to prevent another such humiliation as it lately received at the hands of Japan. While, therefore, congratulating the present Taotai on his promotion, those friends of China who would like to see her becoming a strong power, cannot but regret that the Government has had to throw away the experience gained by him during his connection with the Arsenal, for lack of means of rewarding him in the field in which he acquired his honours. Another loss which we regret to hear the Arsenals are likely to suffer, is the retirement of Dr. Macartney, now superintending the Arsenal at Nanking. Mr. Seward, in a dispatch addressed to Mr. Fish, Minister for Foreign Affairs at Washington, a short time ago, declared it to be a fact within his own knowledge that Li Hung-chang was beginning to sink under the worry which opposition to his measures and ameliorations had created. Some such feeling is said to influence his protégé at Nanking, in wishing to retire from the Imperial service. It is well known that, for some time past, but more especially since the discharge of the foreign staff serving under M. Giquel at Foochow, there has been a growing disposition amongst the mandarin class to show themselves, as they imagine, independent of Foreign assistance. When dictated

by proper motives, and kept within due bounds, the desire is not only natural, but commendable. It is different when, as is too often the case, it arises from corrupt motives, such as a desire on the part of the superior officials to escape the surveillance which the foreigner must exercise on their actions, or from a false idea of humiliation in having to learn under the direction of a man whom they would wish, could they do it, to despise. The Chinese are adepts in the arts of intrigue; and whether in camp or arsenal there are sure to be numbers of men anxious to improve their position at the expense of that of the foreigners engaged. Nanking has been no exception to the rule. Dr. Macartney, we learn, discovered on his return from Europe last year, that advantage had been taken of his absence to turn everything upside down, and that arrangements had been made for the discharge of his foreign employés. Annoyed at this, and unwilling to incur the responsibility of carrying on the works without foreign assistance, he has requested permission to retire. It is well known that to Dr. Macartney's representations to Li, was due the first foundation of Arsenals in China; and that, from small beginnings, under his own immediate supervision, the Arsenal, now at Nanking, has grown to its present state of efficiency, and has served as a model for similar institutions elsewhere. Dr. Macartney was peculiarly fitted for the work, and his retirement cannot fail to be severely felt. The scientific studies which, as a medical man, had formed part of his education, added to a natural inclination towards mechanical pursuits, rendered him peculiarly fitted for carrying on the multiform processes of which arsenal work consists, and which cannot in China, as in Europe, be parcelled out to the number of different overseers there rendered necessary by the subdivision of labour.

Turning from arsenals to camps, it is but seldom now that we find a foreigner attached to any of the camps, though a few years ago foreign drill instructors were to be met with in every military station. One after another they seem to have died, retired, or been supplanted by the intrigues of those whose promotion they obstructed. The result of this is in every case apparent. No one can now return from a week's shooting in the country, without having become familiar with the parody of military exercises which is perpetuated, under the denomination of foreign drill, by the Chinese on whom the mantle of the instructor has fallen. Each one teaches his men those parts of the manual exercise which he has retained in his memory, and makes up for what he has forgotten by cribbing from the Chinese drill book. The result of this is a heterogeneous mixture, the uselessness of which it seems strange that the generals in command do not observe. Possibly they do observe it, but as it is named "foreign drill," they dare not object to it, lest their objections might raise suspicions as to their apprehension of it. The European military system is at present in favour with the authorities, but this has not arisen from any intelligent comprehension of its principles. No Chinese has yet attained to this. They judge it by its effects; and, it having proved more powerful than their own, Europeans were engaged to teach it; but the mandarins, being too proud to be themselves instructed in its principles, retained, when the European instructors were withdrawn, such an imperfect knowledge of it, that it is not too much to say China would, if called on to meet an European enemy to-morrow, hardly make so good a resistance as she often did under her own erroneous and inefficient system. A bad system vigourously executed, and thoroughly understood by every one from the general to the soldier, will produce a better result than a much superior one, imperfectly understood by the one and looked down on by the other. The present drill of the Chinese army is neither one thing nor the other, but a hybrid compound of the systems of the East and the West;—two systems perfectly incompatible, and as difficult to be welded together as wood and iron. Besides this, the drill is not the same in two camps, one element or the other being found to prevail according as the instructor has gained a greater or less insight into foreign methods. The two systems being understood and relied on in different proportions by officers and men, there does not exist any of that confidence which is the result of harmony of action; and it will be well for China if she have no occasion for her army till this radical defect has been remedied. This, however, is not to be accomplished in a day, or in the hurried manner in which it was attempted to be rectified when war with Japan seemed imminent. Chinese officers ran hither and thither asking foreigners to drill their troops, and offering them large pay to enter their service, when the first and immediate result of their instructions would have been to make matters worse; to loosen the confidence of the troops in their own system, without having had time to restore it by an effective knowledge of the other. A similar furore affected the mandarins on the Yangtsze, which, without understanding the rudiments of foreign fortification, they sought to fortify in foreign manner. The market was cleared of everything in the shape of boiler plate and sheet iron; and this, it was afterwards ascertained, was in order to render the forts impenetrable to the shot of the Japanese ironclads. It is true that this was mainly done by civil, not military mandarins, but the fact only shows the innate unsoundness of the system. A military mandarin accustomed to the old Chinese system would probably have been more successful; for had he merely attempted constructing an ordinary Chinese camp, he might have produced something fairly suited to the circumstances. In former times, Chinese troops have succeeded in constructing forts which made no mean resistance to foreign arms, and there is no reason why they should not do so again. At any rate, they could not have done worse than the mandarins alluded to, whose forts most resembled children's card houses, since they fell down at the sound of their own guns.

If such be the case with the camps, we can imagine what it must be in the arsenals, which require for their management an amount of scientific information which no mandarin who has simply passed through the curriculum of the best Chinese education can possibly possess; and yet, without it, he cannot escape being made the dupe of the workmen he is supposed to direct. We have heard of many costly and absurd experiments, which mandarins lacking the first rudiments of scientific knowledge, have been induced to make; but one bearing on an unfortunate occurence recorded by our Tientsin correspondent in our issue of the 28th ultimo, is particularly apposite. Two guns, said to have been manufactured on foreign models at the Nanking Arsenal, burst somewhat curiously at the same moment, while being tried at the Taku forts, killing and wounding several persons. No system of gun manufacture yet invented is absolutely free from such dangers; but there seems no reason to attribute the failure of the guns in question to any such unavoidable cause, particularly if they resembled those which some of our naval officers encountered in going over the Nanking Arsenal a short time ago—cast-iron guns, having the same calibre and weight of metal, and all the characteristics peculiar to guns of steel or wrought-iron constructed on the compound principle. It appeared that this was one of the attempts of a would-be mandarin Krupp, in order, we presume, to show his ability to do without foreign assistance. Some one had given him a drawing of a Blakely or some other kind of built-up gun, and, ignorant of its compound nature, he thought that to imitate it he had only to turn out of cast-iron the rings and other peculiarities so conspicuous in guns of modern manufacture. We have heard, almost *ad nauseam*, of the progress which the Chinese have made, more particularly in the manufacturing arts, within the last ten or twelve years. The arsenals, the drilled troops, and more recently the successful attempt to lay the foundation of a National Debt, have been pointed out as proofs. But facts, such as the above, show that progress has been less real than apparent. There is really little difference between the Nanking attempt at gun-making in 1874, and the ludicrous attempt to convert a junk into a steamer, during our first war, by furnishing her with a pair of side-wheels, and a funnel to carry off the smoke from straw lighted beneath it. In both cases, was exhibited the same superficial character of the Chinese mind. The mandarin artillerist saw nothing in modern artillery excepting the difference in form; while his Cantonese predecessor, overlooking the real power which propels our naval giants, saw nothing but the smoke and wheels. As it was in the past, so will it be in the next ten years, unless some such thing as a war occurs to open Chinese eyes to the fact that, in the field as well as in the arsenal,—and we may add in all the branches of manufacturing industry,—China as yet knows nothing, and can know nothing so long as her people are ignorant of the highly scientific branches of education on which now depend the arts of war and peace.

OPIUM GUILD RUNNERS.

Encouraged by the freedom from interference their runners have enjoyed, the Opium Guild, not content with levying duties on Chinese within the Settlement, were active enough last week to sue the British subject Dyan for theft. It is difficult to conceive on what principle such a charge was attempted to be sustained. We have heard of such proverbs as, "All yours is mine; and all mine is my own;" and apparently some such idea might have flashed across the minds of the Guild, when pleading that the opium being carried by Dyan was not his but theirs. We have several times questioned the wisdom of lending the assistance of the police to such bodies as the Opium Guild, but are met by the objection that the Chinese living in the Settlement are none the less subject to the jurisdiction of their own authorities, and that it is better the runners should be checked by the co-operation of the Foreign police than left uncontrolled. This may be true where the object of the native myrmidons is clearly legal, but it is by no means clear that the Opium Guild have a legal right to levy the taxes they are doing on opium within the Settlement limits. Our readers will acquit us of any desire to encourage the use of opium, when deprecating what we look upon as a mistaken concession to Chinese encroachment. For our own part, we should be glad to see the smoking of opium in China entirely put an end to, but the present system is not likely to culminate in that end, nor, indeed, is it intended to. So far as outsiders can discover, it is an attempt to set up under our eyes a close monopoly, a grievance found so irksome that a special clause of the treaty of Nanking was found necessary in former times, to repress it. Did the interference of the native tax collectors end with opium, however objectionable it might be in principle, it might be pleaded that little harm was done. We have, however, the strongest reason to believe that every article bought and sold within the Settlement is subjected to the same system of extortion. We may certainly acquit the Council of any intention to help these irregular levies. They plead, indeed, that it is impossible to detect or control them; but do they not, by opening the door to such levies in the case of opium, open the door to a system and a class of people whose ulterior action can very hardly be followed? We can not be satisfied that aid is not sometimes lent, or at least indifference displayed, towards the agents of Native Guilds, or even, in some cases, of private parties, who consider the foreign Settlement a fair field for carrying on illicit taxation. We cannot but think that the first step taken, in permitting the police to give certain assistance to the emissaries of the Opium Guild, was a mistake, and this mistake has eventuated to all appearance in affecting the influence and utility of the police force. It is difficult to conceive a more peculiar situation than that in which the natives residing in the Settlement are placed. They have, in fact, to pay double taxes; once to the Municipal Council, for protecting their property and keeping in order the streets; the other, to various agents of native bodies, for no apparent purpose whatever. The Chinese Government has no expenses to meet connected with the Settlement, except keeping up the Mixed Court, and by all accounts this institution in fast relapsing to the ordinary condition of a native Yamên. The Municipal Council is responsible for the peace and good order of the districts under its charge, and we should be very jealous of any interference with its powers and privileges. The ingression of these native tax-gatherers is an intolerable nuisance, and we shall be glad if the judgment of the Court can be construed to mean that it is as illegal as it is irritating. If it be right that opium should pay taxes within the Settlement, the natural way would be that such taxes should be collected by the Council, and handed over to the native bodies authorised to receive them. Such a custom would have few of the disadvantages of the present system, and would not tend to the weakening of Municipal authority within the limits. In the meantime, the decision in the Dyan case is a check to the ever-growing assumption of the Guild; and we should like to infer from it the meaning that opium within the Settlements is still within the limits of the Port, and therefore not yet liable to further exactions. We repeat that we have no sympathy with the opium trade, nor care to see opium itself protected; but we do consider the principle at stake an important one, and wish the Council could be held to have power to exclude tax-gatherers of every sort and description, other than its own.

REVIEW.

Medical Reports for the Half Year ended 31st March, 1874. by the Surgeons to the Customs at the Treaty Ports.

These reports are of course more immediately valuable to professional men; still there is a great deal in them which will interest the general reader if he be not deterred from research by the prevalently technical aspect of the pages.

Dr. Somerville, for instance, gives some curious particulars about a highly malignant remittent fever which has come under his notice at Foochow, and which has been remarked elsewhere on the China Coast. It seems to present several points of resemblance to the worst cases of the African remittent fever on the Gold Coast, with points of divergence chiefly interesting to a medical reader, and which are explained in Dr. Somerville's carefully elaborated paper. He concludes "that the etiology and pathology of these cases of 'malignant' intermittents and remittents have yet to be worked out; particularly as to the condition of the liver, spleen, brain and spinal cord and their relations. This can only be done by a series of careful autopsies, and it is very desirable that one should be had whenever practicable. It is in this way only that all the points can be decided; such expressions as 'malarial influences,' 'paludal cachexia,' and even 'blood poisoning'—used, as these terms too often are, in the sense of expressing facts instead of mere hypotheses—tend to obscure rather than to clear up the question. For the present, one thing seems certain—that quinine, so valuable in the other fevers of this country, is at least useless if not positively hurtful when once this particular type has declared itself. Stimulants also fail, though persevered in to the extent of enormous quantities given according to the state of the pulse and the general symptoms."

The same report contains a quantity of information on the peculiar disease so frequent among dogs, in Shanghai, known as "Worms in the Heart." Dr. Somerville cites the experience of a number of medical men, among others a letter from Dr. Jamieson, which gives a remarkable picture of the disease.

"In many instances the dog appears quite well up to 24 hours before death, and alarming symptoms come on so suddenly, and succeed one another so rapidly, that poisoning is suspected. As a general rule here, the dog vomits a quantity of blood, staggers about, and dies either exhausted or in a convulsion. In one case which I dissected with Mr. Hallett, there was a continuous rope of worms stretching from the right hepatic vein, through the cava, into the right auricle, and thence, by a fine twist of one or two worms, through the tricuspid valve into the right ventricle. Unluckily I did not follow, or rather try to follow, the rope through the pulmonary artery until it was too late, and the parts were cut about. But on opening the left auricle I found it simply packed with worms, and drawing on the mass puckered up the lungs. I therefore carefully followed the pulmonary veins backwards, and found that the mass in the left auricle was only the middle of a rope fourteen inches long, which stretched into both lungs, and which was without difficulty drawn out and laid on the table for measurement. No doubt there was a continuous string from the right ventricle, but I cannot affirm it. There was not a single worm in the left ventricle, nor did there appear to be any attempt at perforating the walls of the heart. Of course I cannot say whether the extremity of the rope in the hepatic vein was the beginning or the end, but it is at least suggestive that the liver should have been one of the termini. At the same time, Dr. Little tells me that he once traced a single worm from a vein at the knee of a dog (I do not know which knee) right along into the right auricle. I don't think any treatment has been tried, and, in fact, the onset of the symptoms is so rapidly followed by death that treatment seems hardly possible."

The disease is by no means confined to foreign dogs. Dr. Myers, of Chefoo, killed several native dogs, in experimenting with an unknown Chinese poison, and found these worms to a more or less extent in every dog he opened. At the same time he concludes that dogs imported from Europe seem to acquire them more readily, and to a more rapidly fatal degree.

Dr. Somerville concludes, from his study of the subject and from the communications he has received, that treatment is scarcely possible, as the disease can be so hardly recognised during life, and the case ends fatally before any treatment can be applied. In case the presence of the disease

is suspected, he suggests the administration of santonine, but even this would be of little use unless at a very early stage; for even if it killed the worms "it is difficult to see how they would be more harmless dead than alive, in the way of blocking up the blood vessels and cavities of the heart." As to the origin of the disease, Dr. Somerville writes—

"I think that the bulk of evidence goes to show that the germs are taken into the intestinal canal by ingestion. Once admitted into the gut, they could find entrance into the blood through a lacteal or a blood-vessel (especially if an open ulcer occurred), and thus they could traverse the circulation, for it has been shown that the diameter of the embryo is less than that of a white blood corpuscle. Dr. Krabbe states (according to Dr. Cobbold) that the young are produced *viviparously* and carried along in the circulation. There is, therefore, no difficulty in explaining their wonderfully rapid reproduction within the vascular walls, and how it is that they become numerous enough to form ropes in the blood-vessels and masses in the cavities of the heart."

It is satisfactory to remark that, so far as it is known at present, the disease does not exist in the human subject, in any part of China.

Drs. Carmichael and Myers, in their report on Chefoo, give some particulars of the poison referred to by the latter in the experiment we have quoted above. It is a substance used by the Chinese for the purpose of curding bean curd; but it is also, say the writers, a strong poison, and is sometimes resorted to by women for suicidal purposes. It was first brought to their notice by a compradore, who suggested that it might be the poison used in the case of a favourite horse which had been killed on the night before the races. This proved not to be the case, but the suggestion led to examination of the substance, with the following results :—

"It is called by the Chinese 滷水 lu-shui. Two specimens were examined. No. 1 gave slight acid reaction with test paper. No. 2 was strongly alkaline. The quantity of solid matter was great, but varied in each specimen, as did also the specific gravity. No. 1 contained alum, to which probably its acid reaction was due. In both the chloride of sodium was largely predominant and triple phosphates were also present. It is one of the productions in the manufacture of saltpetre, which is found in combination with chloride of sodium, impregnating the soil of the coast of the Gulf of Pechili; some localities are distinguished by the white efflorescence which it gives to the surface. This appearance we have observed especially on the borders of Shantung and Chihli, where the saline plains extend for miles inland. The soil is subject to a lixiviating process, chiefly for the purpose of obtaining the saltpetre. The poisonous product is the liquid incapable of cystallization in the extracting of the salt. It is poisonous in doses of from one fluid ounce."

The Medical Report on Amoy mentions one of the most unpleasant incidents in up-country travelling that we have seen recorded. A naturalist, who had been for some months travelling in Formosa, happened to mention to Dr. Manson that he had been lately troubled with pains in the head and other symptoms pointing to some anomalous condition of his nose. An examination was made with the following result :—

"Through a speculum we could see a dark shining body far up in the nose, and just as the speculum was being withdrawn the head of a leech was protruded between the blades of the instrument and quickly retracted. An artery forceps was introduced into the nostril, and, after one or two attemps, was fastened on the head of the animal as it was protruded. Allowing the forceps thus attached to dangle from the nose while some salt and water was injected, the leech, after a short time, relaxed its hold and fell into the hands of the astonished naturalist."

The presence of the intruder is accounted for by the traveller having drunk on one occasion from a pool in which he noticed a number of small leeches, and afterwards picked two or three from the roof of his mouth. Some six or eight days afterwards he was troubled with bleeding from the nostril—caused of course by the little brute which had taken the occasion to quarter himself there. The patient had suffered much from pain in the head, vertigo and loss of appetite, before the successful discovery of the leech. The Drs. Manson have heard of another case of the same kind, in Tamsui, and add that they have on two occasions seen, in Takow, what they now know must had been this parasite in the nostrils of monkeys :—

"Sometimes when the animal was sitting quietly, a long dark fleshy body would come out of the nostril, but the movements of the monkey on our making any attempt at a close inspection immediately caused the protruded object to retract. There can be little doubt that this parasite is derived from drinking water, probably creeping round the velum into the posterior nares or by the anterior nares, especially when stooping down to drink from a pool."

We must defer notice of Dr. Jamieson's report on Shanghai, till another occasion. It deals with matters of sufficient interest and importance to claim a separate article.

Outports.

TIENTSIN.

In the Peking *Gazette* of the 21st Jan., we find a Decree from the Imperial Regents—the Empresses Dowager—with reference to the prayer of the Prince of Chun (the father of the new Emperor), to be allowed to retire from public life. It has been decided, after due deliberation on the subject by the other Imperial Princes, the Dukes, the Ministers of State, the six Boards, and the nine King, that the Prince shall be allowed to do so, and that he shall, in consideration of his past able services to the State, receive yearly a double monetary allowance. We learn from later decrees that the posts he held had been given to other high officials. The Prince of Pih—Pih-wang or Pih-yen-no-mo-koo—(the son of the famous Mongol General Săng-ko-lin-săng)—had received the appointment of the command-in-chief of the foreign drilled and armed Manchow Legion (known to the Chinese by the name of the Shin-ke-ying) stationed at and near the metropolis. The Prince of Chun was formerly the commander-in-chief of this corps. Prince Pih stood in high favor with the late Emperor; and when His Majesty went to the Western Tombs last spring, rode by his side both on going and on coming back. In the *Gazette* of the 22nd January, it is announced that the Princes of Tun, Kung, and Foo, all uncles of the late and also of the present Emperor, are exempted from performing the kow-tow on certain occasions at Court. Also, in the same *Gazette*, there is an edict making known and publishing that His Majesty, (whose name is Tsae-tien, but whom we will in future, as has been the custom in China when designating the sovereigns, speak of by the name of his reign, namely, Kwang-seu,) will ascend the Throne early in the morning of the 25th day of February, the Chinese 20th day of the 1st Moon of the 1st year of Kwang-seu.

On the 26th ultimo, we learnt that his Excellency Li Hung-chang, would, immediately after the closing of the seals of the Paouting yamêns for the New Year holidays on the forenoon of the 27th instant, leave Paouting for Peking. It has been surmised amongst the Chinese here, that Li has been called to the capital by the Imperial Regents, to remain at Court as one of the advisers to the Throne; by which is meant, I suppose, that his Excellency will become one of the members of the Cabinet at Court. We have received at Tientsin copies of the Peking *Gazettes* up to the 25th ultimo, but in none of them do we find mention of any change having been made in the post of Governor-General of this province. If Li Hung-chang becomes stationed at Peking, as a member of the Privy Council, he will cease to be Governor-General of Chihli.

In the *Gazette* of the 18th January, it is announced that Tseng-kwo-tseuen, brother of the celebrated statesman Tseng-kwo-fan, and formerly Governor of Hoopeh province, had reached Peking, and presented his respects to the Throne. The Chinese people here have a rumour that he is to succeed Li Hung-chang as Governor-General of this province. I have heard nothing from reliable sources on the subject, and myself do not credit the report. On the 27th instant, early, all the yamêns here were closed for public business during the New Year holidays, namely, till the 24th February. Only urgent business will be attended to during this period.

During the winter months at Tientsin, and after the ice on this river will bear weight, one of the chief vehicles for the conveyance of passengers, supplies of goods for the humans and animals of the city, and of produce and manufactures, is the hand-sleigh, which is moved along the ice by one man standing at the back of the sleigh with a foot on each runner, by a pole having a sharp iron point, which he uses between his legs. In calm weather, and carrying four passengers, the sleigh can be poled along the ice at the rate of about ten miles an hour; and with a favorable, strong wind it can move along at the rate of fifteen miles an hour; but then, of course, it can only be poled against the wind slower, at about three or four miles an hour.

When the British army was at Tientsin, during the winter of 1860, there were many officers and men in the regiments who had been formerly stationed in North America, Canada, Nova Scotia, &c., where the Red Indians use a hand-sleigh for the conveyance of baggage, game, &c., &c., on sporting excursions, which they call a tabogau; and the name has thus been adopted in Tientsin. The Tientsin Chinese call a tabogau, Pai-tsze 擺子 and the Pekingese, To-chueang 脫床 or 冰床 Pingchwang. These sleighs have two runners, about eight feet long, six inches deep, and a couple of inches thick; and the bottom parts are shod with iron; the runners are about two feet separate, and are held apart by two wood cross binders. A thick millet stalk matting is placed on the upper part of this frame, on which the passengers sit and the goods are placed. The men who pole the tabogaus, when not at work, wear a loose long fur coat; but when poling, this coat is placed on the tobagau, and the passengers use it as a cushion on which to sit. The implement used for poling is made of wood, has a sharp iron point, and is about seven feet long. The day

OPIUM GUILD RUNNERS.

Encouraged by the freedom from interference their runners have enjoyed, the Opium Guild, not content with levying duties on Chinese within the Settlement, were active enough last week to sue the British subject Dyan for theft. It is difficult to conceive on what principle such a charge was attempted to be sustained. We have heard of such proverbs as, "All yours is mine; and all mine is my own;" and apparently some such idea might have flashed across the minds of the Guild, when pleading that the opium being carried by Dyan was not his but theirs. We have several times questioned the wisdom of lending the assistance of the police to such bodies as the Opium Guild, but are met by the objection that the Chinese living in the Settlement are none the less subject to the jurisdiction of their own authorities, and that it is better the runners should be checked by the co-operation of the Foreign police than left uncontrolled. This may be true where the object of the native myrmidons is clearly legal, but it is by no means clear that the Opium Guild have a legal right to levy the taxes they are doing on opium within the Settlement limits. Our readers will acquit us of any desire to encourage the use of opium, when deprecating what we look upon as a mistaken concession to Chinese encroachment. For our own part, we should be glad to see the smoking of opium in China entirely put an end to, but the present system is not likely to culminate in that end, nor, indeed, is it intended to. So far as outsiders can discover, it is an attempt to set up under our eyes a close monopoly, a grievance found so irksome that a special clause of the treaty of Nanking was found necessary in former times, to repress it. Did the interference of the native tax collectors end with opium, however objectionable it might be in principle, it might be pleaded that little harm was done. We have, however, the strongest reason to believe that every article bought and sold within the Settlement is subjected to the same system of extortion. We may certainly acquit the Council of any intention to help these irregular levies. They plead, indeed, that it is impossible to detect or control them; but do they not, by opening the door to such levies in the case of opium, open the door to a system and a class of people whose ulterior action can very hardly be followed? We can not be satisfied that aid is not sometimes lent, or at least indifference displayed, towards the agents of Native Guilds, or even, in some cases, of private parties, who consider the foreign Settlement a fair field for carrying on illicit taxation. We cannot but think that the first step taken, in permitting the police to give certain assistance to the emissaries of the Opium Guild, was a mistake, and this mistake has eventuated to all appearance in affecting the influence and utility of the police force. It is difficult to conceive a more peculiar situation than that in which the natives residing in the Settlement are placed. They have, in fact, to pay double taxes; once to the Municipal Council, for protecting their property and keeping in order the streets; the other, to various agents of native bodies, for no apparent purpose whatever. The Chinese Government has no expenses to meet connected with the Settlement, except keeping up the Mixed Court, and by all accounts this institution in fast relapsing to the ordinary condition of a native Yamên. The Municipal Council is responsible for the peace and good order of the districts under its charge, and we should be very jealous of any interference with its powers and privileges. The ingression of these native tax-gatherers is an intolerable nuisance, and we shall be glad if the judgment of the Court can be construed to mean that it is as illegal as it is irritating. If it be right that opium should pay taxes within the Settlement, the natural way would be that such taxes should be collected by the Council, and handed over to the native bodies authorised to receive them. Such a custom would have few of the disadvantages of the present system, and would not tend to the weakening of Municipal authority within the limits. In the meantime, the decision in the Dyan case is a check to the ever-growing assumption of the Guild; and we should like to infer from it the meaning that opium within the Settlements is still within the limits of the Port, and therefore not yet liable to further exactions. We repeat that we have no sympathy with the opium trade, nor care to see opium itself protected; but we do consider the principle at stake an important one, and wish the Council could be held to have power to exclude tax-gatherers of every sort and description, other than its own.

REVIEW.

Medical Reports for the Half Year ended 31st March, 1874. by the Surgeons to the Customs at the Treaty Ports.

These reports are of course more immediately valuable to professional men; still there is a great deal in them which will interest the general reader if he be not deterred from research by the prevalently technical aspect of the pages.

Dr. Somerville, for instance, gives some curious particulars about a highly malignant remittent fever which has come under his notice at Foochow, and which has been remarked elsewhere on the China Coast. On the 26th ultimo, we learnt that his Excellency Li Hung-chang, would, immediately after the closing of the seals of the Paouting yamêns for the New Year holidays on the forenoon of the 27th instant, leave Paouting for Peking. It has been surmised amongst the Chinese here, that Li has been called to the capital by the Imperial Regents, to remain at Court as one of the advisers to the Throne; by which is meant, I suppose, that his Excellency will become one of the members of the Cabinet at Court. We have received at Tientsin copies of the Peking *Gazettes* up to the 25th ultimo, but in none of them do we find mention of any change having been made in the post of Governor-General of this province. If Li Hung-chang becomes stationed at Peking, as a member of the Privy Council, he will cease to be Governor-General of Chihli.

In the *Gazette* of the 18th January, it is announced that Tseng-kwo-tseuen, brother of the celebrated statesman Tseng-kwo-fan, and formerly Governor of Hoopeh province, had reached Peking, and presented his respects to the Throne. The Chinese people here have a rumour that he is to succeed Li Hung-chang as Governor-General of this province. I have heard nothing from reliable sources on the subject, and myself do not credit the report. On the 27th instant, early, all the yamêns here were closed for public business during the New Year holidays, namely, till the 24th February. Only urgent business will be attended to during this period.

During the winter months at Tientsin, and after the ice on this river will bear weight, one of the chief vehicles for the conveyance of passengers, supplies of goods for the humans and animals of the city, and of produce and manufactures, is the hand-sleigh, which is moved along the ice by one man standing at the back of the sleigh with a foot on each runner, by a pole having a sharp iron point, which he uses between his legs. In calm weather, and carrying four passengers, the sleigh can be poled along the ice at the rate of about ten miles an hour; and with a favorable, strong wind it can move along at the rate of fifteen miles an hour; but then, of course, it can only be poled against the wind slower, at about three or four miles an hour.

When the British army was at Tientsin, during the winter of 1860, there were many officers and men in the regiments who had been formerly stationed in North America, Canada, Nova Scotia, &c., where the Red Indians use a hand-sleigh for the conveyance of baggage, game, &c., &c., on sporting excursions, which they call a tabogau; and the name has thus been adopted in Tientsin. The Tientsin Chinese call a tabogau, Pai-tsze 擺子 and the Pekingese, To-chueang 脫床 or 冰床 Pingchwang. These sleighs have two runners, about eight feet long, six inches deep, and a couple of inches thick; and the bottom parts are shod with iron; the runners are about two feet separate, and are held apart by two wood cross binders. A thick millet stalk matting is placed on the upper part of this frame, on which the passengers sit and the goods are placed. The men who pole the tabogaus, when not at work, wear a loose long fur coat; but when poling, this coat is placed on the tobagau, and the passengers use it as a cushion on which to sit. The implement used for poling is made of wood, has a sharp iron point, and is about seven feet long. The day

before yesterday, about eleven o'clock in the forenoon, I stood on the verandah looking on the river; and during five minutes by my watch, 55 tabogaus passed my house up and down the river. This was at the rate of 660 in an hour. If we reckon that during 10 hours this rate of traffic goes on, we have during that period 6,600 tabogaus passing the British Settlement up and down the river. If we calculate that during four other hours, namely two in the morning and two in the evening (from 5 a.m. to 7 a.m., and from 5 p.m. to 7 p.m.), half the above number pass the Settlement to and from the city, we have to add 1320 more tabogaus to the above number, making 7,920. We may set down for the remaining 10 hours of the 24, that 20 tabogaus pass up and down the river hourly before the Settlement, making an additional number of 200 to be placed to the above total. Thus we have a grand total for the twenty-four hours of 8,120 tabogaus passing up and down the river off the British Settlement. By the other branches of the river, above Tientsin, coming from the North, West, and South, we may put down a traffic of double that existing on the river before us. We shall consequently have something like 24,000 tabogaus passing to and from the city of Tientsin, from and to the surrounding region, during the twenty-four hours of each day in winter (weather permitting, of course), engaged in carrying supplies of food for the inhabitants of Tientsin, and the animals in it, and in transporting produce, manufactures and passengers, to and from the city. The millet stalks, which are used by the inhabitants of Tientsin for cooking purposes, and for heating their sleeping and sitting stoves, appear to be always transported to the city from the surrounding districts on long carts, which are dragged by horses, mules, or oxen; arising mainly I fancy from the stalks being too long and bulky to be conveniently conveyed on the tabogaus. Every day we see a number of long carts passing the Settlement on the Taku road, loaded with millet stalks going up to the city.

Since writing the above, I am now told by natives that the daily tabogau traffic on the upper river branches, including the canal branch which comes to the city from the interior, considerably exceeds the traffic on the river branch off this Settlement. This, on reflection, I can readily credit. Thus then my computation, as above given, is rather below than above the actual state of things.

Owing to a lack of any interesting political news to write to you about by to-day's Customs' post from this quarter, I have taken the liberty to jot down the above brief account regarding our tabogau traffic; and I trust your readers, who have never witnessed such a traffic, may deem my short account worth reading.

The ice harvest still continues going on; last night, opposite this Settlement on the river, Chinese were at work all night gathering in and housing ice. We ought, during all next summer, to have plenty of ice of good quality, and at a moderate price.

On the 30th ultimo, another paper hunt came off; but this time on the opposite side of the river. I understand that the field was again large, and that the sport was excellent. Mr. Random came in first on this occasion.

Since the departure of last week's Customs' mail, we have had two Northerly dust storms—one on the 28th ultimo, commencing at 1 a.m., and continuing till dark; and the other all yesterday. The weather otherwise has been really delightful. Last night's temperature caused the Fahrenheit thermometer to fall to 10°. The river ice this morning was 14½ in. thick.

On the 4th instant, according to the Chinese reckoning, Spring begins. The Chinese weather-wise folks are of opinion that the river from Taku to this will be free of ice by the 1st March, and quite free for steamer navigation after that time.

The Peking *Gazette* of the 29th January has just come to hand. From it we learn that His Excellency Li Hung-chang had arrived at Peking, and that on that day he had had an audience of the Throne to present his respects; that Ying Han, the newly-appointed Governor-General of the provinces of Kwangtung and Kwangse, had requested an audience to receive the commands of the Throne on leaving for his post at Canton; that Li Hung-chang and Ying Han had later been asked to appear at the Council Room of the Cabinet on special business; that Ching Lin (formerly Customs' Taoutai at the port of Newchwang) had been promoted to be Vice-President of the Board of Works; and that Tih Chun (formerly Superintendent of the Imperial Arsenal at Tientsin) had been promoted to be Vice-President of the Colonial Office, *vice* Ching Lin, promoted as above.

PURITAN.

February 1st, 1875.

AMOY.

The Chinese at Amoy either had not the news, or showed less respect to the memory of the Emperor than their countrymen in Shanghai. A correspondent of the *China Mail* says:—"The New Year festivities are taking place with their usual accompaniment of fire-crackers and noises of all kinds. The Chinese war vessels in port were decorated with flags on New Year's day, and Europeans largely availed themselves of the holiday to indulge in picnics and excursions up country."—The Amateur Dramatic Corps gave a successful performance on the 6th inst. A concert is to take place shortly in aid of the funds for building a Sailors' Home. Another theatrical performance is promised by the German community, so that we may fairly presume that the Amoy Season has commenced.

FOOCHOW.

A very destructive fire broke out on the night of the 1st instant in the south-west suburb of the city, near the bridge. It was discovered between 10 and 11 o'clock, and spread with such rapidity that before 3 a.m. more than 400 houses were destroyed. At one time it was feared that the hongs recently occupied by Messrs. Ivanoff & Co. and Ruttonjee & Co. would become a prey to the flames, in which case the premises of Messrs. D. Sassoon, Sons & Co., and Messrs. Gibb, Livingston & Co. would have been seriously jeopardized; fortunately the fire was arrested at about 3 a.m. without having caused any injury to foreign property.—Rather a good story is told of a house-boy in the Settlement, who having the spirit of commercial adventure in him started a lottery, and advertised the same by a notice over the gateway of his master's private residence.—A meeting of the Foochow Club was held on the 29th Jan. It had gone on prosperously during the year, the library had been considerably enlarged, and a new bar-room and lavatories erected. Arrangements have been made with the Shanghai and Hongkong Clubs for reciprocating privileges to members of the three Clubs. Messrs. Tatham, Dermer, Haslam, Pim, Fairhurst, Masfen and Harton were elected to the Committee for the ensuing year.—H. M. S. *Kestrel* arrived from Tamsui on the 9th instant.—The *Herald* hears that H. B. M.'s Consul, Mr. Sinclair, is about to leave for Europe, and that he will be succeeded by Mr. Pedder—the present representative of British interests at Amoy.—It is reported that the Chinese authorities have ordered a survey of the river below Pagoda Island, with a view to selecting a suitable site for the construction of a Dry Dock. The floating dock at the Arsenal does not fully meet existing requirements, nor is the channel leading to it so deep as it was formerly.—Rumours very similar to those which were current in Shanghai during our interval of no news from Peking, were current also in Foochow.—The *Herald* says, a mob have pulled down several houses belonging to the Great Northern Telegraph Company:

"The object of attack was a watch-house belonging to the Great Northern Telegraph Company, built on ground purchased by them in conformity, not only with the terms of the concession granted to them, but also with a special clause in the Danish treaty. Three of these houses were built on ground purchased by the Company—at intervals of 10 miles. All these houses contained property belonging to the Company; they were looted, the European and Native *employés* driven therefrom; and finally the buildings were demolished. The portion of the line already constructed was pulled down, and the wire, poles &c., stolen by the mob, who declared, we are informed, that the Authorities had given permission to them to take whatever they could lay hands on. Fortunately there was no loss of life on either side, but this is entirely owing, we think, to the praiseworthy forbearance displayed by the Europeans—all of whom were well armed."

Forbearance is no doubt praiseworthy within certain limits; but a point may be reached when resistance is justifiable, and we should think that point was nearly reached in the case of the Telegraph Company at Foochow. A judicious application of Penang lawyers would go a long way to convince the mob that their action was mistaken. We always think, in such cases, of Lord Palmerston's memorable letters to Sir John Davis about the Canton riots: "The true way to encourage the mob to acts of violence is to leave unprotected the persons and the property that might be the objects of their violence." And again, "There is no greater incentive to outrage on the part of the turbulent and lawless, than a belief that the persons whom they would like to insult or plunder may be assailed with success and plundered with impunity." The maxim is equally true whether the mob be acting of its own accord or at official instigation.

The Market Report of the 12th February says, no transactions in tea had been reported during the week. The s. s. *Priam* arrived on the 7th instant, and left on the (12th) for London, *viâ* Hongkong, &c. The *Wm. Turner* sailed for Melbourne on the 7th; and the *Golden State* was to take her departure for New York on the 13th.

HONGKONG.

Hongkong papers are full of reports of the various public companies. A meeting of shareholders in the Hongkong Fire Insurance Company was held on the 15th. The report (published on another page) was passed. The business of the Company was stated to be in every way satisfactory. Remuneration to Directors, $1,000 each, was passed. Messrs. A. F. H. Heard, Lapraik and André were elected to the Consulting Committee. The Committee were recommended to give a bonus to Mr. Chambers, for his services as Secretary.

The Report of the Victoria Fire Insurance Co. shows that $76,562 remained at credit of 1873 Working Account, which has been distributed according to the Deed of Settlement. The Reserve Fund stands at $179,821, exclusive of the Working account of 1874.—$50,278 stand at credit of Working account for 1874, after making all requisite provision for losses, interest, charges, &c.

The Report of the China Fire Insurance Co. shows a net profit in 1873 of $81,269. The Reserve Fund stands at $248,614.

The balance at credit of working account for 1874 is $69,870.

The Report of the China Traders' Insurance Co. shows that the total premia collected during the year ended 31st October last amounted to $347,381. The mode in which this sum will be apportioned is explained in the Report.

The Hongkong Bank Report gives details of the losses which have nearly extinguished the Reserve Fund. The Sugar Company of course stands prominent. We are told that this Company's estate now stands in the Bank's books at half the value the Bank's Special Agent has placed upon it. The Directors purpose to realize the property with all despatch, and steps have been already taken to that end.—Losses in London, losses on the Pier Company property, depreciation of securities, &c., help out the total. Mr. Vacher, the London manager, has left the Company's service. A Committee of management is to be appointed in London. The poor result of the half-year's working is attributed to the bad state of trade in the East; business generally has yielded but little profit, and that in Exchange has proved no exception. The demand for advances has been small and the interest obtainable on them consequently low, while the interest paid by the Bank on deposits has been heavy. The Directors affirm however that the general business and position of the Bank continue sound.

A horticultural show is to be held on the 19th and 20th instant.—The P. M. str. *Great Republic* is to be docked and re-coppered. She has experienced so rough weather on the voyage over, that her copper is torn off in places.—The U. S. frigate *Hartford* arrived on the 14th, bearing the flag of Rear-Admiral A. M. Pennock. She saluted the different vessels in port and was saluted in return.—In the *Ava* and *Rona* case it has been agreed that the report should go back to the Registrar and merchants to be reconsidered, and that each party with the approval of the other appoint an additional assessor. The Hon. Mr. Lowcock was named for the *Ava*. The agents of the *Rona* asked time to select theirs.—The fund for the widows and orphans of those who lost their lives on board the *Mongol*, reached over $2,000.—Admiral Shadwell left Singapore for England on the 4th inst., in the *Iron Duke*.

The *Daily Press* learns that it is intended before long to establish a line of steamers to run between Saigon and Tonquin.—The assault on Mr. Hill is made the text for a rather exaggerated picture of affairs at Shanghai. The *Press* assures us that, if foreigners do not carry arms, or the authorities are not compelled to restrain their subjects, or "something" is not done, "unprotected foot passengers" will have to expect continual grief. Hongkong, on the other hand, is remarkably free from such assaults. "The large and efficient Police Force maintained in the Colony renders the perpetration of such offences a very hazardous job, and hence Europeans go about freely without the slightest fear of insult or danger." But we invite perusal of the whole article, which will be found in another column; premising only that we have heard the Hongkong Police less favourably described. It is pleasant to note such a complete revulsion of feeling.—A yacht race for the Wave Cup was won by the *Naiad*, which seems to farm these events; it must be getting almost monotonous. The *China Mail* concludes its account of the race with a graceful tribute to the memory of Mr. G. F. Heard, the late Commodore of the Club. "Always ready to join in promoting the sport of yachting and yacht racing, his hearty geniality and good fellowship were unbounded, and by no section of the community will his loss be more deeply regretted than by yachting men. We understand that the yachts belonging to the Club will fly their ensigns at half-mast to-morrow, as a slight token of the respect in which he was held by their owners and his many friends interested in yachting."

NAGASAKI.

The *Rising Sun* reports rough weather lately on the coast, north-westerly gales and some squalls. Even in the Inland Sea three junks and eight persons were lost. The *Adventure* arrived from Hongkong on the 6th, and left on the 9th for Yokohama; she experienced a heavy gale the day before arrival.—The apprehension which we noted last week, that the small-pox would travel westward, is being verified. It appears to have broken out in Hiroshima, and one or two cases are reported in Nagasaki.—The *H. C. Oersted* arrived from the coast of Corea on the 11th, after picking up the broken cable between Nagasaki and Vladivostock. She experienced heavy north-westerly gales, icebergs, and snow.—H. M. S. *Curlew* arrived from Chefoo the same day.—The Municipal elections have become slightly entangled, through the rejection by the Consuls of all ballot papers which were not signed by the voters. The Consuls have acted on the principle which rules in Shanghai, but appear to have made the mistake of not explaining their intention beforehand. Of course the gentlemen declared elected under such conditions have declined to serve, and the process has to be repeated.—The Captain of the *Condor* lately went out shooting with one or two other gentlemen, and while practising with pistols received a shot in the fleshy part of the thigh. The wound is not dangerous, but still sufficient to prevent him from taking command of the vessel, which left for Shanghai on the 8th instant.

YOKOHAMA.

The *Mail* announces that Her Majesty the Empress, having been informed that an institution was to be established in Yedo for intructing young women as teachers, expressed her deep sense of the importance of improving the education of the women of this country, and gave further effect to her words by a munificent donation of 5,000 *yen* to the institution.—Major Murater, a well-known native marksman, has been detached on special service to visit France and Prussia, to make himself familiar with the rifle drill of those countries.—Mr. Ernest Satow, Japanese Secretary to H. B. M. Legation, has gone to England on a year's leave, partly on private affairs, partly with the view of publishing a work which promises, says the *Mail*, to be of vast utility to students of the Japanese language.—Destructive fires have recently occurred in the neighbourhood of Yokohama, Osaka, Yedo, &c., in one of which several thousand houses were destroyed.—Two successful amateur dramatic performances have been recently given in Yokohama, the pieces played being the Falstaff scenes from *Henry IV.*, and the farce *Little Toddlekins*.—Moriyama, Secretary to the Minister for Foreign Affairs, who is to be despatched on a mission to Corea, took leave of His Majesty the Mikado on the 2nd instant, and was presented with a gold watch by the Emperor.—Mr. Von Brandt having been appointed to Peking, the members of the German Asiatic Society gave him a farewell banquet at Bonnat's Hotel, on Saturday evening, the 6th instant.—The return football match between the Fire Brigades and the Settlement, on the 28th ultimo, was won by the former.—The *Tokei Journal* says the Imperial Gardens, both at Hamago-ten and the Castle, have been opened to the public, under certain restrictions.—The same paper states that Prince Fushimi, the younger, has passed an excellent examination in French and Chinese, and has entered the army as *sous-lieutenant*.—The *Gazette* says, on the 2nd inst. some thieves broke into a house near Yokohama, and one of the inmates, an old man, took up a spear to oppose them. One of them attacked him, and cut off his head with a sword. The murderer has been apprehended.—According to the Tokio native papers, small-pox continues to rage with unmitigated virulence in the Capital, and the mortality in some *Dai-ku* equals seventh-tenths of the whole population.—A farmer, while lodging at an hotel in Tokio, during a visit to that town, found all his money had been stolen, and thereupon committed *harikaru*. He died before assistance could be procured.—The action brought by the Hongkong and Shanghai Banking Corporation against Mr. E. Wallace, to recover $8,700, balance of account, was resumed in H.B.M. Bankruptcy Court, on the 2nd and 5th instant, by adjournment from a hearing in January. The case was further adjourned.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

Jan. 23rd.—(Court Circular.)—The Grand Secretariat presented their Memorial with decision as to the posthumous appellation and canonical designation of His late Majesty.

(1)—The Governor-General of Fuhkien and Chêhkiang, in a postscript memorial, refers to a report by the Imperial Commissioner, Shên Pao-chêng, on the loss of two steam gunboats in the gales of September last off the coast of Formosa; and gives an account of destructive storms and floods on the coast of Fuhkien, in which much damage was done at the same time to life and property.

(2)—The same authority reports the arrival at Foochow of the Liu-ch'iuan junk which was reported (see *Gazette* of Oct. 24th, 1874) as having been drifted, with ten men on board, to the coast of Chêhkiang. After having been repaired at Yü Hwan T'ing, the junk was sent on to Foochow, where she arrived, after an eleven days' voyage, on the 10th Sept., and she was in due course to be allowed to return with those on board to Liu-ch'iu.

Jan. 24th.—(1) A Decree of the two Empresses, in reply to a memorial from the Board of Ceremonies, dispensing with the customary levée of congratulation on the coming New Year's Day.

(2) A Decree in the name of the Emperor, referring to the decree issued last month, in which the bestowal of additional titles of honour on the two Empresses was ordained. His Majesty considers it his duty to fulfil the intentions of his predecessor, although the two Empresses, in their grief on His late Majesty's decease, had issued orders countermanding the step; and he now decrees that the selection of appropriate additional titles be proceeded with, as the great Council of State may find to be most proper.

(3) Memorial of the Prince of Li and his colleagues, entreating His Majesty to reconsider his determination with reference to the three years of mourning.—Rescript already published.

(4) The Censor Yü Shang-hwa memorializes representing that the penalty inflicted on the two Imperial physicians has been disproportionately slight, and asking for their immediate degradation. Rewarded as they already were beyond their deserts, they should have strained every nerve in devotion to their task, instead of which, in less than twenty days afterwards, owing to their mistaken treatment, His Majesty was suddenly removed to another world. Universal indignation is felt against the two physicians, whose offence is likened to that of the Prince of Hü, branded for his misdeed by Confucius in the Spring

and Autumn Chronicles. (The Chronicle records that "She, heir-son of Heu, murdered his ruler, Mae,"—Legge's Classics, Vol. V., P. 674. The commentators explain that the act entitled murder, in reprobation of its gravity, consisted in failure to taste the remedies supplied to his father by the offending prince, before he gave them to the sufferer). In their erroneous diagnosis and ineffectual prescription of remedies, the offence of the two physicians has been more heinous even than that of failure to taste a mixture supplied, and complete degradation from official rank is called for as the only fitting punishment.—Rescript confirming this proposed sentence has already appeared.

(5) The Military Governor of Shêng-king (Manchuria) memorializes with reference to certain exchanges which he deems advisable between the commandants of different districts within his jurisdiction. Although the region is at present comparatively free from the brigandage which has until lately afflicted it, a recurrence of the evil is nevertheless to be apprehended should the garrison posts be withdrawn; and this liability to disturbance is traceable to the unsuitability of officials to the posts they have to fill. The commandantship at Fêng-hwang Ch'êng is particularly important, owing to its proximity to the Corean frontier, and the frequent occurrence of international transactions. On each occasion when Corean officials enter Chinese territory, it is the commandant's duty to institute examination in person, and maintain order; and he has likewise to supervise the squatters on the waste lands beyond the border. An exchange between the present commandant, and a more active and energetic officer, at present stationed at Fuh-chow, is thought advisable. At Kai-chow, again, this city having under its jurisdiction the port of Muh-kow Ying (Newchwang), with its foreign trade, an officer of superior intelligence is required, and an exchange is to be effected here, as well as at two other points.

Jan. 25th—(Court Circular.)—The Grand Secretariat memorialized reporting the decision arrived at with regard to the rules for the conduct of the Regency.

(1) The Governor of Honan reports the completion of measures he has instituted for encouraging the formation of village granaries in his province, as a provision against times of scarcity; his object being to make the system entirely unofficial, so that the country people may not be pillaged by dishonest underlings or harassed by the empty form of handing in elaborate returns. The contributions collected during the past two years have enabled a stock of grain to be assembled in the different districts, amounting at present to 930,000 piculs. In the event of bad harvests, advances or sales will be made under the management of the local notables and elders.

(2).—The same Governor reports the establishment of a system of distribution and pay for the corps of specially drilled troops lately set on foot for the preservation of order in the province. The force consists of four battalions, of 500 men each, of infantry; and three battalions, of 250 men each, of cavalry; who have been selected from the established force of the province to constitute this special drilled corps. The greatest care is exercised to maintain their efficiency and the good condition of the horses. The rules adopted with regard to service and pay are essentially the same with those drawn up by Tsêng Kwoh-fan while Governor-General of Chihli.

(*N. B.*—From the 26th January to the 24th February, being the period of the New Year's holidays, the *Gazette* will only appear every other day)

Jan. 26th 27th (1).—A Decree, approving the selection made by the assembled Ministers of State, of the posthumous titles to be attributed to the deceased Emperor. The canonization 尊謚 adopted is I Hwang-ti,毅皇帝, and the title to be enrolled in the list for worship in the ancestral temple is Muh Tsung 穆宗. (The above titles may be rendered as Noble Resolve and Moral Grandeur).

(2) A Decree of the two Empresses, calling, in conformity with precedent, for advice in the shape of memorials from officials throughout the Empire on the occasion of His Majesty's accession. In representing whatever may have a practical bearing upon the conduct of affairs, all idle forms of words are to be discarded. An example will be set in the Palace of the regard for simplicity and economy which the Sovereign has constantly inculcated. For the future, it shall be forbidden to make offerings of articles of luxury and elegance, and of objects ministering only to the delight of the eye or ear. In all apparel and other surroundings, simplicity will be the first consideration. The official class is called upon to respond to these intentions, and thus to contribute to a reform of morals and to the predominance of the highest form of order. Officials generally are farther reminded of the exhortations repeatedly addressed to them of late years, urging genuine earnestness of action, which nevertheless have remained unheeded. They are now again besought to rouse themselves into activity, and to aim vigorously at the worthy discharge of their duty.

(3).—A Decree of the two Empresses, conferring the honorary title of Kia Shun 嘉順 on the Empress-consort of his Majesty now deceased, and the honorary title of Tun-I 敦宜 on the chief of his Majesty's subsidiary consorts (lately raised to the rank of Hwang Kwei Fei), in recognition of the devotion they manifested toward their Imperial lord.

(4).—A further Decree of the two Empresses, appealing to the high provincial authorities, who have enjoyed to so great an extent the favours of the State, that, in these present troublous times, they should exert themselves in all loyal devotion to discharge their duty to the uttermost.

(5).—Li Hung-tsao and his colleagues Sü T'ung, Ung T'ung-sheh, and Kwang-show, are relieved by decree, at their own request, of their duties in connexion with the Hung-têh Tien (the late Emperor's study).

(6).— A Decree appointing Chih-kang (one of the two Burlingame "co-Envoys") to the post of Resident at Urga.

(7).—Yih-jung, Military Governor of the province of Kirin, memorializes reporting the complete extirpation of the bands of rebellious gold-hunters who have lately troubled the region of Ninguta and Sansing, between the rivers Usuri and Sungari. Having already heretofore reported the measures taken in quelling the disturbances at Ninguta (memorial not published), he had been instructed by a Decree to despatch the Brigadier-General Shêng-an in person, at the head of a military force, to attack the insurgents in their mountain retreats; and in pursuance of these commands, military measures were forthwith instituted. The Brigadier-General Shêng-an has now reported, in different despatches, the various expeditions he has undertaken, resulting in the capture and execution of numbers of the refractory miners. On the 11th October, having ascertained that upwards of 100 of the gold-hunters were assembled in a valley of the Wu-hri-t'a-pan range, he proceeded to the spot, where his force was met with an attack on the part of the insurgents. The troops replied vigorously, and upwards of 50 of the enemy were slain, the remainder taking to flight. They were pursued, and many of them killed, three prisoners being taken alive, one of whom confessed that he and another of the band, named Wang Loh-wu, had been the ringleaders. The prisoners were forthwith executed on the spot. The troops having resumed their advance without delay, intelligence was brought in by the scouts that 300 or 400 of the gold-hunters were assembled in the T'ai-p'ing and Hwa-p'i valleys, and measures were at once concerted for an attack in separate divisions on these localities. On the troops advancing to the scene of action, they were encountered by 80 or 90 of the insurgents drawn up in array to resist attack, but the fire which was opened upon them inflicted a loss of upwards of 40 of their number, whilst at the same time upwards of 20 were killed or taken and beheaded in another direction. A third division of the troops killed between 30 and 40 more, and on searching the valleys upwards of 100 who had sought safety in hiding were discovered and slaughtered. On the following day upwards of 50 more were killed in an engagement, and after this had taken place another band, 200 to 300 strong, was discovered and attacked. The result of an engagement which lasted for two hours was the slaughter of upwards of 200 of the insurgents, and the remnans of them, having taken to flight, were pursued for 40 or 50 *li*, many being either taken and put to death or drowned in the rivers. The loss to the troops was only one man wounded. The result of the next day's work was the capture of some 40 odd prisoners, from whom it was ascertained that the leader, Wang Loh-wu, had perished in the previous fighting. In consequence of these victories, the entire region has been cleared of the bands by which it was infested. Commenting upon the reports received, the Military Governor refers to the disturbance caused in the region in question by the gold-hunters, whom, in despite of instructions, the local commanders had failed to exert themselves to put down; and he adds that when, on a recent occasion, the town of Ninguta was captured, bands of malefactors immediately issued from the mountains to commit depredations. Although Ninguta was subsequently recovered, and the disturbers of the peace driven back to the mountains, local authorities shewed themselves incapable of following them up to their retreats. This task has now been performed, and, in order to secure the maintenance of order in the country lying eastward of Ninguta and Sansing, a force will be detailed to occupy the region and to maintain regular patrols. A list of officers who have distinguished themselves in the late actions is submitted for the bestowal of rewards.

Jan. 28th, 29th.—(Court Circular). The Grand Secretary Li paid his respects on arrival at Peking.—Ying-han, Governor General of the two Kwang, presented himself for instructions.—Fêng-siu 鳳秀 returned thanks for the title of honour conferred upon (his daughter) the Hwang Kwei Fei (see yesterday's *Gazette*). His Majesty will proceed to-morrow to the Kwan Teh Tien (the temporary resting place in the Imperial Park to which the remains of the late Emperor were conveyed on the 28th inst), to perform a religious ceremony. Let preparations be made at 7 a.m.

(1) A Decree. Let Ch'êng-lin 成林 be transferred to the post of Vice-president of the Board of Works; and let his place as Vice-president of the Colonial office be filled by Téh-ch'un. (N. B. Ch'êng-lin is one of the members of the Yamên of Foreign Affairs, and assistant Captain-General of the Gendarmerie).

(2) A Decree expressing the Imperial regrets on the death of Ming-shan, a Vice-president of the Board of Works and Comptroller of the Household.

(3) The Court of Censorate forwards an appeal presented by Lo Lin-chêng, a licensed salt merchant from the Lin-hai district in Chêhkiang, complaining of robbery, oppression, and denial of justice. The petitioner states that in 1864, in conformity with the official regulations, he purchased for Taels 1,400 a license appointing him monopolist of the salt supply to the two districts of T'en-t'ai and Ning-hai, in which, according to law, an annual issue of 800 *yin* and 1,016 *yin* respectively should be consumed (the *yin* in Chêhkiang contains 335 to 400 catties), although, owing to the neglect with which the operations of contraband dealers had long been allowed to flourish, the area of consumption had for years been abandoned to disorder. The monopolist, having establish his central and branch agencies at different points, has carried on his business for the last ten years on good terms with the salt-producers, and has paid to Government 200,000 strings of cash during that time by way of duty and *likin*. In 1873, however, a plot was organized against him by a certain professional stirrer-up of litigation, in concert with a villanous clerk of the district magistracy, who, with the design of getting the salt business out of his hands, instigated three contraband dealers to lodge a complaint against him, stating that he used false weights and owed them money. On the case being brought to trial, the late Magistrate, named Sun, verified the scales and found them correct, and it was moreover established that salt was paid for as delivered to petitioner, who was not in debt as stated. The complainants were punished for bringing a false charge, and the case was dismissed. In revenge for their defeat, the conspirators organized an attack upon petitioner's establishment, after previous acts of forcible interference with his trade, which, on being complained of to the Prefects of T'ai-chow Fu, had been allowed to remain unnoticed. On the 19th September last, the ringleaders of the plot, having got together a band numbering upwards of a thousand armed men, attacked and plundered the central agency, where they killed nine soldiers belonging to the local regulars and militia, and wounded some 20 or 30 more of their number. On the following day they attacked and plundered the branch agency at Hüan-chu. On complaints being lodged with the Prefect and District Magistrate, no steps whatever were taken to arrest the offenders, and the relatives of the soldiers who were killed were allowed to persecute the petitioner at his dwelling, clamouring for compensation to such an extent that he was compelled to pay them 820 strings of cash as indemnity for the loss of life, beside 2,800 strings as compensation to the men who were wounded, for their medical expenses, &c. Not only did the authorities pay no attention to petitioner's complaints, but they winked at the subsequent forcible seizure of his hongs by a party of braves, headed by an official acting in collusion with the hostile faction. The monopolist and his employés were driven forth empty-handed, entire possession of everything being taken by the invaders. The Prefect of T'ai-chow Fu has done all he could to screen the offender, and instead of taking steps to apprehend the really guilty parties he has sought to stifle the affair by simply applying for permission to execute summarily six prisoners, who, although not concerned in the case, have been purchased as substitutes. When, on petitioner's appeal to the Governor of Chêhkiang, a delegate was sent to investigate matters in concert with the Prefect, in lieu of having the case brought up to the provincial capital for trial, the *wei-yüan*, following the rule of "one mandarin stands by another," simply gave his adhesion to the Prefect's report of the proceedings. Petitioner has consequently no resource but to bring his complaint to Peking.—Referred by rescript for further investigation by the provincial authorities, in the usual manner.

Public Meetings.

MEETING OF TREATY CONSULS.

MINUTES of a Meeting of Consuls held at Shanghai, on the 12th day of February, 1875.

Present:—The Consular representatives of Austro-Hungary, Denmark, Germany, Great Britain, Russia, and the United States.

Letters from the Consuls-General of France and Japan, stating their inability to attend the meeting, were placed before the meeting.

The following correspondence was laid upon the table.

A letter from Mr. Medhurst, reporting his action in regard to the interference of Tepaous, etc., with the Contractors of the Municipal Council, while engaged upon Municipal work, and enclosing the Che-Hsien's proclamation against such interference.

A correspondence between Mr. Seward and the Taotai in regard to Bye-Law XXXIV, and the Slaughter House proposal.

A correspondence between Mr. Medhurst and the Taotai in regard to the interchange of presents at New-Years.

A letter from ten members of the Pilotage service, asking that the number of pilots for the Port be reduced to twenty-five.

A letter from Mr. Medhurst, covering one from Admiral Shadwell, reporting an agreement between Admirals commanding on this station, to discontinue the firing of salutes in the river at Shanghai.

A letter from the Mixed Court Magistrate, transmitting the Petition of the Councillors of a benevolent institution, that they be allowed to collect a contribution of one *cash* for each cup of tea taken in the various tea shops within and without the Settlements.

A correspondence with the Municipal Council in regard to the above communication, in which the Council take an adverse view of the proposal.

A letter from the Taotai, transmitting the petition of the Councillors of the Koo Yok-tang, reporting a case in which lives have been lost by the striking of a native boat against the boom of a man-of-war at night, and by the striking of a boat against a buoy at night, and asking that the commanders of vessels of war, and the owners of buoys, be required to put lights out upon these dangers.

A letter from the Harbour Master, recommending an amendment of the Harbour Regulations, to provide for the danger occurring by reason of the presence of kerosene oil and sulphuric acid upon vessels in harbour, and for fire signals for such vessels.

A letter from the Chehsien and the Mixed Court Magistrate, stating the observances required on account of the death of the Emperor of China.

A letter from the Taotai, conveying his thanks to the Consuls and Commanders of vessels of war, for their recognition of the death of the Emperor, as shown by the half-masting of their flags.

A letter from the Municipal Council, setting forth the inadequacy of the system of punishments at the Mixed Court, and the lack of power in the Court.

The letter of the Pilots was left for discussion with the Harbour Master, at a future meeting.

The Senior Consul was asked to respond to the Magistrate of the Mixed Court in regard to the petition forwarded by him, in the sense of the answer by the Council.

The Senior Consul was also asked to place the Taotai's letter forwarding the Petition of the Koo Yok Tang before the Harbour Master, with a request to be informed whether it is not desirable that vessels of war should swing in their booms at night, and whether they may not be required to do so by a Harbour Regulation, and whether it is usual elsewhere, and practicable here, to secure the lighting of buoys.

The Senior Consul was also asked to write to the Harbour Master in reference to the proposed amendment of the Harbour Regulations, inquiring whether it is desirable to include sulphuric acid in the list of articles the presence of which should be considered a sufficient danger to require the vessel bearing it to anchor below the shipping, and whether it would not be well to specify what is meant by "explosive or inflammable material," and expressing with this exception a general approval of the rules proposed by him.

The questions raised by the Council in regard to punishments at the Mixed Court, and the powers of the Court, were referred to Messrs. Davenport, Haas, and Yates for a report.

The Senior Consul was asked to request the Consuls to send in to him, in sealed envelopes, nominations for the Court of Consuls for the year 1875.

JOSEPH HAAS,
Acting Consul for Austria.

E. MOREL,
Consul for Belgium.

W. KESWICK,
Acting Consul for Denmark.

E. GODEAUX,
Consul-Général for France.

W. H. MEDHURST,
Consul for Great Britain.

W. ANNECKE,
Consul for Germany.

L. VIGNALE,
Consul-General for Italy.

E. SHINAGAWA,
Consul for Japan.

F. E. HEYDEN,
Consul for Netherlands.

A. H. DE CARVALHO,
Consul in charge for Portugal.

J. E. REDING,
Vice-Consul for Russia.

A. DE GARAY,
Consul for Spain.

J. D. THORBURN,
Consul-General for Sweden & Norway.

GEORGE F. SEWARD,
Consul-General for United States.

MINUTES OF COUNCIL MEETING OF 15TH FEBRUARY, 1875.

Present:—Messrs. John G. Purdon (Chairman), A. G. Wood, Geo. J. W. Cowie, F. E. Heyden, W. Kidner, F. W. Lemarchand, Robt. Mackenzie, S. D. Webb, and the Secretary.

The Cash State for the week ending 13th February was laid on the table for inspection.

Appropriations were voted as under:—

Widening west side Szechuen Road, between Hankow and Foochow Road, compensation to Trustees of Mrs. R. R. Westall, for portion measuring 365 square feet, of lot 816, T. D., 809, surrendered to the public, ... Tls. 500

Honan Road Bridge—Yangking-pang Creek, half cost of iron bridge, laid down in Shanghai.....Tls. 1,215.06

Wheelbarrow Fees.—Letter read from French Municipal Council, wishing to know before making up their Budget for the ensuing Municipal year if the Council on North side of the Yang-king-pang were disposed to reconsider their decision as to the division of Wheelbarrow fees.

The Council decided to reply that they must adhere to their existing arrangement, and would shortly address them as to Jinrik-sha Licenses and fees derived therefrom.

Tunsin property.—Agreement for purchase and sale of Tunsin property, duly completed, was laid on the table.

French Municipal Council.—The Secretary was directed to publish the following correspondence which has recently passed with the French Council :—

Shanghaï, le 9 Novembre, 1874.

Monsieur,—Ainsi que j'ai eu l'honneur de vous en informer par ma lettre du 1er Octobre, le pont en fer destiné à remplacer le pont No. 4 est arrivé par l'*Iraouaddy*.

L'Agent Voyer, qui depuis a examiné les dispositions à prendre pour le montage de ce pont, vient d'exprimer l'opinion, qu'en raison du poids qui doit peser sur les culées, celle du côté Nord du Yang-King-Pang ne présente pas les garanties de solidité nécessaire, et doit être reconstruite sur des bases plus fermes, tout aussi bien que celle du côté sud.

L'établissement de ces culées, devant même produire une augmentation sensible dans le prix qui avait été prévu en principe pour le montage, le Conseil me charge de vous remettre ci-inclus un nouveau devis des frais reconnus indispensables, en vous priant de bien voulour me faire connaître le résultat de l'examen dont il aura été l'objet de la part du Municipal Council.

Veuillez agréer, Monsieur, l'assurance de mes sentiments les plus distingués.

Le Secrétaire,

H. Sayn.

Monsieur E. B. Souper,
Secrétaire du Municipal Council.

[*Translation.*]

9th November, 1874.

Sir,—As I had the honor to inform you in my letter of 1st October, the Iron Bridge No. 4 has arrived by the *Iraouaddy*.

The Overseer who has since inspected the site expresses his opinion that the abutment on the North side of the Creek is not strong enough to support the Bridge, and should be reconstructed on a stronger foundation, as also the abutment on the South side.

The making of these abutments will entail a marked increase in the cost which had been estimated at first; the Council direct me therefore to hand you an amended estimate of the expenses which they consider absolutely necessary, and beg to be informed of the decision of your Council.

27th November, 1874.

Bridge No. 4—Yang-king-pang.

Sir,—Your letter of 9th instant, with enclosure has been laid before the Council and carefully considered.

The Council notice with regret that the weight of the Bridge will necessitate the strengthening of the abutment on this side of the creek, and therefore an additional outlay; they would call your attention to the suggestions made by them in their letter of 15th September 1873, and they are of opinion that had these been carried out, particularly with regard to a flooring of corrugated iron plate, there would have been no need to alter the abutment.

In the Bridge ordered by your Council, the roadway is to be on arches of bricks, thus materially increasing the weight beyond what it could have been, had an iron flooring been substituted, or the original intention of a wooden one been adhered to (which were the only two plans this Council had any knowledge of); but in the opinion of the Municipal Engineer even this extra weight, were it properly distributed, the abutment is sufficiently strong to bear.

Under these circumstances the Council believe that you must agree with them that they cannot be fairly called upon to bear an extra expense for which they were not prepared, and which would not have been necessary had their suggestions, or the original plan to which they gave their assent, been carried out.

In this connexion the Council would remark that as the length of the Bridge is considerably more than the distance from the abutment on this side to the line of bunding lately made on your side, they are led to hope that it is the intention of your Council to move back that Bund line. It will be in the recollection of your Board that the question of the Bund line referred to was under discussion in January last year, when it was agreed by the representatives at the meeting of the Consular Body that they should recommend their several Councils to submit the point at issue to two members of the Consular Body. This for some reason has been delayed, and it will afford the Council much satisfaction to learn that the matter will be settled by moving back your line at the time of erecting this Bridge, instead of having to proceed to arbitration.

(Sd.) Edward B. Souper,
Secretary.

H. Sayn, Esq.,
Secretary, French Municipal Council.

19th December, 1874.

Sir,—The Works Committee direct me to hand you plan and estimate received from the Fairbairn Engineering Company, Limited, for an iron bridge to cross the mouth of the Yang-king-pang Creek.

The Fairbairn Engineering Company have been most successful in the construction of Girder Bridges, and take a very high place in their profession at home. A most favourable opinion is entertained of them and of their plan by the professional gentleman who has been attending to the matter in England for the Council, and the Committee are therefore strongly in favor of employing them in this instance.

Of the two plans, the one now enclosed will be about £500 cheaper than that obtained by your Board. It is 40ft. wide, the roadway will be of iron flooring, the sidepaths of timber.

It is calculated to bear a weight of 130-lbs. per square foot. The gross weight of the bridge will be about 65 tons.

New granite abutments will have to be constructed in any case to support either bridge.

The Council estimate then that the cost of the bridge will be :—

Cost—delivered free on board ship at Liverpool	£ 1,160
Shipping Charges.—Liverpool to Shanghai, at 45s. per ton	146
Fee to be paid Engineer in England for inspecting the putting together of the bridge prior to Shipment, 5% on £1,160	58
	£ 1,364
say at 5s. 8d. per tael	Tls. 4,814
Constructions of abutments, say	3,300
Landing charges and erecting in Shanghai	200
	Tls. 8,314

On the bridge designed in Paris, the Engineer reports :—

From the cost in Paris say frs. 35,000	£ 1,368
Must be deducted 1/5 so as to reduce the width to 40 feet, the same as the other design	273
	£ 1,095
The bridge has not an iron floor, and is calculated to bear with safety only 82 lbs. per foot on the roadway, and 41 lbs. on the footpath, and in order to give it the same strength as the bridge by the Fairbairn Engineering Company, and to put an iron flooring, he considers 50 per cent would have to be added, say	547
	£ 1,642
Shipping charges, say	146
Fee to Engineer for inspection prior to shipment 5 per cent on £1642, say	82
	£ 1,870
Say @ 5s. 8d., say	Tls. 6,600
Cost of abutments and putting together in Shanghai &c. say	3,500
	Tls. 10,100

Of the two plans therefore the Council prefer that submitted by the Fairbairn Engineering Company, and will be glad to know if you are of the same mind, the expenses attended upon putting it up being borne equally by the two Municipalities as usual.

(Sd.) Edward B. Souper,
Secretary.

H. Sayn, Esq.,
Secretary, French Municipal Council.

P. S.—The plans enclosed in your letter of 23rd November are returned herewith.

Shanghaï, 23 Janvier, 1875.

Monsieur,—Répondant à votre lettre du 19 Décembre dernier, j'ai l'honneur de vous informer que le Conseil n'approuve pas le plan du pont en fer que la Fairbairn Engineering Company de Londres vous propose d'exécuter pour remplacer le pont No. 1.

Indépendamment de la largeur de 40 pieds qui ne parait pas suffisante pour les besoins du trafic, le Conseil trouve que la hauteur de 29 pouces donnée au tablier et le poids total du pont de 65 tonneaux, ne sont pas nécessaires et peuvent être modifiées de manière à donner plus de hauteur au passage des bateaux et à procurer une économie très sensible dans le prix de revient en donnant moins de poids au pont.

Le système de suspension par des solives massives au dessus du tablier n'a pas rencontré l'approbation du Conseil. Ces solives ainsi placées ont, non seulement l'inconvénient d'augmenter le poids, mais encore celui d'être d'un aspect disgracieux.

Un système de pont que le Conseil trouve en tous points préférable, et qu'il serait d'avis d'adopter, est représenté par un plan que lui a soumis l'Agent-voyer. Dans ce plan, la hauteur du tablier étant réduite à 24 pouces et le poids total du pont à 40 tonneaux, il résulterait de son adoption, les avantages d'une plus grande hauteur pour le passage des bateaux, et d'une diminution dans le prix de revient produite par l'économie de 25 tonneaux de matiére.

Pour vous édifier d'avantage, le Conseil m'a chargé de vous transmettre une copie de ce plan et de vous prier de bien vouloir prendre des renseignements en Angleterre, tant sur la possibilité d'exécution que sur la dépense qu'entrainerait la construction d'un pont de ce genre.

Par la même occasion le Conseil me charge de vous faire remarquer qu'en vous proposant l'adoption du plan qui lui parait le meilleur, l'Administration Française ne devant participer que pour un tiers dans la dépense, ne prétend en aucune façon s'ingérer dans l'éxécution des travaux à effectuer pour le pont No. 1.

Elle s'en tiendra, comme contrôle des intérêts qu'elle représente, à envoyer le plan en question en France, afin de se rendre compte des meilleures conditions d'éxécution.

Je vous retourne d'autre part le plan de la Fairbairn Engineering Company.

Veuillez agréer, Monsieur, l'assurance de ma considération la plus distinguée.

Le Secrétaire,

H. Sayn.

Monsieur E. B. Souper,
Secrétaire du Municipal Council.

[*Translation.*]

Shanghai 23rd January, 1875.

Sir,—In reply to your letter of 19th December last, I have the honor to inform you that the Council do not approve the Fairbairn Engineering Company's plan of an iron bridge which you propose to replace bridge No. 1.

Independently of the width of 40 feet appearing to be insufficient for the requirements of traffic, the Council consider that the height of 29 inches given to the roadway and the total weight of the bridge, 65 tons, are not necessary, and might be modified so as to allow a greater height for the passage of boats and to effect a very considerable reduction in the cost by giving less weight to the bridge.

The plan of suspension by massive girders above the roadway does not meet with the approval of the Council.

These girders in such a position not only add inconveniently to the weight but they would be unsightly.

A style of bridge that the Council consider in all respects preferable and which it would wish to adopt, is represented in a plan which has been submitted to them by the Surveyor.

In this plan the height of the roadway is reduced to 24 inches and the total weight of the bridge to 40 tons.

The advantages resulting from its adoption would be a greater headway for the passage of boats and a saving in the cost by using 25 tons less material.

For your information the Council direct me to forward a copy of this plan, and to beg you to be good enough to obtain opinions in England, as to the feasibility of its execution and the expense which would be entailed in the construction of a bridge of this kind. At the same time the Council direct me to remark that in proposing the adoption of the plan which to them appears the best, the French Administration bearing only one-third of the expense do not claim to interfere in any way with the execution of the work for bridge No. 1.

They will confine themselves, in the interests they represent, to send the plan to France for the purpose of ascertaining the most favorable terms on which it can be manufactured.

I return the plan of the Fairbairn Engineering Company.

Sd. &c., &c.

15th February, 1875.

Bridge No. 1 Yang-king-pang.

SIR,—Your letter of 23rd ult. having been laid before the Board and carefully considered by the Public Works Committee to whom it was referred, I am directed to inform you of the decision arrived at.

They agree with you that a greater width than 40 feet is desirable, and that as great a headway as possible should be allowed. The plan enclosed in your letter under notice has therefore been submitted to the Engineer.

But before proceeding further in the matter, the Council wish it understood that the cost of whatever style of bridge may be ultimately decided upon, shall be borne equally by the two Municipalities.

(Sd.) EDWARD B. SOUPER.
Secretary.

The Secretary,
French Municipal Council.

Shanghaï, le 1er Février, 1875.

MONSIEUR,—Avant de répondre à votre lettre du 27 Novembre 1874 ayant trait au pont No. 4 sur le Yang-king-pang, je suis chargé de vous exprimer les regrets du Conseil pour le délai mis à cette réponse et de vous présenter quelques observations à ce sujet.

Dans le double but d'obvier aux lenteurs résultant de toute discussion par correspondance, et aussi de faciliter l'entente entre les deux Administrations, le Conseil avait proposé à la vôtre de faire régler par une délégation de deux membres de chacun des Conseils, les questions qui auraient amené une divergence d'opinion.

Cette proposition fut acceptée, mais le double but que se proposait le Conseil ne semble pas avoir été atteint, car non seulement votre Administration ne montre aucun empressement à entrer dans la voie de réglement par délégués, mais elle a par une mesure en dehors des usages, rendu impossible à l'avenir la réunion des délégués.

Il est à remarquer à l'appui de la première assertion que c'est toujours le Conseil Français, qui, dans les différents cas qui se sont présentés, a proposé de recourir à la délégation, et que tout dernièrement une réunion des délégués fixée et acceptée officiellement pour le 13 Janvier a été ajournée par suite d'une communication officieuse de votre Président, sans qu'un autre jour de réunion ait été fixée par lui. Il semble donc que le but d'une prompte expédition des affaires n'a par été atteint.

Quant à l'assertion relative à l'impossibilité d'une solution pratique par une discussion à l'amiable des différentes vues des deux Administrations, elle résulte de la publication intempestive d'une plainte d'empiètement, faite par ordre du Municipal Council, sans qu'elle ait été communiquée au préalable au Conseil Français, à qui le Municipal Council avait cependant déjà soumis le fond de la question. Le but de conciliation et de facilité de rapports parait donc aussi avoir été manqué. Aussi comme aucun avantage de temps ou de convenance ne semble devoir être gagné par la réunion de deux délégués de chaque Administration, le Conseil me charge de vous communiquer par écrit ses vues en réponse à votre lettre du 27 Novembre.

Le refus de participer aux dépenses de la construction des nouvelles culées que doivent supporter le pont en fer No. 4 Yang-king-pang, lui parait, en partie, justifié. En effet, afin de doter le public aussi promptement que possible d'un pont à une seule arche, dont l'utilité avait été reconnue, le Conseil, en présence d'une objection faite relativement à la dépense de reconstruction de la culée sud, a pris l'engagement d'en supporter à lui seul la dépense.

Quant à la culée du côté Nord, il est à remarquer que les suggestions que vous soumettiez dans vos lettres 15 Septembre et 3 Décembre 1873, devaient nécessairement augmenter le poids du pont. Le fait est indiscutable, et vous même prévoyiez dans votre lettre du 17 Octobre 1873, une augmentation de prix en raison de l'augmentation du poids. Or, ces *suggestions* ont été transmises au constructeur à Paris avec ordre de s'y conformer autant que *praticable* et autant que cela ne modifierait pas par trop le prix de revient. Elles ont été suivies en partie, et les modifications qui en sont résultées ont augmenté de 6,230 kilos, ou 57 %, le poids de la partie métallique par rapport au poids du plan original. Eussent elles été suivies dans leur entier, le Conseil ne fait pas doute qu'elles auraient entrainé une augmentation de poids de métal qui, quoique moins importante, il est vrai, que celle de la partie métallique et des briques du pont tel qu'il doit être, une fois mis en place, eût été assez considérable, néanmoins, pour nécessiter la reconstruction de culées plus fortes que celles actuellement existantes. Il ne parait donc que juste que le Conseil Français supporte en entier la dépense de construction de la culée sud, et par moitié seulement celle de la culée nord. D'ailleurs, cette dernière avance outre mesure dans le lit du cours d'eau, et, telle qu'elle est actuellement, elle ne peut que géner la navigation.

Une erreur matérielle s'est glissée dans votre lettre. Le pont, tel qu'il a été commandé en France avec approbation de votre Administration, est dans des conditions de longueur qui ne permettent pas de donner à l'arche l'ouverture que vous suggérez par la construction en retraite du quai sud du Yang-king-pang aux abords du pont No. 4.

Le Conseil, au reste, s'explique difficilement le retour à une ancienne difficulté qui, dans l'intérêt du public, avait, d'un accord tacite pour ainsi dire, été laissée de côte. En effet, ce que le public doit vouloir avant tout, c'est un pont solide et la liberté de la navigation. Ce but paraissait devoir être atteint par la commande d'un pont en fer d'une seule arche entrainant par conséquent la suppression de la pile intermédiaire qui se trouve actuellement placée dans l'endroit de la plus grande profondeur de l'eau. De l'ensemble de la correspondence entre les deux Administrations cette pensée ressort d'une manière manifeste, et le Conseil ne peut que regretter profondément d'avoir à rappeler à votre Administration que les intérêts du public ne peuvent que souffrir du retard apporté à la mise en place du pont No. 4.

Le Conseil est peiné de voir que votre Administration actuelle ne tient aucun compte de ce fait que le Municipal Council, loin d'avoir continué sa réclamation par l'envoi du mémoire annoncé par lettre du 15 Janvier 1873, a, au contraire, semblé y renoncer en acceptant la construction d'un pont en fer à une seule arche qui a été proposée par le Conseil comme le moyen la plus pratique de faciliter la circulation dans le canal du Yang-king-pang en supprimant la pile qui est dans le milieu du chenal.

L'attention de votre Administration est attirée sur les avantages que la navigation retirera par la mise en place du pont en fer qui offrira à la circulation par bateaux une arche de 40 pieds anglais d'ouverture, tandis que le pont actuel présente deux ouvertures de 22 pieds seulement chaque.

Quant à ce qui concerne la question d'empiétement, la Municipalité Française est préparée à réprendre l'attitude qu'elle avait assumée précidemment lorsque, pour la première fois, une réclamation avait été soulevée.

Elle espére prouver qu'elle n'a nui à aucun des intérêts qui existent des deux côtés du Yang-king-pang, et si elle ne soulève pas elle-même des questions d'empiétement sur le Yang-king-pang de la part des autorités Municipales du côté nord, c'est qu'elle est certaine qu'elles ont été faites parfaitement de bonne foi et sans nuire en rien aux intérêts du public. Comme dernière remarque à ce sujet votre Administration peut se convaincre que presque tous les ponts sur le Yang-king-pang ont été bâtis par les soins des employés du Municipal Council, et qu'à une ou deux exceptions près, ils présentent une ouverture moins grande que celle qu'offrira le pont en fer.

Quant à ce qui concerne la commande même du pont, le Conseil pense être resté dans l'esprit des conventions intervenues entre les deux Municipalités, et il est convaincu que le pont en fer No. 4, une fois en place, remplira le but qu'on s'est proposé. Il lui semble que le Municipal Council s'en écarte en le rendant responsable de ce qui semble à votre Administration en dehors des prévisions et de ses suggestions, car l'Administration Française n'a jamais entendu et ne peut accepter le rôle d'entrepreneur responsable pour le compte des deux Municipalités au mieux des intérêts des deux associés, et ne peut même conseiller un recours contre le constructeur qui, à son avis, n'a pas donné lieu à des plaintes.

Il est à remarquer que dans le plan et devis qui ont été soumis au Municipal Council, la partie métallique est évaluée a kilos 11,052, devant côuter Francs 13,500. Par suite des suggestions qui ont été suivies en partie ; le poids du métal a été augmenté de kilos 6,230 et la partie métallique portée au poids total de kilos 17,282. Mais, par suite d'une baisse opportune dans le prix de la fonte, le prix de facture de la partie métallique n'a été que de Francs 13,500. Sans cette baisse les suggestions de votre Administration, en tant qu'elles ont été mises en pratique eussent augmenté de beaucoup le prix. Enfin, l'augmentation de poids a forcément entrainé celle du prix de transport.

Il est donc impossible au Conseil de trouver valables les objections relatives au côut du pont rendu à Shanghai, et je vous prie de vouloir bien me faire remettre un chèque pour la moitié de cette dépense s'élevant à Taëls 2,430.12.

Facture Frcs. 16,798.55 à f. 7.125 par Taël.....	Taëls	2,357.69
Intérêts à 6%, sur la dite somme payés au Comptoir d'Escompte du jour de la négociation des traites à Paris jusqu'à celui de l'arrivée du remboursement à Paris, soit 94 jours	,,	36.43
Frais de débarquement $18.00 à 0.75.....	,,	13.50
Prime d'assurance sur Tls. 2,500	,,	22.50
	Taëls	2,430.12

Soit moitié Taëls 1,215.06.

Lorsque le pont aura été mis en place, je vour ferai parvenir le montant des dépenses incombant à votre Administration, qui se détaillent ainsi :

Moitié des dépenses de reconstruction de la culée côté Nord ;

Moitié des dépenses de mise en place et en état de service du pont.

Comme il est dans les intérêts du public que le nouveau pout soit mis en place aussitôt que possible, et attendu que ce pont est conforme aux dimensions proposées dans le plan approuvé par votre Municipalité, le Conseil a donné les ordres nécessaires pour que les travaux de mise en place soient commencés immédiatement apres les fêtes Chinoises, et je vous prie de vouloir bien prendre en note que la circulation par le pont No. 4 Yang-king-pang sera interrompue à partir du 15 Février courant.

Le Conseil pense que le Municipal Council voudra bien faire abandon des matériaux de la pile intermédiaire qui seront employés à la reconstruction des deux culées, et je vous serai obligé de me faire connaitre sa décision à cet égard.

Veuillez agréer, Monsieur, l'expression de mes sentiments les plus distingués.

Le Secrétaire,
H. SAYN.

Monsieur E. B. SOUPER,
Secretaire du Municipal Council.

(Translation)

Shanghai, 1st February, 1875.

Sir,—Before replying to your letter of 27th instant, relating to No. 4 Bridge over the Yang-king-pang, I am directed to convey to you the apologies of this Council for their delay in replying, and to offer you some few observations on this subject.

With the twofold object of obviating the delay generally attending a discussion by letter, as also to promote good feeling between the two Administrations, this Council had proposed to yours to submit all questions in dispute to a Committee formed of two members from each respective Council.

This proposal was accepted, but the double aim which our Council had in view does not appear to have been realized, for not only does your Council show no inclination to carry out this principle as agreed upon, but it has also, by a most unusual act, rendered for the future any meeting of delegates quite impossible.

It may not be out of place here to remark, in support of my first assertion, that it has always been the French Council who have proposed to settle through delegates the different matters in dispute which have presented themselves, and that quite recently a meeting of delegates officially appointed for the 13th January, has been adjourned by an private communication of your Chairman, without his appointing another day for the meeting. It appears therefore, that this means of promptly settling and despatching business of common interest has entirely failed.

With respect also to the foregoing assertion of the impossibility of any future practical good resulting from a friendly interchange of the views of the two Administrations, such is the result of the premature action of your Council, in publishing a complaint of encroachment without having first communicated with the French Council, to whom however your Municipal Council had already submitted the basis of the question. Therefore this wish to conciliate and to facilitate matters appears here also to have failed. Further, as no advantage in time or convenience will to all appearance be gained from the meeting of two delegates of each administration, the Conseil directs me to convey to you in writing its views in reply to your letter of 27th November.

The refusal to share the expense of constructing new abutments for the Iron Bridge No. 4, over the Yang-king-pang, appears to it, partly justified. In fact, in order to provide the public as speedily as possible with a bridge of a single span,—the utility of which had been allowed,—the Conseil,—though having to contend against objections made respecting the cost of reconstructing the southern abutment,—has taken upon itself the burthen of supporting the whole cost.

With respect to the abutment on the north side, it must be noted that the suggestions contained in your letters of 15th Sept. and 3rd Dec. 1873, would necessarily increase the weight of the bridge. This fact is indisputable, and you yourself,—as per your letter of 17th Oct. 1873—anticipated an enhanced price consequent on the increased weight. Thus, these suggestions on your part were forwarded to the builder at Paris with the instruction to adhere to them as closely as was practicable, and so long as the cost price was not too much augmented thereby. They have been partly followed, and the changes have resulted in an additional 6,230 kilos, or 57 per cent in weight, taking the weight of the hardware in proportion to the weight of the original plan. Had your suggestions been followed out in their entirety, the Conseil has no doubt but what they would have caused an increase in weight of metal which, though certainly less than that of the metallic part and of the—supposing the bridge finished and in place—bricks of the bridge, would still be sufficiently important to necessitate the reconstruction of abutments stronger than those actually existing. It is no more than just and reasonable therefore, that the French Council bears the cost of constructing the Southern abutment, and the *half only* of the Northern one. Besides, this latter projects out beyond a reasonble limit into the bed of the water course, and as it at present stands, is only an obstacle to free navigation.

A grave mistake has crept into your aforesaid letter. The bridge, according to the specifications, ordered with the approval of your Administration and forwarded to France, is not sufficiently long to permit of the size of span for the arch which you suggest being carried behind the Quay, on the South side.

Further, this Council can with difficulty understand this bringing forward again by yours of an old subject of contention, which in the public interest had, so to speak, been tacitly allowed to drop. To sum up;—what the public wants, is a substantial structure, and free navigation. This want appeared to be met by the order of an iron bridge of one span consequently rendering unnecessary the intermediate pile which is actually in the very spot where there is the greatest depth of water. The whole weight of the correspondence between the two Administrations shows this point manifestly predominant, and this Conseil cannot but deeply regret to be under the necessity of bringing to the notice of your Administration the fact of the injury which public interests suffer through the delay in putting in place the No. 4 Bridge over the Yang-king-pang.

This Conseil is much pained to observe that your Administration seems to quite ignore the fact that the Municipal Council, far from supporting its claims (?) by the forwarding of memoranda as announced by letter of 15th January 1873, had on the contrary seemed to have quite given it up, judging from its accepting the proposal of the French Conseil to construct a bridge of iron with a single arch, as the best and most practical way of facilitating the navigation of the creek, and of doing away with the pile in the middle of the canal.

The attention of your Administration is particularly directed to the great advantages to free navigation which are afforded by an iron bridge of a single span measuring forty (40) English feet. The present bridge has two spans of 22 feet only each span.

As regards the question of encroachment, the French Municipality is prepared to take up the same standing which it assumed when the question was first opened.—It trusts to be in a position to prove that it has by no means injured any interests which exist on either side of the Yang-king-pang, and that if it has,—on its own part,—hitherto refrained from bringing forward any complaints of encroachment on the Yang-king-pang, made by the Municipal Authorities of the northern side, it is only from the knowledge that they have been made in good faith, and because they have in no wise affected public interests. As a final remark on this subject, Your Administration may convince itself that nearly all the bridges over the Yang-king-pang have been erected by employés of the Municipal Council, and that with only one or two exceptions, their arches are smaller than will be the span of the new iron bridge.

So far as respects the order for the bridge itself, our Conseil considers that it has confined itself to the understanding arrived at between the two Municipalities, and it feels convinced that, once the No. 4 iron bridge is in place, it will fully meet the utmost requirements of the case. It further appears to it that your Municipal Council rather goes beyond its province in wishing to make the Conseil responsible for everything that your Administration may consider not exactly to meet its ideas and suggestions, for most certainly the French Council never consented—nor would think of accepting—the rôle of contractor for the two Municipalities. It has simply acted throughout to the best of its ability for the mutual benefit of the two Administrations, and cannot even recommend any action against the contractor, who, according to the opinion of the Conseil, has given no cause for such proceeding.

It may be noted that, in the plan and specifications submitted to the Municipal Council, the metallic part is put down at 11,052 kilos., to cost Francs 13,500. In order partly to meet the suggestions which were made, the weight of metal has correspondingly increased 6,230 kilos., and the metallic part has been brought up to a total weight of 17,282 kilos. But fortunately owing to a fall in the price of cast-iron, the cost of the Invoice of the metallic part does not exceed Francs 13,500. Had it not been for this opportune fall, the suggestions of your Administration, in so far as they were carried out, would have greatly increased the price. And further, the increase in weight has naturally entailed a greater cost in the transport of it.

It is therefore quite impossible that the French Conseil can admit any of the objections made relative to the cost of the iron bridge laid down in Shanghai, and I therefore must beg that you will be good enough to send me a cheque for the half of this cost,—amounting to..... Tls. 2,430.12

Invoice Fcs. 16,798.55 at fcs. 7.125 per Tael	,,	2,357.69
Interest at 6 % on the said amount paid into the Comptoir d'Escompte, from the day when the drafts at Paris were negociated until the arrival of the funds at Paris—say 94 days.....	,,	36.43
Landing expenses $18—at 75 %	,,	13.50
Insurance fee upon Tls. 2,500	,,	22.50
Taels		2,430.12

Half of which, say Tls. 1,215.06.

So soon as the bridge is put up, I will forward to you a memo. of the expenses due by your Administration, which may be thus detailed:

Half of the cost of reconstructing the abutments on the northern side;

Half of the cost of putting in place and in a state of service the iron bridge.

As it is in the interest of the public that the new bridge should be put in its place so soon as possible, and always understood that the said bridge is in conformity with the specifications set down in the plan approved of by your Municipality, the French Conseil has issued the necessary orders to commence work immediately after the China New-year holidays, and I would beg you to take due note that the traffic over the bridge No. 4, Yang-king-pang will be interrupted from the 15th February.

The French Conseil deems that the Municipal Council is willing to abandon the materials of the intermediate pile, and which could be employed in the reconstruction of the two abutments. I should feel obliged, if you would kindly communicate to me your decision on this subject.

I beg you to accept, Sir, the expression of my most distinguished sentiments.

The Secretary,
(signed) H. Sayn.

E. B. Souper, Esq.,
Secretary Municipal Conucil.

15th February, 1875.

Bridge No. 4 Yang-King-Pang.

Sir,—The Council desiring in common with your Board that as little time as possible should be lost in placing in position the iron bridge recently arrived, confine themselves for the moment to replying to your letter of 1st instant only so far as regards the erection of this bridge—leaving the rest of your despatch for later consideration.

Cost.—They have much pleasure in handing you cheque on the Hongkong and Shanghai Bank for Tls. 1.215.06 (Taels one thousand two hundred and fifteen, cand. six) representing the share of the cost of the bridge (laid down in Shanghai) to be borne by the Ratepayers on this side of the Yang-King-Pang.

The expenses of putting up the bridge will of course be equally divided by the two administrations.

Abutments.—The Board note your intention to bear the expense attending the construction of an abutment on the South side of the creek.

They do not recognize the necessity of altering the position of the abutment on this side, and while thanking you for your offer to share the expense of doing so were it necessary, have decided to strengthen the abutment at their own cost sufficiently to sustain the weight of the bridge at the North end.

The centre pier and materials of the old bridge, the Council wish sold for the benefit of the two Settlements.

Presuming that the foregoing meets the views of your Board, and will not in any way alter the position maintained by this Municipality with regard to the question of the line of Bunding on the South side of the Yang-King-Pang—the Council agree to the traffic over bridge No. 4 being stopped on the 15th, and the work of putting up the new bridge commenced at speedily as practicable.

(Sd.) Edward B. Souper,
Secretary.

H. Sayn,
Secretary French Municipal Council.

16th February, 1875.

A. VOISIN, Esq.,
Chairman French Municipal Council.

SIR,—In reply to the communication from your Council, dated 1st inst., my colleagues request me to say that they note with much regret the views expressed therein with regard to delegates meeting to discuss matters pending between the Municipalities.

They consider that the plan has not had sufficient trial to warrant any opinion as to its usefulness, as only one meeting has taken place, and although that resulted in each side maintaining its own previously entertained ideas it does not follow that future meetings would necessarily have the same result.

With regard to the meeting fixed for 13th January to which allusion is made, it is known to your goodself that on casually meeting one of the appointed delegates from your side, I mentioned that the day fixed was American mail day, and he most readily agreed that it had better be postponed, promising to inform you of the circumstance. Another day was not then fixed, as we did not know what day would be mutually convenient, and my sudden departure for Hongkong prevented one being appointed until my return, before which, however, the communication under reply was received.

I only refer to this point to prevent any wrong impression that might arise from the perusal of that communication by those to whom the facts are not known, as I am aware your Council have no intention of imputing any want of courtesy in the matter.

So far from showing no inclination to carry out the proposed plan, this Council can only repeat that they think it desirable to have submitted to a friendly meeting of two or three members of each Council, questions upon subjects which in their nature are susceptible of alteration or modification from interchange of views upon them, before they are definitely entered into by official correspondence; and in the same spirit which the Council have invariably manifested to do all in their power to maintain amicable relations between the two Municipalities, they hope the plan will not be abandoned at least until further trial proves impracticability.

With regard to the subject of the line of Bund on the South side of the Yang-King-Pang Creek, the Council need only say that having their attention called to the subject by several Ratepayers they referred to the correspondence of former Councils, and found that while the Council have always maintained very firmly their position regarding what they considered an encroachment on the South side of the Creek (how firmly may be seen by reference to letters of this Council to yours of 11th 14th 27th and 31st December 1872) both Municipalities had however agreed to leave the question to arbitration; but that no further steps had been taken after the 15th January 1872, owing no doubt to the late Secretary of the Council being shortly afterwards taken ill and leaving the settlement, and this matter with many others was overlooked for the time; and to this and not to the Council having given up their position, is to be attributed the non-forwarding the memoranda mentioned in their letter of 15th January 1873.

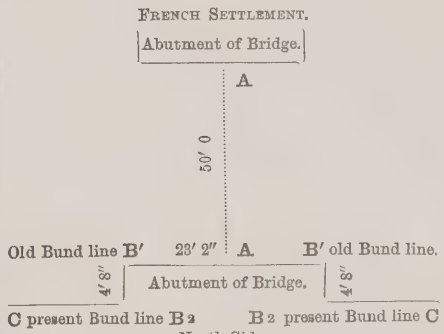
This Council therefore considered it their duty to ascertain your views, as the erection of a new bridge offered a good opportunity for the moving back of the line of Bund; or failing your acceding to that, they would have been pleased to know when it would be agreeable to your side to carry out the arrangement entered into by our predecessors, and which has never been abandoned so far as this Council know.

This Council entirely agree that what the Public wants is free navigation on that creek, and it was for this reason the Council on this side opened the question at all (see Mr. Dent's letter of 11th September 1872), as it is equally the only reason why the present Council have reverted to it.

It will also be seen by reference to correspondence of December 1872, that the idea that removing the centre pier of the bridge would compensate for the encroachment of the line of Bund, was not deemed satisfactory by the Council on this side. The removal of the pier is undoubtedly a desirable improvement, but is altogether independent of the other question.

The Council are much pleased, however, to understand from the letter under reply, that your Council are prepared to have the matter referred to arbitration as before agreed, and will be glad to learn when it will be agreeable to you to have this arrangement carried out on the basis of correspondence in January 1872, when the Council will immediately appoint its arbitrator.

The Council take due note of your remarks regarding the projecting of the abutment of the Honan road bridge on this side. They cannot admit it to be an encroachment. On the contrary, the line of the bund on the North side of the creek formerly went out to the end of the abutment (B' A B'), and in point of fact the space B1 B2 C lying between the present line of bund and the outside of the abutment has been given to the creek by this Municipality.



This will be better understood by a glance at the accompanying sketch, when it will be seen that the true width of the creek is the 50 feet (A to A) from abutment on the south side to the abutment on the north, as it was at the time when the bridge was taken over by the two Municipalities.

With regard to the question of expense and of putting up Bridge No. 4, as well as to the plan of the bridge, the Secretary has been instructed to reply thereto.

In conclusion, my colleagues join me in expressing the hope that, while differences of opinion regarding matters between the two Settlements will doubtless always exist, these differences even when they cannot be settled to the satisfaction of both sides need not in any way interfere with the cordial relation that should exist between the neighbouring Municipalities; and as one means towards this end, the Council consider that perhaps it will be better if in future, as in times past, all communications regarding important matters should be signed by the Chairman of the respective Councils.

(Sd.) J. G. PURDON,
Chairman.

FRENCH SETTLEMENT.

Hongkew Creek Iron Bridge, Broadway.—The question of removing the iron bridge and replacing it by a Malava wood structure was deferred consideration.

Seward Road Extension.—The meeting were informed that further progress was at present delayed, until the new Taotai had taken office.

Bund Line.—The Council understanding that the Harbour Master was at present engaged in drawing up a plan for regulating the width of the River and large Creeks in the neighbourhood of Shanghai, and being a scheme which closely affects the interests of the Settlement, it was decided to write to Mr. Viguier stating that the Council will be glad to afford him any assistance in their power and to communicate with him in the matter.

Pontoons.—A suggestion as to making a wide step on pontoons, was referred to the Public Works' Committee.

Police.—The meeting expressed much satisfaction at the manner in which the approaches to the fire at Messrs. Lane, Crawford & Co.'s Auction Rooms had been kept, and at the discretion and firmness displayed by the constables on the occasion.

The Secretary was instructed to request the Acting Superintendent of Police to make this known to the men under him.

Increase of Crime.—Read letter from the United States Consul-General, stating that he would bring before his colleagues at an early date the following letter from the Council as to the increase of crime in the Settlement and the insufficiency of the punishments awarded by the Mixed Court:—

20th January, 1875.

SIR,—It will probably not have escaped the attention of yourself and colleagues, that the number of misdemeanors and petty crimes by Chinese within the limits of the Municipality has been for a considerable time steadily on the increase, and there is every reason to suppose that unless some more effectual means are taken to check this growing evil, this Settlement will soon lose the reputation it has so long enjoyed of being particularly free from danger to life and property of the residents. The Council, from their position, possess a better knowledge of these facts than perhaps the Consuls, but the Daily Papers serve enough to show the prevalence of disorder in our midst.

The principal object the Council have now in addressing you, is to solicit your assistance in obtaining the consent of the Chinese to the re-introduction of the chain-gang system, which was formerly in operation and worked well.

The punishments now meted out to Chinese offenders, in many instances, are almost bribes to repeat the offences, and have naturally proved totally inadequate to obtain the end desired, the diminishing of crime.

The Council are strongly of opinion that the chain-gang hard-labor system is the one likely to prove the most effective that can be introduced, and that it would speedily show most excellent results. It is not necessary to trespass on the time of your Body by putting forward any facts or arguments in support of this position, as they feel sure the Consuls must agree with them.

In connection with this subject, the Council would enquire whether the Consular Body deem it expedient to address the proper Chinese Authorities on the subject of the Mixed Court. Two means of improving the existing state of things suggest themselves to the Council:—

Either that the Magistrate now presiding at the Court should be endowed with fuller powers, or, what would apparently better meet the ends of justice, that a Magistrate should be appointed by the Council to preside over and judge all cases now submitted to the Mixed Court Magistrate and foreign Cousular Assessor.

(Sd.) JOHN G. PURDON,
Chairman.

GEORGE F. SEWARD, Esq.,
Chairman, Consular Body.

Periodical leave of absence to officers.—Arrangements for periodical leave to officers were submitted and approved, subject to such modification as may appear necessary hereafter.

Municipal Year.—It was determined to move for the change of the year, making it co-temporary with the calendar year.

The Budget would be made up for nine months, and if the Ministers at Peking did not confirm the alteration, which, after all, was one of mere office detail, by 31st December next, it would then be necessary to call a meeting to vote funds for the three months ending 31st March, 1876.

There was only one opinion, that the change was desirable in every way.

HONGKONG FIRE INSURANCE COMPANY.

The sixth ordinary annual meeting of shareholders in the above Company was held on the 15th instant. Hon. J. Whittall presided; and there were also present:—Dr. Adams, Messrs. J. S. Lapraik, Remedios, W. Morgan, H. Smith, McIver, Vaucher, M. E. Murray, Bottomley, Strack, Newton, Nelson, André, Budde, Linstead, Landstein, R. H. Cairns, Mitchell, Maclehose, E. T. Alford, C. P. Chater, H. Nicaise, and Chambers (secretary), &c., &c.

The notice calling the meeting and minutes of last meeting were read.

The CHAIRMAN said as the report and balance sheet had been in the hands of the shareholders for some days, he would, with their permission, take them as read. He thought all he had to say was embodied in them. The business of the Company, he

was glad to say, continued to increase and was satisfactory; and, as far as it was possible to judge, all their securities were good. They had had very few losses, thanks to the management of the fire brigades, especially those of Hongkong and Shanghai. Before asking them to accept the report and balance sheet, he should be glad to answer any questions respecting them.

REPORT.

The general managers, in submitting their annual statement of accounts, have to congratulate the shareholders on the fortunate immunity from serious losses during the past year, and upon the continued satisfactory working of the Company.

The nett profits for the year 1873 amount to $207,000 to be appropriated, according to articles of association, as follows:—

30 per cent. to reserve fund.....	..$62,100
20 per cent. to contributing shareholders.....	 41,400
50 per cent. dividend to shareholders,	103,500
Total, ...	$207,000

thus increasing the reserve fund to $451,774 giving a return of 23/94 per cent. on contributions, and a dividend of $51.75 per share.

The working account 1874 shows a balance at credit of $233,784.87, both premium and interest accounts resulting more favorably than in the previous year.

The general managers and the consulting committee have every reason to consider the investments of the Company's funds as both remunerative and secure. During the past month they have interested the Company in the bonds of the Chinese Imperial Loan to the extent of $60,182.20, the equivalent of £13,000 sterling.

The departures from the Colony of Messrs. Sassoon, Rowett, and G. F. Heard, leaving vacancies on the consulting committee, the vacant seats have been accepted by Messrs. A. F. Heard, J. S. Lapraik, and A. André, and the existing committee, consisting of Messrs. J. J. dos Remedios, H. Nicaise, A. F. Heard, J. S. Lapraik, and A. André, offer themselves for re-election.

Auditors.—Mr. F. W. Mitchell and Mr. Henry Smith, (who holds the position at date, in consequence of Mr. Coxon's absence), offer themselves for re-election.

Dr. Adams proposed that the report and accounts be accepted and passed.

Mr. McIver seconded, and it was carried unanimously.

The Chairman said the remuneration of the committee was last year increased from $500 to $1,000. It would be for the meeting to decide whether the same amount should be paid this time.

Mr. Landstein proposed that the remuneration to the committee continue at $1,000.

Mr. Linstead seconded, and it was agreed to.

The Chairman said the remuneration to the auditors was $150. Would any one move on that?

Dr. Adams proposed that it continue as heretofore.

The motion was seconded and agreed to.

The Chairman said that the vacancies on the consulting committee caused by Messrs. Sassoon and Rowett and the late Mr. G. F. Heard, had been filled by Messrs. A. F. Heard, J. S. Lapraik, and A. Andrè; and the existing committee, consisting of Messrs. J. J. dos Remedios, H. Nicaise. A. F. Heard, J. S. Lapraik and A. Andrè offered themselves for re-election.

Mr. McIver proposed that they be re-elected, which was seconded and carried unanimously.

The Chairman said, with respect to the auditors, that Mr. Coxon's name had been allowed to remain, and Mr. H. Smith had been appointed to fill the vacancy. Mr. Smith and Mr. Mitchell, the other auditor, now offered themselves for re-election.

Mr. W. Morgan said he understood Mr. Mitchell was leaving the Colony in March, and wished to know what would be the use of electing him again as auditor. He asked if it would not be better to elect Mr. Smith to officiate as auditor permanently.

The Chairman said that, if Mr. Mitchell should leave, the committee had the power to elect a successor to him at any time.

Mr. W. Morgan said they should like Mr. Mitchell to remain altogether, but he would now propose that both he and Mr. Smith be re-elected.

Mr. Nicaise seconded, and it was agreed to.

Mr. W. Morgan then said—Before we separate I have a proposition to make, which I trust will meet with your concurrence and hearty support. For a number of years a gentleman has been immediately connected with the business of the Hongkong Fire Insurance Co. Acting at first in a subordinate position under Mr. Jukes, he was on the departure of that gentleman appointed to his place, and from that time to now has so conducted the business of the Company, as to bring it to its present prosperous condition. But not only in the office has Mr. Chambers shown business qualities of a superior kind, but, as foreman of the Hongkong Fire Insurance Co.'s Volunteer Brigade, on many occasions he has materially aided in averting great destruction of property. It is therefore with pleasure that I propose, "That the thanks of the Shareholders of the Hongkong Fire Insurance Co. be offered to Mr. Chambers, for the great ability and zeal displayed by him in the interests of the Company during the time he has been in charge of the business of the office, and further recommend to the Directors that some bonus should be presented to him on the occasion of his relinquishing the post he has so ably filled, the amount to be left to the discretion of the Directors." I beg to mention as a precedent that on the departure of Mr. Jukes a sum of $1,000 was presented to him by the vote of the Shareholders. (Applause.)

Mr. Linstead seconded the proposition.

The Chairman had much pleasure in putting it to the meeting. There was no doubt that Mr. Chambers had done a great deal towards the prosperity of the Company, and he should be glad to support the views advocated by Mr. Morgan if the shareholders should agree with them. (Applause.)

The proposition was carried unanimously.

Mr. Chambers said he was extremely obliged to the gentlemen present for their kind recognition of any services he had rendered.

The meeting then terminated.

—*(Daily Press.)*

HONGKONG AND SHANGHAI BANK REPORT.

The Directors have now to submit to you a general Statement of the affairs of the Corporation, and Balance Sheet for the half-year ending 31st December last.

The net profits for that period, including $7,042.19 brought forward from last account, after paying all charges and deducting interest paid and due, amount to $119,785.42, of which, after taking out Rebate on Bills not yet due, and Remuneration to Directors, there remains a balance of $109,059,44.

The Directors again regret that they cannot recommend the payment of any Dividend to the Shareholders. The general working of the Bank during the half-year has been unsatisfactory, and, notwithstanding the profit derived from the Chinese Imperial Government Loan, the profits are comparatively small.

The losses and amounts written off require $106,000 of the Profits, together with the $275,000 of the Reserve Fund mentioned in last Report, and a further sum of $400,000 from the same account. The Reserve Fund will thus stand at $100,000, and there will be a balance of Profit of $3,359.44 to be carried to the credit of New Account.

The poor result of the half-year's working is attributable to the bad state of trade in the East; business generally has yielded but little profit and that in Exchange has proved no exception. The demand for advances has been small and the interest obtainable on them consequently low, while the interest paid by the Bank on deposits has been heavy. These deposits are now larger than they ever were, notwithstanding that, more than six months ago, the Directors resolved to receive none at a higher rate of interest than 5 per cent. per annum.

The amount now set aside is required as follows:—

For London Accounts.....	$160,000
,, Sterling Bills..	80,000
,, Head Office Accounts.....	180,000
,, Sundry Accounts.....	86,000
	$506,000

The $275,000, referred to in the last Report, has been required, as anticipated by the Chairman at last Meeting, chiefly by the Indo-Chinese Sugar Company's account and transactions connected therewith. The Company's estate now stands in the Bank's books at half the value the Bank's Special Agent has placed upon it. The Directors purpose to realize the property with all despatch, and steps have been already taken to that end.

The amount placed against London losses is required on account of transactions entered into prior to the present half-year. Although these transactions were known to the Directors at the date of the previous Meeting, they had no reason, from the information then in their possession, to look upon them as bad. Subsequent advices, however, shewed that a considerable amount had to be provided for them, which has now been done.

The Directors at the last Meeting had hoped to recoup the Bank a portion of the amount then set aside for London losses from Mr. Vacher, the London Manager at that time, as they believed he was possessed of considerable means, but he is unable to meet his own indebtedness (unwarrantably incurred) to the Bank, and although the Directors have obtained from him an assignment of his available property, they have to provide for a loss on his account. Mr. Vacher is no longer in the Bank's service.

The losses on Sterling Bills are chiefly due to purchases made previous to the half-year, and are now provided for.

The amount placed against "Head Office accounts" is required for writing off considerable amounts from the value, in the Bank's books, of the Sugar Refinery, the Pier Company's property and other items, and for deficiencies on current advances during the half-year, securities of all kinds having depreciated greatly in value.

The sum placed against "Sundry accounts" is required mostly to meet losses on advances made at some of the Branches previous to the half-year.

Referring to their last Report and to the expectations there expressed as to the extent of possible future losses, the Directors greatly regret that their anticipations should have turned out much too sanguine. They cannot, however, close this Report without pointing out, that, although they have been compelled to lay before the Shareholders two successive unfavourable statements of accounts, the general business and position of the Bank continue sound.

The Directors, under authority of Article 144 of the Deed of Settlement, have now resolved to take immediate steps to appoint a Local Committee in London to supervise the transactions of that Branch.

Mr. David McLean has been appointed to make a special tour of inspection of the Bank and will be here shortly, but it will be at least two months before he can hand the Directors his Report.

The Balance of the Marine Insurance Account now amounts to $33,981.06,—no losses have been sustained during the half-year.

Mr. Thomas Pyke resigned his seat at the Board, in conformity with the notice he gave at the last General Meeting. Messrs. R. Rowett and S. D. Sassoon also resigned their seats at the Board, on leaving the Colony, and Mr. F. D. Sassoon has been appointed in room of the latter gentleman.

Mr. Adolf André has been appointed Chairman of the Corporation for the year 1875, vice

Mr. Wm. H. Forbes, whose term of Office now expires, and Mr. A. F. Heard has been elected Deputy Chairman.

In conformity with the provisions of the Deed of Settlement, two Members of the Court, Messrs. Adolf André and A. F. Heard, retire from the direction, but they are eligible for re-election and offer themselves accordingly.

Miscellaneous.

JOHN WILKES, M.P., LORD MAYOR OF LONDON.

In view of the contemplated celebration of the hundredth anniversary of his mayoralty (1775), it may be interesting to survey, as briefly as may be, the correspondence and papers of John Wilkes, M.P., Lord Mayor and Chamberlain of the City of London, and author of the celebrated number XLV. of the *North Briton*, which appeared on the 23rd of April, 1763. The papers to which we refer include many letters not before published, and were submitted by the representatives of the late Col. Macaulay, R.E., to the Royal Commission on Historical Manuscripts, whose inspector has contributed a somewhat lengthy account of them in the voluminous Appendix to the Report, which has been recently presented to both Houses of Parliament by command of Her Majesty. Before proceeding to notice this collection in detail, and in order to shew its value, it will be convenient here to quote from the Report itself the remarks of the Commissioners respecting it. They state that they were permitted "to examine a box full of letters, both written by the celebrated John Wilkes and addressed to him. The correspondence between Wilkes and his daughter is extensive, and in the main unpublished. Here are letters by Boswell, some of which have not been printed, and these contain a notice of Dr. Johnson not embodied in Boswell's life and conversations. Many of the letters relating to Wilkes' duel with Mr. Martin, and the proceedings by the Government against Wilkes, were printed in his lifetime; but here are other letters and papers as yet unprinted on the subject of his prosecution and his expulsion from the House of Commons. Numerous letters from foreigners of note have been carefully preserved. The most interesting feature of the collection is a packet containing original letters by Junius to Wilkes, and copies of Wilkes' replies in the handwriting of the latter. All except one were printed by Woodfall; and that one shews the bitter hatred which Junius bore to the King. * * * A short hasty note by Junius, written immediately after a longer one the same day, is in a less studied handwriting than its immediate predecessor, and may be usefully examined in some future attempt to discover the author of the letters."

The present collection contains many of the originals of the letters which Wilkes himself published in 1769, and it was evidently made use of for the Correspondence and Memoirs of the life of Wilkes, issued in 5 vols., by John Almon, in 1805. The letters from Wilkes to his daughter between 1774 and 1796, as published in 1804, are not in the Macaulay collection, which, however, comprises numerous other letters which passed between the father and daughter in other years, and shew the great love that each bore to the other. "The refinement," says Mr. Horwood, in reporting upon these papers, "which he ought to have exhibited to all, seems to have been reserved for her alone, and her father's devotion to her was known and appreciated by all his correspondents; for hardly a letter omits mention of Miss Wilkes."

With regard to the Junius packet, the letter not printed by Woodfall, which was received by Wilkes on Nov. 7th, 1771, runs thus, and from the nature of its contents it is not surprising that Woodfall thought it advisable to suppress it:—"Since my note of this morning, I know for certain that the Duke of Cumberland is married to Luttrel's sister. The princess Dr., and the D. of Glr. cannot live, and the odious hypocrite is *in profundis*. Now is your time to torment him with some demonstration from the city. Suppose an address from some proper number of Liverymen to the Mayor for a common hall, to consider of an Address of Congratulation—then have it debated in Common Council; think of something. You see you need not appear yourself." From looking over the letters of Wilkes' various correspondents, Mr. Horwood came to the conclusion that the general character of the writing of the Junius letters was common at that period, and that from the uniform nature of the writing of all the letters, it is probable that Junius employed an amanuensis. The following details respecting the paper on which the letters are written, are interesting, and may some day prove useful:—"The letters of 21st August, 7th September, 18th September and 21st October, are written on paper of a large folio size; the watermark on one half being Britannia with a trident, and a lion rampant within a wooden fence, and the motto "Pro Patria;" and on the other half the letters G. R. under a crown, something like a feather at each side, and the whole enclosed in a circle. Five of the letters are on quarto letter paper, the watermark on two being a shield charged with a bugle, and surmounted with a royal crown, and on the others only the name of the maker, *J. Portal*. The other two letters are on small pieces of paper."

Three days before the letter cited above, H. S. Woodfall writes to Wilkes that he has just received a note from Junius, in which is the following passage:—"I hope Mr. W. will consent to have that silly account of my letter to the Bill of Rights contradicted." In a note, dated *Sunday afternoon*, Woodfall writes to Wilkes that he called to acquaint him that he received a letter from "J." in which he seems to be of opinion "that the cause suffers by its being understood that Junius has declared for the Parliament and rotten boroughs, and that this is an aspersion he ought not to submit." He did also expect "that you would have communicated him Dr. Lee's reply, but that as soon as you think proper."

In this collection also are, "The Controversial letters of John Wilkes, Esq., and the Rev. John Horne" (afterwards known as Horne Tooke), which were published in 1771. In one of these letters Wilkes says, "I glory in having four large volumes* of manuscript letters, many of them written by the first men of the age." Here, we are told, are letters by Lords Temple and Talbot, and Mr. Martin, in the matters of the prosecution of Wilkes, and the quarrels and duels between Wilkes and the two latter. Most, if not all, of these, adds Mr. Horwood, were printed by Wilkes in his lifetime; for he found that making a racket was the best means of raising or repairing his popularity. The volumes have been somewhat mutilated, and many letters are evidently missing from them; the largest also "has suffered much from water, and the Junius letters, which seem to have been once in that volume, are partially damaged." In one document is found a list of the 24 Original Members of the Sublime Society of the Beef Steaks, instituted 6th December, 1735, and their successors, all arranged in 24 columns.

Of two duodecimo volumes, each of 376 pages, originally intended to contain Wilkes' biography, the first has only 7½ pages of writing; these are by Wilkes himself, and comprise an exordium, a brief statement of his parentage and schoolmasters, and his introduction to the Mead family at Aylesbury; he mentions here that Miss Mead, afterwards his wife, was about ten years older than himself. Of the second volume, about 47 leaves are filled. It begins with the year 1764 and ends in the autumn of 1765. The chief part of the contents relates to his adventures with the Signorina Corradini in France and Italy. At Naples, Wilkes saw and understood the liquefaction of the blood of St. Januarius; and at Geneva the laugh of Voltaire banished all regret for the fair Italian. We may here mention that Almon, in his work alluded to before, states that Miss Wilkes destroyed some autobiographical sketches left by her father.

Of a folio volume of 43 leaves, the first 31 are occupied with verbatim reports of the speeches of Counsel and Judgment of the Lord Chief Justice in the case of John Wilkes, when, having in 1763 been arrested and imprisoned as the author of Number XLV. of the *North Briton*, he obtained his discharge on the ground that, as a member of Parliament he was privileged from arrest in a case of that kind.

In a letter, dated Rue St. Nicare, Paris, April 5, 1764, Wilkes writes to Alex. Phillips, complaining of his silence, and saying that he (Wilkes) has not heard the particulars of the proceedings in the House of Lords relative to the poem (? Essay on Woman.) He tells him to address under cover to Monsr. Suard, Auteur et Directeur de la Gazatte de France. (A pencil note opposite is, *Don't copy this letter.*)

On April 10, 1764, Wilkes writes from Paris to Charles Churchill, and suggests that he should make use of his intimacy with Hanbury to get from him the "treasure of letters from Lord Holland, Lord Chesterfield, &c., &c.," and print them in Paris. He mentions one letter of Fox's, worth £10,000. He says that the French Court was outrageous against D'Eon, who had infamously betrayed them, and published the secrets of his negociation. Says that he has begun a long letter to D'Eon on his dedication of the two volumes of the *Finance* to Lord Bute, in which he compares the Scot to the great Sully. Says that the eldest son of *the Fox* is there (Paris), dissipating the ill-got fleeting wealth of the father. Says that Sterne and he often meet.

On Oct. 27, 1768, the Chevalier D'Eon† writes to Wilkes from Brewer Street, Golden Square, and sends him a dozen of smoked Russian tongues. Will come in a few days to eat some with Wilkes; wishes that the tongues had the eloquence of Cicero and the delicacy of Voltaire, in order to worthily celebrate Wilkes' birthday.

1766, May 6, Auchinleck. James Boswell to Wilkes. Alludes to Wilkes' kind behaviour to him at Paris, when he heard of his mother's death. Asks for W.'s address. Begs that when Wilkes writes, he will put *John Wilkes* at the end of his letters, that they may not look like consigned title deeds.—Two months later there is a letter from Edmund Burke, putting aside Wilkes' offer of political assistance, on the plea of his party not having yet decided on their plan of action.

1767, May 25, Paris. Copy (by Wilkes) of letter by John Horne [Tooke] to Wilkes: "According to your permission I leave with you 1 suit of scarlet and gold cloth, 1 suit of white and silver cloth, 1 suit of blue and silver camlet, 1 suit of flowered silk, 1 suit of black silk, and 1 black velvet surtout: If you have any fellow feeling you cannot but be kind to them; since they too, as well as yourself, are outlawed in England; and on the same account—their supe[illegible]orth."

* In this collection.

† There are several other letters f[illegible] in the collection.

—Wilkes adds, Nov. 21, 1767, *Sent to Mr Punchaud's in the Rue St. Sauveur.*

We next come to a very thick folio, in which letters are laid down. Wilkes' book-plate is on the cover, *or* a chevron sable between 3 birds' heads erased. Crest, a cross-bow. Motto, *Arcui meo non confido.* Below it is written the following note, signed A. (*i.e.* Almon), "I find little exceptionable in this vol. Miss Wilkes' letters to her father and some indecent lines should be destroyed, and all the letters of Churchill and Lloyd."

Ignotus, 1762, April 9. Tells how at the conquest of Martinico, when the cannon were being hauled up to the top of Mount Tortenson, the French playing upon them from the batteries, a sailor mounted a 36 pounder while being drawn up, and with a fiddle played the Black Joke;—and how an Indian called Silver Heels (one of the 40 taken from N. America by Monkton) killed twenty-two French officers; at night he brought back twenty-two laced coats, and begged and obtained permission that he might put them all on, by way of military honours.

T. Smollett writes from Chelsea on March 16, 1759, asking Wilkes to use his interest to release Francis Barber (the servant of Dr. Johnson, the Great Cham of Literature), who had been pressed as a sailor.

Voltaire to Wilkes: Sir, I return you many thanks; you set me in flames with your courage, and charm me with your wit. Your most h. ob. s. V.

Under date of Oct. 8 and 16, 1754, we find two letters from David Hume at Edinburgh. In the first he says that Wilkes' curiosity to see his (Hume's) History does him much honor. It will be finished in less than 2 months. Says he could not get a copy for Wilkes' amusement on the road, because Hamilton, the publisher, did not like copies to get out before publication. . . Recommends Blacklocke, a Scotch poet, a poor tradesman's son and born blind, who by his industry had acquired Greek, Latin and French, and had become a good general scholar. He is a very elegant correct poet. He even employs the ideas of light and colour with great propriety. Dodsley intends to reprint his poems.—With a second letter Hume sends a copy of the History; and asks Wilkes' advice as to language: he says, Notwithstanding all the pains I have taken in the study of the English language I am still jealous of my pen.

In another folio volume there are many letters from Wilkes to Churchill, in 1763 and 1764. In one dated Dover, Tuesday, July 26, he says:—"Churchill the Bruiser! Hogarth "avaunt. If you will join in the conspiracy "I would advertise a *Critique on the works of* "*Hogarth*; for it would be a good sub-"stratum for all our unconnected ideas "of taste, humour, &c., and would shew "the nakedness of H." In another from Paris, Wilkes says he may print what he pleases there. Suggests that Churchill should print explanatory notes to the Rosciad. Wishes for Churchill's works in pocket volumes; then the great sale will begin. Wishes for a new edition of the Rosciad and the Ghost, with additional lines sacred to the impostures of the season; and says that Churchill may embalm every fool and block-head as they rise.

In this volume there is a long letter from John Horne (Tooke), dated Montpelier, 1766, Jan. 3. It is strong in his professions of friendship for Wilkes. Says that although a parson, he is not ordained a Hypocrite. True, he has suffered the infectious Hand of a Bishop to be waved over him. Mentions his having passed a week with Sterne at Lyons, and being to meet him again at Sienna in the summer . . . Sheridan [father of the dramatist] is at Blois by order of His Majesty, and with a pension, inventing a method to give a proper pronunciation of the English language to strangers by means of sounds borrowed from their own; and he begins with the French.—Tells a story of an attempt to prove Lord Harborough to have been an idiot. The counsel on each side relied on the same circumstance;—a box could not be opened; Lord Harborough told the servant to do with it as they did with oysters, viz., to put it in the fire and it would gape. Horne says that the Commission of Sheridan appeared to him to be equally equivocal, and should a similar statute be attempted at any time against His Majesty, they who do not know him may be apt to suspect that he employed Sheridan not so much for the sake of foreigners as of his own subjects, and had permitted him to amuse himself abroad to prevent his spoiling our pronunciation at home. There are also several letters from the person afterwards known as Philo-Wilkes, in some of which money is sent or offered. One in 1776 begins, "Eximious Sir," and in another, of which the date is not given, but which seems to have been written between 1772 and 1776, Philo-Wilkes mentions "the excellent invention of steel pens."

The volume further contains letters from Burke, Woodfall, David Garrick, &c., and one from Mr. A. Strahan in 1793, telling Wilkes that he heard Lord Mansfield say at a dinner in March, 1783, that Mr. Wilkes was the pleasantest companion, the politest gentleman, and the best scholar he knew.

The most noticeable letters in a 4to volume seem to be two from Almon (1767), in one of which he urges Wilkes to be quick with his History of England, because the purchasers of Hume's History will naturally have it by way of completing that work, and Hume himself is about a work of the same kind; and in another he offers to pay 500 guineas, when the MS. of the first volume of the history is delivered. John Nesbitt also sends draft of an agreement by a publishing firm to take Wilkes' History of England, proposed to be in three 4to volumes; he decries Almon as an upstart of yesterday. But ten days afterwards Heaton Wilkes writes to his brother that he had settled with Almon. And, adds Mr. Horwood, Almon's letter of 20th July is there, saying he had accepted the first draft for £200, and hoping the one-half of the MS. would be sent over by the 1st of September next.

Besides the forgoing there are numerous letters not "laid down," and of these we need notice but few.

There are about 100 letters from Miss Wilkes (1771-1780) to her father, and 3 or 4 from Henriette Wilkes to the same.

Of ten letters from James Boswell, eight were printed in the 4th vol. of Almon's Life of Wilkes. Edinburgh, 14th February, 1783. —He expected that Wilkes would have sent a peace offering of wit for having *put him in fear* of Dr. Johnson's anger at Mr. Dilly's. But as Dilly tells him that Wilkes says the Chamberlain of London is entitled to hear first from the Laird of Auchinleck, Boswell now *demands* what they in law language call a solatium, not of shining ore, but of brilliant pleasantry.

26th March, 1783. No. 22, Poultry. Boswell says that an invitation to dinner will not do. He is not hungry; he does not want wine but wit. He must have a pleasant apology for *putting him in fear* of Dr. Johnson's displeasure on account of a certain Epithalamium.

Dr. Dodd writes, "Anything you please to send, and the more the better, on politics or any miscellaneous subjects, news, squibs, &c., &c., will be taken due care of if directed under cover for the Editor of the New Morning Post, to Mr. Cox, printer, No. 73, Great Queen Street, Lincoln's Inn Fields.—Pray don't forget the *psalm.*"

From L. Sterne, daughter of Lawrence Sterne, there are four letters to Wilkes and one to J. Hall Stevenson, author of *Crazy Tales.* The first and second to Wilkes are dated from Angoulême, July 22 and Oct. 24, 1[illegible], and the others are dated from Gerrard Street, Soho. Mr. and Miss Sterne earnestly solicit assistance, and that Wilkes and Stevenson should write the Life of Sterne. (Sterne died in 1768, £1100 in debt; his effects were sold for £400. Mrs. Sterne promised to pay his creditors the balance out of her estate of £40 a year!) In urging Stevenson, she says that it will prove that Rugenius was the friend of Yorick. There are thirteen letters and notes from Joseph Warton between 1789 and 1797. In Sept. of the last named year, he alludes to the attack in the *Monthly Review* on his edition of Pope's works, and says that he hears that he has been scourged in the *Pursuits of Literature;* wants to know who is the author of it; thinks the verse portion harsh, crabbed and obscure, and evidently written for the sake of the long pedantic notes.

Among the letters in French there are many (full of French Court Gossip) by the Baron de Castille, Officer in the regiment of French Guards, from Paris or Beaucaire, in 1779, 84, 85, 86. We will conclude this paper with an interesting extract [(which is in Miss Wilkes' handwriting) from one of these, as it tells a story which, we believe, is not very generally known. He says that Wilkes will remember the recognition by the Pretender of his natural daughter, known at Paris as Lady Charlotte, and living at a convent with her mother, called Countess of Alberstrooff. On the 14th August last, Lady Charlotte informed him that the Prince was going to take all necessary measures to naturalise her, and giving her the title of Duchess of Albany, and the King consented that all the *actes* should be registered in Parliament; and they were, in fact, so registered on the 7th of September, as she told him by letter dated 8th of September. She adds that His Majesty has granted to her letters patent enabling her to inherit all goods which the Prince her father has in France, and the right to dispose of them. She left a short time ago for Florence, where her father received her with tenderness; whose whole business seems to be to see her happy and settled according to her rank. Many Italian Princes have offered, and one of the brothers of the King of Sweden. Her father, who wishes to see her on a throne, presses hard for the latter. He is commissioned to write to England. The Duchess has suffered so much in her youth that she would prefer not to marry, if the Court of England would make her an allowance as long as she remained single, and thus every idea of the unfortunate house of Stuart would be extinguished. The pursuit of the King of Sweden on behalf of his brother is a speculation; he hopes to make some advantage by the alliance.

Law Reports.

H. B. M.'s SUPREME COURT.

Shanghai, Feb. 20th.

Before Sir Edmund Hornby, *Chief Judge.*

Procopio da Silva *v.* Lane, Crawford & Co.

Mr. Hannen for the plaintiff.

Defendants were unrepresented by counsel.

The Plaintiff, as official liquidator of the estate of Pedro Loureiro & Co., sued John Wilson, James Alexander Harvie, and Henry Relph, trading under the firm of Lane, Crawford & Co., to recover Tls. 250, money received by them for the use of the plaintiff, being balance of the proceeds of sale of the *Evening Gazette* printing office, and deducted by them as commission, they being the mortgagees of the said printing office. In his petition, the Plaintiff set forth that the defendants applied to have formal possession of the property given to them, and that the same was given under guarantee that any surplus realised by the sale of the property, over and above Tls. 4,500, the amount of mortgage, was to be handed over to the estate; that before possession was given to the defendants, the sale of the said property was a settled affair between the purchaser and the owner, but as formal possession was to be given to the defendants, the purchaser was referred to them with regard to the transfer of the property and the payment of the purchase money; that the defendants, after collecting the proceeds of sale of the said property, amounting to Tls. 5,000 Shanghai sycee, instead of handing over Tls. 500, less amount of an order for Tls. 150, making Tls. 350, the balance above referred to, rendered an account tendering as proceeds only Tls. 100, by crediting themselves with five per cent., or Tls. 250, as commission on sale of the property, which never originated with them; that H.M.F.M.'s Consul on the 19th ult., demanded on behalf of the estate of Loureiro & Co. payment of the Tls. 250, and that no answer to his demand was given. The petitioner therefore, prayed that the defendants might be ordered to pay to plaintiff the sum of Tls. 250 Shanghai sycee together with the costs of this suit.

The Defendants' answer set forth their admission that they were the mortgagees of the estate of Loureiro and Co., but denied the allegation as to their giving a guarantee that any surplus over Tls. 4,500 was to be handed over to the estate; that on the 24th November, 1874, they took possession in the terms of a letter addressed by them to A. H. de Carvalho, Esq., H. M. F. M. Consul

for Portugal, in which they notified their taking possession under powers granted them by a duly registered deed of mortgage, and, "would dispose of the business publicly or privately, whichever may be to the best advantage, holding balance of funds, if any, to your (the Consul's) order, after recouping amount of mortgage and other indebtedness." On the same day, Mr. de Carvalho replied, by letter, "you, as privileged mortgagees of the property, can have the said property formally transferred to you on your giving me a letter guaranteeing that you will sell the said property to the best of the mortgagor's advantage, and that any surplus over and above Tls. 4,500 you will hand into his estate at this Consulate, without prejudice to any other claim you may have against Mr. Loureiro or Loureiro and Co." Defendants further admitted that, as mortgagees of the property, they were endeavouring to find a purchaser when they applied for possession, but they denied that they had concluded a sale until three days afterwards, in support of which denial they produced a letter from the ultimate purchaser, dated on 27th Nov., 1874, withdrawing all previous offers and making a new offer to them for the purchase of the property, which was accepted. Defendants admitted having sold the property for Tls. 5,000, but did not admit the plaintiff's statement that the sale never originated with them. In the final clause of their answer, the defendants said, "The mortgagees, in their capacity as commission agents and auctioneers, effected a sale of the property for the benefit of all concerned, aud in charging commission of 5% did merely what any other commission agents or auctioneers would do, it being the established and customary rate for such business."

Mr. HANNEN, after stating the plaintiff's case, as contained in his petition, said he believed the whole of the facts were undisputed, except as to the guarantee. He should not, however, rely upon the fact whether a guarantee to return the surplus of the proceeds of the sale to the estate had been given or not, but simply rely upon the law of the case. The defendants said that no such guarantee to hand over the surplus had been given.

Mr. WILSON (one of the partners) said they gave no guarantee to hand over the balance. There was a reason which at first caused them to think they could retain the surplus, which was that Mr. Loureiro was indebted to them otherwise to some extent; but after reading over the mortgage-deed, they found they could not do that, and so charged commission in order to recoup themselves.

Mr. HANNEN said the only question for the Court was whether a mortgagee could charge commission. It was a well known principle that a mortgagee, after selling, and recouping the amount of the mortgage, stood in the relation of a trustee.

His LORDSHIP—You do not contend that if they had employed another auctioneer, and charged his fees, they would not have been entitled to do so?

Mr. HANNEN said certainly not; but they did not do that. He quoted Harrison's Dig. Vol. 3, under the head Trustee-Remuneration, to show that Trustees were not entitled to charge any commission for trouble; and in the Supplement, vol. 2, under the same head, in column 3,591, a later case again laid it down that trustees could only be allowed costs out of pocket. He would further refer his Lordship on that point to "Fisher on Mortgage," page 956, under the head of mortgagee's right to costs. He now came to the question of mortgagees, and cited the case of "Thomas *v.* Rumball, 3, *Jurist*," and notes to "Robinson and Pett," leading cases in equity, in which the same principle was laid down that a trustee was only entitled to his costs out of pocket and could not charge commission. Then came "Kirkman *v.* Booth," 11, Bevan's Reports, 273; and, in fact, there followed a whole series of cases to the same effect. Upon those cases, some of which were exactly similar to that before the Court, he submitted the plaintiff was entitled to a judgment.

Mr. WILSON said the defendants simply contended that they took possession and sold the business in their capacity as commission agents, and on rendering their account they charged their usual commission. If they had employed another auctioneer, they would have had to pay his charges. They had had a great deal of trouble in the matter, and looked upon it that they were entitled to their commission as agents in the sale. He had no law cases to cite, but would simply repeat that they considered themselves entitled to their commission.

His LORDSHIP said he thought the cases cited by Mr. Hannen were conclusive. There could be no doubt that mortgagees were not entitled to anything more than the bare expenses out of pocket, and that nothing in the shape of commission accrued.

Mr. WILSON—That is to say, we are to charge all actual expenses out of pocket?

Mr. HANNEN—But that cannot affect this case.

His LORDSHIP—You stand towards the other creditors now in the position of a trustee; and as a trustee you are bound to hand over everything.

Mr. HANNEN—This amount of money will be distributed among the employés, who are nearly all Portuguese, for their wages. It is very hard upon them, and I hope your Lordship will make an order as to the costs of the suit now. You have the power to do so, and it will shorten matters greatly. I venture to say that if Mr. Wilson had made a statement to his lawyer, and taken an opinion, for which he would have had to pay some Tls. 10 or Tls. 15 perhaps, he would not have been put to these costs.

Mr. WILSON—If I am to pay costs, they must come out of the estate. I cannot be expected to pay them out of my own pocket.

His LORDSHIP—In cases which involve a doubt, it is much better to ask legal advice. The amount is Tls. 250, and I will fix the costs at $50. I do not wish Mr. Wilson to think I am fighting the battle of the lawyers, but, in all cases where there is any doubt as to the bearing of the law, it is better to have legal opinion. In the end it saves money.

The Court then rose.

POLICE COURT.

Shanghai, Feb. 17th.

Before R. A. MOWAT, Esq.

R. (Master of *Northampton*) *v.* JOHN WILLIAMS.

Defendant, a man of colour, an able seaman of the British ship *Northampton*, was charged with using abusive language to the chief mate, and with being absent without leave and drunk, on Sunday, the 14th instant. He denied being abusive to the mate, but admitted the other offences, adding that the doctor came to him on Monday and asked him if he could go to his work. He told the doctor he could not, because he was drunk.

The Chief Mate said the defendant was abusive to him on a former occasion, but the next day became aft, said he was sorry, and the affair was overlooked. On Sunday morning last, he went on shore between ten and eleven in the forenoon without leave, and came on board about five o'clock in the afternoon, in a state of intoxication, but was unable to turn to work until noon on Tuesday. On Monday, witness went to the forecastle to see him, with the doctor, who said he was drunk, and it was no use giving him medicine for that. There was no work being done on the Sunday, but it was usual for seamen to ask for leave before going on shore; no one had been refused. Defendant's wages were £4 per month.

His WORSHIP said, on the former occasion, when defendant had been abusive to the mate, he had the good sense to express his regret for it, and it was overlooked. That, however, made the present matter worse, as notwithstanding the leniency shown towards him, he had repeated the offence. He must forfeit £1 from his wages, pay the cost of the summons, and return to his duty.

R. (Master of *Star of Jamaica*) *v.* ADAMS and WESTERBURY.

Continued Refusal of Duty.

Defendants, for the fourth time, were brought up on the above charge. They were put on board by order of the Court on Monday afternoon, and again refused to return to work.

Captain SACK said the ship was ready to go to sea, but he was now disinclined to take defendants, as he thought it would be running too great a risk to put to sea with a mutinous crew.

His WORSHIP said if the captain was not willing to take them, and the men refused to go, it was no use sending them on board. There was no doubt these men had been led away by the other two, who were already in prison, and as it seemed they were anxious to join them there, they would have to do so for twelve weeks. Before a week was over, they would perhaps wish they were on board again.

ADAMS said it was no use going to sea in such a ship.

His WORSHIP—Do not say that. You were in her for nearly ten months without complaint.

The Captain, in reply to questions, said the ship was bound to New York, and from thence home, which he would probably reach in six months, but it depended on the time of his detention in port.

His WORSHIP (to defendants)—Then by the time you come out of prison, your ship will be half way home,—a pleasant look out for you, is it not? But if you want to go to prison, you can go,—it is no use standing there.

The defendants were then handcuffed, and removed.

MIXED COURT.

Shanghai, Feb. 17.

Before the Chinese Magistrate CHEN, and A. DAVENPORT, Esq., British Assessor.

House Robbery.

A Chinese thief, who had been previously convicted, was charged with stealing six articles of wearing apparel from a native house in the Peking road. The case was clear against the accused, and he was sentenced to 100 blows with the bamboo, and to be cangued for a month at the door of the house he had robbed.

Feb. 18th.

Before the Chinese Magistrate CHEN, and Dr. YATES, U. S. Assessor.

Attempted House Robbery.

The Chinese thief who, a few weeks ago, was found inspecting the upper apartments of a foreigner's house in Hongkew, while the family were at dinner, and whose excuse was that he had made a mistake in the house, having been invited next door, was brought to Court on another charge. On this occasion, he had been caught wrenching a lock off a stable door. He had no good defence to-day, and was sentenced to 100 blows with the bamboo, and to be cangued for a fortnight.

Feb. 19th.

Before the Chinese Magistrate CHEN, and A. DAVENPORT, Esq., British Assessor.

Attempted Store Robbery.

The thief who attempted to steal some pieces of cloth and flannel from Messrs. Watson and Co.'s store, was brought up to-day, and the charge being fully proved against him, he was sentenced to 200 blows with the bamboo and a month's cangue.

Feb. 20th.

A Chinese Cutpurse.

A native was charged with stealing $3.50 from a fellow-countryman, by the simple process of cutting away the purse containing the money. Information being given to the police, the thief was captured, and $1.50 found upon him. He was sentenced to 100 blows with the bamboo, and a fortnight's cangue.

Obstructing the Footway.

A jinricksha coolie plying for hire near the Club, was charged with obstructing the footway at the entrance of that building, in the competition with others of the class to obtain a fare. This kind of offence is of nearly every-day occurrence, notwithstanding that frequent complaints are made respecting it; and only the other day an offender was brought up and leniently punished. In the present case, a sentence of one day's imprisonment was awarded.

Feb. 24th.

Raid on Chinese Gamblers.

Four natives were charged with gambling in a house in the Woo-hoo road. It appeared that, from instructions received, a native Sergeant and Constable of the Municipal Police went to the house on Tuesday afternoon, and found quite a number of people there, all of whom were gambling. As soon as the Police were seen, a stampede ensued, but four were captured, one of them being the occupant or "head man" of the house. He was sentenced to 200 blows with the bamboo and three months' cangue; each of the others to 100 blows and one month's cangue.

Petty Theft.

Two natives went on Monday night to a lodging-house in the Woo-hoo road, to sleep. One of them had a small bundle, containing seven pieces of clothing. In the morning he found that his companion and the bundle had disappeared. Information given to the police led to the speedy capture of the thief. He had pawned some of the articles, and was wearing the others. Sentenced to one month's cangue.

Obstructing the Footway.

Two jin-rik-sha coolies were charged with the frequent offence of obstructing the footway on the Bund, near the Club. Sentenced to two days' cangue each. (This is an improvement—the sentence hitherto has been only one day's cangue or imprisonment.)

Stealing Ballast from a Pilot Boat.

Two native boatmen were brought up on a charge of stealing a quantity of copper and iron ballast from a pilot boat, value $200. The evidence of the head lowdah being necessary, the prisoners were remanded until the return of the boat from a cruise down the river.

Stealing an Anchor.

Three Chinese were accused of stealing an anchor, weighing, it is said 200 catties, from a boat-builder's yard on the Soochow Creek. One of the thieves was caught in the act, but the others ran away. The captured one, however, gave information as to the whereabouts of his accomplices, and they were also taken. The punishment awarded was one month's cangue each.

Clippings.

Has it yet to be preached that ships' boats at sea ought to be in perfect readiness for launching, having water and provisions placed in them? A correspondent of the *Times* remarks upon the simple plan of packing bottles of water in each boat, and tins of preserved meat, with a knife or two to open them, ready for use. The value of these stores of cooked food for such purposes has yet to be acknowledged. At least, some kind of food should be packed in the boats, and done under Government inspection.

The last news received from Mr. Avery, our Minister to Peking, was by a letter from him to a friend in this city. His health had greatly improved, and he was about to continue his journey toward Peking. He left Shanghai October 14th, arrived at Tientsin on the 18th, and resumed his journey toward Peking on the 31st. Mr. Avery has had a severe struggle with the Prime Minister of Death, but had at last accounts the advantage in the controversy. We hope he may win over him fully, and be able to hold his own against Prince Kung.—*Alta.*

Still another China line of steamers is proposed to be established, to run between San Francisco and China, in connection with the Union Pacific Railroad. Jay Gould's name is mentioned as the party who entertains the idea of establishing such line, and, of course, upon the credit of the United States, and the indebtedness of the Union Pacific Railroad to the United States. No wonder the idea is looked upon as a novel one. We should say as reported it is an audacious one. However, the scheme may be different from what the telegraph would appear to suggest. Of course, San Francisco and this State would be pleased to see as many steam-lines on this route as could make money by the business. But it may be doubted if this or the other proposed new line could pay its way and profits in a trade whence the English company was but too glad to withdraw because of its unprofitableness.—*Idem.*

Captain Jordan, of the schooner *Tori*, which arrived yesterday from the Ronin Islands, brings news of the suspicious disappearance of Captain Pease, an American subject, part owner and formerly master of the *Tori*, who had been living at the Ronin Islands since he left her. On the 9th October last Pease was missing, and enquiries were made of his wife, a coloured woman. She said he had gone to visit her brother-in-law, who lived two or three miles distant. It was discovered that Pease had not been near the place referred to, and his boat was afterwards found on the beach, smashed up; not by the sea, apparently, but by hand. The next morning, traces of blood were found in Pease's house, in a room which was generally occupied by Captain Jordan, but where the missing man used to write. The wife was again questioned, when she made the excuse that her nose had been bleeding. A coloured man named John Spencer was suspected of having assisted her in making away with Pease, and both were taxed with the crime. They positively denied any knowledge of the affair, and Spencer, on being questioned as to where he passed the night of the 9th inst., thrice made contradictory statements. A meeting was then called by Captain Jordan, who exercises, we believe, the functions of magistrate, and all the residents attended, except the wife of Pease, the man Spencer, and Mrs Pease's brother-in-law; the latter positively refused to attend. The general impression of the meeting seemed to be that Spencer and Mrs. Pease had caused the death of Captain Pease, with the connivance of Mrs. Pease's brother-in-law. Whether or not these suspicions are well founded remains to be proved; but, about three weeks after the occurrence, Spencer and the coloured woman made application to Capt. Jordan, asking to be united in wedlock, but he of course refused to marry them. The affair will be laid before the U. S. Consul-General at this port, who will, no doubt, take measures to discover the truth, and, if foul play be proved, bring the perpetrator to justice.—*Japan Gazette.*

The recent murderous attack on Mr. C. E. Hill, at Shanghai, by a Chinese mob, following on several other outrages lately committed by natives on foreigners in that city, affords another proof that the hostility of the Celestial to foreigners, which was so signally evidenced by the riots of last year, is still only slumbering. Acts of violence would be even yet more frequent in the Settlement were it not that the Chinese local authorities are kept in wholesome dread of the satisfaction which is very properly insisted upon by the foreigners. Assaults of the kind committed on Mr. Hill are happily very rare in Hongkong nowadays. And even when they take place, they are usually committed with the object of plunder, as in the case of Mr. Downs, who was knocked down one evening last May, robbed of his watch, and left insensible on the road. The large and efficient police force maintained in this colony also renders the perpetration of such offences a very hazardous job, and hence Europeans go about freely, without the slightest fear of insult or danger. But in Shanghai there is no such security. Last month several cases of violence and robbery were recorded, some of a most dastardly character, and the criminals escaped, we believe, the punishment they so richly merited. In one instance a lady was struck across the face by some scoundrel without the smallest provocation. It is often difficult, at such times, to identify the perpetrator of the outrage, for he of course beats a speedy retreat, and the Mongolian physiognomy presents fewer and less striking variations than the Caucasian, and it is consequently more difficult to recognise a Chinaman thus hastily seen. It is time, however, some more efficient means of protecting foreign residents in Shanghai were taken, or the Chinese, emboldened by former impunity, will make a trade of plundering unprotected foot passengers. It has become necessary either for foreigners to carry arms or to insist upon the Chinese authorities exercising an effectual restraint upon their people, for it is perfectly clear that Mr. Hill's courage and presence of mind alone saved his life.—*Daily Press.*

COMMERCIAL INTELLIGENCE.

SHANGHAI, FEBRUARY 24TH, 1875.

Arrivals.—The London mails of 8th ultimo yesterday, per P. & O. steamer *Sunda*, and the steamers *Benledi*, *Corea*, and *Pardo*, from London.

Telegrams.—The last received gives quotations the same as those appearing in the previous week's Report.—The export of Plain Cottons from home has been telegraphed as 5,500,000 yards.

Four steamers, the *Shingking*, *Shantung*, *Appin* and *Taku*, are on the berth, and will leave for the North so soon as there is the slightest chance of their being able to enter the Peiho.—Latest advices from Tientsin—dated 8th instant—speak as if the ice were expected to break up about the beginning of next month. Business at date had not been resumed. From Hankow, the accounts of markets are rather better than they have been for a length of time past. A fair amount of business in 9¾, 8¼ and 7-lbs. *Grey Shirtings* is reported, but, as is pretty often the case now-a-days, the natives of Shanghai were aware of the improvement, or knew that it was coming some days ahead of the foreigner. The result—which is not so important as it might have been—will be found below. The *Japanese* dealers have done scarcely anything. The letters by the *Costa Rica*, arrived on 18th instant, were discouraging in tone, and telegrams since received are equally so. The markets—for *Grey Shirtings*, and *Velvets* more especially—are said to be very dull at all the ports.

Grey Shirtings—8¼-lbs.—About 16,000 pieces of Dewhursts' *Eagles*—which were wanted when last mail was under despatch, have been bought for the Hankow districts at Tls. 1.90 *a* 1.92 per piece, for J.A. and P.A. general imports—and holders are now asking higher prices. The enquiry has not been very active, and the improvement which these rates indicate has been due to firmness on the part of sellers. At Hankow the native selling price is said to be Tls. 1.97 per piece, which however includes Municipal rates, and for a credit of three months. Collie's *Dollar* chop has been sold at Tls. 1.95 per piece, and *E-wo green dragon* has been booked at Tls. 1.98 per piece; but in the lower qualities only a trifling business has taken place. At the close there is a little demand for Collie's *Spread Eagle* at Tls. 1.80, and for good *Lie Eagle* at Tls. 1.62 *a* 1.63 per piece. At the *Yuen Fong* auction last week, Mildews of the *Two-man* chop were sold at Tls. 1.51 per piece. In 6 and 7-lbs. there is no change to note. The market continues flat, and buyers can be found only when they see a bargain. Best *heavy Shirtings* are still wanted at Tls. 2.60 for Dewhurst's *Eagles*.

White Shirtings.—Some 56 Reeds at Tls. 1.61 *a* 1.65 per piece have been settled, and that is nearly all that can be said about this article to-day. The purchases for the most part have gone to Japan.

T-Cloths.—Common to ordinary 6, 7 and 8-lbs. have been in good request. Of the lighter weights the market seems to be cleared; while the rates offered for the 8-lb. cloth, viz., Tls. 1.58 *a* 1.60 per piece are a shade too low to bring many on the market. A few ordinary 8-lbs. have changed hands at Tls. 1.60 *a* Tls. 1.62½ per piece. *Mexicans* have seldom or never been asked for.

Drills.—The sale of between 17,000 and 18,000 pieces of Levita and Hudson's Dragon 14-lbs. at Tls. 2.35 per piece is the most notable event of the week, and the next to it in importance is a transaction—1,500 pieces, in Americans *Feiman*, at Tls. 3.40 per piece. These have nearly all been settled to the Northern dealers, whose orders are now about full for the first steamers. To-day, 3,000 pieces of Mendel's 14-lbs. Pillars are reported at Tls. 2.30 per piece.

Jeans.—The foreigners market for these has had a relapse. The enquiry noticed last week has entirely subsided, having been satisfied out of previous heavy speculative settlements not reported at the time of sale. Prices for all but the very best are little more than nominal.

Sheetings.—In the absence of stocks of English, there is no business to report, and buyers still refuse to pay the rate demanded for the American cloth on hand.

Fancy Cottons.—Quietness has prevailed, and transactions have been very trifling. Reported sales embrace 300 pieces 2¼-lb. *Turkey Reds* at Tls. 1.76 per piece; 800 pieces *Dimities* at Tls. 1.50 per piece; 1,800 pieces *Irishes* at Tls. 2.80 *a* 3.02½ per piece; 160 pieces printed *Cashmeres* at Tls. 4.25; 1,000 pieces extra good *Chintzes* at Tls. 1.52 per piece; 500 pieces of *Dyed Brocades* at Tls. 2.65 per piece; 150 pieces *Velvets* at Tls. 0.18¾ per yard, and 2,000 dozens of blue *Handkerchiefs* at Tls 0.52 *a* 0.54 per dozen.

Woollens.—Scarlet *Long Ells* have continued in request at last mail's rates, viz., Tls. 7.30 per piece for C.P.H., but there are none on hand. A small business however has been done in assortments of H. D. B. at Tls. 6.90, and in dark blue of a more ordinary chop at Tls. 6.50 per piece. *Camlets.*—Sales of C. P. H. scarlet at Tls. 14 were effected at the beginning of the week. Since then the rate has fallen to Tls. 13.90 per piece, free of commission. At the close speculators are enquiring for "cheap" goods, or as they describe them, "hurry sell-'m cargo." *Lastings.*—About 1,000 pieces—560 assorted, and 400 pieces black, have been settled at Tls. 10.80 and Tls. 10.20 *a* 10.25 per piece respectively. *Figured Orleans.*—The only transaction I have heard of consists of 600 pieces assorted inferior cloth at Tls. 2.70 per piece. *Spanish Stripes.*—A misprint occurred in last report. The selling rates of C. P. H. and H. H. *Gentian* should have been Tls. 0.60 and 0.64 per yard. In this article scarcely anything has transpired since last mail day, and the price of Scarlet has declined fully 1 cand. per yard without attracting notice. In *Medium Cloths*, business has been confined to 100 pieces No. 2 *Russian Cloths* at Tls. 25.50, and 40 pieces damaged of the same at Tls. 25 per piece.

METALS, &c.—*Nailrod Iron.*—The market continues very quiet, 2,000 bundles "M. M." at Tls. 2.85 per picul being the only sale reported. In best cargo there appears to be nothing doing, and Tls. 3.00 *a* 3.10 per picul, according to assortment, is still quoted. *Lead.*—Small sales of L.B. to natives at Tls. 6.25 per picul are reported, but this price is said to include all charges, delivering, and putting on board cargo-boats or ships. *Tin—Fok Chok* and the lower brands are rather more firmly held, and for the few little lots that have been settled slightly higher rates have been paid. *Copper* and most other Metals have been neglected. *Tin Plates.*—There have been offers of remunerative rates for some floating cargo, but as yet no sale has taken place.

A fair quantity of South Sea Island *Sandalwood* has recently changed hands at Tls. 3.70 per picul for best quality.

QUOTATIONS—DUTY PAID.

COTTON.—The market continues quiet, and quotations remain unaltered. The stocks at the hongs are not heavy, but the receipts are regulated entirely by the demand. Rates are not expected to decline, as the country people will soon be engaged on their fields, and during their agricultural labours the supply of necessity will be limited.

EXCHANGE.—There is more demand for Bank paper, and rates are weaker. 5s. 9d. was the quotation at the beginning of the week, but at the close 5s. 8¾d. *a* 5s. 8⅞d. is the best rate named. There is still but a limited supply of private paper. Closing quotations are 5s. 9¼d. for Credits, and 5s. 9⅜d. for documents. On India, rates close at Rs. 304½ on Bombay and Rs. 306 on Calcutta. On Hongkong, Bank paper can be got at 26⅜ *a* 26½.

EXPORTS.

TEA.—The export to date, as compared with that of last season, is :—

To Great Britain—Black	Excess	6,339,735	lbs.
,, ,, —Green	Excess	1,153,076	,,
To United States—Black	Excess	711,431	,,
,, —Green	Deficiency	3,703,581	,,

Shipments to date have gone forward as under :—

To Great Britain (per Steamer)	51,363,107	lbs.
,, ,, (per Sailing Vessel)	24,152,588	,,
To America (per Steamer)	11,368,711	,,
,, (per Sailing Vessel)	6,201,360	,,

Black.—Three small parcels of Common Teas from Kiukiang have been settled at Tls. 15 *a* 18½, and two have been shipped on owners' account, thus clearing the market.

Settlements and shipments, 465 chests. Stock (against *none* last year), *Nil.*

The following prices have been paid :—

	Exchange, 5/9¼.	Freight, £3.
Common Kiukiang kinds	Tls. 15 *a* 18½ =	0/10½ *a* 1/0½.

Green.—There has been only a small business during the fortnight, buyers seeking for considerable concessions, which holders are at present unwilling to make. A few purchases of Country Teas show a decline of about Tls. 2, but a larger decline is apparently wanted to cause any general demand.

					Against 1874.
Settlements—Fychows, Teenkais and Moyunes	5,060 ½-chests.	Stock,	49,500 ½-chests.		4,517 ½chests.

SILK.—The last public telegrams from London report business confined to a few auction sales ; fair No. 5 Tsatlee is quoted at 12s. 6d. ; Common Tsatlee, 12s. 0d. ; Skeins, 11s. 0d. *a* 11s. 6d. ; 9/12 Moss Taysaams, 11s. 3d., and No. 2 re-reeled Haining at 16s. 0d. Deliveries of China Silk continue fairly satisfactory, being 1,800 bales from the 1st to the 16th of this month. The shipments of silk since my last circular have been 134 bales for London, 211 bales for the Continent, 33 for India and Coast, and 5 for America, in all 383 bales, the smallest fortnight's export seen this season. For the French mail of the 19th inst., about 300 bales found buyers at the following reported prices.

	Per picul.	Per lb.	Per kilo.
Dragon Chop, No. 3 Tsatlee	Tls. 395	19s. 6d.	Frs. 54.60
Donkey ,, ,, ,,	Tls. 395	19s. 6d.	Frs. 54.60
Pang-e-tai "Ting-how" Tsatlee	Tls. 337½	16s. 9d.	Frs. 46.80
,, "Tay-how" ,,	Tls. 317½	15s. 9d.	Frs. 44.10
Blue Elephant	Tls. 335	16s. 7d.	Frs. 46.60
Red Peacock	Tls. 320	15s. 10d.	Frs. 44.45
Common Tsatlee	Tls. 260	12s. 11d.	Frs. 36.28

During the past week only 500 bales have been purchased, at slightly lower rates. No chops or known silks are said to have been bought, the settlements consisting of market and common Tsatlees, Tls. 260 *a* 330, Taysaams, 260 *a* 280, Sewhings, 240 *a* 250, and Yellow silks, 180 *a* 230 per picul. For America 200 bales have been taken at Tls. 320 *a* 370 for re-reeled Tsatlees, and Tls. 320 *a* 390 for re-reeled Hainings, and the market is almost cleared of desirable parcels of this class of silk. Arrivals for the fortnight have been very trifling, and the unsold stock is estimated at 4,300 bales.

Statement of Imports and Deliveries of Cottons and Woollen Piece Goods for the week ending 22nd Feb., 1875, compiled from the "Customs Daily Returns," Nos. 34 @ 39, both numbers inclusive.

* Exclusive of import cargoes ex *Amoy-Cassandra, Kashgar, State of Virginia, Hector, Ava, Benledi, Pardo, Sunda, Corea,* several Coasters, and of sundry re-exports.

COMMERCIAL POSTSCRIPT.

February 25, 1875.

Arrivals.—February 19th, British ship *Black Adder*; 22nd, British barque *Janet*, both from Sydney.

Departures.—February 21st, British barque *Star of Jamaica*, for New York; 23rd, British steamer *Hector*, for London.

The English mail steamer *Kashgar* takes about 250 bales of Silk.

Exchange.—On London, Bank Bills, 6 months' sight, 5s. 8$\frac{3}{4}$d. *a* 5s. 8$\frac{7}{8}$d. First-class Credits to Bank, 5s. 9$\frac{1}{4}$d. First-class to Private buyers, 5s. 9d. Private and Documentary, 5s. 9$\frac{1}{4}$d. *a* 5s. 9$\frac{3}{8}$d. On Paris, Bank, Frs. 7.22$\frac{1}{2}$ *a* 7.25. Private, Frs. 7.30. On India—Bombay Bank, demand, Rs. 305$\frac{1}{2}$. Calcutta Bank, Rs. 307. On Hongkong, Bank Bills, demand, 26$\frac{1}{2}$ per cent. discount. Private, 15 days' sight, 27. Gold Bars, Tls. 173.50. Bar Silver, Sh. Tls. 111.20 Mexican dollars, Sh. Tls. 73.85 per 100. Carolus dollars, Sh. Tls. 80.50 per 100. Copper cash, 1,530 per tael.

Shares.—Messrs. J. P. Bisset & Co. report:—

S. S. N. Co.—We have no business to report. Shares are readily obtainable at Tls. 73 per share.

H. & S. Banking Corporation.—A fair business has been done at 17 % discount cash, and at 18 % discount for April. Shares are on offer for cash, but are enquired for on time.

Marine Insurance Shares.—*China & Japans* are wanted at Tls. 86$\frac{1}{2}$. *Yangtszes* and *Chinese* are also firm at quotations of Tls. 585 and $188 respectively.

Fire Insurance Shares.—*Victorias* are on offer at quotations—cash and time; *Chinas* are wanted for cash, and *Hongkongs* are obtainable at $500 *ex div.*

Hongkew Wharf Co.—Shares have been placed at various rates from Tls. 95 *a* 101 cash; and they are now in demand at Tls. 103.

Land.—Twenty-five *mow* of land, situated in Hongkew, below Dow's godown, and having a frontage to the river, has been sold at auction for Tls. 34 per *mow*.

Weather.—After four days of nearly incessant rain, the temperature became much lower on Saturday, and some smart snow showers fell. These were followed by others early Sunday morning, but towards noon the dark mass of cloud which had overshadowed us so long, began to disperse and blue sky was once more seen, the afternoon being crisp and clear. The moon "fulled" at 8.1 a.m. on Saturday, and the alteration in the weather took place within the prophetic thirty-two hours afterwards. This morning, however, the sky became again overcast, and as we write snow is falling thickly. The thermometer has ranged from 31 to 50. Another deep fall of snow is reported from Ningpo.

BIRTH.

At 6 Pyrland Road, London, N., on the 7th January, 1875, the wife of the Rev. J. HUDSON TAYLOR, of a son.

MARRIAGES.

At Shanghai, on the 26th Feb., 1875, at H.I.G.M.'s Consulate, before W. Annecke, Esq., GUSTAV THEODORE BAFFY, to HELENE MARIA MEYER.

On Thursday, 4th March, at Trinity Church, Shanghai, by the Rev. Canon Butcher, ERNEST WALTER TISDALL to ISABELLA, eldest daughter of the late Thos. Simpson Duff, of London.

THE publication of the *North-China Herald and Supreme Court & Consular Gazette* commenced at 5.00 P.M.

The North-China Herald.

IMPARTIAL, NOT NEUTRAL.

SHANGHAI, THURSDAY, MAR. 4, 1875.

RETROSPECT OF 1874.

Piece Goods, continued. *White Shirtings.*—An increasing trade in this fabric has to be recorded; the year 1874, in its consumptive deliveries overtopping those of any previous period it has been our privilege to review. The Comparative Statistics stand thus:—

	Imports.	*Deliveries.*	*Stocks.*
1874 pieces	573,000	586,000	50,810
1873 ,,	385,000	525,000	64,900
1872 ,,	527,000	560,000	204,600
1871 ,,	540,000	442,000	244,600

Moreover, the business has been fairly steady throughout. The fluctuation in prices has not been great, and a fair ordinary 64-Reed—which, like its congener the 8¼-lbs. in the Grey, comprises by far the greatest portion of the deliveries—when a market existed, has always commanded a reasonable value. Dewhurst's best Eagle—*Taeping*—was never quoted under Tls. 2.15 per piece, against the opening and maximum rate of the year, Tls. 2.25 per piece; and the more ordinary cloths seldom showed a wider difference, excepting when the system of weekly auctions of sound goods was instituted last summer. At that time, and for two or three months subsequently, demand was at a very low ebb, and the forcing of business under the circumstances was followed by its natural consequence. A chop which was worth Tls. 1.93 *a* 1.94 in May, had fallen as low as Tls. 1.80 in August, and this was all the more to be regretted considering the very favorable position of stocks during the greater part of the season. For two months afterwards, enquiry languished, but then the demand came, and under its influence every available parcel was quickly taken up. Prices at once rebounded to their earliest level, and dealers were eager buyers for distant arrival at the advance indicated by the following quotations, taken from our Market Reports from 1st to 31st December, viz.: Tls. 1.90 *a* 2.05 for common chops, and Tls. 2.17½ for Dewhurst's *Taepings*. White Shirtings are closely allied to the unbleached article, and the causes which influence the trade in the one very frequently affect the other. Thus 52 *a* 60-Reeds, like the 6 and 7-lbs. Grey Shirtings, have been very difficult to move in quantity from year's end to year's end, while in conformity with the better business in heavy Grey Shirtings, the finer counts of bleached cloths improved materially as the season advanced, and yielded fair profits to those engaged in their importation.

T-Cloths.—There is one point, and one only, on which favorable comment can be made, and that is the decrease in the stocks that has been gradually taking place since 31st December, 1873. On that date, the Chamber of Commerce Returns showed 1,260,000 pieces of all weights in godown and on board ship in harbour, whereas at the beginning of the present year the stock by similar Returns appeared to be only 487,600 pieces, or say 600,000 pieces, allowance being made for the goods held by those firms who did not furnish statistics. But this diminution was powerless in raising the very low rates current at the opening of last season, and after two or three ineffectual efforts to establish higher quotations, holders, accepting their destiny, sold out as opportunity offered; and many an one seemed thankful for the riddance, although it was like the parting of old friends, and cost him severe pangs to see them go. And were they not old and dear friends, or had they not the right to be styled as such? Yea, verily, for some of them had been quietly reposing in their owners' warehouses for years, and every year they became dearer and more expensive still. But against this decrease in stocks, there has been a serious falling off in the consumption of *T-Cloths* within the past two years, much to the disappointment of the importer as well as to his loss; and no satisfactory conclusion as to its cause has yet been arrived at. We noticed this fact in our Retrospect for 1873; mentioning that general opinion was disposed to ascribe it to the plentiful cotton-yield of the previous autumn, notwithstanding that statistics were rather against the supposition. The depression prevailing in the *T-Cloths* market, however, and the great abundance and cheapness of native cotton and cotton-cloths throughout 1874, give force to the previous belief, and so in the absence of any better reason, we accept the native cotton idea as the true solution of the mystery. In connection with the foregoing, the following comparative statement of the statistics for the past six years may prove of interest to our readers:—

	Imports.	*Deliveries.*	*Stocks.* on 31st Dec.
1874 pieces	1,675,000	2,327,000	487,660*
1873 ,,	1,685,000	2,283,000	1,259,500
1872 ,,	4,650,000	3,597,000	1,782,300
1871 ,,	3,680,000	3,246,000	1,063,600
1870 ,,	2,556,000	2,946,000	570,000
1869 ,,	2,716,000	2,115,000	None [published.

* Calculated to be short about 100,000 pieces, the supposed holdings of those firms who disapproved of the annual collection of the stocks of imports by our Chamber of Commerce, from whose list the above stock column is taken.

The diminution of the stocks, as we have already said, is the only satisfactory point noticeable in the *T-Cloth* position, for business was flat at the opening of the year, and quotations low, and this was pretty well the ruling state of matters until its close. In our earliest Report, 7th January, no mention is made of the article, while in the next, quotations were altogether omitted and the market was thus described: "Trans- "actions are again trifling, and consist "chiefly in the class of Mexican 7-lbs. "obtainable at about Tls. 1.35 per piece. "There is a slight enquiry for fine 7-lbs., "and Tls. 1.60 is the rate named; but "it is somewhat difficult to define the "buyers' meaning of 'very fine,' and "so we can give no particular chop as "the basis for sellers to work upon; "small lots of Dewhurst's M.T. 8-lbs. "have found a market at Tls. 1.70 per "piece;" and again about six weeks later, our weekly Report states, "A sale "of 6-lb. Mexican T-Cloths is such a "rarity now-a-days, as to deserve a "special record." That same trans- action consisted of 1,000 pieces only, and the price realised was Tls. 1.32½ per piece, against a laying-down cost of about a mace higher. In March, although there was a more extensive business going on, and an advance of 3 to 5 c. per piece established in the value of 7-lbs. we were compelled to record the dissatisfaction still prevailing amongst holders who "generally, are "under the impression that before long "they will see a more satisfactory trade "and better prices." By the 1st of April, however, the dealers had "returned "to their old offers of Tls. 1.35 or inside "Tls. 1.40 for ordinary Mexican 7-lbs." Nor could they be induced to operate largely, unless on better conditions, during the remainder of the year; and, on 31st December, and for some weeks previously, we find that class quoted at Tls. 1.30 per piece. We con- clude our T-Cloths' Review with the following quarterly range of prices for the different weights and qualities:—

		1st July	1st April.	3rd July.	7th Oct.	31st Dec.
6-lbs. Common per piece	Tls.	1.01 *a* 1.06	1.04 *a* 1.07	1.05 *a* 1.10	1.09 *a* 1.13	1.05 *a* 1.10
6-lbs. Mexican		1.13 *a* 1.20	1.17 *a* 1.25	1.16 *a* 1.30	1.16 *a* 1.30	1.15 *a* 1.25
7-lbs. Mexican		1.31 *a* 1.37	1.35 *a* 1.55	1.38 *a* 1.57	1.31 *a* 1.55	1.30 *a* 1.55
7-lbs. Common		1.13 *a* 1.20	1.13 *a* 1.18	1.15 *a* 1.25	1.20 *a* 1.25	1.18 *a* 1.22
8-lbs. Common to Good		1.55 *a* 1.70	1.55 *a* 1.70	1.70 *a* 1.88	1.30 *a* 1.80	1.53 *a* 1.70

The improvement in 8-lbs. cloths at Midsummer was owing to an enquiry that set in about the beginning of June, and to the very moderate supply of the article on hand. Towards the middle of that month, heavy sales of hard and floating cargo were registered; but after that time the demand moderated, and when the goods began to arrive freely, prices reacted, reaching their normal level by the middle of November. *Mildew* has had no small share in keeping the lighter weights of T-Cloths at such a low range during 1874. But the Mildew in many instances was more in consequence of prolonged holding than of any primary adulteration in the manufacture, and it occurred mostly in those classes of 7-lb. Mexicans which are more particularly alluded to, and which in former years were crowded upon this market from home, to an extent far heavier than the country could bear. Of course, there have been cases of Mildew in more recent arrivals, but the damage of which we speak, and which we believe to have been partly instru- mental in depressing the market values of the year, was the result of excessive production and the consequent accumu- lation on this side.

Drills.—The opening of the market was exceedingly disappointing to holders. It is true that the year was inaugurated by heavy sales, but the rates paid and accepted were simply ruinous. When the autumn trade of 1873 terminated, quotations of ordinary quality—14 *a* 15-lb. English Drills were Tls. 2.48 *a* 2.58 per piece, and these figures even were somewhat below cost. But the stock was heavy, and supplies from home were constantly pouring in. Hence sellers became frightened, and most of them made haste to realise. Buyers had everything to themselves, and it is not surprising that they managed in a very brief space of time to get prices down to "Tls. 2.30 per piece for fair ordinary 15-lbs., or its equivalent for the lighter weights." Moreover, on the 21st of January last year, we find it written, "A sale of 7,000 pieces "fine 15-lb. English Drills (Dewhurst's) "at Tls. 2.35 distant clearance—has "been the event of the week. Indeed "there has been little else done, although "similar quality has been in constant "demand. Such a decline was rather "unexpected, and holders generally are "not yet prepared to accept it." Never- theless, most of the business of the year was done at or under those quotations, and a 15-lb, of fairly passable quality was auctioned in May at Tls. 2.18 per piece. However, the final results to importers, as the season advanced, were not so deplorable as at the commencement. The cost in Manchester had lessened considerably; the shipments from Europe and America were on a reduced scale, the home trade being scared by the unsatisfactory accounts from this side; and native consumption continued large; our stocks became more manageable. And so the importer of 1874 frequently sold his goods at a profit, not great certainly, but it was cheering to him to have something in his hands with which he could do a little good.

The English manufacture occupies by far the most important position here now, and to a great extent it rules the market. American cloth, by reason of the regulated supply, commands fancy prices so to speak, and the Dutch 13 *a* 14-lbs. rank after the same weights of English. During 1874, however, the imports from Holland also decreased very materially. The accumulations of the latter at the close of 1873, the peculiar and unaccountable absence of demand, and the high cost of produc- tion last year, acted as deterrents to shippers. Besides, to say nothing of the impossibility of selling at reasonable rates as compared with those paid for the English textile, many a holder was for a long time fettered by limits from home; and when sales became practica- ble the unlimited few closed with the earliest offers they received, selling out at from Tls. 2.00 *a* 2.10 per piece in May, up to Tls. 2.20 *a* 2.30 per piece in December. Hankow, which is the chief emporium for Dutch Drills—at least it has proved itself so in bye-gone days—has this season taken off but a small proportion only; whether because of the limits placed on most of them, or whether owing to the *Likin* difficul- ties, we are not in a position to say; but the fact remains, that the usual Hankow Spring enquiry was not experienced last year, and the trade in the article stood still, until the heavy decline indicated by the above figures attracted the atten- tion of the Northern dealers, who entered the market in Autumn, and whose opera- tions gradually established the prices cur- rent when winter set in. Of American Drills, it is only necessary to remark that they suffered in common with the other descriptions, although probably not to so great an extent. The market opened in April at Tls. 3.75 for P.M.C.D. *Dragon* chop, declining to Tls. 3.47½ towards its close. The cheaper makes were mostly wanted, and fair quantities of them changed hands from time to time on the basis of Tls. 3.30 *a* 3.40 per piece.

A falling off in the business of Drills has to be noted, but under this heading we have already trespassed too far, and will now close the subject, leaving the following comparative statement to explain what we had intended to say farther:—

	Imports.	Deliverres.	Stocks.
1874...pieces	561,000	777,000	244,000
1873...	1,315,000	1,056,000	397,000
1872...	1,010,700	971,000	124,700
1871...	710,640	788,000	104,000

Jeans.—The importer of *Jeans* has not gone altogether unrewarded, neither have the natives suffered on that account. Moreover, consumption has outrun the importation, and 1875 com- mences with as low a stock as we have seen for a number of years past. The opening quotations for ordinary to good medium qualities were Tls. 1.75 *a* 1.90 per piece, but the average selling prices of the year were considerably higher than these figures. In fact, excepting on one or two occasions, there was no business done so cheaply. In March, the standard quotation for English 8-lb. Jeans was Tls. 1.86 *a* 2.06, receding in June to the opening rates, recovering themselves shortly afterwards and maintaining an average value of Tls. 1.84 *a* 1.95 per piece throughout the remainder of the year. In *Dutch Jeans* transactions were neither extensive nor important, and seldom did the rates realised cover cost. Quotations were fairly steady throughout, the extreme points being Tls. 2.23 in January, Tls. 2.05 in Spring and early Summer, and Tls. 2.20 in Autumn and Winter. Of American Jeans there were not any importations:—

	Imports.	Deliveries.	Stocks.
1874...pieces	308,000	328,000	253,000
1873... ,,	387,200	365,000	96,700
1872... ,,	396,500	333,000	88,400
1871... ,,	187,000	189,000	39,500

Summary of News.

The P.M. str. *Golden Age*, with American mails of the 15th January, is just signalled.

A mail leaves for Europe to-morrow, by the M. M. str. *Ava*.

The following Reuter's telegrams have been received during the week :—

Mitchell again stands for Tipperary.

Congress has voted the Revenue Bill, which increases the Sugar Duty 25 %. Tea and Coffee are not taxed.

The trial of the Gaekwar is proceeding.

The Official Journal in France declares that Macmahon is resolved to uphold Conservative principles.

The steamer *Hongkong* has struck on a rock and foundered.

We hear that the Chinese Government have contracted a new loan of Tls. 3,000,000, two-thirds of which have been taken up by the Oriental Bank, and one-third by Messrs. Jardine, Matheson & Co. It is secured on certain Customs revenues.—It is said that the money is destined for the army in the north-west.

The Annual Meeting of subscribers to Trinity Church was held on Monday. The accounts, as printed in another column, were passed. It was pointed out, however, that if the sum of Tls. 512 subscribed towards the salary of an assistant Chaplain were deducted, they would be nearly Tls. 400 to the bad. This is due to a falling off in receipts from pew-rents.—Messrs. Krauss and Bell were elected Trustees, and Mr. M. O. FitzGerald Treasurer, for the ensuing year.—Negociations have been going on in England, about engaging an Assistant-Chaplain ; and it is hoped that news will very shortly be received of an arrangement being made.—Power was given to the Trustees to sell certain superfluous benches and bells, and a clock which is not likely to be again useful.—It was pointed out that the lease of the Main Guard to the Gymnasium had expired, and that it was now occupied subject to six months notice. It was resolved to let this arrangement continue.—Some discussion took place as to the advisability of asking the Bishop of North-China to constitute Trinity Church his diocesan Cathedral. It was agreed that this would be a fitting compliment to Bishop Russell, and that the position of Shanghai entitled it to this distinction. The Trustees were accordingly authorised to advise with him on the subject.

The annual meeting of the Shanghai Race Club was held on Friday afternoon, and was numerously attended. The chair was taken by Mr. C. J. King, who briefly stated that the balance of loan and interest due to Mr. Keswick had been paid, and eight shares in the race course purchased on behalf of the Club, which now possessed 17 out of 25 shares.—The accounts, showing a balance in favour of the Club, of Tls. 2,649, were passed as printed, after an enquiry by Mr. Brandt as to what had become of the German Challenge Cup, which had disappeared, and on account which the Club stood indebted to the final winner in the sum of Tls. 350. The Chairman said this matter was the subject of correspondence between the Stewards and Mr. Cordes, who was now at Honkong, and it would be premature to say anything more about it at present.—The next business was the appointment of Clerk of the Course, consequent upon the resignation of Mr. F. King. The Chairman said that the duty would be undertaken by Mr. Barnes Dallas, if elected, and be held in conjunction with his appointment as Secretary to the Race Club. A resolution was passed, electing Mr. Dallas to the vacant post, at a salary for the joint offices of Tls. 720 per annum.—Some correspondence which had passed between the Club and the Recreation Fund Trustees was read, and resolved to be printed for circulation among the members, the decision to be left to an extraordinary meeting. An amendment, declining to entertain the proposition contained in the Trustees' letter, was lost.—The thanks of the Club, with a sum of Tls. 200, were voted to Mr. Dallas, for his services and the time expended by him in attending the late trial in the Supreme Court.—A suggestion that some alteration should be made in the present steeplechase course, was [illegible] consideration of the Stewards : as was also another suggestion with reference to altering the date of holding the annual meeting, from January to a period just after the autumn meeting. The following were elected by ballot as stewards for the ensuing year :—Messrs. C. J. King, F. D. Hitch, Low, Fergusson, McLeod, Bell and Hart.—A letter was read from Mr. P. V. Grant, to the effect that a sum of Tls. 500 had been subscribed among the engineers of Shanghai for a piece of Plate to be run for and won by a China pony from the same stable, two consecutive years. A vote of thanks was passed to Mr. Grant and the subscribers.

The schedule of the first Flower Show to be held in Shanghai, on the 24th and 25th May next, has been published, together with the rules under which exhibitors are to enter their contributions. The number of prizes offered is no less than seventy-four, and the committee must be congratulated or being able to publish so large a number at first starting. The productions, for the excellence of which these prizes are offered, include plants in pots, forty-seven ; cut flowers, eight ; vegetables, fourteen ; and fruits, five. But in addition to those named in the schedule, the committee solicit further contributions in any of the classes named, whether mentioned in the catalogue or not (for which prizes will be given at the discretion of the judges), as well as for flowers mentioned, not being in pots. Appended to the rules, is the important announcement that the Committee will make every arrangement for the security and health of the contributions, but will not be responsible for loss or damage. By Rule 8, contributions may be sent for exhibition only, and not for competition—an excellent arrangement, which is found in the case of all flower shows at home to aid materially in filling the marquee. The Committee consists of Messrs. W. H. Medhurst, W. V. Drummond, T. R. Wheelock and C. E. Endicott; the latter being also hon. secretary, and of whom any further information may be obtained. Given bright sunny weather, and there seems no reason to doubt the success of the first Shanghai Flower, or more strictly, Horticultural, Show.

The unusual occurrence of two alarms of fire on the same morning, happened Sunday ; but, fortunately, neither of them were of a very serious nature. The first was at about the early hour of four a.m., the bells intimating the locality to be Hongkew. It appears that a watchman on duty at Hunt's Wharf noticed a glare of light proceeding from some stables in the rear of the Chinese houses on the side of the Broadway opposite to the Wharf Hotel. He roused Mr. Vail, who at once rang the alarm connecting the wharf with the Hongkew police station. It was afterwards found that a bamboo-built shed used as a stable and trap-house, was on fire. The signal was quickly taken up by the Central and other stations, and the fire-brigade and police were soon in motion ; but Mr. Stripling seeing, from the inflammable nature of the structure, that the fire would probably burn itself out before the engines could arrive from the English and French side, despatched Sergeant Lloyd in his trap to stop them, which he did. The Hongkew engine and Hook and Ladder Company were soon on the spot, and remained at hand in case of emergency, but all source of further danger was prevented by means of [illegible] pulling down the burning remains. Two ponies were destroyed, having been probably suffocated by the smoke before the flames reached them. A carriage was also burnt. The stable belonged to the compradore of the English Sailors' Home.—The second alarm was rang out at a little before nine a.m., and was at first believed to be the prelude to a serious disaster. The engines, &c., were again speedily under way and making for the district indicated, this time in the French Concession. But it was soon found that their services were not required, the fire being only in a chimney at the French Consulate. It was extinguished by the primitive method of pouring water down from the roof. It is rather hard that the entire Settlement should have had its nerves shaken by the piercing clangour of fire-alarm bells—the second time in one morning, too—for nothing more than a blaze in a chimney.

The various men-of-war in harbour and the flag-staffs of the several consulates were gaily dressed on the 25th ulto., in honor of the young Emperor's accession. The Mandarins resumed their most gorgeous official robes—breastplate, beads, fringe, buttons, red umbrellas, &c., &c.—and went to the Hwan Shêw Kung 萬壽宮 temple inside the West Gate, to kotow before the Imperial tablet. The proceedings were guided, as in the case of the mourning ceremonies, by explicit instructions, which add that all ornaments are to be laid aside and the quiet dress of mourning resumed, immediately afterwards.—The *Shênpao*, we observe, came out on vermilion paper in honour of the occasion. The idea seems to have struck the Chinese fancy exactly ; double the usual number of copies having been sold. The paper itself must have cost our contemporary as much as his charge ; but hi[illegible]

enterprise will no doubt have an indirect reward.—The Mandarins opened their seals after the new year's holiday, and resumed business, on Wednesday.

The *débris* of Messrs. Lane, Crawford and Co.'s auction rooms have been sold at auction for Tls. 460.

The Race Course was open for training for the Spring Meeting, on Monday morning.

A general parade of the Volunteer Corps is called for to-morrow afternoon.

The *Shanghai Evening Courier* and the *Evening Gazette* have been incorporated, under the title of *The Shanghai Courier and China Gazette.*

We have several complaints of the mismanagement which failed to give merchants a chance of writing by the P.M. str. *Vasco de Gama.* This str. arrived in Yokohama on Sunday, the 28th Feb., but only on Tuesday night was news of her arrival and of her intended depatch for San Francisco on the 9th March, received in Shanghai; whereas the P.M. str. *Costa Rica* had left for Shanghai the same morning, and a mail for America might have been made up by her if the Yokohama manager of the Co. had given earlier notice. This, too, assuming that the decision to send the *Vasco* was a sudden one; whereas it was probably predetermined, and might have been pre-announced. This, however, is only on a par with the general neglect of public convenience which has been shown lately in the management of the P. M. steamers; they run without regularity, and their movements are announced and changed with suddenness and inconsiderateness. Two several correspondents suggest that a public letter should be written to the President of the Company, complaining of the mis-management and neglect of their interests. It would certainly have some effect.

We regret to learn that Messrs. Siemssen & Co. have received a telegram announcing the total loss of the str. *Hongkong,* near Socotra. The telegram says nothing about the Captain and crew; we may therefore hope that they are safe.

Messrs. Butterfield and Swire have received telegraphic news that the O.S.S. Co.'s str. *Ulysses* is ashore at Jeddah. Her cargo was being transferred to the *Nestor* and *Deucalion.*

The Customs Gazette for the last quarter of 1874 was published Saturday. We have already noticed the Shanghai Return, which was published separately on the 3rd inst. The total revenue collected at the 14 open ports, during the quarter, was Tls. 2,835,163.

Pages 20 and 21 of No. 26 of the Peking Magazine, contain a poem, stating that, among other grievances to which Chinese are subjected in Cuba, their bones are boiled down for purposes of sugar refinery!

We are informed that Mr. Wade has given a donation of Tls. 100 to the Chinese Polytechnic Institution and Reading Room; and that Chên, the Mixed Court Magistrate, has placed at the disposal of Her Majesty's Consul $200 out of the fines levied in the "General Yang" abduction case; one moiety to be handed over to the Polytechnic Institution, and the other to be applied as Mr. Medhurst may see fit, in the relief of distressed British subjects.

We have had an opportunity of inspecting specimens of the new magnetic fire-alarm apparatus, adopted by the Municipal Council for this Settlement. The apparatus is known as "Siemen's Patent Inductors," and has been used in Manchester (which possesses one of the most complete fire-brigade organisations in the world) and also in the principal towns of France, Belgium, etc., for a long period. In construction, arrangement, and working, the system is simplicity itself. There is no complicated machinery, only one wheel and a handle being required, and altogether there are only three moving pieces in each box. These boxes are little more than a foot square, and can be fixed anywhere, the wires being led to them in the ordinary way. The power is obtained by means of a series of magnets and a revolving cylinder known as "Siemen's armiture." The peculiarity is that there is no battery required, and the apparatus not being affected by variations of temperature or other influences, always retains its strength. Mr. J. D. Bishop has fitted up, in a room at his residence at Hongkew, the requisite number of boxes to represent the Central, Louza, and Hongkew Police Stations, together with the fire-station in the French Concession and the outlying district along the Bubbling Well road; but, of course, these could be multiplied to any extent necessary. There are two ordinary clock-bells attached to each inductor, and these are rung by means of a hammer suspended between them, the magnetic current at the same time releasing a painted circular vane, which flies up and so indicates the whereabouts of the fire. No effect is produced by only turning the handle, the circuit not being completed without pressing down a knob, when the bell immediately rings and the alarm is given. For each district, there is a different stroke of the bell, either a long and then two short ones, or a short and then a long one, etc., as might be arranged, to indicate it. The mode, too, of disconnecting the various districts is exceedingly simple. For instance, it would be unnecessary to communicate to the residents in the Bubbling Well road, the news of a fire in Hongkew—they would hear the alarm soon enough by means of the alarm-bell, with signal-lights at night—and, therefore, in order to conserve the magnetic force as much as possible, a little movement disconnects any of the districts at will. The usefulness of the apparatus in the outlying districts is to send an alarm of fire to the various stations, and this anybody can do by merely opening the box and turning a handle. The present telegraph poles will be made available to stretch the wires, and but comparatively little additional expense would be incurred to place inductors and extend the wires to every essential point throughout the Settlement. The simplicity, durability and usefulness of the new system over that now in use, can hardly be over-estimated.

Among the passengers arrived by the *Oregonian* from Yokohama, was His Excellency M. Von Brandt, late German Minister resident in that city, but now *en route* to take up his residence at Peking. Previous to his departure from Yokohama, Mr. Von Brandt was present at an official dinner given in his honour by the Government; and on the following day, he was entertained by the members of the German Club in their hall.

We have letters from Newchwang via Chefoo, to the 27th January. Our correspondent writes:— Business is quiet, owing to the China New Year, which is drawing near. We have had a cold week, the thermometer ranging from 5 to 12 degrees below zero Fahrt. but the wind not being strong, the cold has not been felt much. Small pox has carried off a great number of children.—Imperial troops have been successful against banditti, judging from the disgusting sight of heads in baskets with which we are greeted at the East gate, near the British Settlement.—The Peking mail is just in, with news of the Emperor's death. There will be no work for the barber, for the next month.

We have Tientsin letters to the 15th February. Our correspondent says everything was quiet at Peking.—The last Chinese impression was that the river will not be open till the end of the first week in March.

A meeting of Land Renters in the British Concession at Chinkeang was held on the 4th instant. The report of the Municipal Council for the past year describes various improvements; jetties have been made, trees planted, and a new road is recommended. The income had been Tls. 1,598 and the expenditure Tls. 1,564, leaving a balance of Tls. 34.—Messrs. Starkey, Bean, Duff, Gearing and Williamson were elected a Council for the ensuing year.—Some irritation seems to have been caused by the use of the Municipal sewer to drain land belonging to Father Massa, which is not in the Concession. Sir Edmund Hornby has decided that he was entitled to use the sewer; but the residents claim that his decision is antagonistic to their bye-laws.—The following taxes were agreed on—3 per cent. on rentals, Tls. 150 on pawnshops, and Tls. 10 per lot of land.—The condition of the Bund seems to be giving anxiety, and professional opinion is to be had.—Messrs. Spencer & Wolff's market report of the 1st March says:—Business has now fairly commenced in staple goods, and the market may be considered steady at quotations. So soon as the remainder of the country dealers (now daily expected) arrive, an active trade is looked for.—Grey Shirtings, 1.56 and 1.76; Iron dull; opium, active.

A private letter from Takow, dated the 21st February, and brought by the *Glamis Castle,* says:—"About 300 Chinese soldiers and three or four Mandarins have been killed by savages at the Southern end of Formosa. The savages surprised the camp during the night. A steamer left here the other day for Foochow, with the news. The Authorities will await instructions from that place, before attacking the savages."

Full summaries of Hongkong and Japan news will be found under the usual "Outport" heading.

Editorial Selections.

MANCHURIA.

The extension of cultivation into Manchuria, where large districts still remain to be occupied by the industrious natives of Chihli and Shansi, who form the bulk of immigrants, cannot but eventually be productive of considerable changes both social and political. It seems strange that, for so many centuries, a country so rich in its products and enjoying so fine a climate, should have been permitted to remain almost uninhabited, alongside so ancient a civilisation and so teeming a population as that of China. Taking advantage of a season of supereminent weakness, the rude though hardy tribes who inhabited the valley of Sungari actually succeeded in overcoming the populous empire which lay at their doors; but, as in many a similar case, their success was only the prelude of their own political extinction. The barrier between the two countries once removed, the more populous race flowed over quicker than the other, and the Manchoos as a nation are now almost effaced; those that do remain having to witness the occupation of their soil by the less warlike and robust, but more persevering sons of Han. Pouring as the flood of Chinese immigration is, into the rich soils of Manchuria, the first feeling of the new settler is probably one of relief from the narrow limits within which he has cribbed during his abode in China. The few square feet of garden patch laboriously cultivated, and just yielding enough in ordinary seasons to preserve his half vegetable life, give place to what to him must appear the freedom of an almost boundless prairie. He can, for the first time in his life, raise not only enough to keep body and soul together, but actually a surplus, which if favourably situated he may perhaps contrive to sell. Such is his present position, and in it he might be disposed to see the germs of future prosperity. But though nature has been kind to the country, there are things she has not given. The greater part of Manchuria drains, not south to the gulf of Pechihli, whither its produce might be conveyed by barge in summer or sleigh in winter; but north, towards the inhospitable regions of the Amoor. Consequently, the settler, unless placed at a position of vantage as to communication, is troubled even more than at home by the position of enforced isolation in which he is placed. He has if possible less inducement to grow the more ordinary crops, as they are practically valueless in a country where everyone has enough, and no means exist for sending a surplus to a market for sale. The consequences are easily seen. The peasant in Manchuria, unable to make a profit out of the ordinary products of the soil, grows the only one which will bear the expense of carriage to market, namely opium. Out of this he can get the few cash which he requires to buy salt, a little sugar, and his light summer clothing, while for the rest he has to depend on the soil itself. Now the result of this state of affairs cannot fail, in the course of a few generations, to make itself felt, unless means are taken to counteract it in the beginning. Under such circumstances, population must and will increase to the utmost possible extent, while the isolated nature of the country which has led to that high population, will result in seasons of agricultural failure and famines of the most severe description. Manchuria, when fully populated, will in fact be a second China, with all the evil features of the Chinese system intensified. The remedy for this state of affairs is, of course, good roads of whatever description. Railways would be best, but in their absence roads of some sort. At present the country, rich as it naturally is, is entirely devoid of the most primitive of roads. Tracks made by the laborious passage of mules and carts are the only substitute; and these become in bad weather so impassable, that the open country is adopted in preference. Some effort to improve the means of communication would naturally be adopted by any Government other than the Chinese. The present dynasty, however, seems to have made it a matter of policy to obstruct as far as possible the intercourse of the provinces. Not only are no new roads made, but old ones are allowed to go to ruin, and when once ruined no attempt is made to repair them. In this way China itself is well nigh ruined, and what ought to become a prosperous dependency is started on the same downward track.

EUNUCHS.

If, as Dr. Williams tells us, there are some 5,000 eunuchs connected with the palace, we can easily understand that they form a very strong influence, and may be a very fertile source of trouble if any conflict of interests arise among their masters. An edict in the Peking *Gazette* of the 1st February shows that there has been trouble with them lately; and the guess might not be a very rash one, that they have taken the opportunity of the late complications to assert themselves intolerably. Whether they have simply been running riot during a time of transition, when discipline was naturally relaxed, or whether they have been taking a share in political intrigue, we cannot pretend to guess. One thing only is clear, that they have emphatically offended the Empresses Dowager, and have come to condign grief in consequence. The edict convicts them of having "misbehaved themselves and acted re-"gardlessly of duty, even going so far "in some cases as to assume authority "to which they had no title, and to "engage in intrigues with officials of the "Household for dishonest purposes." Three of the chief eunuchs, including one wearing an official button, are consequently to be stripped of office and banished to the Amoor, there to be given as slaves to the soldiery; while four others are to be severely bastinadoed and set to work as grass-cutters in the Hunting Park. It is quite possible the case may be purely one of indiscipline; the coincidence, only, of the row with the inauguration of a new regime, suggests a political interpretation. Perhaps the most likely case is, that the eunuchs have taken advantage of the late Emperor's youth and inexperience, to curry favour, and gain an influence in palace affairs which the Empresses will not tolerate.

Eunuchs have always been a source of trouble at Peking, though they have always been recognised as a necessity. Chinese annals contain abundant memorials and edicts, deprecating their influence and legislating for their control. A memorial by one Ngew Yang-sieu, during the time of the Song dynasty, paints them with great boldness and truth:—"In all ages, eunuchs who have had power have been looked upon as the pests of a State. They are still more to be feared than women; and that is saying a great deal. They are insinuating, artful, and patient; they know how to give certain proofs of their virtue very dexterously in matters that don't cost them much, that they may court the esteem of the Prince. They make advantage of certain seasonable occasions, which of themselves are of no consequence, to make a shew to their master of their attachment and loyalty, that they may gain his confidence. Do they gain it? They take care to pay themselves for their trouble: They manage the Prince as they please, either by raising up empty phantoms to fright him, or by suggesting delusive hopes to soothe him. The Prince may well have at his court men of capacity, virtue and zeal, but he looks upon them as strangers in comparison of the eunuchs, who are always near his person in the heart of the palace; he places his whole confidence in them, and they well know how to use it, so as to increase their own power: the officers without doors are of no greater value than the eunuchs have a mind to put upon them. Then men of merit either retire or grow cold, and the poor Prince remains alone in the hands of his eunuchs, to whom he has abandoned himself. These wretches frighten him every moment and, rendering themselves necessary, they more and more strengthen their authority, or rather, their tyranny."—A prince may, says the writer, be recovered from the influence of women, and no harm ensue. That is a weakness dangerous to the State, but it may be conquered, it is an evil not without remedy; whereas, "if he abandon himself to his eunuchs, in vain would he retract." Instances are quoted of dynasties that have perished simply through submission to such influence; those of the Han and the Tang for instance. Ministers and people became indignant at the position the eunuchs had arrogated, and created a rebellion in the effort to upset them. "They are," says a memorial of Su-chê, "malignant swellings in a part which has too near a connection with the vitals to be cut off without danger. However, they were cut off and death ensued; or, to speak without a figure, the Sovereign authority was violated by extirpating these favourites against the Prince's will; and all that the conquerors gained was to perish with that State which they hoped to have saved."

Without knowing what has brought about the present collision, we may give the Empresses every credit for energetically repressing a dangerous class. The temperament of Oriental peoples, and the constitution of Oriental Courts, render these singularly liable to intrigue; but the intrigue of relatives and friends is innocent, compared to the baleful influence

which the writers we have quoted, set themselves to deprecate. Socially ostracised, eunuchs have no interest in the welfare of the country. Knowing necessarily all that transpires in the palace, having access to both the Emperor and his zenana, they have singular opportunities for acquiring an influence which they care only to use for their own gain. A Court where such satellites are even tolerated, cannot but be regarded as a semi-barbarbous Court; and by striving to abolish the system, Chinese statesmen would do more to raise their Sovereign in the world's esteem, than by simply asserting a superiority which is ridiculous in face of facts.

BUSINESS.

Although business can scarcely be said to have been resumed as yet since the Chinese New Year, the natives seem to have more sanguine ideas about the probable course of events than at this time last year. At all events the succession at Peking seems to have been quietly acquiesced in. This, however, is a thing with which the ordinary Chinaman troubles himself so little, that some grievance must needs be inflicted to force him to move; and as the present dynasty, with all its errors, has perhaps proved itself superior to the later Emperors of the Ming, the nation is willing to believe that its time is not yet come, and that it may be allowed to regulate its own affairs as to succession in its own way. The simple fact that the New Year in Shanghai opened with a deluge of rain, has been adopted by the natives as a prognostic of good; and as no nation, since, perhaps, the Romans, has been so firm in its belief in auguries, this feeling may possibly go some way towards removing the want of confidence which was, in every trade, the prevailing feeling of the last two years. It is needless to say that foreigners would gladly reciprocate this feeling of confidence, were the prospects in other quarters equally bright. Some such feeling certainly actuated the greater portion of those engaged in trade last year, but was hardly justified by the result. Silk, for instance, to the best informed, seemed to offer a chance but seldom afforded. It appeared evident that a revival from the dreary inactivity of the last three or four years in Europe was about to take place, while at the same time everything looked favourable for exporters in China. As a matter of fact silk has probably paid all round, but it has certainly not yielded a large profit on the total, and has only been profitable to some, while it has lost to others. Low prices were not followed by the expected demand, and the market remains, in the end, nearly as dull and inactive as ever. But although there were sufficient grounds to justify some activity in the silk market, the same could hardly be said of tea. The previous year's teas had been bought at prices which generally proved remunerative, but some fancy on the part of buyers in China seems to have led them to expect that teas in England would advance beyond the average prices of the last four years. It is needless to say they did not, and really there was no reason why they should. There had been no special depression in the market, and supplies were going on as usual, and keeping a pretty fair pace with consumption. And so the result seems to have been that the difference in price between the rates at which they had been bought, as compared with the previous year, nearly balanced the account of profit and loss. In green teas, even the excuse of a possible rise could hardly be urged. They were notoriously sick when the season opened, and forced sales on an inactive market have made them worse month by month. Still, the unfavourable comments upon them in the *Lancet* and other quarters no doubt helped to depress them. Imports again were unprofitable, partly on account of the want of confidence which was the characteristic of Chinese trade during the year; but mainly because shippers in England could not be made to believe that, in the face of large stocks in China and abundant cotton crops, no permanent improvement in price could take place.

Now, all these elements seem likely to affect trade again for the coming year. So it is, perhaps, a good thing that foreigners generally have got rid of a little of the sanguine element which played them such ill pranks last year. It was in some respects a bad thing that Epimetheus should have kept back hope in Pandora's box, for hope has been the steady opponent of everything rational in China for the last fifteen years. Hope seemed some years ago disposed to confine her operations to their legitimate channels, but the opening of the telegraph cable, and Reuters' daily announcements, seem to have set her at her pranks again, and she has been steadily picking the pockets of the China trade. Doubtless tea purchasers will again this year hope that the market will go up, and that hope will give them thence a few taels a pecul. Yet, if they only looked calmly at the matter, they would see some cause for apprehension, especially so far as Shanghai and the river ports are concerned. The competition of the Southern ports is likely to be more dangerous than it has been for many years, while there is every prospect of Hankow finding a nearer rival in Kiukiang, to disturb the market. The home market has accommodated itself to the import of teas by steamers, and so far has eased the trade of one great element of uncertainty, but it does not seem at all disposed to raise its rates in unison with the ideas of purchasers in China. What is true of black tea is true of silk. Hope again seems in the ascendency, but there is some slight difference. With low prices ruling, the market for silk can apparently be largely extended, while high rates at once put a stop to deliveries. A brisk market on low rates does not by any means justify the hope of establishing any permanent rise; it is only by depressing rates that the necessary demand can be excited. The amount produced is increasing year by year, but there is no reason to believe that the cost of production is greater than formerly, and no reason therefore why the price should be higher than formerly. Europe and America have certainly not reached the limit of demand, but there are so many ways of making up for silk at extravagant rates, that practically it has to enter into competion with far inferior fabrics. Unluckily, the enhanced price of silk for the past few years, has led fashions to move on mixtures, and fashions are not to be changed in a day.

REVIEW.

Medical Reports for the Half Year ended 31st March, 1874, by the Surgeons to the Customs at the Treaty Ports.

II.

Dr. Jamieson's report on the Health of Shanghai during the year 1873, contains little of special interest as regards the year under notice. 1873 was, in medical as in other respects, an ordinary year. One case of scarlatina (imported from the Coast) occurred, and this is remarkable, as it has been hitherto considered, on merely negative evidence however, that China enjoyed an exemption from the disease. It is certainly noteworthy that, during the long practice of foreign physicians since China was opened to foreign residence, no case of scarlatina should hitherto have been observed, and that the combined experience of those in charge of the various dispensaries and hospitals for natives should have led to the same conclusion. The negative evidence here was of the strongest nature. Variola, varicella and rubeola, the latter of a malignant type, were known to prevail extensively, yet scarlatina itself was apparently unknown. It does not tend to simplify the matter, that the only two known cases as yet have occurred amongst the foreign community, and were undeniably communicated the one to the other. Arterial disease continued prevalent in Shanghai, among 31 certified deaths no less than 5 being due to aneurism. Dr. Jamieson would not, he tells us, even hazard a guess as to the cause of this extraordinary prevalence in Shanghai of this class of disease.

"That senile decay in its ordinary sense, has nothing to do with the prevalence of aneurism in Shanghai, is clear, but it is equally clear that in a considerable number of foreign residents there exists that degeneration of the tissues which is so often associated with advanced life as to be included among its common phenomena, and to acquire a name from it."

As compared with Hongkong in this respect, Shanghai offers a singular contrast. Amongst nearly 6,000 cases treated in the various Hongkong hospitals within six years, but four cases of aneurism were registered, a number exceeded by the cases of death amongst the ordinary resident population here in one year. There has been no very especial tendency to aneurism during the year, as compared with Dr. Jamieson's previous report, so that the number of cases may be excepted as normal.—Dr. Jamieson complains with good cause of the quality of the water made use of in Shanghai. It is not that good water cannot be had here, for the analyses of the samples sent to England proved that water of unusual purity was obtainable. The Hwangpoo can match, for the quality and wholesomeness of its water, most rivers in the world; but practically this purity is of little moment, as our supplies are regularly drawn from polluted

localities. There is a difference between the main stream of the Hwangpoo and the polluted eddies from which our water coolies delight to draw our supplies, and a still greater difference between even these and the pools of semi-stagnant slush along the banks of the Soochow Creek and the Yang-king-pang, on which the larger part of residents have to depend. Even the Soochow Creek, above the Settlement, when the water is drawn on the ebb, shows a fair amount of purity; but Chinese servants, careless themselves, will not take the trouble of thinking for their employers, and too often the nearest puddle becomes the source of water supply. We do not quite follow Dr. Jamieson into his somewhat sensational remarks about the milk supply of the place. It is doubtless essential, so far as possible, that the cows should be protected from all contaminating influences. At present they merely have, in the majority of cases, to put up with water of very similar quality to their masters. The communication of cattle murrain by water has not, we believe, been suggested. Steps to prevent contagion proved effective in arresting the disease in England. Sun, its connection with a prevalence of dysentery in Shanghai could scarcely have been accidental. No more ready means of communication could be suggested, than from a diseased cow to a diseased infant through the milk of the former.

We are glad to observe Dr. Jamieson's remark on the subject of the proposed quarantine regulations at Shanghai. At the time those regulations were published, we protested against them as being useless and vexatious. Experience in Europe is not in favour of quarantine, and we notice that the feeling against it is daily becoming stronger in the best informed quarters. Quarantine *would* be useful if it *could* be effective. But no method of making it effective has ever yet been introduced. On a small island, like Malta, with the most rigorous means of guarding access, it might possibly be found possible, at an enormous expense, and at serious injury to the industry of the place, to establish an effective quarantine; but no means has yet been devised of making quarantine effective in a continental port, and the case of Shanghai is exceptionally difficult. Take the present epidemic of small-pox in Japan, for instance. We have heard more than one suggestion that ships coming from Japanese ports should be quarantined, during its continuance. But if this would not be straining at a gnat and swallowing a camel, the proverb was never illustrated. The advocates of quarantine must forget that the Chinese inoculate their children, and that there are consequently hundreds of cases of small-pox continually going on in the City and suburbs. Where, again, would be the use of preventing one or two additional cases from coming by sea, when every creek is a possible inlet for infection from the country? Even were quarantine effectually introduced, it would probably result in less care being taken to preserve those sanitary conditions which are the best guardians of the public health. Endemic diseases arising from imperfect drainage and impure air are far more deadly in the long run than epidemics of cholera. The best preservatives against the latter, are fortunately also our best defences against the foe always in our midst. Quarantine, as Dr. Jamieson remarks, is, as tending to inspire false confidence, worse than useless. It has never been adopted to any extent in England, and English physicians are almost unanimous in desiring to introduce in its stead a system of rigid medical inspection. That the latter would be useful, is almost as undeniable as that the former is harmful. Still in Shanghai even it, from the complexity of the means of approach, could scarcely be made effective except to the most infinitesimal extent.

Outports.

NAGASAKI.

There is very little news from Nagasaki. The *Abbotsford*, from London for Yokohama, called in on Friday for a pilot, to take her through the Inland Sea.—A fire occurred in the village of Aba on 10th, and 300 houses were destroyed.—The Japanese are said to contemplate filling in the water lot between the Custom House and Decima, to be used as a Recreation Ground. Fancy the Chinese doing anything so energetic.—The *Rising Sun* has it that the Empresses-Dowager are running the "Infant Imperial Line," in the face of all opposition.

HIOGO.

The Hiogo papers which have reached us contain absolutely nothing in the shape of news; but several numbers are missing, and we infer that they probably contain an account of a fire which seems to have occurred at Osaka on the 7th instant, and by which 1,145 houses, 16 godowns, 12 temples, &c. were burnt down. The following is a copy of a printed handbill which has been published in Kioto, by the Committee of the Exhibition:—

An Exhibition is to be held this year, in the Gosho, Kioto, similiar to that of the last 3 years, and will remain open to the public for 100 days, from the 1st March to the 8th June, inclusive. During this time, foreigners will be permited to visit Kioto and also to exhibit any articles at the Exhibition. Foreigners exhibiting goods at the Exhibition will be allowed to visit Kioto one week before and one week after the above date. All the other rules are the same as for the former Exhibition. Therefore, all foreigners are cordially invited to visit and to exhibit various articles, and so assist this Exhibition. Specimens of the productions throughout the whole of Japan are to be collected this year, and they will be classified according to their districts. It is hoped that all learned persons will advise and give information respecting such articles.

YOKOHAMA.

The *Mail* states that the Committee appointed to choose two successors to Dr. Dalliston, the late Surgeon to the General Hospital, have elected Dr. Eldridge and Dr. Massaís. The latter was formerly medical officer to the French Municipal Council in Shanghai, and has since been employed by the Japanese Government in connection with some of the provincial hospitals.—The hearing of the case of the Hongkong & Shanghai Banking Corporation against E. Wallace was resumed on the 11th, before H.B.M. Consul. His Honor declined to permit the production of further evidence on the plaintiff's side and the case ended with the addresses of the respective Counsel, judgment being reserved.—Mr. Moriyama left on the 11th on his mission to Corea. He was accompanied by two officials belonging to the Ministry of foreign affairs.—The *Herald* says, the 11th instant, being the anniversary of the coronation of the first Emperor of Japan, the men-of-war in harbour dressed ship, and a national salute was fired at noon.—According to a statement in the *Herald*, there are now thirty-four native newspapers printed and published in Japan, and they sent through the local post-office during 1874, no fewer than 2,564,229 copies. The *Nichi Nichi Shimbun* heads the list, with 977,643 copies.—General Yamagata, Minister of War, accompanied by General Saigo and a large staff, on the 13th inst., paid a farewell visit of inspection to the French and English troops.—Previous to his departure, Major Kinder was honoured with an audience by his Majesty the Mikado, who spoke in flattering terms of Major Kinder's services in connection with the Mint.—The Messageries Maritimes Co. have presented a gold chronometer watch, bearing a suitable inscription, to Mr. Maida Koriou, as a testimony of their thanks for his kindness to the survivors of the *Nil*.—The *Tokei Journal* conveys the gratifying information that small-pox has disappeared from that place.—At five minutes past 11 o'clock on the night of the 15th inst., a severe and protracted shock of an earthquake was experienced here.—The *Herald* states that on the 15th there was a strong rumour to the effect that the ex-Shogoon was to be restored to power, as the outcome of the political meetings of politicians at Osaka. There was, however, no confirmation of the rumour at the departure of the mail, The Gazette reports numerous other fires in Yokohama and neighbourhood.—The same paper says that foreigners are cordially invited to visit the Exhibition, to be opened on the 1st March at the Gosho, Kioto. The exhibition will remain open until June 8th, and the invite to foreigners extends from one week before to the same period after the above dates.—The Tokio omnibus broke down on the 11th instant. One passenger had his arm broken, and the horses becoming frightened, ran over the two bettoes, killing them instantly.—A Farewell banquet was given to H. E. M. Von Brandt on the 11th by the Government. Most of the principal officials and ministers were present.—On the 5th inst., a man went to Takeda Michinobu, the priest of the shrine, and informed him that he had been entrusted with the mission of offering to Inari a copper lantern, on behalf of a number of *geyshas*. The priest was so elated that he entertained the ambassador with fish and *sake* until dark, when they both became intoxicated. The man at length went out hastily, saying he would return next day; but, soon after, the priest found the drawer of the money chest open, and discovered that the sum of twenty *yen*, which he had scraped together with much assiduity, had been abstracted.—The Members of the Royal Marine Battalion and Infanterie de Marine Francaise who until lately, acted as police-constables, have each been presented with a roll of red and of white silk crape, of fine texture.—A girl named Hana, who was employed by one Hirasawa at Higashi Konya-cho, Tokio, was rewarded with a handkerchief, for having discovered a fire which had just broken out in the house of a person who resided next door. She was greatly pleased with the present, and being desirous of receiving a further reward, attempted to set fire to her master's house, but was detected, and as a warning, mulcted in the heavy penalty of 75 *sen*.

TIENTSIN.

In the Peking *Gazette* of the 31st Jan. we find an announcement that Ching-lin and Tih-chun, whom I mentioned last week

as having been promoted the first to Vice-President of the Board of Works, and the second to Vice-President of the Colonial office, had had an audience to return thanks for the favors bestowed on them. Ching-lin is one of the junior members of the Tsung-le yamun; and Tih-chun was, during the rule of Chunghow at Tientsin, superintendent of the Imperial Arsenal. In the same *Gazette* it is announced that the Ministers of the Cabinet and Li Hung-chang, as Minister of State, had been summoned by the Regents to the Council Room for deliberation and the dispatch of public business. The *Gazette* of the 2nd February adds that Li had had an audience of the Regents, to take leave on his departure for Paouting. Further on, in the same *Gazette*, and on the same day, we find it announced that the Ministers of the cabinet and Li Hung-chang had been summoned to the Council Room, for deliberation and the dispatch of business. From private letters received here from Peking on the evening of the 3rd and 4th instant, we learnt that Li would leave Peking on the 3rd instant for Paouting; and since then we have heard from the Chinese officials here, that his Excellency had reached Paouting on the 5th instant, the last day of the Chinese year.

In the *Gazette* of the 2nd February there is a short Edict in reply to a memorial from Censor Li Kweilin, praying that the Throne will allow Ting Show-chang, lately Territorial Taoutai at Tientsin, at present at this place in mourning for his father, and a man highly respected by the people of Tientsin, to be again employed in the public service in Chihli. The Regents command, accordingly, that at the expiration of his one hundred days of mourning, [illegible] give Ting Show-chang employment. Ting is a native of the same province as Li Hung-chang, the province of Nganhway.

The heavy mail with our newspapers arrived here on the morning of the 4th instant, putting us in possession of the *North-China Daily News* up to the 15th January, and London papers up to the 27th November. On the 2nd instant, a party of three Tientsin sportsmen started for the wild grounds of Mongolia, and as they, in our minds, rank with Gordon Cumming, Baldwin, Baker, and Rice as sportsmen, we naturally expect to see them return, after the Chinese holidays are over, with a long string of carts, heavily laden with the trophies of their rifles and guns, namely tigers, wild boars, wolves, foxes, elks, antilopes, bustards (Tepoo) down to sand grouse. In imagination we see two new wings commenced to be added to the Shanghai Museum to take in new specimens of wild animals and birds bagged in Mongolia—a new field really for foreign sportsmen.

The 6th instant was the first day of the Chinese New Year and the first day of the first year of the reign of Kwang-seu. I have not heard of anything having occurred on that day worthy of being chronicled in the *North-China Herald*, beyond the circumstance that on that day, and only for that day, the mandarins went out of mourning, wearing their buttons, &c., &c., and using red cards. As customary, the Consuls sent their cards to the local Chinese officials to congratulate them on the new-year; but as the officials do not receive visits while in mourning, no congratulatory visits as hitherto will take place on the 5th day of the first moon.

On the 1st instant, my Chinese people saw a flock of wild geese flying north. On the 5th instant, I saw a flock of sixteen flying over my place in an easterly direction, and fancied I saw them with my glass alight on the lakes, where I suppose there must be some place free of ice.

On the 4th instant, we had charming weather—bright sky, calm, and mild,—and during the following night the thermometer only fell to 26°. At 10 a.m. on the 5th instant, a change took place, the wind coming out of the east and blowing strongly. In an hour it ceased, and we had a calm till noon; but during this time we could see, high in the air, that ere long we were going to have a dust storm from the north, and of course at once set to work closing firmly our windows and doors to meet it efficiently. About half-past twelve the storm reached us, and we were almost in darkness in a few moments. It continued all the remainder of the day and during a great part of the following night; the weather becoming colder every minute. On the morning of the 6th inst., the thermometer stood at 10° Fahrenheit, and yesterday at 9°.

The ice harvest has come to an end, and I understand that it has throughout been satisfactory.

Puritan.

8th Feb., 1875.

HONGKONG.

We reprint from the *Daily Press* a report of proceedings at the Hongkong and Shanghai Bank Meeting, on the 18th instant. It will be seen that the Chairman made an elaborate statement regarding the affairs of the bank, and that a good deal of detail information was afterwards elicited. The Shanghai Bank premises are to cost Tls. 115,640; the proposed outlay of £4,000 in furnishing them was objected to. The total amount which has been provided for London losses is £71,000. No figures appear to have been stated regarding the Sugar Company, but a prospect was held out of realising the estate. A proposal was brought forward, to reduce the Directors' fees from $20,000 to $10,000 a year; but the Chairman declined to put it to the meeting, on the ground that two days' notice should have been given. —A meeting of shareholders in the China Traders' Insurance Company was held on the 19th instant. It was explained that the Company had done a larger business than during the previous year, but it had been less profitable, owing to the typhoon of September, by which they had lost $130,000. The Report and Accounts were passed.—The flower show on the 19th is spoken of as a great success.—Sir Arthur Kennedy is likely to go home on leave.—The Douglas Challenge Cup was again sailed for on the 19th, and was again won by the *Naiad*; the *Naomi* lost her topmast during the race.

The *Gazette* contains reports from several Heads of Departments. A decrease in crime of 22.96 per cent. is noted, and the figures may apparently be relied on, as they are calculated on the number of cases reported, and not of prisoners taken.—The number of kidnapping cases has greatly diminished since the stoppage of the Macao coolie trade.—The success of the Police school has been highly satisfactory.—A large fire was reported to be raging in Canton city on the night of the 20th, but no particulars had been received.—The *Daily Press* regrets Sir Edmund Hornby's recent decision, upholding the constitution of the Foochow Mixed Court, as likely to prove very inconvenient.—The report of the Hongkong and Whampoa Dock Co. shows a steadily improving position of affairs. A dividend of 2 per cent. for the half-year is advised. The debt to the Hongkong Fire Insurance Company has has been reduced to $190,000.

A meeting of shareholders in the Victoria Fire Insurance Company was held on the 22nd February. It was stated that the reserve fund was now made up to the full amount required by the articles of Association, and a small excess was available for distribution among the shareholders.—A variety of changes are being made in the Government offices, consequent on the departure of Sir Arthur Kennedy. The Hon. J. G. Austin will become acting Governor; the Hon. C. C. Smith, acting Colonial Secretary; Mr. C. May, acting Colonial Treasurer; Mr. Wodehouse, assistant Colonial Secretary; Mr. Tonnochy, acting Registrar General; Mr. Tomlin, acting Governor of the Gaol; Mr. Lister, Postmaster General (consequent on Mr. Mitchell's retirement;) while Mr. Russell reverts to his old post of Private Secretary to the Governor. The *Hongkong Times* comments on the absence from the list of Mr. Stewart, who, as Inspector of Schools, has shown himself one of the most practical and able officials in the Colony.—An appointment, also, which it severely blames, is that of Mr. Lister to the Post Master Generalship vacated by Mr. Mitchell; and we concur in its criticism. The appointment was fairly due to the Assistant Postmaster, Mr. Barff, and it is unwise and unjust to place over that gentleman's head an officer who has had no experience whatever of Post Office work. Mr. Mitchell's conduct of the Post Office has always been popular; but it is well known that he has been often holding other offices, during which his attention must have been more or less distracted from his own. On such occasions, and during his occasional tours of inspection, the control must of course have devolved more or less upon Mr. Barff, who appears to have proved himself thoroughly competent. The appointment of Mr. Lister as Post Master General, simply means that Mr. Barff will have to teach him his duties, and to do the chief part of the work while he is learning them. The appointments to Hongkong Government offices have been often a subject of satire and amusement to outsiders; but as the majority of the posts are more high-sounding than important, people have seldom cared to protest—the whole administration being really not on a larger scale than that of the Shanghai Municipality. The Post Master Generalship, however, is an office which really requires training and experience, and we repeat that it is both unwise and unfair to pass by a qualified man, and appoint one who has had neither.

The British ship *Atlantic*, which left Hongkong on the 30th January for Vancouver's island, has been obliged to put back and go into dock, she having been ashore on the southernmost island of the Madjicosima Group.

MACAO.

We publish, below, a letter from the Secretary to the Macao Committee of Relief, warmly acknowledging the remittance of $1,374.57, subscribed by the Shanghai community for the relief of those who suffered by the cyclone in September last.

Illmo. Sr.—O Sr. Presidente da Commissão de Beneficiencia de Macao tendo recebido uma letra sobre Hongkong and Shanghai Banking Corporation de $1,374.57 do Illmo. Sr. José H. de Carvalho quem a remettera em nome da Illustre Communidade de Shanghai, sendo ella parte do producto de uma subscripção, que por iniciativa de V.Sa. fora aberta n'essa em soccorro dos que soffreram privações pelos effeitos destruidores do grande tufão que passou esta Cidade na noite de 22 para 23 de Setembro ultimo; e tendo a commissão encarregado a mim como Secretario da mesma do honroso dever de significar á Illustre Communidade, e particularmente a V.Sa. como iniciador d'essa caridosa e philantropica obra, o seu sincero voto de agradecimento por si e pelos soccorridos, cumpre-me pois rogar a V.Sa. se digne acceital-o, bem como transmittil-o a Illustre Communidade, a quem e igualmente a V.Sa., ella assegura que não poupará nenhum esforço para cabalmente corresponder a confiança que teve ella a honra de merecer.

D. Ge. a V.Sa. Macao, 21 de Janeiro de 1875.

O Secretario da Commissão de Beneficiencia de Macao,

ANTONIO DOS REMEDIOS.

Illmo. Sr. ANTONIO H. DE CARVALHO,
&c., &c., &c.
Shanghai.

[*Translation.*]

SIR,—The Chairman of the Macao Committee of Relief having received a draft on the Hongkong and Shanghai Banking Corporation amounting to $1,374.57 from Mr. J. H. de Carvalho, who has handed it over in the name of the illustrious community of Shanghai; this amount being part proceeds of a subscription solicited by you for the relief of those who suffered by the late cyclone on the night of the 22nd to 23rd September last; and the Committee having charged me, as their Secretary, with the honourable duty of expressing to the illustrious community, and particularly to your goodself as the originator of this charitable and philantropic deed, their heartfelt thanks:—it behoves me to beg your acceptance of the same, and to transmit them to the said illustrious community, whom the Committee assures that no pains will be spared to justify the confidence they had the honour to deserve.

ANTONIO DOS REMEDIOS.

Macao, 21st Jan., 1875.

Peking Gazettes.

ABSTRACT OF PEKING GAZETTES.

Jan. 30th-31st.—The Court Circular of the 30th announces that the Governor-General Li Hung-chang had audience.—That of the 31st announces a further visit of His Majesty, to-morrow morning, to the building in which the remains of the deceased Emperor are lodged.

(1)—A Decree. In reply to the Memorial from the Board of Ceremonies, requesting that an envoy and associate-envoy be appointed to convey to Corea a copy of the valedictory manifesto of his late Majesty, We appoint Ming-an 銘安 as chief, and Li-jui 立瑞 as associate-envoy. Let them reverently convey the manifesto [to Corea] and promulgate it there. (N.B.—Ming-an is at present a member of the civil government of Shêng-king, as vice-president of the Board of Revenue at Moukden.)

(2) A Decree by the two Empresses. We have received the memorial presented by the Censor Wu Hung-ên, offering observations in pursuance of the Decree calling for advice (see *Gazette* of 26th inst.) The several representations he has made, in respect of nurturing virtue in the Sovereign, acquiring support in men's minds, and being guided by the expression of public opinion, are all worthy of attention. His Majesty being still of tender age, it is beyond question expedient that effectual training in the right path be studied. All those who surround His Majesty and are in near employment about His person, should be without exception of tried capacity and solid character. No youthful and thoughtless persons shall be suffered to be in attendance. Thus it may be that, by laying from the first a right foundation, the virtues which become a Prince may daily be made to increase in splendour. Inasmuch as the first consideration, in the policy of the State, is regard for the welfare of the people, it has already been enjoined upon the high officials in all the Provinces that they should devote themselves, with redoubled care, to guarding against the evils under which the people suffer. Let all Governors-General and Governors be active in putting an end to unauthorized levies and to oppressive exactions of every description. The contributions ordered by the Board of Revenue from provincial resources should also be reduced, or wholly done away with, as the circumstances of each province may, on consideration, shew to be advisable. As regards the expenditure of the Privy Purse, the annual amount of this is fixed by rule; and it is especially incumbent upon the Comptrollers of the Household to be accurate and sparing in their administration, avoiding all approach to wastefulness or excess. In all matters of judicial punishment and rewards of merit, the Sovereign is guided by the one rule of absolute justice. It should be the aim of all officials to mould their actions by this example, so that, whether it be to add a lustre to good deeds or to brand the conduct of evildoers, an even balance be ever held in advancement or in repression. In such wise may effect be given to the continual desire of the Sovereign for the perfection of His rule.

(3).—The Governor of Hunan reports the receipt of a communication from Tsiang Yih-li, titular ex-Judicial Commissioner of Shansi (heretofore Governor of Kwangtung), who states that he has a large number of kinsfolk whose circumstances are of a straitened nature, on whose behalf he has resolved upon devoting certain property of his own, being the result of his savings from his official salary, to form a fund to provide for the expenses of their education. He has made arrangements to set aside the rental of certain lands, amounting to 1,275 piculs of grain, besides 3,000 strings of cash, to be allotted proportionally among the descendants of his great-great-grandfather in a yearly division of the amount accruing thereform. He requests that this foundation may be officially recorded; and it is consequently reported to the Throne.

Feb. 1st.—2nd.—(1)—A Decree of the two Empresses, referring to the stringency of the discipline enforced by the August Sovereigns of the present dynasty for the governance of the eunuchs of the Palace. Notwithstanding this, certain eunuchs have been so bold as to misbehave themselves and act regardlessly of their duty, even going so far, in some cases, as to assume authority to which they had no title, and to engage in intrigues with officials of the Household for dishonest purposes. Their evil machinations, with an eye to their own profit, are worthy of the deepest abhorrence. Let the most notable among these offenders, to wit, the superior eunuchs Chang Têh-hi and Mêng Chung-ki, with the eunuch wearing an official button, Chow Tsêng-show, be forthwith stripped of their office and be transported to the Amoor, to be given as slaves to the soldiery and to be excluded from the benefit of any future general pardon. Let four other eunuchs (whose names are given) be bastinadoed in the severest manner by the office of discipline, and be handed over to the Comptrollers of the Household to be transported to the Hunting Park and set to work as grasscutters. The Comptrollers of the Household are likewise to make enquiry with regard to any acts of collusion between the officials of that department and eunuchs, and to impeach any such persons as may be found to have been guilty in this respect. The Comptrollers will be held answerable themselves if they allow favouritism to stand in the way of justice.

(2) A Decree of the two Empresses, in answer to a memorial by the Censor Li-Hung-mo, in denunciation of certain officials. A memorial was heretofore presented by the Censor Sun Fêng-siang, accusing the Comptroller of the Household, Kwei-pao, of collusion with Li Kwang-chao in his attempted frauds in connection with the supply of timber, whereupon sentence of deprivation of rank was submitted by the Board. With regard to the Comptroller of the Household, Wên-si, he was some time ago denounced by the Censor Chang King-ts'ing for malversation of his office, and he was removed from all his functions. Both these officials are thus in bad repute and unfit to discharge their trust. Let Kwei-pao and Wên-si be forthwith stripped of their rank. Let the proper Board take note.

(3) Memorial by Li Tsung-hi, Governor General of the Two Kiang, applying for leave to retire on the score of ill-health. (Rescript granting the application published Jan. 12th).

(4) Li Tsung-hi reports, in a postcript memorial, that the war-junks of the naval divisions of the Yangtsze, and adjacent coast and inner waters, had been assembled and exercised on receipt of the Imperial orders to take measures for defence within his jurisdiction. As the necessity for defensive measures has now passed by, it is desirable that the vessels should return to their respective stations in time of peace, in order to discharge the constabulary duties which are incumbent upon them, and orders have accordingly been given to this effect.

(5) Li Ho-nien, Governor-General of Min-chêh, reports that during the absence from his post of the naval general of Fuh-kien, Lo Ta-ch'un, who is at present in the North of Formosa, at Su Ao (Sawo), directing the measures that are in hand for opening the mountains, a temporary appointment in his stead is necessary. The Brigadier-general of Chang-chang, Sun K'ai-hwa, is consequently appointed his locum tenens.

(6) Memorial by the Duke Twan-siu, asking leave to resign his command and appointments about the Court, together with the State allowance of his rank, on the ground of increasing infirmity. (N.B.—This memorial was acknowledged and the request acceded to, on the 13th January, among the decrees issued with reference to the decease of the late Emperor on the previous evening.)

Feb. 3rd-4th.—(1)—A decree, on receipt of a memorial from the vice-president of the Sacrificial Court, Chow Jui-ts'ing, soliciting posthumous honours on behalf of Tsiang Yih-li, who has just died. The military services rendered by the deceased official, in combating the rebellion, before his advancement to the post of Governor of Kwang-tung, are duly acknowledged; and it is added that his late Majesty, mindful of the distinguished merit he had achieved, summoned him last summer to Peking with a view to conferring employment upon him. Having come to the capital, suffering though he was from illness, he has now been removed from the world to the great sorrow of his Majesty. It is ordered that he be honoured with the funeral rites due to a provincial governor, and that his life be recorded in the imperial historiography.

(2) A Decree. Replying to memorials from two officials, expressing opposite views with reference to the conduct to be pursued by the late Prefect of Tientsin, Ting Show-ch'ang. The Censor Li Kwei-lin has memorialized, extolling the virtues and ability of Ting Show-ch'ang, who some months ago was obliged by his father's death to vacate office in order to observe the 27 months of mourning, and requesting that in his case an exception to the general rule be made, and that he be retained for service in Chihli. On the other hand the vice-president of the Sacrificial Court, Chow Jui-ts'ing, represents that Ting Show-ch'ang is bound by rule to observe the mourning period, and requests that he be commanded to return to his provincial home for this purpose. It is decreed hereupon, that the retention of Ting Show-ch'ang in Chihli is for

detached service, and not in the incumbency of any stated office. The memorial of Chow Jui-ts'ing need not, therefore, be taken into consideration. (Ting Show-ch'ang, who, as Taotai of Tientsin, was highly trusted by the Governor-General Li, was retained by the latter in an appointment on his own staff on his being compelled to vacate his office as Taotai a few months ago. The memorial and countermemorial dealt with above, probably form part of the arrangement, as the readiest means of publishing sanction to a somewhat irregular proceeding).

(3) A decree, referring for consideration by the Board of Civil Office a memorial from the Censor Yüan Chêng-yeh, urging that the ancient rules with regard to the purchase of rank be reverted to, and a check be placed upon the system of recommendations for promotion in ordinary cases.

(4) Kin-shun, the commander-in-chief of Kansuh, and divisional general of the troops beyond the Wall, draws attention in a postscript memorial to the alacrity and efficiency with which the provincial government of Shensi have bestirred themselves in maintaining the supply of funds required. He mentions that he has now reached Barkul (near Hami) with the force under his command.

Public Meetings.

SHANGHAI RACE CLUB.

The Annual Meeting of the above Club was held on Friday afternoon, present—Mr. C. J. King, in the chair; Messrs. R. Fergusson, F. D. Hitch, and Barnes Dallas, stewards; Messrs. H. Savage, D. Brand, A. Robinson, Percival, Fitz-Henry, C. A. Rees, H. Morriss, H. J. Limby, C. Lucas, J. S. Fearon, O. Brandt, J. Haas, G. A. Lindsay, J. E. Wallis, H. Thorburn, Rohl, P. Möller, C. J. Ashley, Walker, T. G. Williamson, R. Church, W. Leslie, T. R. Wheelock, M. Kalb, W. H. Short, E. A. Fabris, J. A. Pond, A. Farrar, R. G. Ogle, B. Palamountain, and Lovett.

The Chairman said, in asking them to receive the accounts, which had already been before them, he would merely allude to Mr. Keswick's loan, the balance of which, together with interest, had now been paid, so that that obligation had ceased. Another matter to which he might allude, was that eight shares in the Race Course had been purchased on behalf of the Club, so that now 17 out of 25 shares were the property of the Club, which was considered a very desirable object to obtain. With those amounts paid, there remained a balance of Tls. 2,649.43; and, without any further remark, he hoped the accounts would receive the approbation of the meeting, and be passed; though if it were thought necessary to ask any questions respecting them, he would be happy to give any information possible.

Statement of Receipts and Expenditure for 1874.

Dr.

February 18th, 1875.	Taels.

Autumn do.	55.00

Mr. Lucas proposed—

That the accounts as printed be accepted and passed.

Mr. Brandt said, before the accounts were passed, he wished to ask for an explanation with respect to the German Challenge Cup, for which the Club were made indebted in Tls. 350. It was understood that the amount had been subscribed by the German community for the purchase of the cup, and it could hardly be understood why the Club were now charged with it.

The Chairman said the amount had been subscribed and invested in the purchase of a cup, he believed; but the cup had never reached the hands of the Club up to the present time. It was, however, now the subject of correspondence between the Stewards and Mr. Cordes (who was at present at Hongkong), and perhaps it would be premature to say more about the matter yet.

Mr. Brandt considered it was a subject that ought not to be lost sight of. The Cup ought certainly to be forthcoming.

The Chairman said the meeting would excuse him, if he said he was not acquainted with the matter fully. Perhaps Mr. Dallas could tell them more about it.

A general conversation ensued, and a member said he heard the cup had been traced up to a certain time, since which nothing had been known of it. It was time some steps should be taken with a view to its recovery.

Mr. Brandt said he had heard it had been seen at the German Club. He asked how the Race Club became responsible for the value of the cup?

The Chairman said the cup was promised to the Club, and was advertised by them to be run for. It was run for and won under the terms advertised, and then was not forthcoming. There appeared to be some mystery about it, and to-day, for the first time, he had heard it had been seen at the German Club. But if that were so, he should have thought the cup would have been in a safe place there, and have been produced when required.

Mr. Dallas said there were several persons, who, like Mr. Brandt, thought the Cup was at the German Club, and, acting upon that thought, the Cup was applied for. They were told it was not a race cup at all that had been seen, but a cup that was won as a rifle-shooting prize.

Mr. Brandt said the cup came out from Berlin in 1870, he believed. It was seen at that time.

Mr. Dallas said in 1870 the old cup was finally won; and the cup in question first run for in 1871, being finally won in 1873.

A member expressed the opinion that, if Mr. Cordes was responsible for the money, he ought to be applied to for payment.

The Chairman replied that Mr. Cordes undertook to collect the money; but somehow there was a slip between the cup and the lip, and Mr. Cordes was as much surprised at it as they were. But as he had before said, the Stewards were in correspondence with Mr. Cordes on the subject, and perhaps it need hardly be continued now.

Mr. Brandt thought if the cup had been in the care of the German Club, that Club ought to be made responsible for it. It certainly was too serious a matter to be lost sight of.

The Chairman repeated that the matter had not been lost sight of. The Stewards were now in correspondence with Mr. Cordes on the subject, and that was all that could be done at present. In the meantime, the Race Club were called upon to pay the amount, because the cup had been won under the terms advertised by them. As soon as anything was understood about the cup, it would be made known to the members.

The conversation then dropped, and

Mr. Haas seconded the motion for the adoption of the accounts, which was carried unanimously.

The Chairman said the next business to which he had to call attention was the appointment of a Clerk of the Course, which had become vacant by the resignation of Mr. F. King. The duty would be undertaken by Mr. Barnes Dallas, if elected to the office; and for the purpose of offering himself, that gentleman had resigned his position as Steward, which he (the chairman) was sure they would all much regret. They had, therefore, to recommend that Mr. Dallas should receive the double appointment, as Secretary to the Race Club and Clerk of the Course, at a salary of Tls. 720 per annum. He moved that the services of Mr. Dallas be accepted.

Mr. Hitch seconded the motion, and it was agreed to *nem. diss.*

The Chairman said he would now ask them to listen to some correspondence which had passed between the Recreation Fund Trustees and the Stewards of the Race Club; with which the Stewards did not feel themselves competent to deal without ascertaining the opinion of the members of the Club.

Mr. Dallas read the correspondence, as follows:—

Shanghai, 27th July, 1874.

C. J. King, Esq.,
Chairman Race Club,
and the Trustees.

Dear Sirs,—As it has been suggested that I should address the Trustees of the Recreation Fund with a view to alter their determination as to the necessity of appeal, I have to-day written them, pointing out how I think the difficulty now existing might be arranged.

In their letter of 14th July, they state.—"We cannot, under the permanent injunction granted by the Court, sell the Land or deal with it as (they) we please on terms of our Trust. On the other hand, the Race Club Land is unfettered, and may be sold, or be let upon, to the detriment of the Recreation Fund Land on the interior of the Course. They also state that we never had, and that we have not now, any wish or intention to obstruct the view of the Race Course." Their determination to appeal strikes me as based on the first portion of the above quoted paragraph, and I have therefore pointed out to them how I think the whole matter could be settled without further litigation, viz., that the Trustees of the Recreation Fund should give the Race Club a formal and sufficient guarantee of their expressed intention never to interfere with the view of the Race Course, and that the Race Course Proprietors and Race Club on their side will equally pledge themselves that, so soon as the present Race Course has ceased permanently to be used as a Race Course, then the Recreation Fund Trustees will be at liberty, so far as the Race Club is concerned, to use the Land in the interior for any purpose they may see fit. If the above should meet with your approval, a meeting with the Trustees of the Recreation Fund might tend to a satisfactory conclusion, and the Lawyers would draw up the necessary documents for a final settlement of this vexed public question with honor and satisfaction to all.

Trusting it may be so.

I remain, Dear Sirs,
Yours faithfully,
John Dent.

Shanghai, 30th July, 1874.

John Dent, Esq.

Sir,—I am requested by the Stewards of the Shanghai Race Club to thank you for your letter of 27th inst., to Mr. C. J. King, Chairman of the Race Club, and to express to you their sense of the obligation you have conferred on the Race Club by bringing forward a satisfactory solution of the difficulties pending between the Trustees of the Recreation Fund and the Race Club.

The Stewards think it desirable that the Chairman of each body should meet, to arrange a settlement of the question, on the general ground laid down in your proposition, viz., that the Trustees guarantee an uninterrupted view of the Race Course so long as it is

permanently used for Racing purposes, and on the other part, the Race Club will undertake to release the land in the interior of the Race Course from all liabilities to the Race Club when the Course ceases to be used for Racing purposes.

The Stewards hope that, at a meeting as above, full terms of the settlement of the difficulty may be arrived at, to the satisfaction of both parties; and have every reason to believe the members of the Race Club will be willing to agree to the terms that may be laid before them.

I have the honor to be, sir,
Your obedient servant,
BARNES DALLAS,
Steward and Secretary Shanghai Race Club.

Approved.
C. J. KING,
F. D. HITCH,
C. S. GRANT,
E. G. LOW.

Shanghai, 28th August, 1874.

C. J. KING, Esq.,
Chairman, Shanghai Race Club.

DEAR SIR,—I beg to hand you the enclosed Communication which has just come to hand from the Chairman of the Recreation Fund, and would ask your serious consideration of it.

Yours faithfully,
JOHN DENT.

Shanghai, August 18th, 1874.

JOHN DENT, Esq.,
Shanghai.

DEAR SIR,—Your letter of the 27th ulto. has received the earnest consideration of the Trustees. We are glad to see in it the expression of, what we believe to be, a general desire for an amicable settlement of the questions at issue between the Race Club and the Recreation Fund, and if we hesitate to accept the compromise which you suggest, it is not because we fail to reciprocate the wish for an adjustment, but because the plan proposed does not seem to us to go far enough.

It is a notable fact in the history of Shanghai amusements, that in every private association which has started with a proprietary distinct from the general body of members or subscribers, there has, sooner or later, been a certain divergence of opinion, or clashing of interests between the two sets of men, with a result always more or less unfortunate. Illustration of this fact will recur to the mind of every old resident, and further allusion to it would be out of place.

The Trustees, however, may say that the elimination of the proprietary element from schemes of public amusement, has long appeared to them an advantage to the community, and an object towards which they may properly devote a portion of their Fund whenever opportunity arises.

Recent events have brought to light the fact, that the Recreation Fund Trustees are viewed by many persons as a body in direct antagonism to the Race Club and its special interests. How this feeling originated or has been fostered, it is useless to enquire, but we believe that its existence has been at the bottom of all the late trouble, and that it may continue to breed discussion as long as the legal tenures of the Race Course and of its interior remain in their present unsatisfactory state.

It is, therefore, not only in response to your letter, but with the two-fold object of showing that this supposed antagonism does not exist, and of enabling the Race Club to purchase the remaining private interests in the Course, that we submit the following scheme:—

1.—The Trustees will at once furnish the necessary funds to buy up the privately-held shares in the Race Course, and they will issue to the Race Club, debentures representing the balance of the cost of the Race Course, bearing interest at 5 per cent. per annum, and redeemable by instalments within five years.

NOTE.

Cost of Race Course to original shareholders, (including cost of 30 *mow* of ground, houses thereon &c., &c)	Tls. 10,800.00
(25 *shares at Tls.* 432 *a share.*)	
Less cost of above 30 *mow*, houses &c., for which payment has already been made by the Recreation Fund, Tls. 2,000 in cash and certain privileges as per letter of Secretary to Race Course, 5th October, 1872	3,427.94
Actual cost of Race Course.	7,372.06

The final result of this arrangement would be to give the Race Club some Tls. 3,200 in cash, against which and the cash paid for purchase of shares they would be chargeable with interest at 5 per cent., making the annual rental of the Race Course, Inner and Steeple Chase Course, Tls. 368.60.

2.—The Race Course and Grand Stand enclosures to be vested in the Trustees of the Recreation Fund, two Stewards of the Race Club, *ex-officio*, to be added to the five present Trustees.

3.—The Trust Deed to provide that the Race Course shall be left in possession of, and under the sole control and management, of the Race Club, as long as the Club shall consist of members or more. That the Course shall not be sold until a new and suitable Course, ready for use, be first provided, and then only with the consent of at least five Trustees and two-thirds of the resident members of the Race Club.

4.—The Deed also to provide that the land in the interior of the Course shall not be sold, or the view of the Course obstructed, as long as the Course is in the possession of the Race Club.

5.—The Race Club to be responsible for keeping the Course, &c., in order, for the necessary repairs, taxes, &c., and to pay interest at the rate of 5 per cent. per annum on the amount expended by the Fund in taking over the shares in the Course, it being understood that *no individual responsibility is incurred by the members.*

6.—In order to arrive at a settlement of *all* points at issue, the Trustees will waive their claim for a clean title deed for the 30 *mow* of Land alleged to be in the interior of the Race Course, which they have already paid, and will confirm the privileges granted to the Race Course in respect of the Training and Steeplechase Courses.

You will doubtless remember that the agreement with the Race Club, to which you as *ex-officio* Chairman of the Trustees were a party, made the production of clean title deeds for the 30 *mow* of Land, the consideration for both the money payment and the privileges above-mentioned.

The Trustees believe that the proposed amalgamation is the only plan by which the various interests can be thoroughly conciliated and advanced, and they submit it for frank discussion upon its merits. They would specially deprecate, on the one side or the other, any remarks bearing upon either the past disagreements or the present relative positions of the parties to the late litigation—and they hope that the scheme may be viewed solely as to the advantages which it offers for the future.

To the Race Club, the pecuniary inducements are manifest, while a security for the preservation of the Race Course is offered which does not exist to-day. To the Trustees there will remain the satisfaction of having widened the usefulness of the Fund, and of having given a definite solution to a long-vexed question.

I remain, dear Sir,
Your obedient servant,
JOHN G. PURDON,
Chairman of the Trustees of the Shanghai Recreation Fund.

Mr. LUCAS thought a question of the importance contained in the letter should have been circulated more freely. He considered the present meeting was hardly capable of dealing with so sweeping a measure.

Mr. HITCH suggested it would be better, perhaps, to have the correspondence printed for circulation amongst the members.

A general conversation took place, and, ultimately,

Mr. LUCAS proposed—

That the correspondence between the Club and the Recreation Fund Trustees be printed and circulated among the members, and the decision in the matter left to an extraordinary meeting.

Mr. HAAS seconded the motion.

Mr. MORRISS—Why not come to a decision at once, and decline it?—it will be sure to be declined.

Several members considered this would be too summary a way of disposing of the question; and it was also suggested that members not present at the meeting might like to have an opportunity of expressing their opinion.

Mr. LINDSAY however, submitted, as an amendment—

That the Secretary be instructed to answer the proposition made in the Recreation Fund Trustees' letter of 18th August, and to decline the same on the ground that there is no reason to alter the present constitution of the Race Club.

Mr. MORRISS seconded the amendment.

The CHAIRMAN put the amendment first, but there were only six hands held up in its favour, the remainder of the meeting voting against it. The original motion was then put, and carried, against one dissentient.

Mr. J. S. FEARON thought, before the subject dropped, the meeting should give some expression and acknowledgment of the Club's indebtedness to Mr. Dallas, for his services on the occasion of the trial between the Recreation Fund Trustees and the Club. He would, therefore, move—

That the thanks of the Club be voted to Mr. Dallas, with a sum of Tls. 200, for his services and the time expended by him in attending the late trial in which the Club was involved in the Supreme Court.

Mr. FERGUSSON had only too much pleasure in seconding such a proposition.

The CHAIRMAN submitted the motion, and it was carried without dissent.

Mr. DALLAS thanked them very much for this recognition of his services.

Mr. SAVAGE suggested that the Stewards should make some alteration in the Steeplechase jumps. The present arrangement was very unsatisfactory to racing men, and no doubt prevented a greater number of entries. As one instance, he might mention that the wall was too near the start, and many China ponies would not face it.

Mr. DALLAS said it was in contemplation to move the wall to near the Monument, and to place a hurdle for the first jump.

Mr. SAVAGE also thought the double opposite the Grand Stand might be improved.

A voice—It might he made a treble. (Laughter.)

Mr. J. S. FEARON remarked that the number of entries for the Steeplechase was generally so small that it was hardly worth while to alter the course. He thought it would be better to have only one Steeplechase at each meeting.

Mr. WALKER thought there would be a larger number if the wall were altered.

The CHAIRMAN said it would probably be sufficient to draw the attention of the Stewards to the question, who would take it into consideration.

Mr. SAVAGE had only wished to call attention to the subject.

Mr. LINDSAY observed that there was another subject to which he might ask their attention. He thought it would be more convenient to call the annual meeting immediately after the Autumn races, when matters were fresh in the minds of the members, and would be likely to receive closer attention than at a long period afterwards. If the subject were brought to the notice of the Stewards, they would perhaps see fit to make the alteration.

Mr. J. S. FEARON did not agree with the suggested alteration. He considered the proper time to hold the annual meeting was when the accounts were presented.

No discussion followed, and,

Mr. LINDSAY said he only mentioned the matter suggestively, and did not intend to propose any resolution upon it.

The next business was the election of Stewards for the ensuing year.

The CHAIRMAN said there was a vacancy caused by Dr. Gottburg going home, and another by Mr. Dallas' retirement in order to become Clerk of the Course. The meeting would, however, ballot for stewards as usual.

The papers having been handed in, the following were found to have received the greater number of votes:—Messrs. C. J. King, F. D. Hitch, E. G. Low, R. Fergusson, McLeod, F. H. Bell and Hart, who were declared duly elected.

The CHAIRMAN read a letter from Mr. P. V. Grant, to the effect that the engineers of Shanghai had subscribed Tls. 500 for the purchase of a piece of Plate, to be run for and won two consecutive years by a China pony from the same stable. (Applause.)

Mr. FERGUSSON moved, and Mr. HITCH seconded, a cordial vote of thanks to Mr. Grant and the subscribers to the Plate, which was carried unanimously.

A vote of thanks to the Chairman, who briefly acknowledged the compliment, concluded the meeting.

MEETING OF SUBSCRIBERS TO TRINITY CHURCH.

The Annual Meeting of Subscribers to Trinity Church was held at H. B. M. Consulate on the 1st instant.

Present:—W. H. Medhurst, H. B. M. Consul (in the Chair,) Rev. C. H. Butcher, Sir E. Hornby, Messrs. Alabaster, Davenport, Dent, Drummond, Krauss, Tate and Turnbull.

The CHAIRMAN said this was the usual Annual Meeting to receive the accounts, elect office bearers, and discuss any other general matters that might be brought forward. The accounts had been audited, and, together with the Report, had been circulated and were now before them. He might add that the Meeting would have been held earlier, in accordance with the Act, but for the unfortunate illness of their esteemed Treasurer, who was still not able to be present, but in whose stead Mr. Turnbull would give any necessary explanation.

Mr. TURNBULL proposed

That the accounts as laid on the table be passed.

REPORT.

The Trustees beg to lay before the Subscribers their Annual Report and Statement of Accounts.

It will be noticed that the Receipts from Pew Rents in 1874 have fallen to Tls. 4,408.88 against Tls. 4,748.94 in 1873,—a decrease of Tls. 340.06. On the other hand, the amount paid for Repairs in 1874 is less than that paid in 1873 by Tls. 711.54. A bell, which had for some years been lent to the Municipal Council as a Fire Alarm in Hongkew, has now been sold to that body for Tls. 150.00.

Parsonage Loan.—The thanks of the Subscribers are due to Messrs. Birley, Worthington & Co. for their liberality in writing off the amount at their credit under this heading. It is hoped that this example may be followed by the other creditors.

Assistant-Chaplain. — The Trustees were authorised at a Special Meeting held on 9th February last, to increase the Stipend offered to Tls. 2,700.00 per annum, and they have empowered a Committee in England—Messrs. F. D. Barnes, F. B. Johnson, and A. Michie, to receive applications and fill the appointment. The thanks of the Subscribers are due to these gentlemen, and especially to Mr. Johnson, for the trouble which they have taken in the matter. Mr. Johnson's last letter announced that a suitable candidate had presented himself.

Eight Seats containing 40 Sittings have been set aside as Free Seats. Twelve Seats containing 60 Sittings will henceforward be let at the reduced rate of Tls. 12 per annum per Sitting in accordance with a Resolution passed at the General Meeting of 21st Jan., 1870.

An Alms-box has been placed at the entrance to the Church.

The Trustees cannot close their Report without tendering their best thanks to the Members of the Voluntary Choir who have so kindly given their services during the year.

The Account of the Treasurer and Trustees of the British Episcopal Church Establishment *at Shanghai, for the year ending 31st December*, 1874.

1874 Jan. 1, to Dec. 31	Tls.
To Pew rents received	4,408.88
,, Rents of Main Guard	200.00
,, Proceeds of one bell sold to Municipal Council	150.00
,, Birley, Worthington and Co. Amount written off from Parsonage Loan	167.98
,, Balance carried down	3,234.12
	8,160.98

1874 Jan. 1, to Dec. 31	Tls.
By Balance of last account	3,297.61
,, Chaplain's Stipend	3,200.00
,, Incidental expenses and repairs	1,530.77
,, One year's interest on the Parsonage Loan at 5 per cent. per annum	132.60
	8,160.98

Statement of the Parsonage House Loan,

Dr. 31st December, 1874.

1873 Dec. 31.	Tls.
To Amount of last account ..... Tls. 2,820.09	
Less Amount written off by Birley, Worthington and Co. ..... ,, 167.98	
	2,652.11
To Interest charged to the Trustees' General Account, one year on Tls. 2,652.11 at 5 per cent per annum	132.60
	2,784.71

Cr.

1874 Dec. 31.	
By Amounts due to the following;—	
G. Barnet and Co.	352.77
Jardine, Matheson and Co.	552.77
Shaw, Brothers and Co.	352.77
Gibb, Livingston and Co.	176.38
Bull, Purdon and Co.	176.38
Gilman and Co.	176.38
Augustine Heard and Co.	176.38
The Estate of Dent and Co.	408.35

1874—Collection in Trinity Church on Christmas Day ..... Tls. 512.65

Treasurer's Balance Sheet, 31st December, 1874.

Dr.	Tls.
Balance of Trustees' Account	3,234.12
Cash in Treasurer's hands	63.24
Total....	3,297.36

Cr.	Tls.
Parsonage Loan of 1859	2,784.71
Assistant Chaplain's Fund	512.65
Total....	3,297.36

The Chairman asked how the falling off in pew-rents was to be explained; was it through people leaving?

Mr. Turnbull said the same number of pews were not taken; probably people leaving had something to do with it.

Mr. Tate seconded the resolution, which was carried.

Mr. Dent thought one word of comment might be made on the accounts. The balance carried forward, of Tls. 3,297 showed rather a better position than last year. At the same time if they deducted the subscription to the Assistant Chaplain's fund, they would really prove nearly Tls. 400 to the bad on their actual financial position. He drew attention to this because, if the public were made aware of the discrepancy, and read the first portion of the report showing that the receipts had fallen from Tls. 4,748 to Tls. 4,408, they would probably be willing to come forward and supply the deficiency. It was merely a falling off in pew-rents which had caused the reduced income. The collection balanced the deficit; but the collection was for the Assistant Chaplain's salary.

The Chairman asked if the reduction which had been agreed on in the rate of certain pew-rents, had affected the revenue?

Mr. Turnbull thought not to any great extent.

The next question was the election of officers for the ensuing year. Mr. Turnbull said he himself and, he believed, Mr. Dent, declined further service; but Messrs. Krauss and Bell were willing to accept office, and Mr. FitzGerald would continue to act as Treasurer.

On the proposal of the Chairman, seconded by Mr. Turnbull, these gentlemen were elected.

Mr. Turnbull called attention to what was said in the report about an Assistant Chaplain. Mr. Johnson had interested himself very much in the matter, an in a late letter said he hoped he should soon complete an arrangement with a gentleman who was in every respect well qualified. Probably the incoming mail might bring further information on the subject. He did not know that any further comment was necessary; the salary which should be offered had already been decided on at a meeting of the 9th February. They were aware what arrangement had been with the Trustees of the Seamen's Church, and the means on which they counted for the balance of the emolument.

The Chairman here suggested that the Minutes of the special meeting on the subject should be read; and in connection with it a letter was read from the Seamen's Church Trustees, repudiating any personal responsibility for the amount they had undertaken to provide, and a reply recognising their position.

The Chairman proposed, and Mr. Dent seconded, a vote of thanks to the gentlemen who had been interesting themselves, in England, in procuring an Assistant Chaplain.

Mr. Turnbull called attention to certain property belonging to the subscribers, in the shape of benches, bells, and clocks, which it was not likely could be ever made use of. As regarded bells, the one used in Hongkew as a fire-bell had been sold to the Municipal Council. This did not involve spoiling the set because one, which was lying in Mr. Krauss' compound, was cracked. There still remained two bells which were in some way connected with the clock. A portion of this clock Mr Krauss had also kindly allowed to stop on his premises, but the most delicate portion was in charge of Mr. Gombert. It was a question for consideration whether the clock would be any use to them, or whether they had not better dispose of it. Then the benches were some which they had over; there had been rather too many made, and they might also be sold.

It was remarked that the clock was formerly in the tower of the old church. Was not a tower contemplated in the present one? As this project, however, had not yet got the length of plans, it was eventually proposed by Mr. Tate, seconded by Mr. Dent, and resolved—

That the Trustees be empowered to use their judgment with regard to the disposal of certain articles of furniture now of no use to the church.

Mr. Turnbull said there was one other matter. The lease of the Main Guard expired at the end of last year; and it was now occupied on terms of six months' notice. Would the meeting wish to go on, on this footing, or have a new lease?

It was explained that the terms of the lease gave the Trustees the right of opening the building on a wet Sunday, for the purpose of sheltering chairs, and it was occasionally so used. After some conversation, it was resolved to let the lease go on on the present footing.

Reference was also made to the fact of carriages occasionally driving up to the church door; the road was not intended for a drive. It was suggested that the Municipal Council, which has charge of the compound, might perhaps make a drive; but no definite action was taken.

Mr. Tate then rose to call the attention of the meeting to a matter of great importance, which had apparently escaped the notice of the last meeting, but which he believed in truth had not been brought forward because people were uncertain of the proper course to be taken in the matter. They were aware that a Bishop of North China had been appointed, and, as everyone who identified himself with the rising fortunes of the community with which he was associated, he felt anxious that steps should be taken as soon as possible to induce His Lordship to select Trinity Church as his Cathedral. There was no doubt that the building was suited for the purpose; and he thought that, as the oldest, largest, wealthiest, most numerous and in every way most important Community in the North of China, Shanghai had a just claim to be honoured by the erection of its church into a Cathedral now opportunity offered. They were he believed all agreed in the matter, and he would not detain them longer save to say that he echoed the wishes and feelings of a number of people not present. He would simply move

That the Trustees be requested to advise with the Right Reverend the Bishop of North China as to the erection of Trinity Church into a Cathedral, and be authorised to take what steps are necessary to that end.

Sir Edmund Hornby had great pleasure in seconding the proposal.

Some discussion followed as to the position of a bishop with reference to his cathedral. Sir Edmund Hornby explained that he had no other right in it but to his throne. The erection of Trinity Church into a cathedral would not imply any dependence on the bishop, nor in any way affect the position of the incumbent. The Church would remain precisely as it was now. The Bishop would simply be invited to adopt it as his diocesan church, and it would gain a nominal dignity. If we were to have cathedrals in China, he did not see why Hongkong should have a monopoly. The proposed step would be a compliment to the Bishop, a recognition of his episcopal rank, and of the high character which had led to his selection for the office. As far as law went, he would gain no power over the church, either ecclesiastical or temporal. The Trustees would simply invite him to nominate the church of Shanghai as his cathedral church; it was in his power to select which church he pleased for this dignity.

The Rev. Canon Butcher cordially endorsed the proposal. He had the highest esteem for Bishop Russell, and should be glad to be brought into more intimate relations with him. The erection of the church into a cathedral would promote the dignity of Shanghai, with which his interests were inseparably bound up.

Sir Edmund Hornby repeated that the proposed step would be a compliment to the Bishop, and considered it fitting that

the first community in China should place at his disposal their church, of which they would still retain the Government. Another result would be to dissolve their connection with Hongkong. At present their worthy chaplain was a Canon of Hongkong, which was a mistake now the diocese was divided. If he were a canon at all, he should be a canon of the diocese in which he was stationed.

The resolution was then put to the meeting and carried unanimously.

The Rev. CANON BUTCHER then proposed a vote of thanks to the retiring officers, to whom they were much indebted for their services during the year; and with a vote of thanks to the Chairman, the meeting broke up.

SHANGHAI AND HONGKEW WHARF COMPANY.
